

Kaavad - Rajasthan

V1 — Authentic Style

Universal Hard Prompt

Create an image in pure authentic source-truth Kaavad from Rajasthan.

Treat this as a true portable wooden storytelling-shrine system, not as flat panel painting, not as miniature-on-wood, not as a generic painted shrine box, and not as decorative wooden folk art.

Build the image from the true grammar of Kaavad:

wooden cabinet-object identity,
hinged unfolding structure,
painted narrative compartments,
front-facing shrine logic,
outer-to-inner revelation hierarchy,
oral-storytelling usability,
sacred central climax,
and whole-object Kaavad coherence.

The image must feel like it genuinely belongs inside the original Kaavad tradition.

Keep the whole frame inside one object-authored visual language.

The form itself must be source-born:

cabinet first, picture second,
hinges structurally meaningful,
doors revealing inner panels,
nested narrative zones,
painted compartments supporting spoken storytelling,
portable shrine presence rather than static decorative furniture.

Panel logic must remain source-faithful:

outer panels,
middle reveals,
inner panels,
central sacred chamber,
framed narrative scenes,
clear compartment separation,
story order through opening,
not one flat image spread across wood.

Figure logic must remain source-faithful:

gods, saints, heroes, patrons, genealogical figures, epic scenes, or devotional presences
must feel panel-compatible,
frontally readable,
narratively direct,
iconically clear,
and subordinate to compartment hierarchy rather than realism.

Material memory must remain visible:

painted wood,
hinged cabinet construction,
red-led object identity,
handmade shrine-object presence,
not canvas painting,
not mural logic,
not printed wood decor.

Use Kaavad color logic:

bold red-led base structure,
clear narrative color separation,
frontally readable painted zones,
direct storytelling color,
never atmospheric realism,
never miniature-style tonal subtlety,
never scenic lighting dominance.

Do not add:

flat wooden panel painting,
generic mythological cupboard art,
miniature detailing logic,
decorative furniture painting,
static shrine without reveal structure,
or any second visual language stronger than Kaavad.

The final result must feel like true Kaavad storytelling-shrine work from Rajasthan at source-truth level, not a modern wooden object decorated with folk narrative scenes.

Reusable Variable Template

Create [SUBJECT / OBJECT / STORY DEVICE / SHRINE IMAGE] using the authentic source-truth grammar of Kaavad from Rajasthan.

Core style system to preserve:

wooden cabinet-object identity,
hinged unfolding structure,
painted narrative compartments,

front-facing shrine logic,
outer-to-inner revelation hierarchy,
oral-storytelling support,
sacred central climax,
whole-object Kaavad coherence.

Translate the image like this:

[MAIN OBJECT / MAIN SHRINE / MAIN STORY DEVICE] becomes a Kaavad-born cabinet with meaningful hinges, narrative panel order, and sacred reveal logic.

[SECONDARY PANELS / SUPPORTING FIGURES / OUTER DOORS / INNER CHAMBERS] become supporting Kaavad presences governed by the same storytelling structure.

[BACKGROUND / SURROUNDING CONTEXT] supports the Kaavad object without overpowering it through scenic realism.

Keep:

cabinet-object identity,
panel hierarchy,
reveal logic,
painted compartment clarity,
portable shrine authority,
oral-story usability.

Avoid:

flat panel painting,
decorative wooden-box styling,
miniature-on-wood,
generic shrine box,
furniture realism,
or mythological scenes without object-sequence intelligence.

The final image must feel like the Kaavad tradition itself authored the full storytelling-shrine object.

Image-to-Image

Convert this source image into an authentic source-truth Kaavad world from Rajasthan.

Preserve the source image's core subject count, main story or figure relations, and overall readability, but rebuild the entire image through true Kaavad grammar.

Replace ordinary image logic with:

wooden cabinet-object identity,
hinged unfolding structure,
painted narrative compartments,
front-facing shrine readability,

outer-to-inner reveal hierarchy,
oral-storytelling support,
and sacred central climax.

Do not simply paint the source on wood.
Do not merely divide it into panels.
Do not turn it into generic decorated cupboard art.

If the source contains figures, rebuild them as Kaavad-born narrative presences:
panel-compatible,
iconically clear,
story-readable,
compartment-bound,
and subordinate to reveal structure.

If the source contains supporting objects or scenes, translate them into a true Kaavad panel sequence.
Do not leave the image as scenic realism.
Do not make it a static painted shrine box.

The final image must feel like a genuine Kaavad storytelling-shrine from Rajasthan, not a modern image decorated in panelled folk style.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Kaavad from Rajasthan.

This is not a literal artisan product mockup.
This is not wooden craft photography.
This is not a decorative handcrafted cabinet with paintings on it.
This is not realism-first object styling.

