

Pilkuwa print - Uttar Pradesh

if translated beyond textile

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Pilkuwa Print from Uttar Pradesh**, treating it as a **Pilkuwa-rooted hand block-print textile system** built through **carved wooden-block repetition, natural-dye cloth printing, repeat-layout alignment, nature-and-cultural-symbol motif logic, and practical apparel-and-home-textile surface refinement**.

Build the image as if it genuinely belongs inside the native Pilkuwa hand block-print tradition itself. The image must be governed first by **block-impression rhythm, repeat-layout structure, printed-cloth surface behavior, nature-and-cultural-symbol motif discipline**, and **workshop-made precision**, not by generic floral décor print, digital repeat graphics, painted textile effects, embroidery texture, brocade richness, or machine-made furnishing fabric styling.

The support must feel like real printed cloth, not paper, not wall, not woven brocade, and not embroidered textile. The design must feel created by repeated carved-block impressions, one impression at a time, until a continuous pattern field is built. The surface must feel print-applied and cloth-borne: clear, shape-led, repeat-capable, and flat in the correct printed-textile way, not raised, not brush-painted, and not glossy machine-perfect.

The motif world must remain **Pilkuwa-born**: intricate motifs inspired by **nature and cultural symbols**, arranged through repeat logic and careful alignment. Motifs must feel like they belong to a disciplined hand-block family, not like random trendy floral or generic furnishing icons. The field must feel suitable for **sarees, dupattas, stoles, cushion covers, tablecloths, and bedcovers**, not like one framed illustration.

The print must preserve **controlled handmade alignment**: practiced, repeat-aware, artisan-led, and precise without becoming sterile. The final result must feel like **the real Pilkuwa Print system itself made the whole image**.

Reusable Variable Template

Create **[SUBJECT / PRINTED CLOTH FIELD / TEXTILE SURFACE / PILKHUWA BLOCK-PRINT WORLD]** in the **pure authentic source-truth visual logic of Pilkhuwa Print from Uttar Pradesh.**

Style system that must remain unchanged:

- cloth-field identity
- carved-block repetition
- printed-color surface logic
- nature-and-cultural-symbol motif intelligence
- repeat-layout alignment
- workshop-made precision
- practical textile-surface usability
- whole-frame Pilkhuwa consistency

Translate the image like this:

- **[MAIN CLOTH FIELD / MAIN TEXTILE AREA / MAIN PRINTED SURFACE]** becomes a Pilkhuwa-built printed textile presence governed by repeat-layout block order
- **[MOTIFS / NATURE-BASED FORMS / CULTURAL SYMBOLS / ORNAMENTAL UNITS]** must feel block-print-born, not painted, woven, stitched, or digitally generated
- **[COLOR / DYE / PRINTED SHAPE REGIONS]** must feel applied through block-print logic, not through brush shading or woven color
- **[REPEAT RHYTHM / ALIGNMENT / SPACING / FIELD CONTINUITY]** must feel hand-disciplined, workshop-made, and structurally repeat-capable
- **[BORDERS / EDGE RUNS / ALL-OVER FIELDS / PRODUCT ZONES]** must feel textile-native and usable across apparel or home-furnishing surfaces
- **[IF FIGURES / OBJECTS / ARCHITECTURE APPEAR]** faces, bodies, posture, object logic, and environment logic must all be reorganized through Pilkhuwa block-print order, not realism

Keep:

- block-built repeat logic
- printed-cloth surface behavior
- motif discipline
- controlled handmade alignment
- utility-textile spread
- Pilkhuwa refinement
- repeat-safe design order
- whole-frame consistency

Avoid:

- generic floral print
- machine-made repeat fabric
- painted textile simulation
- embroidery texture

- brocade richness
- screen-print perfection
- generic décor styling
- realism with Pilkhuwa motifs added later

The final result must feel like a true Pilkhuwa hand block-print textile system, not a decorative fabric wearing traditional cues.

