

Farrukhabad print - Uttar Pradesh

if translated beyond textile

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Farrukhabad Print from Uttar Pradesh**, treating it as a **Farrukhabad-rooted hand block-printing system** built through **carved block repetition, printed-color surface logic, classical buti / Tree of Life / mango-paisley motif families, foliage-flower-bird-animal pattern intelligence, repeat-built cloth fields, and workshop-based textile printing refinement**.

Build the image as if it genuinely belongs inside the native Farrukhabad hand block-printing tradition itself. The image must be governed first by **block-impression rhythm, repeat-field organization, printed-cloth surface behavior, classical motif-family discipline, and Farrukhabad print refinement**, not by generic floral fashion print, digital repeat graphics, painted cloth effects, embroidery texture, or brocade-like richness.

The support must feel like real printed cloth, not paper, not wall, not woven brocade, and not embroidered textile. The design must feel created by repeated carved-block impressions, one impression at a time, until a continuous pattern field is built. The surface must feel print-applied and cloth-borne: clear, shape-led, repeat-capable, and flat in the correct printed-textile way, not raised, not brush-painted, and not glossy machine-fabric perfect.

The motif world must remain **classical Farrukhabad**: butis, Tree of Life, mango/paisley, foliage systems, flowers, birds, animals, and connected ornamental growth. Motifs must feel like they belong to a disciplined block-print family, not like random trendy floral icons. The field must feel suitable for garments, scarves, stoles, yardage, curtains, cushions, bed covers, quilt covers, and other real textile uses rather than behaving like a framed picture.

The print must preserve **controlled handmade registration**: practiced, workshop-disciplined, human, and repeat-aware. It must not feel digitally tiled, screen-printed, or mechanically sterile. The final result must feel like **the real Farrukhabad Print system itself made the whole image**.

Reusable Variable Template

Create **[SUBJECT / PRINTED CLOTH FIELD / TEXTILE SURFACE / FARRUKHABAD BLOCK-PRINT WORLD]** in the **pure authentic source-truth visual logic of Farrukhabad Print from Uttar Pradesh.**

Style system that must remain unchanged:

- cloth-field identity
- carved-block repetition
- printed-color surface logic
- classical motif-family intelligence
- repeat-field organization
- workshop-discipline and hand-registration memory
- Farrukhabad print specificity
- whole-frame Farrukhabad consistency

Translate the image like this:

- **[MAIN CLOTH FIELD / MAIN TEXTILE AREA / MAIN PRINTED SURFACE]** becomes a Farrukhabad-built printed textile presence governed by block-repeat order
- **[BUTIS / TREE OF LIFE / MANGO-PAISLEY / FLORAL / FOLIAGE / BIRD / ANIMAL MOTIFS]** must feel block-print-born, not painted, woven, stitched, or digitally generated
- **[COLOR / DYE / PIGMENT / PRINTED SHAPE REGIONS]** must feel applied through block-print logic, not through brush shading or woven color
- **[REPEAT RHYTHM / REGISTRATION / SPACING / FIELD CONTINUITY]** must feel hand-disciplined, workshop-made, and structurally repeat-capable
- **[BORDERS / EDGE RUNS / ALL-OVER FIELDS / PRODUCT ZONES]** must feel textile-native and usable across garments or furnishings
- **[IF FIGURES / OBJECTS / ARCHITECTURE APPEAR]** faces, bodies, posture, object logic, and environment logic must all be reorganized through Farrukhabad block-print order, not realism

Keep:

- block-built repeat logic
- printed-cloth surface behavior
- motif-family specificity
- controlled handmade registration
- utility-textile spread
- Farrukhabad refinement
- repeat-safe design order
- whole-frame consistency

Avoid:

- generic floral print
- machine-made repeat fabric
- painted textile simulation

- embroidery texture
- brocade richness
- screen-print perfection
- random fashion patterning
- realism with Farrukhabad motifs added later

The final result must feel like a true Farrukhabad hand block-printing system, not a decorative printed fabric wearing traditional cues.

