

# Nirmal - Telangana

## V1 — Authentic Style

### Universal Hard Prompt

Create an image in pure authentic source-truth Nirmal from Telangana.

Treat this as a true Telangana painted-wood art family, not as generic decorative wood painting, not as miniature-on-wood, not as raw carved toy craft, not as generic black-and-gold décor, and not as ordinary glossy painted craft.

Build the image from the true grammar of Nirmal:

prepared painted-wood identity,  
smoothed coated support,  
refined decorative painted language,  
display-oriented authorship,  
branch-aware family duality,  
dark-ground gold-led painting logic,  
bright glossy painted-object logic,  
and whole-family Nirmal coherence.

The image must feel like it genuinely belongs inside the original Nirmal tradition.

Keep the whole frame inside one Nirmal-authored visual language.

The support itself must be source-born:

prepared wood first,  
painting second,  
smoothed and finished surface,  
display-ready refinement,  
not raw timber,  
not cloth,  
not paper-folio logic,  
not generic painted furniture decoration.

Family logic must remain source-faithful:

if the image leans toward the painting branch, preserve black or dark-ground elegance, gold-led ornament control, refined pictorial display logic, and Naqqash-painted surface authority.

if the image leans toward the object branch, preserve shaped painted wooden form, bright finished color, smooth coated body, and display-object refinement.

In both cases, it must still read as one Nirmal family.

Motif and subject logic must remain source-faithful:

floral designs,

mythological figures,  
birds,  
animals,  
dancers,  
musicians,  
landscape and decorative scenic fragments,  
all translated through Nirmal painted-wood refinement rather than generic folk painting.

Material memory must remain visible:

prepared wood,  
coated and leveled support,  
refined painted finish,  
polished display-oriented surface,  
not rough carving,  
not canvas-like brush behavior,  
not unprepared painted wood.

Use Nirmal color logic:

for painting-branch emphasis, dark ground with gold-led decorative hierarchy and controlled supporting colors.

for object-branch emphasis, bright painted color with refined glossy display finish.

Never make the palette generic.

Never make the finish rustic.

Never let black/gold or gloss become generic décor behavior.

Do not add:

miniature-paper logic,  
raw wooden folk toy logic,  
generic interior décor painting,  
generic black-and-gold luxury styling,  
generic glossy object craft,  
or any second visual language stronger than Nirmal.

The final result must feel like true Nirmal painted-wood art from Telangana at source-truth level, not a modern decorative object or painting merely styled to resemble Nirmal.

## **Reusable Variable Template**

Create [SUBJECT / OBJECT / SURFACE / WORLD] using the authentic source-truth grammar of Nirmal from Telangana.

Core style system to preserve:

prepared painted-wood identity,  
smoothed coated support,  
refined decorative painted language,  
display-oriented authorship,

branch-aware Nirmal family logic,  
dark-ground gold-led painting behavior,  
bright glossy painted-object behavior,  
whole-family Nirmal coherence.

Translate the image like this:

[MAIN SURFACE / MAIN OBJECT / MAIN FIELD] becomes a Nirmal-born painted-wood presence built through prepared support, refined finish, and branch-correct decorative control.

[SECONDARY SURFACES / OBJECTS / SUPPORTING ELEMENTS] become supporting Nirmal presences obeying the same painted-wood family logic.

[BACKGROUND / WORLD / SURROUNDING AREAS] becomes a Nirmal-authored painted-wood field rather than neutral realism or generic decorative design.

Keep:

prepared wood logic,  
smoothed finish,  
Naqqash-style painted refinement,  
branch-aware family identity,  
display-oriented completeness,  
Nirmal coherence.

Avoid:

generic wood painting,  
miniature-on-wood,  
raw toy craft,  
generic black-and-gold décor,  
generic glossy painted craft,  
or a realistic world with Nirmal styling pasted on top.

The final image must feel like the Nirmal tradition itself authored the full painted-wood world.

## **Image-to-Image**

Convert this source image into an authentic source-truth Nirmal world from Telangana.

Preserve the source image's core subject count, structural readability, and main visual organization, but rebuild the entire image through true Nirmal grammar.

Replace ordinary image logic with:

prepared painted-wood identity,  
smoothed coated support,  
refined decorative painted language,  
display-oriented finish,  
branch-aware Nirmal family logic,  
and full painted-wood coherence.

Do not simply paint the source onto a wooden board.  
Do not merely add black background and gold.  
Do not turn the source into generic glossy folk craft.

If the source contains figures, objects, architecture, animals, or background, rebuild them through Nirmal painted-wood logic:  
prepared support,  
refined decorative control,  
branch-correct color behavior,  
display-oriented finish,  
and Naqqash-style family coherence.

Do not leave the environment as neutral realism.  
Do not make it generic decorative art on wood.

The final image must feel like a genuine Nirmal painted-wood world from Telangana, not a modern image decorated with Nirmal-like surface cues.

## **V2 — Artisan Translation**

### **Universal Hard Prompt**

Create an image in V2 = authentic handcrafted dimensional translation of Nirmal from Telangana.