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Pilkhuwa Print from Uttar Pradesh**.

Preserve the source image's **subject count, core action, main relationships, and readability**, but rebuild the full image through Pilkhuwa Print grammar. Replace generic decoration with carved-block repetition. Replace one-off graphic layout with repeat-layout organization. Replace painted or digital surface behavior with printed-color cloth logic. Replace generic ornament with Pilkhuwa's **nature-and-cultural-symbol** motif intelligence. Replace machine perfection with controlled handmade alignment.

If the image includes motifs, make them feel block-carved and repeat-capable. If the image includes textile zones, make them behave like real apparel or home-textile surfaces. If the image includes figures, objects, or environment, they must also be reorganized through Pilkhuwa block-print intelligence rather than remain generic underneath a printed overlay.

Do not simply add decorative motifs to the source image. Do not keep digital print logic underneath. Do not let the image behave like painted cloth, embroidery, or furnishing-fabric mockup. The final result must feel as if the original image has been fully reauthored inside the true source-truth Pilkhuwa Print system.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in the **authentic dimensional translation of Pilkhuwa Print from Uttar Pradesh**, preserving the same deep source grammar as the authentic source-truth version, but translating it into a **richer, more dimensional, more image-complete printed world while staying fully print-born**.

Keep the core Pilkhuwa Print grammar fully unchanged: cloth-field identity, carved-block repetition, printed-color surface logic, nature-and-cultural-symbol motif intelligence,

repeat-layout alignment, workshop-made precision, and practical textile-surface usability. Do not turn this into decorative print concept art, digitally beautified furnishing fabric, painted-textile styling, luxury home-fabric mockup, or generic ethnic décor print.

Translate that same grammar into a more alive and dimensional visual language. The image must no longer behave only as literal textile-surface documentation, but it must also not become full realism-world depth. It should become a **creative hybrid block-print image world** where Pilkhuwa's own carved-block and repeat intelligence generate richer form, stronger motif hierarchy, and more dimensional presence.

The transformation must affect the whole frame. If figures appear, faces, bodies, silhouettes, posture, grouping, and relations must all be rebuilt through Pilkhuwa print logic. If objects appear, they must be shaped through block-repeat order, motif hierarchy, and printed-field organization. If environment appears, it must grow from repeat-built surface intelligence and print-born textile logic rather than remain generic. The block-print system must become the larger organizing intelligence, not just a decorative overlay.

Dimensionality must come from Pilkhuwa Print itself: from carved-block rhythm, careful alignment, repeat continuity, motif-family spread, natural-dye surface character, and workshop precision. Do not solve dimensionality through brush shading, digital graphic polish, embroidery illusion, or ordinary realism with printed motifs added later.

Do not create:

decorative print concept art, digital pattern styling, painted-fabric mockups, generic ethnic furnishing glamour, or a generic dimensional image decorated later by Pilkhuwa Print.

The final result must feel like **the same Pilkhuwa Print grammar has entered a richer, more dimensional printed world without losing block-print identity.**

Reusable Variable Template

Create **[SUBJECT / IMAGE / BLOCK-PRINT WORLD / PILKHUWA PRINT SURFACE SYSTEM]** in the **authentic dimensional translation of Pilkhuwa Print from Uttar Pradesh.**

Keep unchanged:

- cloth-field identity
- carved-block repetition
- printed-color surface logic
- nature-and-cultural-symbol motif intelligence
- repeat-layout alignment
- workshop-made precision
- practical textile usability
- whole-frame style consistency

Translate it into a richer dimensional printed world like this:

- **[MAIN CLOTH FIELD / MAIN PRINTED AREA / MAIN SURFACE MASS]** becomes a Pilkhuwa-built printed presence with more dimensional life, but still governed by repeat-built block order
- **[SECONDARY FIELDS / BORDER ZONES / STOLE SURFACES / FURNISHING PANELS]** also transform through the same Pilkhuwa grammar rather than generic styling
- **[REPEAT RHYTHM / BLOCK IMPRESSION / ALIGNMENT / MOTIF HIERARCHY / COLOR FIELD RELATION]** become more spatially alive and structurally expressive while remaining print-born
- **[NATURE-LINKED MOTIFS / CULTURAL SYMBOLS / ORNAMENTAL REPEAT SYSTEMS]** must remain block-print-native and disciplined
- **[IF FIGURES APPEAR]** faces, bodies, posture, grouping, object logic, and environment logic must all be rebuilt through Pilkhuwa print order
- **[IF ENVIRONMENT APPEARS]** it must grow from repeat-built printed intelligence and textile-surface logic rather than generic realism

Increase:

- dimensional presence
- motif hierarchy clarity
- repeat depth
- visual richness
- structural rhythm
- whole-frame transformation
- printed-world depth

Do not use:

- generic floral-print logic
- digital pattern polish
- painted textile logic
- embroidery texture
- brocade richness
- machine-repeat perfection
- generic environment with Pilkhuwa overlay
- only one printed patch carrying the style

Success condition:

the result feels like the same Pilkhuwa Print grammar has been translated into a richer dimensional printed world.

Failure condition:

the result feels like a generic decorative image decorated later by Pilkhuwa Print.

Image-to-Image

Convert this source image into the **authentic dimensional translation of Pilkhuwa Print from Uttar Pradesh**.

Preserve the source image's core subject logic, action logic, grouping logic, and readability, but rebuild the full image through Pilkhuwa Print's internal grammar translated into a richer, more dimensional print-born world.

Replace generic ornament with carved-block repeat logic. Replace one-off layouts with repeat-field continuity. Replace painterly color behavior with printed-color organization. Replace generic décor motifs with Pilkhuwa's **nature-and-cultural-symbol** structure. If figures are present, transform faces, bodies, silhouettes, posture, grouping, object logic, and surrounding structure through Pilkhuwa block-print logic, not realism. If objects or environment are present, they must also be rebuilt through repeat-built printed intelligence instead of remaining generic.

Let the image gain more dimensional life, stronger motif hierarchy, richer repeat rhythm, and better whole-frame coherence. But do not turn it into digital pattern art, painted-textile styling, or generic furnishing glamour with traditional motifs added afterward.

Do not style only one cushion, tablecloth edge, stole, or printed patch. Do not leave the rest of the frame generic. The final result must feel like **the source image has been fully reauthored through an authentic dimensional translation of Pilkhuwa Print**.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in the **world-depth translation of Pilkhuwa Print from Uttar Pradesh**, preserving the same authentic source grammar but pushing it into its **most complete, most embodied, most scene-capable full world**.

Keep the same deep Pilkhuwa Print visual intelligence fully unchanged: cloth-field identity, carved-block repetition, printed-color surface logic, nature-and-cultural-symbol motif intelligence, repeat-layout alignment, workshop-made precision, and Pilkhuwa specificity. Do not turn this into generic realism, interior décor realism, home-furnishing realism, or a normal world with one printed tablecloth, stole, cushion, or bedcover added on top.

Now convert that same grammar into a believable full world. The result must have believable material behavior, believable spatial separation, believable object presence, believable environmental completion, and believable three-dimensional world logic. But every visible part of the image must still be generated by Pilkhuwa Print grammar.

If figures are present, they must be rebuilt through Pilkhuwa-born block-print structure, not normal realism wearing printed fabric. If objects appear, they must be shaped through repeat-built motif order, printed-field hierarchy, and carved-block rhythm. If environment appears, it must be generated by carved-block repetition, printed-surface organization, motif logic, and workshop-made alignment discipline. The world must not become ordinary reality with one printed insert into it.

Depth must now become full world-depth, but it must remain style-controlled. The source grammar must still govern figure design, shape logic, composition logic, material identity, environment logic, and total scene organization.

