

Bhotia woven systems - Uttarakhand

V1 — Authentic Style

Universal Hard Prompt

Create an image in pure authentic source-truth Bhotia woven systems from Uttarakhand.

Treat this as a true high-Himalayan Bhotia/Shauka wool-weaving tradition, not as generic Himalayan décor, not as boho rug styling, not as printed tribal blanket design, not as fashion wool textile, and not as boutique mountain-lodge furnishing.

Build the image from the true grammar of Bhotia woven systems:

dense sheep-and-goat wool identity,
loom-built structure,
knot-built or densely woven surface authority,
thick insulating mountain form,
rugged utilitarian seriousness,
geometric-symbolic Himalayan field order,
dark-base bold-color palette,
and whole-system Bhotia/Shauka mountain coherence.

The image must feel like it genuinely belongs inside the original Bhotia wool tradition of Uttarakhand.

Keep the whole frame inside one mountain-wool-authored visual language.

The textile itself must be source-born:

wool first,
structure first,
density first,
use-value first,
not print,
not embroidery,
not décor styling,
not lightweight fashion fabric.

Material logic must remain source-faithful:

dense mountain wool,
weight-bearing textile body,
insulating and durable feel,
handmade but strong,
not soft boutique luxury wool,
not airy woven fashion cloth,
not polished lifestyle throw.

Construction logic must remain source-faithful:

- loom-born organization,
- warp-weft authority,
- dense surface build,
- knot-built or thickly resolved woven body where relevant,
- trimmed and hand-finished look,
- not printed surface illusion,
- not surface decoration placed on top.

Field logic must remain source-faithful:

- organized woven field,
- strong geometric structure,
- motifs embedded into the textile body,
- not scattered decorative symbols,
- not wallpaper repeat,
- not graphic-design layout.

Motif logic must remain source-faithful:

- geometric patterns,
- mountain floral elements,
- dragons where relevant,
- Buddhist/Himalayan symbolic elements such as lotus, wheel, swastika where relevant,
- all structurally woven into the field,
- never random cultural ornament,
- never cute illustration,
- never generic “tribal pattern.”

Color logic must remain source-faithful:

- dark mountain base tones such as black, brown, maroon, or deep blue,
- with strong accents such as turquoise, green, red, or yellow,
- serious and high-altitude,
- not pastel,
- not faded neutral décor,
- not modern Scandinavian wool palette,
- not boutique earth-tone styling.

Use-value logic must remain source-faithful:

- cold-climate textile,
- mountain durability,
- rugged handwoven authority,
- functional and ceremonial at the same time,
- not purely decorative furnishing.

Do not add:

- interior décor styling,
- lifestyle product photography,
- printed blanket behavior,
- fashion-shawl softness,

generic Tibetan rug language,
or any second textile language stronger than Bhotia wool grammar.

The final result must feel like true Bhotia woven systems from Uttarakhand at source-truth level, not a modern wool décor product merely inspired by them.

Reusable Variable Template

Create [SUBJECT / WOOL FIELD / MOUNTAIN TEXTILE WORLD / DENSE WOVEN SCENE] using the authentic source-truth grammar of Bhotia woven systems from Uttarakhand.

Core style system to preserve:
high-Himalayan Bhotia/Shauka wool identity,
loom-and-knot construction memory,
dense insulating structure,
rugged utility authority,
geometric-symbolic field order,
dark-base bold-color palette,
whole-system mountain coherence.

Translate the image like this:
[MAIN TEXTILE / MAIN FIELD / MAIN FORM] becomes a Bhotia-born dense wool presence built through loom structure, mountain weight, and embedded symbolic geometry.
[SECONDARY SURFACES / SUPPORTING ELEMENTS] become supporting Bhotia presences obeying the same wool-built field logic.
[BACKGROUND / WORLD / SURROUNDING AREAS] becomes a Bhotia-authored mountain textile environment rather than neutral realism or generic décor styling.

