

Tanjore - Tamil Nadu

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Tanjore Painting from Tamil Nadu**, treating it as a **Thanjavur-rooted devotional gold-embossed panel-painting system** built through **central sacred-icon hierarchy, frontal devotional readability, rich saturated color, gold-foil and jewel-like embellishment, and temple/court ornamental authority**.

Build the image as if it genuinely belongs inside the native Tanjore sacred-panel tradition itself. The image must be governed first by **central sacred-icon dominance, frontal devotional presentation, gold-embossed hierarchy, and panel-based sacred order**, not by realism-first illustration, generic devotional painting, decorative gold art, or modern ornamental styling.

The main deity or sacred figure must dominate the whole panel. The figure must feel iconically stabilized, front-facing or devotionally frontal, composed, regal, and sacredly readable at first glance. The composition must not behave like a cinematic scene or narrative environment. It must behave like a sacred image-panel.

Gold must function as **hierarchy**, not as decorative shine. Gold-bearing zones such as crowns, jewelry, sacred framing, arches, and major ornamental accents must feel structurally important and emboss-like. Jewel-like accents must feel concentrated, precious, controlled, and sacredly ranked, not randomly luxurious.

Color must feel rich, saturated, and icon-supportive, especially through strong devotional reds, blues, greens, yellows, and gold-coordinated contrasts. The background must support the central icon rather than compete with it. Floral, celestial, animal, temple-derived, or sacred support motifs may appear, but they must remain subordinate to the devotional center.

The full image must feel like a sacred Thanjavur panel: polished, ornamental, devotionally authoritative, temple/court-derived, and iconically stable.

Do not make this generic South Indian devotional art, flat gold-colored painting, realism-first sacred illustration, decorative wall art with deity motifs, or generic ornamented heritage painting. The final result must feel like **the real Tanjore system itself made the whole image**.

Reusable Variable Template

Create **[SUBJECT / SACRED PANEL / DEVOTIONAL IMAGE / FIGURAL SACRED PANEL]** in the pure authentic source-truth visual logic of Tanjore Painting from Tamil Nadu.

Style system that must remain unchanged:

- central sacred-icon hierarchy
- frontal devotional readability
- gold-embossed hierarchy
- jewel-like embellishment logic
- rich saturated devotional color
- temple/court ornamental authority
- panel-space sacred order
- whole-frame Tanjore consistency

Translate the image like this:

- **[MAIN DEITY / MAIN SACRED FIGURE / MAIN ICON]** becomes the dominant devotional center of the entire image
- **[FACE / BODY / POSTURE / GESTURE]** must feel iconically stabilized, regal, sacred, and frontally legible
- **[GOLD ZONES / CROWNS / JEWELRY / SACRED FRAMING]** must feel hierarchically important, embossed, and precious
- **[COLOR FIELDS / CLOTHING / ORNAMENT / SUPPORT AREAS]** must remain rich, saturated, and devotionally structured
- **[BACKGROUND / ARCH / FLORAL / CELESTIAL / SUPPORT MOTIFS]** must stay secondary and support the central icon
- **[IF FIGURES / OBJECTS / ARCHITECTURE APPEAR]** they must all be reorganized through Tanjore icon-panel logic, not realism

Keep:

- sacred center
- frontality
- icon authority
- gold hierarchy
- jewel concentration
- devotional color richness
- panel logic
- whole-frame consistency

Avoid:

- generic devotional illustration
- realism-first sacred figure
- decorative gold art
- cinematic staging

- atmospheric scene depth
- uncontrolled luxury ornament
- generic background storytelling
- realism with Tanjore accents added later

The final result must feel like a true Thanjavur devotional gold-panel system, not a decorative religious painting wearing Tanjore cues.

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Tanjore Painting from Tamil Nadu**.

Preserve the source image's **subject count, core action, main relationships, and readability**, but rebuild the full image through Tanjore grammar. Replace generic sacred illustration with central-icon panel hierarchy. Replace realism-first anatomy with iconically stabilized devotional form. Replace decorative gold color with true gold-embossed hierarchy. Replace random ornament with jewel-ranked sacred emphasis. Replace atmospheric or narrative background with supportive panel-space logic.

If the image includes deity or sacred figures, they must become frontally readable, composed, and ornamentally ranked through Tanjore logic. If background elements appear, they must support the sacred center and not compete with it. If objects or architecture appear, they too must be reorganized through Tanjore's icon-panel order rather than remain generic.

Do not simply add gold and jewelry to a normal devotional image. Do not keep realism underneath. Do not let ornament overwhelm the sacred center. The final result must feel as if the original image has been fully reauthored inside the true source-truth Tanjore system.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in the **creative artisan translation of Tanjore Painting from Tamil Nadu**, preserving the same deep source grammar as the authentic source-truth version, but translating it into a **richer, more imaginative, more dimensional 2D + 3D hybrid visual system**.