Preserve the same deep Kaavad grammar unchanged:
wooden cabinet-object identity,
hinged unfolding structure,
painted narrative compartments,
front-facing shrine logic,
outer-to-inner revelation hierarchy,
oral-storytelling support,
sacred central climax,
and whole-object Kaavad coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid storytelling-object form.

The added dimensionality must come from Kaavad's own logic:

hinge depth,
door thickness,
nested reveal structure,
compartmental spatial rhythm,
panel hierarchy,
cabinet-body relation,
sacred center compression,
story-order architecture,
and full-object narrative intelligence.

Do not only improve wood texture.

Do not only add shadows.

Transform the full image logic:

form,
construction,
grouping,
panel hierarchy,
object-body presence,
narrative zoning,
shrine-object authority,
and full-frame visual language.

If figures appear, they must not remain generic painted figures on a wooden box.

They must become Kaavad-born presences:

compartment-shaped,
story-order governed,
frontally readable,
structurally related to outer and inner reveal logic,
and integrated into the object's narrative mechanism.

If surrounding space appears, it must not remain neutral realism.

It must begin to feel re-authored by Kaavad:

nested,
panel-aware,
frontally organized,
revelation-driven,
and shrine-object-centered,
not just normal space around a craft object.

Believable depth must come from Kaavad itself,

not from generic object rendering,

not from product-shot realism,

not from standard woodworking realism.

Keep:

source-rooted Kaavad identity,
hinged reveal intelligence,
storytelling compartment logic,
sacred center hierarchy,
portable shrine authority,
creative artisan translation,
full-object style control.

Do not allow:

generic wooden craft realism,
decorative box-object mockup,
miniature painting on panels,
flat storytelling panels with better texture,
furniture logic,
or a normal object underneath with Kaavad added later.

The final result must feel like Kaavad itself has creatively re-authored the object into a richer, more dimensional, more inventive storytelling-shrine world while still remaining fully Kaavad-born.

Reusable Variable Template

Create [SUBJECT / OBJECT / STORY DEVICE / SHRINE WORLD] in V2 = authentic handcrafted dimensional translation of Kaavad from Rajasthan.

Preserve these unchanged deep style-core rules:

wooden cabinet-object identity,
hinged unfolding structure,
painted narrative compartments,
front-facing shrine logic,
outer-to-inner revelation hierarchy,
oral-storytelling support,
sacred central climax,
whole-object Kaavad coherence.

Translate the image like this:

[MAIN OBJECT / MAIN SHRINE / MAIN STORY DEVICE] becomes a richer Kaavad-born dimensional cabinet with stronger reveal depth and more inventive narrative zoning.

[SECONDARY PANELS / SUPPORTING FIGURES / DOORS / INNER CHAMBERS] become supporting Kaavad presences governed by the same reveal structure.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a re-authored Kaavad-oriented space where hierarchy, depth, and grouping come from cabinet-reveal intelligence rather than neutral realism.

Increase:
object presence,
hinge depth,
panel hierarchy,
nested reveal clarity,
sacred-center compression,
storytelling architecture,
inventive Kaavad world-building.

Do not lose:
cabinet identity,
reveal logic,
narrative compartments,
oral-story usability,
portable shrine force,
full-object style control.

Avoid:
craft-product mockup,
furniture realism,
miniature-on-wood,
decorative painted cabinet,
static shrine box,
or a realistic world with Kaavad added afterward.

The final image must feel like the same Kaavad grammar has been creatively translated into a richer, more dimensional, more scene-capable storytelling-object form.

Image-to-Image

Convert this source image into a V2 authentic handcrafted dimensional Kaavad world from Rajasthan.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Kaavad grammar translated into a richer, more dimensional, more inventive hybrid object-form.

Replace ordinary image logic with:
wooden cabinet-object identity,
hinged unfolding structure,
painted narrative compartments,
outer-to-inner reveal hierarchy,
sacred central climax,
oral-storytelling support,
and whole-object Kaavad coherence.

Do not simply put the image into framed boxes.
Do not just build a wooden cabinet around it.
Do not make it a product mockup.

Rebuild the image so that:
the object-body is governed by reveal logic,
depth comes from nested hinge structure and storytelling compartments,
figures become Kaavad-born narrative presences,
inner and outer zones feel meaningfully staged,
the whole object begins to behave like a living storytelling shrine,
not a decorative cabinet.

If surrounding space appears, rebuild it through Kaavad's own structural logic rather than neutral realism.

The final image must feel like a true creative artisan translation of Kaavad into a richer dimensional storytelling-object world, not a normal wooden object with Kaavad surface styling.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Kaavad from Rajasthan while keeping the same source grammar unchanged.

This is not realism replacing style.
This is not realistic wooden craft photography.
This is not a premium handmade devotional cabinet.
This is not cinematic folk-object art.
This is not a normal world with Kaavad decoration added afterward.