Keep:
wool-first identity,
dense structure,
loom-built authority,
rugged use-value,
embedded motif logic,
dark-base bold-color seriousness,
Bhotia/Shauka coherence.

Avoid:
boho rug styling,
printed tribal blanket language,
fashion wool behavior,
soft furnishing luxury,
generic Tibetan drift,
or a realistic world with Bhotia weaving added afterward.

The final image must feel like the Bhotia tradition itself authored the full mountain textile world.

Image-to-Image

Convert this source image into an authentic source-truth Bhotia woven world from Uttarakhand.

Preserve the source image's core subject count, structural readability, and main visual organization, but rebuild the entire image through true Bhotia woven grammar.

Replace ordinary image logic with:
dense mountain wool identity,
loom-built structure,
knot-built or thick woven surface logic,
rugged utility authority,
geometric-symbolic Himalayan field order,
dark-base bold-color palette,
and full Bhotia/Shauka coherence.

Do not simply add geometric motifs.
Do not merely make the surface look woolly.
Do not turn the source into generic Himalayan décor.

If the source contains figures, objects, architecture, landscape, or background, rebuild them through Bhotia textile logic:
dense wool body,
mountain structural seriousness,
embedded symbolic geometry,
rugged Himalayan use-value,
and Bhotia-authored coherence.

Do not leave the environment as neutral realism.
Do not make it behave like interior décor, lifestyle furnishing, or boutique mountain textile styling.

The final image must feel like a genuine Bhotia woven world from Uttarakhand, not a modern image decorated with wool texture and mountain motifs.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Bhotia woven systems from Uttarakhand.

This is not a literal rug mockup.

This is not a textile swatch study.

This is not interior décor rendering.

This is not lifestyle furnishing realism.

This is not just a richer wool texture on the same object.

Preserve the same deep Bhotia grammar unchanged:

high-Himalayan Bhotia/Shauka wool identity,

loom-and-knot construction memory,

dense insulating structure,

rugged utility authority,

geometric-symbolic mountain field order,

dark-base bold-color palette,

and whole-system Uttarakhand coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid image-form.

The added dimensionality must come from Bhotia's own logic:

wool mass,

woven density,

knot-to-field structure,

mountain textile weight,

embedded motif hierarchy,

field-and-border order where relevant,

cold-climate functionality,

and full-frame Himalayan textile intelligence.

Do not only improve texture.

Do not only make the surface more plush.

Do not only increase realism.

Transform the full image logic:

form,

construction,

grouping,

silhouette,

objects,

environment,

spatial organization,

and full-frame visual language.

If figures appear, they must not remain generic humans next to or using a wool object.

They must become Bhotia-born presences:

face logic influenced by mountain symbolic simplification,

body logic shaped by dense textile structure and rugged utility,

silhouettes built through woven mass and field logic rather than fashion softness,

objects and props translated into the same Bhotia wool system.

If environment appears, it must not remain neutral realism.

It must already begin to feel re-authored by Bhotia weaving:

dense wool-world logic,

mountain field rhythm,

geometric-symbolic structural ordering,

rugged high-altitude textile intelligence,

not just normal scenery with a wool item somewhere inside it.

Believable depth must come from Bhotia itself,

not from default realism,

not from interior-styling habits,

not from generic 3D textile shading.

Keep:

source-rooted Bhotia identity,

wool-built structure,

knot/loom authority,

embedded motif logic,

creative artisan translation,

mountain utility force,

full-frame style control.

Do not allow:

rug mockup logic,

soft décor styling,

fashion-wool behavior,

generic Tibetan-carpet drift,

printed tribal blanket logic,

or a normal image underneath with Bhotia weaving decoration added later.

The final result must feel like Bhotia weaving itself has creatively re-authored the image into a richer, more dimensional, more inventive mountain textile world while still remaining fully Bhotia-born.