Keep the core Tanjore grammar fully unchanged: central sacred-icon hierarchy, frontal devotional readability, gold-embossed hierarchy, jewel-like embellishment logic, rich

devotional color structure, temple/court ornamental authority, and Tanjore-born panel composition. Do not turn this into luxury devotional décor, premium religious concept art, gold-texture mockup, ornate fantasy sacred illustration, or realism with Tanjore decoration layered on top.

Translate that same grammar into a more alive and dimensional visual language. The image must no longer behave only as literal sacred panel description, but it must also not become full realistic scene-world depth. It should become a **creative hybrid sacred-image system** where Tanjore's own icon-panel logic generates richer form, stronger visual invention, and more dimensional presence.

The transformation must affect the whole frame. If figures appear, faces, bodies, silhouettes, posture, grouping, and figure relations must all be rebuilt through Tanjore icon logic. If objects appear, they must be shaped through gold-ranked sacred order, jewel concentration, and panel-centered hierarchy. If environment appears, it must grow from Tanjore's own icon-panel structure rather than remain generic. The sacred panel system must become the larger organizing intelligence, not just an ornamental surface.

Dimensionality must come from Tanjore itself: from sacred centrality, frontal presence, gold-emphasis ranking, jewel-accent hierarchy, rich color-block authority, ornamental discipline, and temple/court dignity. Do not solve dimensionality through generic rendering habits, realism-first anatomy, cinematic religious staging, or premium decorative finish.

Do not create:

luxury devotional concept render, gold-surface mockup, ornate fantasy sacred art, decorative heritage branding, or a generic dimensional image decorated later by Tanjore.

The final result must feel like **the same Tanjore grammar has entered a richer, more imaginative, more dimensional artisan translation without losing itself.**

Reusable Variable Template

Create **[SUBJECT / IMAGE / FIGURAL SYSTEM / SACRED PANEL WORLD]** in the **creative artisan translation of Tanjore Painting from Tamil Nadu.**

Keep unchanged:

- central sacred-icon hierarchy
- frontal devotional readability
- gold-embossed hierarchy
- jewel-like embellishment logic
- rich devotional color structure
- temple/court ornamental authority
- Tanjore compositional DNA
- whole-frame style consistency

Translate it into a richer dimensional hybrid visual system like this:

- **[MAIN FIGURE / MAIN ICON / MAIN SACRED CENTER]** becomes a Tanjore-built presence with more dimensional life, but still governed by sacred centrality and icon-panel order
- **[SECONDARY FIGURES / SUPPORT FORMS / SUPPORT OBJECTS]** also transform through the same Tanjore grammar rather than generic styling
- **[GOLD ZONES / JEWEL ZONES / ORNAMENTAL HIERARCHY / PANEL FRAMING]** become more spatially alive and structurally expressive while remaining sacredly ranked
- **[COLOR BLOCKS / CLOTH / SUPPORT FIELDS / SACRED SURFACE AREAS]** become richer and more dimensional while staying devotionally structured
- **[IF FIGURES APPEAR]** faces, bodies, posture, grouping, silhouette, object logic, and environment logic must all be rebuilt through Tanjore order
- **[IF ENVIRONMENT APPEARS]** it must grow from icon hierarchy, ornamental ranking, and sacred-panel order rather than realism

Increase:

- dimensional presence
- visual richness
- artisan-like reinterpretation
- hybrid 2D + 3D form
- structural clarity
- whole-frame transformation
- imaginative sacred spatial layering

Do not use:

- luxury devotional décor logic
- gold-texture-only translation
- generic realism with sacred props
- fantasy-religious concept-art habits
- cinematic sacred staging
- generic environment with Tanjore overlay
- only surface ornament carrying the style

Success condition:

the result feels like the same Tanjore style has been artistically translated into a richer dimensional hybrid system.

Failure condition:

the result feels like a generic dimensional image decorated later by Tanjore.

Image-to-Image

Convert this source image into the **creative artisan translation of Tanjore Painting from Tamil Nadu**.

Preserve the source image's core subject logic, action logic, grouping logic, and readability, but rebuild the full image through Tanjore's internal grammar translated into a richer, more dimensional 2D + 3D hybrid visual system.

Replace generic sacred illustration with icon-panel authority. Replace realism-first bodies and faces with Tanjore-born sacred form. Replace decorative gold with gold-ranked hierarchy. Replace luxury ornament with jewel-structured sacred emphasis. Replace generic background space with supportive Tanjore panel order. If figures are present, transform faces, bodies, silhouettes, posture, grouping, object logic, and surrounding structure through Tanjore logic, not realism. If objects or environment are present, they must also be rebuilt through Tanjore's internal order instead of remaining generic.

Let the image gain more dimensional life, richer sacred form, more imaginative layering, and stronger whole-frame coherence. But do not turn it into luxury devotional art, gold fantasy illustration, or realism with Tanjore accents added afterward.