This is not a literal craft-object mockup.  
This is not product photography of painted wood.  
This is not texture-only styling.  
This is not generic handmade décor.  
This is not realism-first painted-object rendering.

Preserve the same deep Nirmal grammar unchanged:  
prepared painted-wood identity,  
smoothed coated support,  
refined decorative painted language,  
display-oriented authorship,  
branch-aware family duality,  
dark-ground gold-led painting logic,  
bright glossy painted-object logic,  
and whole-family Nirmal coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid image-form.

The added dimensionality must come from Nirmal's own logic:  
prepared support thickness,  
surface-to-body relation,  
painted-plane hierarchy,  
refined ornamental structuring,  
branch-specific display logic,  
gold-on-dark elegance where relevant,  
bright glossy painted-object logic where relevant,  
and full-frame Naqqash-authored refinement.

Do not only improve polish.  
Do not only increase gloss.  
Transform the full image logic:  
form,  
construction,  
grouping,  
silhouette,  
objects,  
environment,  
spatial organization,  
and full-frame visual language.

If figures appear, they must not remain generic figures painted onto wood.  
They must become Nirmal-born presences:  
face logic shaped by decorative painted refinement,  
body logic shaped by support and surface hierarchy,  
silhouettes built through Nirmal display control,  
objects and props translated into the same painted-wood family logic.

If environment appears, it must not remain generic realism.  
It must already begin to feel re-authored by Nirmal:  
prepared-surface world logic,  
display-oriented composition,  
ornamental painted hierarchy,  
branch-aware family presence,  
not just normal scenery with Nirmal decoration added on top.

Believable depth must come from Nirmal itself,  
not from default realism,  
not from product-shot lighting,  
not from generic 3D craft rendering.

Keep:  
source-rooted Nirmal identity,  
prepared support logic,  
smoothed finish,  
branch-aware family control,

creative artisan translation,  
display-oriented authorship,  
full-frame style control.

Do not allow:

literal wooden craft simulation,  
generic décor-object rendering,  
miniature-on-wood drift,  
raw folk-object behavior,  
generic black-and-gold luxury styling,  
generic glossy craft-object realism,  
or a normal image underneath with Nirmal added later.

The final result must feel like Nirmal itself has creatively re-authored the image into a richer, more dimensional, more inventive painted-wood world while still remaining fully Nirmal-born.

## **Reusable Variable Template**

Create [SUBJECT / SCENE / OBJECT / IMAGE FIELD] in V2 = authentic handcrafted dimensional translation of Nirmal from Telangana.

Preserve these unchanged deep style-core rules:

prepared painted-wood identity,  
smoothed coated support,  
refined decorative painted language,  
display-oriented authorship,  
branch-aware family duality,  
dark-ground gold-led painting logic,  
bright glossy painted-object logic,  
whole-family Nirmal coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a Nirmal-born dimensional presence built through prepared support logic, refined painted hierarchy, and branch-correct display control.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become supporting Nirmal presences governed by the same painted-wood family system.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a creatively re-authored Nirmal space where grouping, depth, and spatial rhythm come from prepared painted-wood logic rather than neutral realism.

Increase:

dimensional presence,  
support-body relation,  
painted-surface hierarchy,  
ornamental refinement,

branch-specific display richness,  
inventive Nirmal world-building.

Do not lose:

prepared wood identity,  
smoothed finish,  
Naqqash-style painted control,  
branch-aware family coherence,  
display-oriented authorship,  
full-frame Nirmal control.

Avoid:

craft mockup logic,  
product realism,  
miniature-on-wood drift,  
generic decorative wood art,  
raw toy-craft behavior,  
or a realistic world with Nirmal decoration added afterward.

The final image must feel like the same Nirmal grammar has been creatively translated into a richer, more dimensional, more scene-capable visual form.

## **Image-to-Image**

Convert this source image into a V2 authentic handcrafted dimensional Nirmal world from Telangana.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Nirmal grammar translated into a richer, more dimensional, more inventive hybrid image-form.

Replace ordinary image logic with:

prepared painted-wood identity,  
smoothed coated support,  
refined decorative painted language,  
display-oriented finish,  
branch-aware Nirmal family logic,  
and full-frame painted-wood coherence.

Do not simply add wood texture.

Do not just increase gloss.

Do not make it a painted-object mockup.

Rebuild the image so that:

forms are organized through Nirmal's own support-and-surface logic,  
depth comes from prepared body and painted-plane relation,

objects and environments begin to behave like a Nirmal-authored world,  
branch identity remains structurally active,  
and the whole frame feels generated by Nirmal itself rather than realism with decoration.

If figures appear, rebuild them as Nirmal-born presences rather than generic figures with painted surfaces.

If objects or environments appear, rebuild them through Nirmal visual ontology rather than neutral realism.

The final image must feel like a true creative artisan translation of Nirmal into a richer dimensional painted-wood world, not a normal image with decorative craft styling.

## V3 — 3D / Realistic / Cinematic Translation

### Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Nirmal from Telangana while keeping the same source grammar unchanged.

This is not realism replacing style.