Reusable Variable Template

Create [SUBJECT / SCENE / WOOL FIELD / MOUNTAIN TEXTILE WORLD] in V2 = authentic handcrafted dimensional translation of Bhotia woven systems from Uttarakhand.

Preserve these unchanged deep style-core rules:

high-Himalayan Bhotia/Shauka wool identity,
loom-and-knot construction memory,
dense insulating structure,
rugged utility authority,
geometric-symbolic field order,
dark-base bold-color palette,
whole-system Uttarakhand coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a Bhotia-born dimensional presence built through dense wool structure, woven field order, and mountain utility force.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become supporting Bhotia presences governed by the same mountain-wool system.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a creatively re-authored Bhotia space where grouping, depth, and spatial rhythm come from dense woven order rather than neutral realism.

Increase:

dimensional presence,
wool-to-field relation,
density clarity,
motif-to-structure integration,
mountain utility authority,
dark-base bold-color force,
inventive Bhotia world-building.

Do not lose:

wool-first identity,
loom-and-knot memory,
rugged structural seriousness,
embedded symbolic geometry,
high-altitude palette logic,
whole-system Bhotia control.

Avoid:

rug mockup,
interior décor realism,
soft furnishing luxury,
fashion-wool softness,
generic Himalayan styling,
or a realistic world with Bhotia added afterward.

The final image must feel like the same Bhotia grammar has been creatively translated into a richer, more dimensional, more scene-capable visual form.

Image-to-Image

Convert this source image into a V2 authentic handcrafted dimensional Bhotia woven world from Uttarakhand.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Bhotia grammar translated into a richer, more dimensional, more inventive hybrid image-form.

Replace ordinary image logic with:
dense mountain wool identity,
loom-and-knot construction memory,
rugged insulating structure,
geometric-symbolic Himalayan field order,
dark-base bold-color palette,
and full-frame Bhotia coherence.

Do not simply add thicker wool texture.
Do not just make the object look handcrafted.
Do not make it a décor-style textile render.

Rebuild the image so that:
forms are organized through Bhotia's own mountain wool logic,
depth comes from weave density, knot structure, and field hierarchy,
objects and environments begin to behave like a Bhotia-authored world,
and the whole frame feels generated by Bhotia weaving itself rather than realism with a Himalayan textile added on top.

If figures appear, rebuild them as Bhotia-born presences rather than generic bodies near a wool object.
If environments appear, rebuild them through Bhotia visual ontology rather than neutral realism.

The final image must feel like a true creative artisan translation of Bhotia woven systems into a richer dimensional mountain textile world, not a normal image with wool texture and geometric mountain motifs.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Bhotia woven systems from Uttarakhand while keeping the same source grammar unchanged.

This is not realism replacing style.
This is not interior décor realism.
This is not luxury rug photography.
This is not mountain-lodge styling.
This is not a normal world with Bhotia textiles added afterward.

Preserve the same deep Bhotia grammar unchanged:
high-Himalayan Bhotia/Shauka wool identity,
loom-and-knot construction memory,
dense insulating structure,
rugged utility authority,
geometric-symbolic mountain field order,
dark-base bold-color palette,
and whole-system Uttarakhand coherence.

Now push that same grammar into its most complete, most fully embodied, most fully resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by Bhotia logic.

That means the transformation must affect everything:

faces,
bodies,
hands,
feet,
hair,
posture,
gesture,
props,
objects,
ground,
architecture,
plants,
sky treatment,
empty space,
environment rhythm,
foreground,
midground,
background,
and the full-frame visual language.

Nothing important may remain generic realism.

Bhotia woven systems must control reality through their own logic:
dense mountain wool mass,
loom-and-knot construction,
field-and-border structural order,

embedded geometric-symbolic Himalayan motifs,
dark-base bold-color mountain palette,
rugged cold-climate utility,
and full-world Bhotia/Shauka textile ontology.

