

Ajrakh - Gujarat

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic visual logic of Ajrakh from Kutch, Gujarat, as a resist block-print textile tradition built through repeated washing, mordanting, resist application, carved wooden block printing, indigo and red dye development, and layered cloth finishing.

Do not treat this as generic geometric ethnic print, painted fabric, wallpaper pattern, embroidery, or fashion graphic design.

Build the entire image as if it is generated from a real Ajrakh textile system:
deep indigo blue, red or maroon, black, and off-white as the main process-bound palette;
clear hand-block repetition;
strong geometric symmetry;
structured border zones and center-field organization;
cloth absorbency and dyed depth;
matte textile surface rather than glossy print finish;
repeat units that feel carved-block-made, aligned, and process-built.

If figures, objects, animals, architecture, landscape, or environment are present, rebuild all of them through Ajrakh textile intelligence so the whole frame feels born from resist block-print cloth logic, not like a normal scene with Ajrakh cloth inserted later.

Every important element must belong to one Ajrakh system:
pattern structure, edge treatment, surface divisions, color behavior, and field organization must all feel textile-built.

Avoid:

generic geometric print,
digital vector sharpness,
painted ornament,
embroidery drift,
fashion-surface styling,
wallpaper repetition,
one Ajrakh patch inside an otherwise unrelated visual world.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] in the authentic visual logic of Ajrakh from Kutch, Gujarat.

Treat the style as a process-built resist block-print textile system, not as generic ethnic patterning.

Core style lock:
multi-stage cloth-building memory,
carved wooden block repetition,
deep indigo + red or maroon + black + off-white palette,
geometric symmetry,
border-and-center field structure,
matte dyed cloth behavior,
textile absorbency,
whole-frame Ajrakh consistency.

Translate the image like this:

[MAIN SUBJECT / MAIN FIELD] becomes an Ajrakh-built textile presence with block-repeat order and dyed-cloth logic.

[SECONDARY FIGURES / OBJECTS / FORMS] also obey the same resist-print textile grammar.

[EDGES / BORDERS / DIVISIONS] become structured Ajrakh textile zones.

[ENVIRONMENT] becomes organized through Ajrakh field logic, repeat order, and cloth-born symmetry.

Keep:

process-memory,
block-built structure,
geometric balance,
border intelligence,
dyed textile depth,
Kutch craft identity.

Avoid:

generic geometric fashion print,
painted fabric look,
embroidery-first styling,
wallpaper field,
normal realism with Ajrakh added afterward.

Image-to-Image

Convert this source image into the authentic visual world of Ajrakh from Kutch, Gujarat.

Preserve the source image's main subject relationships, action, and readability, but rebuild the entire image through Ajrakh resist block-print textile grammar.

Replace ordinary surfaces with dyed-cloth behavior.

Replace random decoration with carved-block repeat order.

Replace generic color with deep indigo, red or maroon, black, and off-white process-bound contrast.

Replace ordinary spatial divisions with structured border zones, central field logic, geometric symmetry, and repeat discipline.

If the source contains people, props, objects, animals, background forms, or environment, convert all of them so they feel generated by Ajrakh textile intelligence instead of remaining normal realism.

Do not simply paste Ajrakh motifs onto the source.

Do not leave the environment generic.

Do not make it look digitally printed or painted by hand like a mural.

The final image must feel like a real Ajrakh cloth system expanded across the whole frame.

V2 — Artisan Translation

Universal Hard Prompt

Create a creative 2D + 3D image translation rooted in Ajrakh from Kutch, Gujarat.

This is not generic geometric art and not a full realistic world yet.

It must remain source-rooted in Ajrakh textile grammar:

resist block-print logic,

multi-stage dye-memory,

carved-block repetition,

geometric symmetry,

border-and-center field organization,

deep indigo, red or maroon, black, and off-white palette,

matte dyed-cloth tactility.

Let the image gain dimensional body, layered field depth, stronger separation between border zones and central zones, richer textile tactility, and more articulated pattern-space relations.

But keep the image cloth-field-first.

It should still feel like Ajrakh textile intelligence is constructing the image, not generic scene realism.

Allow motifs, surfaces, figures, props, architecture, and environment to become more spatially alive, but they must still obey block-built repeat logic and textile-field ordering. The depth should feel like dimensionalized textile-image space, not like a fully realistic environment.

Avoid:

luxury décor geometry,

fashion print branding,

vector-clean pattern art,
wallpaper repetition,
generic realism with Ajrakh motifs added later,
random oversized motifs that stop feeling block-built.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] as a creative 2D + 3D translation rooted in Ajrakh from Kutch, Gujarat.

Preserve these source-core rules:
Ajrakh remains process-built and textile-first,
block repetition remains structural,
geometric symmetry remains active,
border and center-field logic remain clear,
dyed-cloth palette memory remains governing,
matte textile tactility remains visible,
the whole frame remains inside one Ajrakh system.