Do not style only the gold surface. Do not leave the rest of the frame generic. The final result must feel like **the source image has been fully reauthored through a creative artisan translation of Tanjore**.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in the **fully resolved believable real-world 3D translation of Tanjore Painting from Tamil Nadu**, preserving the same authentic source grammar but pushing it into its **most complete, most embodied, most scene-capable volumetric world**.

Keep the same deep Tanjore visual intelligence fully unchanged: central sacred-icon hierarchy, frontal devotional readability, gold-embossed hierarchy, jewel-like embellishment logic, rich devotional color structure, temple/court ornamental authority, and Tanjore-born panel composition. Do not turn this into generic devotional realism, luxury sacred realism, cinematic religious illustration, or a normal world with Tanjore gold ornament added on top.

Now convert that same grammar into a believable volumetric world. The result must have believable volume, believable material behavior, believable spatial separation, believable object presence, believable environmental completion, and believable three-dimensional world logic. But every visible part of the image must still be generated by Tanjore grammar.

If figures are present, they must be rebuilt through Tanjore-born sacred structure, not normal realism wearing gold jewelry. If objects appear, they must be shaped through icon hierarchy, gold-ranked sacred order, and jewel-structured emphasis. If environment appears, it must be

generated by panel-born sacred organization, ornamental ranking, and temple/court authority. The world must not become ordinary reality with a Tanjore figure or gold-decorated sacred zone inserted into it.

Depth must now become full scene-world depth, but it must remain style-controlled. The source grammar must still govern figure design, shape logic, composition logic, material identity, environment logic, and total scene organization.

Do not let realism replace the style. Do not let the style survive only in crowns, jewelry, borders, gold surfaces, or props. Do not create a premium cinematic makeover stronger than the source grammar. The final image must feel like **Tanjore itself has become a believable full world.**

Reusable Variable Template

Create **[SUBJECT / SCENE / FIGURAL WORLD / EXPANDED TANJORE WORLD]** in the **fully resolved believable real-world 3D translation of Tanjore Painting from Tamil Nadu.**

Keep unchanged:

- central sacred-icon hierarchy
- frontal devotional readability
- gold-embossed hierarchy
- jewel-like embellishment logic
- rich devotional color structure
- temple/court ornamental authority
- Tanjore compositional DNA
- whole-frame style consistency

Translate it into full world-depth like this:

- **[MAIN FORM / MAIN FIGURE / MAIN GROUP / MAIN SACRED CENTER]** becomes a fully embodied Tanjore-built presence with believable sacred-world logic
- **[SECONDARY FORMS / SUPPORT OBJECTS / SUPPORT FIGURES]** also remain under the same Tanjore-born logic
- **[GOLD ZONES / JEWEL ZONES / ORNAMENTAL FRAMING / SACRED RANK FIELDS]** become volumetric world-organizing elements still governed by sacred hierarchy
- **[SURROUNDING WORLD / ENVIRONMENT / SPATIAL FIELD]** becomes a believable scene-world generated by Tanjore icon-panel intelligence rather than generic realism
- **[IF FIGURES ARE PRESENT]** faces, bodies, posture, grouping, silhouette, object logic, and environment logic must all remain Tanjore-born, not realism-first

Increase:

- volumetric world-building
- material-light interaction
- spatial separation
- scene completeness
- object presence
- environmental orchestration
- full-frame readability
- sacred-hierarchy-to-world transformation

Do not lose:

- central icon authority
- frontality
- gold hierarchy
- jewel-ranked sacred emphasis
- devotional color structure
- temple/court visual authority
- whole-frame Tanjore identity

Do not use:

- realistic devotional scene
- generic cinematic illustration
- style-as-gold only
- style-as-jewelry only
- style-as-border only
- style-as-surface ornament only
- premium finish overpowering source grammar
- reality with Tanjore flavor added later

Success condition:

the result feels like Tanjore itself has become a believable full world.

Failure condition:

the result feels like reality has been coated with Tanjore.

Image-to-Image

Convert this source image into the **fully resolved believable real-world 3D translation of Tanjore Painting from Tamil Nadu**.

Preserve the source image's main subject logic, action logic, relationship logic, and readability, but rebuild the entire image through Tanjore's source grammar translated into **full world-depth**.

Replace generic forms with Tanjore-built volumetric presences. Replace ordinary surfaces with sacred hierarchy construction. Replace generic decorative order with central icon dominance, frontality, gold emphasis, jewel concentration, and devotional color structure. Replace realism-first sacred staging with Tanjore-born sacred-world order. If figures are present, transform faces, bodies, posture, grouping, silhouette, object logic, and environment logic through Tanjore grammar, not realism.

Allow the result to gain complete volumetric embodiment, stronger material-light interaction, spatial separation, object presence, scene completion, and environmental orchestration. But do not let the image become generic reality with Tanjore added later. The whole world must remain Tanjore-born.

Do not stylize only the gold surface or jewelry while leaving the rest of the world generic. Do not make it a luxury devotional realism scene. Do not let the source grammar weaken as depth increases. The final result must feel like **the source image has been fully reauthored as a believable volumetric world generated by Tanjore itself.**