Do not let realism replace the style. Do not let the style survive only in one stole, one tablecloth, one cushion, one bedcover, one border, or one printed patch. Do not create a premium cinematic makeover stronger than the source grammar. The final image must feel like **Pilkhuwa Print itself has become a believable full world.**

Reusable Variable Template

Create **[SUBJECT / SCENE / FIGURAL WORLD / EXPANDED PILKHUWA PRINT WORLD]** in the **world-depth translation of Pilkhuwa Print from Uttar Pradesh.**

Keep unchanged:

- cloth-field identity
- carved-block repetition
- printed-color surface logic
- nature-and-cultural-symbol motif intelligence
- repeat-layout alignment
- workshop-made precision
- Pilkhuwa specificity
- whole-frame style consistency

Translate it into full world-depth like this:

- **[MAIN FORM / MAIN FIGURE / MAIN PRINTED FIELD / MAIN SURFACE MASS]** becomes a fully embodied Pilkhuwa-built presence with believable block-print-world logic
- **[SECONDARY FORMS / SUPPORT FIELDS / BORDER ZONES / OBJECT SURFACES]** also remain under the same Pilkhuwa-born logic
- **[BLOCK RHYTHM / ALIGNMENT / PRINTED-COLOR FIELDS / MOTIF HIERARCHY / REPEAT STRUCTURE]** become world-organizing elements still governed by print structure
- **[SURROUNDING WORLD / ENVIRONMENT / SPATIAL FIELD]** becomes a believable scene-world generated by Pilkhuwa Print intelligence rather than generic realism

- **[IF FIGURES ARE PRESENT]** faces, bodies, posture, grouping, object logic, and environment logic must all remain Pilkhuwa-born, not realism-first

Increase:

- full world embodiment
- spatial separation
- object presence
- environmental orchestration
- repeat-to-world transformation
- motif-structure readability
- whole-frame coherence

Do not lose:

- block-repeat identity
- printed-cloth logic
- motif specificity
- alignment discipline
- repeat-field structure
- Pilkhuwa refinement
- textile-born organization
- whole-frame Pilkhuwa identity

Do not use:

- realistic world with one printed cloth
- generic cinematic interior scene
- style-as-textile patch only
- style-as-floral motif only
- style-as-decorative repeat only
- style-as-surface ornament only
- premium finish overpowering print structure
- reality with Pilkhuwa flavor added later

Success condition:

the result feels like Pilkhuwa Print itself has become a believable full world.

Failure condition:

the result feels like reality has been coated with Pilkhuwa Print.

Image-to-Image

Convert this source image into the **world-depth translation of Pilkhuwa Print from Uttar Pradesh**.

Preserve the source image's main subject logic, action logic, relationship logic, and readability, but rebuild the entire image through Pilkhuwa Print's source grammar translated into **full world-depth**.

Replace generic forms with Pilkhuwa-built printed-world presences. Replace ordinary surfaces with carved-block repeat construction. Replace generic decorative order with nature-and-cultural-symbol motif hierarchy, repeat-layout organization, printed-color structure, and alignment rhythm. Replace realism-first staging with Pilkhuwa-born block-print-world order. If figures are present, transform faces, bodies, posture, grouping, silhouette, object logic, and environment logic through Pilkhuwa Print grammar, not realism.

Allow the result to gain complete material embodiment, stronger spatial separation, object presence, scene completion, and environmental orchestration. But do not let the image become generic reality with Pilkhuwa Print added later. The whole world must remain Pilkhuwa-born.

Do not stylize only one stole, one tablecloth, one cushion, one bedcover, one border, or one printed patch while leaving the rest of the world generic. Do not make it a realism scene with a print insert. Do not let the source grammar weaken as depth increases. The final result must feel like **the source image has been fully reauthored as a believable full world generated by Pilkhuwa Print itself**.