This is not product photography.

This is not interior décor realism.

This is not generic luxury painted-object rendering.

This is not a normal world with Nirmal decoration added afterward.

Preserve the same deep Nirmal grammar unchanged:

prepared painted-wood identity,

smoothed coated support,

refined decorative painted language,

display-oriented authorship,

branch-aware family duality,

dark-ground gold-led painting logic,

bright glossy painted-object logic,

and whole-family Nirmal coherence.

Now push that same grammar into its most complete, most fully embodied, most fully resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by Nirmal logic.

That means the transformation must affect everything:

surfaces,

supports,

figures,

faces,

bodies,  
objects,  
props,  
ornamental structures,  
ground,  
architecture,  
trees,  
plants,  
empty space,  
environment rhythm,  
foreground,  
midground,  
background,  
and the full-frame visual language.

Nothing important may remain generic realism.

Nirmal must control reality through its own logic:  
prepared support intelligence,  
painted-plane hierarchy,  
display-oriented completion,  
ornamental painted refinement,  
branch-sensitive family structure,  
dark-ground gold elegance where relevant,  
bright glossy painted-object logic where relevant,  
and full-world Naqqash-style ontology.

Believable here must mean:  
believable volume,  
believable spatial relation,  
believable material embodiment,  
believable environmental completion,  
believable inhabitable world logic.

It must not mean:  
product-shot realism,  
normal wood-object realism,  
generic interior décor styling,  
generic glossy craft realism,  
miniature realism on wood,  
or realism-first image making.

If figures appear, they must be fully Nirmal-born:  
face construction shaped by decorative painted refinement,  
body logic shaped by support-and-surface relation,  
silhouettes controlled by display-oriented painted hierarchy,  
objects and props integrated into the same Nirmal family ontology.

If environment appears, it must also be fully Nirmal-born:  
ground, structures, plants, space, and atmosphere must all belong to one uninterrupted  
Nirmal world,  
not a normal realistic environment underneath.

If you remove decorative cues, the image should still feel Nirmal through:  
support construction,  
surface logic,  
object logic,  
environment logic,  
spatial organization,  
branch-aware family identity,  
and full-world painted-wood ontology.

Keep:  
same deep Nirmal grammar,  
full world embodiment,  
full environmental completion,  
stronger figure-ground hierarchy,  
stronger spatial separation,  
stronger object presence,  
stronger total-frame style control.

Do not allow:  
product realism,  
generic black-and-gold décor,  
generic glossy painted craft realism,  
miniature-on-wood drift,  
raw folk-object behavior,  
or any second visual language stronger than Nirmal.

The final result must feel like Nirmal itself has taken over the whole visible world and fully  
generated reality through painted-wood family logic, not like realism with Nirmal decoration.

## **Reusable Variable Template**

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable real-world  
3D translation of Nirmal from Telangana.

Keep these unchanged deep style-core rules:  
prepared painted-wood identity,  
smoothed coated support,  
refined decorative painted language,  
display-oriented authorship,  
branch-aware family duality,  
dark-ground gold-led painting logic,  
bright glossy painted-object logic,

whole-family Nirmal coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a fully embodied Nirmal-born presence generated through prepared support logic, painted-plane hierarchy, branch-aware family control, and full painted-wood world authorship.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become equally style-born Nirmal presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Nirmal world where spatial structure, environmental rhythm, and full-scene organization are all controlled by the same painted-wood family grammar.

Increase:

- full world embodiment,
- full environmental translation,
- stronger spatial relation,
- stronger figure-ground separation,
- stronger material presence,
- stronger world coherence,
- stronger full-frame Nirmal control.

Do not lose:

- prepared support identity,
- smoothed finish,
- decorative painted refinement,
- branch-aware family structure,
- display-oriented authorship,
- whole-world Nirmal ontology.

Avoid:

- product realism,
- generic decorative-object styling,
- miniature-on-wood drift,
- generic glossy craft realism,
- generic black-and-gold décor,
- or a normal world with Nirmal decoration added afterward.

The final image must feel like the same deep Nirmal grammar has fully generated an entire believable world.

## **Image-to-Image**

Convert this source image into a V3 fully resolved believable real-world Nirmal world from Telangana.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Nirmal grammar.

Replace ordinary realism with:  
prepared painted-wood identity,  
smoothed coated support,  
refined decorative painted language,  
display-oriented finish,  
branch-aware Nirmal family logic,  
and full-world painted-wood coherence.

Do not simply render the image as a polished object.  
Do not just add black-and-gold or gloss.  
Do not leave the environment generic.

Rebuild the full image so that:  
faces, bodies, objects, props, and environment all belong to the same Nirmal painted-wood ontology,  
depth comes from Nirmal's own support-and-surface logic,  
space is organized through display-oriented painted hierarchy,  
the world becomes fully inhabitable but remains completely Nirmal-born,  
not realism-first.

If any part of the frame remains normal realism underneath, the conversion has failed.

The final image must feel like Nirmal itself has fully generated the entire visible world, not like a normal image decorated with painted-wood craft styling.