Believable here must mean:

believable volume,
believable spatial relation,
believable material embodiment,
believable environmental completion,
believable inhabitable world logic.

It must not mean:

interior styling,
lifestyle furnishing realism,
product-shot rug realism,
normal architecture with wool textiles,
boho décor styling,
or realism-first image making.

If figures appear, they must be fully Bhotia-born:

face construction shaped by mountain symbolic simplification,
body logic shaped by dense textile hierarchy and rugged utility,
silhouette logic shaped by woven mass and high-altitude structure rather than soft décor comfort,
gesture and posture integrated into the same Bhotia world system.

If environment appears, it must also be fully Bhotia-born:

ground, structures, objects, space, and atmosphere must all belong to one uninterrupted Bhotia world,
not a normal realistic environment underneath.

If you remove decorative cues, the image should still feel Bhotia through:

form construction,
body logic,
object logic,
environment logic,
spatial organization,
dense wool-structure grammar,
and full-world visual ontology.

Keep:

same deep Bhotia grammar,
full world embodiment,
full environmental completion,
stronger figure-ground hierarchy,
stronger spatial separation,
stronger object presence,

stronger total-frame style control.

Do not allow:

interior décor language,
product photography aesthetics,
luxury furnishing polish,
generic Tibetan/tribal carpet styling,
soft lifestyle wool behavior,
or any second textile language stronger than Bhotia weaving.

The final result must feel like Bhotia weaving itself has taken over the whole visible world and fully generated reality through Uttarakhand mountain wool logic, not like realism with Bhotia decoration.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable real-world 3D translation of Bhotia woven systems from Uttarakhand.

Keep these unchanged deep style-core rules:

high-Himalayan Bhotia/Shauka wool identity,
loom-and-knot construction memory,
dense insulating structure,
rugged utility authority,
geometric-symbolic mountain field order,
dark-base bold-color palette,
whole-system Uttarakhand coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a fully embodied Bhotia-born presence generated through dense wool structure, mountain field logic, and full woven-world control.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become equally style-born Bhotia presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Bhotia world where spatial structure, environmental rhythm, and full-scene organization are all controlled by the same Uttarakhand mountain-weaving grammar.

Increase:

full world embodiment,
full environmental translation,
stronger spatial relation,
stronger figure-ground separation,
stronger material presence,
stronger world coherence,
stronger full-frame Bhotia control.

Do not lose:

wool-first mountain identity,
loom-and-knot structure,
dense insulating authority,
embedded motif order,
dark-base bold-color seriousness,
rugged utility force,
whole-world Bhotia ontology.

Avoid:

interior décor realism,
luxury rug styling,
mountain-lodge design language,
soft furnishing comfort-first behavior,
generic Himalayan décor,
or a normal world with Bhotia added afterward.

The final image must feel like the same deep Bhotia grammar has fully generated an entire believable world.

Image-to-Image

Convert this source image into a V3 fully resolved believable real-world Bhotia woven world from Uttarakhand.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Bhotia grammar.

Replace ordinary realism with:

dense mountain wool identity,
loom-and-knot construction memory,
rugged insulating structure,
geometric-symbolic Himalayan field order,
dark-base bold-color palette,
and full-world Bhotia coherence.

Do not simply place a Bhotia textile into the scene.

Do not just convert the surface into a richer wool fabric.

Do not leave the environment generic.

Rebuild the full image so that:

faces, bodies, objects, props, and environment all belong to the same Bhotia mountain-textile ontology,
depth comes from Bhotia's own dense wool structure, field hierarchy, and embedded symbolic order,

space is organized through rugged woven logic and high-altitude utility, the world becomes fully inhabitable but remains completely Bhotia-born, not realism-first.

If any part of the frame remains normal realism underneath, the conversion has failed.

The final image must feel like Bhotia weaving itself has fully generated the entire visible world, not like a normal image decorated with Himalayan wool motifs.