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Farrukhabad Print from Uttar Pradesh**.

Preserve the source image's **subject count, core action, main relationships, and readability**, but rebuild the full image through Farrukhabad Print grammar. Replace generic decoration with carved-block repetition. Replace one-off graphic layout with repeat-field organization. Replace painted or digital surface behavior with printed-color cloth logic. Replace generic floral styling with classical Farrukhabad motif-family structure. Replace machine perfection with controlled handmade registration.

If the image includes motifs, make them feel block-carved and repeat-capable. If the image includes textile zones, make them behave like real yardage, garment fabric, scarf field, furnishing cloth, or printed surface product logic. If the image includes figures, objects, or environment, they must also be reorganized through Farrukhabad block-print intelligence rather than remain generic underneath a printed overlay.

Do not simply add florals, paisleys, or a Tree of Life motif to the source image. Do not keep digital print logic underneath. Do not let the image behave like painted cloth or embroidery. The final result must feel as if the original image has been fully reauthored inside the true source-truth Farrukhabad Print system.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in the **authentic dimensional translation of Farrukhabad Print from Uttar Pradesh**, preserving the same deep source grammar as the authentic source-truth version, but translating it into a **richer, more dimensional, more image-complete printed world while staying fully print-born**.

Keep the core Farrukhabad Print grammar fully unchanged: cloth-field identity, carved-block repetition, printed-color surface logic, classical motif-family intelligence, repeat-field organization, workshop-discipline and hand-registration memory, and Farrukhabad specificity. Do not turn this into decorative print concept art, digital floral pattern glamour, painted textile styling, luxury home-fabric mockup, or generic ethnic print beautification.

Translate that same grammar into a more alive and dimensional visual language. The image must no longer behave only as literal fabric-surface documentation, but it must also not become full realism-world depth. It should become a **creative hybrid block-print image world** where Farrukhabad's own carved-block and repeat intelligence generate richer form, stronger motif hierarchy, and more dimensional presence.

The transformation must affect the whole frame. If figures appear, faces, bodies, silhouettes, posture, grouping, and relations must all be rebuilt through Farrukhabad print logic. If objects appear, they must be shaped through block-repeat order, motif-family hierarchy, and printed-field organization. If environment appears, it must grow from repeat-built surface intelligence and print-born textile logic rather than remain generic. The block-print system must become the larger organizing intelligence, not just a decorative overlay.

Dimensionality must come from Farrukhabad Print itself: from carved-block rhythm, controlled registration, repeat continuity, buti distribution, Tree of Life compositional intelligence, paisley recurrence, vegetal networks, and printed-field spread. Do not solve dimensionality through brush shading, digital graphic polish, embroidery illusion, or ordinary realism with printed motifs added later.

Do not create:

decorative print concept art, digital pattern styling, painted-fabric mockups, generic ethnic home-textile glamour, or a generic dimensional image decorated later by Farrukhabad Print.

The final result must feel like **the same Farrukhabad Print grammar has entered a richer, more dimensional printed world without losing block-print identity.**

Reusable Variable Template

Create [SUBJECT / IMAGE / BLOCK-PRINT WORLD / FARRUKHABAD PRINT SURFACE SYSTEM] in the **authentic dimensional translation of Farrukhabad Print from Uttar Pradesh.**

Keep unchanged:

- cloth-field identity
- carved-block repetition
- printed-color surface logic
- classical motif-family intelligence
- repeat-field organization
- workshop-discipline and registration memory

- Farrukhabad specificity
- whole-frame style consistency

Translate it into a richer dimensional printed world like this:

- **[MAIN CLOTH FIELD / MAIN PRINTED AREA / MAIN SURFACE MASS]** becomes a Farrukhabad-built printed presence with more dimensional life, but still governed by repeat-built block order
- **[SECONDARY FIELDS / BORDER ZONES / SCARF FIELDS / FURNISHING SURFACES]** also transform through the same Farrukhabad grammar rather than generic styling
- **[REPEAT RHYTHM / BLOCK IMPRESSION / REGISTRATION / MOTIF HIERARCHY / COLOR FIELD RELATION]** become more spatially alive and structurally expressive while remaining print-born
- **[BUTI / TREE OF LIFE / MANGO-PAISLEY / FLORAL / FOLIAGE / BIRD / ANIMAL MOTIF SYSTEMS]** must remain classical and block-print-native
- **[IF FIGURES APPEAR]** faces, bodies, posture, grouping, object logic, and environment logic must all be rebuilt through Farrukhabad print order
- **[IF ENVIRONMENT APPEARS]** it must grow from repeat-built printed intelligence and textile-surface logic rather than realism

Increase:

- dimensional presence
- motif hierarchy clarity
- repeat depth
- visual richness
- structural rhythm
- whole-frame transformation
- printed-world depth

Do not use:

- generic floral print logic
- digital pattern polish
- painted textile logic
- embroidery texture
- brocade richness
- machine-repeat perfection
- generic environment with Farrukhabad overlay
- only one printed patch carrying the style

Success condition:

the result feels like the same Farrukhabad Print grammar has been translated into a richer dimensional printed world.

Failure condition:

the result feels like a generic decorative image decorated later by Farrukhabad Print.

Image-to-Image

Convert this source image into the **authentic dimensional translation of Farrukhabad Print from Uttar Pradesh**.

Preserve the source image's core subject logic, action logic, grouping logic, and readability, but rebuild the full image through Farrukhabad Print's internal grammar translated into a richer, more dimensional print-born world.

Replace generic ornament with carved-block repeat logic. Replace one-off graphics with repeat-field continuity. Replace painterly color behavior with printed-color organization. Replace random florals with classical Farrukhabad motif families. If figures are present, transform faces, bodies, silhouettes, posture, grouping, object logic, and surrounding structure through Farrukhabad block-print logic, not realism. If objects or environment are present, they must also be rebuilt through repeat-built printed intelligence instead of remaining generic.

Let the image gain more dimensional life, stronger motif hierarchy, richer repeat rhythm, and better whole-frame coherence. But do not turn it into digital pattern art, painted textile styling, or generic décor with traditional motifs added afterward.

Do not style only one curtain, scarf, border, or printed patch. Do not leave the rest of the frame generic. The final result must feel like **the source image has been fully reauthored through an authentic dimensional translation of Farrukhabad Print**.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in the **world-depth translation of Farrukhabad Print from Uttar Pradesh**, preserving the same authentic source grammar but pushing it into its **most complete, most embodied, most scene-capable full world**.

Keep the same deep Farrukhabad Print visual intelligence fully unchanged: cloth-field identity, carved-block repetition, printed-color surface logic, classical motif-family intelligence, repeat-field organization, workshop-discipline and hand-registration memory, and Farrukhabad specificity. Do not turn this into generic realism, interior décor realism, fashion realism, or a normal world with one printed curtain, scarf, bedsheet, or textile patch added on top.

Now convert that same grammar into a believable full world. The result must have believable material behavior, believable spatial separation, believable object presence, believable

environmental completion, and believable three-dimensional world logic. But every visible part of the image must still be generated by Farrukhabad Print grammar.

If figures are present, they must be rebuilt through Farrukhabad-born block-print structure, not normal realism wearing printed fabric. If objects appear, they must be shaped through repeat-built motif order, printed-field hierarchy, and block-impression rhythm. If environment appears, it must be generated by carved-block repetition, motif-family structure, printed-surface organization, and Farrukhabad workshop refinement. The world must not become ordinary reality with one printed insert into it.