Translate the image like this:
[MAIN SUBJECT / MAIN FIELD] becomes a dimensionalized Ajrakh textile-image zone.
[SECONDARY FORMS] also obey the same block-built textile structure.
[BORDERS / DIVISIONS / SURFACE ZONES] gain richer layering but remain textile-organized.
[ENVIRONMENT] becomes a textile-ordered image field rather than generic realism.

Let these become richer:
field layering,
pattern-zone depth,
textile tactility,
surface structure,
relation between border and central field.

Keep unchanged:
resist-print identity,
block logic,
symmetry,
Ajrakh palette memory,
textile-first image order.

Avoid:
generic geometric décor,
fashion-print look,
painted-mural drift,
wallpaper field,
full realism,

one Ajrakh section inside an unrelated image.

Image-to-Image

Convert this source image into a creative 2D + 3D Ajrakh translation from Kutch, Gujarat.

Preserve the source image's main action, subject count, and readability, but reconstruct the full image through Ajrakh textile-field grammar.

Replace ordinary surfaces with process-built dyed cloth behavior.

Replace casual patterning with carved-block repeat structure.

Replace flat decorative geometry with Ajrakh field order: strong symmetry, border intelligence, center-zone organization, and indigo-red-black-off-white textile contrast.

Allow the image to gain layered textile-image depth, stronger separation of zones, richer pattern-body, and more tactile dyed-cloth presence.

But do not let it become full realism.

It must still behave like a dimensionalized Ajrakh textile field.

Do not paste motifs onto a normal image.

Do not turn it into fashion-print styling.

Do not let decorative geometry overpower process-memory.

The result must feel like Ajrakh cloth logic has gained image-body, not that a scene has been decorated afterward.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a believable full 3D realistic dimensional world generated from Ajrakh of Kutch, Gujarat.

The realism must remain fully governed by Ajrakh textile grammar, not by generic realism.

Build the whole world through:

multi-stage resist-and-dye memory,

carved wooden block repetition,

geometric symmetry,

border-and-center field intelligence,

deep indigo, red or maroon, black, and off-white textile palette,

matte dyed-cloth materiality,

textile absorbency,

process-built surface depth.

The world must feel as if Ajrakh textile intelligence has become a complete dimensional reality.

Figures, clothing, objects, architecture, surfaces, environment, and spatial divisions must all belong to one Ajrakh system.

Pattern must still feel block-built, not pasted.

Color must still feel dyed into material, not digitally printed on top.

Borders and field zones must still structure the world.

Make the space fully volumetric and believable, but do not let realism erase the textile origin.

This is not normal realism with Ajrakh motifs.

This is Ajrakh grammar becoming world structure.

Avoid:

generic realistic environment with ethnic cloth inserted,

fashion-editorial print realism,

wallpaper geometry in 3D space,

glossy decorative fabric rendering,

overscaled motifs that lose block plausibility,

normal scene logic dominating over textile logic.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] as a full 3D realistic dimensional world generated from Ajrakh of Kutch, Gujarat.

Style system that must remain unchanged:

Ajrakh remains process-built,

block repetition remains structural,

geometric symmetry remains active,

border-and-field organization remains primary,

indigo-red-black-off-white textile memory remains governing,

matte dyed-cloth materiality remains visible,

whole-frame Ajrakh consistency remains intact.

Translate the world like this:

[MAIN SUBJECT / MAIN FIELD] becomes a fully dimensional Ajrakh-governed presence.

[SECONDARY FORMS / FIGURES / OBJECTS] become volumetric but remain process-built and textile-ordered.

[BORDERS / ZONES / DIVISIONS] continue to structure the world like textile architecture.

[ENVIRONMENT] becomes a believable spatial field organized by Ajrakh repeat logic and dyed-cloth intelligence.

Increase:

full spatial depth,

material presence,

textile tactility,

field continuity,
world completion.

Do not lose:
process-memory,
block-built order,
textile identity,
symmetry,
border intelligence,
Ajrakh world-logic.

Avoid:
generic realistic décor,
fashion-print realism,
wallpaper-like geometry,
digital-surface finish,
Ajrakh as accessory instead of world structure.

Image-to-Image

Convert this source image into a full 3D realistic Ajrakh world from Kutch, Gujarat.

Preserve the source image's main composition, subject relationships, and readability, but rebuild the whole image through Ajrakh textile-world grammar.

Replace normal realism with a world governed by resist-dye process memory, carved-block repetition, strong geometric symmetry, border-and-center field organization, and matte dyed-cloth depth.

If the source contains figures, props, objects, surfaces, architecture, or environment, convert all of them so they behave as if generated from Ajrakh textile intelligence.

Keep pattern block-built and structurally plausible.

Keep color process-bound: deep indigo, red or maroon, black, and off-white.

Keep the whole frame organized by textile-field order rather than generic realistic arrangement.

Do not simply apply Ajrakh texture over the image.

Do not leave environment or secondary forms generic.

Do not turn it into luxury printed-fabric realism.

The final result must feel like Ajrakh itself generated the world.