Preserve the same deep Kaavad grammar unchanged:
wooden cabinet-object identity,
hinged unfolding structure,
painted narrative compartments,
front-facing shrine logic,
outer-to-inner revelation hierarchy,
oral-storytelling support,
sacred central climax,
and whole-object Kaavad coherence.

Now push that same grammar into its most complete, most fully embodied, most fully resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by Kaavad logic.

That means the transformation must affect everything:

object-body,
doors,
hinges,
frames,
inner chambers,
figures,
faces,
bodies,
posture,
gesture,
props,
symbols,
architectural supports if present,
background,
empty space,
spatial hierarchy,
scene rhythm,
foreground,
midground,
background,
and the full-frame visual language.

Nothing important may remain generic realism.

Kaavad must control reality through its own logic:

nested revelation,
cabinet-frontality,
compartmental hierarchy,
outer-to-inner sacred progression,
story-order architecture,
portable shrine compression,
panel-based image ontology,
and object-centered narrative space.

Believable here must mean:

believable object embodiment,
believable reveal depth,
believable sacred-center hierarchy,
believable inhabitable narrative-world logic,
believable structural completion.

It must not mean:

realistic furniture,
product styling,
normal wooden cabinetry,
generic devotional object realism,

cinematic scene-building,
or realism-first image making.

If figures appear, they must be fully Kaavad-born:
their relation to space must follow panel and reveal logic,
their bodies must feel shaped by compartmental narrative structure,
their presence must support shrine-order and storytelling order,
not generic realism.

If environment appears, it must also be fully Kaavad-born:
space must behave like nested revelation and cabinet-structured storytelling space,
not like a normal room, stage, or scenic world underneath.

If you remove decorative cues, the image should still feel Kaavad through:
object construction,
compartment hierarchy,
reveal architecture,
sacred center logic,
frontality,
story-sequence behavior,
and whole-world narrative ontology.

Keep:
same deep Kaavad grammar,
full world embodiment,
full environmental completion,
stronger hierarchy,
stronger reveal depth,
stronger object presence,
stronger total-frame Kaavad control.

Do not allow:
generic wooden craft realism,
decorative shrine cabinet,
miniature-on-wood logic,
flat panel storytelling,
product-shot object logic,
cinematic devotional craft art,
or any second visual language stronger than Kaavad.

The final result must feel like Kaavad itself has taken over the whole visible world and fully generated reality through storytelling-shrine logic, not like realism with Kaavad decoration.

Reusable Variable Template

Create [SUBJECT / OBJECT / STORY DEVICE / WORLD] in V3 = fully resolved believable real-world 3D translation of Kaavad from Rajasthan.

Keep these unchanged deep style-core rules:

wooden cabinet-object identity,
hinged unfolding structure,
painted narrative compartments,
front-facing shrine logic,
outer-to-inner revelation hierarchy,
oral-storytelling support,
sacred central climax,
whole-object Kaavad coherence.

Translate the image like this:

[MAIN OBJECT / MAIN SHRINE / MAIN STORY DEVICE] becomes a fully embodied Kaavad-born presence generated through nested reveal logic, cabinet-frontality, sacred-center hierarchy, and full object-world control.

[SECONDARY PANELS / FIGURES / SUPPORTING ELEMENTS] become equally style-born Kaavad presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Kaavad world where spatial structure, hierarchy, and scene organization are all controlled by the same storytelling-shrine grammar.

Increase:

full world embodiment,
full environmental translation,
stronger reveal hierarchy,
stronger panel-to-center depth,
stronger object presence,
stronger sacred climax,
stronger full-frame Kaavad control.

Do not lose:

cabinet identity,
hinge logic,
narrative compartments,
story-order architecture,
portable shrine authority,
whole-object coherence.

Avoid:

wooden craft realism,
decorative box-object logic,
miniature-on-wood,
flat panel art,
product styling,
cinematic devotional object art,
or a normal world with Kaavad decoration.

The final image must feel like the same deep Kaavad grammar has fully generated an entire believable world.

Image-to-Image

Convert this source image into a V3 fully resolved believable real-world Kaavad world from Rajasthan.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Kaavad grammar.

Replace ordinary realism with:
wooden cabinet-object identity,
hinged unfolding structure,
painted narrative compartments,
outer-to-inner reveal hierarchy,
sacred central climax,
oral-storytelling support,
and full-world Kaavad coherence.

Do not simply place the image inside a wooden cabinet.
Do not just paint panels around it.
Do not leave the environment generic.

Rebuild the full image so that:
object-body, space, figures, props, and environment all belong to the same Kaavad storytelling ontology,
depth comes from reveal structure and compartment hierarchy,
the world becomes fully inhabitable but remains completely Kaavad-born,
not realism-first.

If any part of the frame remains normal wooden-object realism underneath, the conversion has failed.

The final image must feel like Kaavad itself has fully generated the entire visible world, not like a normal scene decorated with storytelling panels.