Depth must now become full world-depth, but it must remain style-controlled. The source grammar must still govern figure design, shape logic, composition logic, material identity, environment logic, and total scene organization.

Do not let realism replace the style. Do not let the style survive only in one scarf, one curtain, one cushion, one bedspread, one border, or one printed patch. Do not create a premium cinematic makeover stronger than the source grammar. The final image must feel like **Farrukhabad Print itself has become a believable full world.**

Reusable Variable Template

Create **[SUBJECT / SCENE / FIGURAL WORLD / EXPANDED FARRUKHABAD PRINT WORLD]** in the **world-depth translation of Farrukhabad Print from Uttar Pradesh.**

Keep unchanged:

- cloth-field identity
- carved-block repetition
- printed-color surface logic
- classical motif-family intelligence
- repeat-field organization
- workshop-discipline and registration memory
- Farrukhabad specificity
- whole-frame style consistency

Translate it into full world-depth like this:

- **[MAIN FORM / MAIN FIGURE / MAIN PRINTED FIELD / MAIN SURFACE MASS]** becomes a fully embodied Farrukhabad-built presence with believable block-print-world logic
- **[SECONDARY FORMS / SUPPORT FIELDS / BORDER ZONES / OBJECT SURFACES]** also remain under the same Farrukhabad-born logic
- **[BLOCK RHYTHM / REGISTRATION / PRINTED-COLOR FIELDS / MOTIF HIERARCHY / REPEAT STRUCTURE]** become world-organizing elements still governed by print structure

- **[SURROUNDING WORLD / ENVIRONMENT / SPATIAL FIELD]** becomes a believable scene-world generated by Farrukhabad Print intelligence rather than generic realism
- **[IF FIGURES ARE PRESENT]** faces, bodies, posture, grouping, object logic, and environment logic must all remain Farrukhabad-born, not realism-first

Increase:

- full world embodiment
- spatial separation
- object presence
- environmental orchestration
- repeat-to-world transformation
- motif-structure readability
- whole-frame coherence

Do not lose:

- block-repeat identity
- printed-cloth logic
- motif-family specificity
- registration discipline
- repeat-field structure
- Farrukhabad refinement
- textile-born organization
- whole-frame Farrukhabad identity

Do not use:

- realistic world with one printed cloth
- generic cinematic interior scene
- style-as-textile patch only
- style-as-floral motif only
- style-as-decorative repeat only
- style-as-surface ornament only
- premium finish overpowering print structure
- reality with Farrukhabad flavor added later

Success condition:

the result feels like Farrukhabad Print itself has become a believable full world.

Failure condition:

the result feels like reality has been coated with Farrukhabad Print.

Image-to-Image

Convert this source image into the **world-depth translation of Farrukhabad Print from Uttar Pradesh**.

Preserve the source image's main subject logic, action logic, relationship logic, and readability, but rebuild the entire image through Farrukhabad Print's source grammar translated into **full world-depth**.

Replace generic forms with Farrukhabad-built printed-world presences. Replace ordinary surfaces with carved-block repeat construction. Replace generic decorative order with classical motif-family hierarchy, repeat-field organization, printed-color structure, and registration rhythm. Replace realism-first staging with Farrukhabad-born block-print-world order. If figures are present, transform faces, bodies, posture, grouping, silhouette, object logic, and environment logic through Farrukhabad Print grammar, not realism.

Allow the result to gain complete material embodiment, stronger spatial separation, object presence, scene completion, and environmental orchestration. But do not let the image become generic reality with Farrukhabad Print added later. The whole world must remain Farrukhabad-born.

Do not stylize only one scarf, one curtain, one bedspread, one cushion, one border, or one printed patch while leaving the rest of the world generic. Do not make it a realism scene with a print insert. Do not let the source grammar weaken as depth increases. The final result must feel like **the source image has been fully reauthored as a believable full world generated by Farrukhabad Print itself**.
