

Bundeli painting - Madhya Pradesh

V1 — Authentic Style

Universal Hard Prompt

Create a full image in the **authentic source-faithful grammar of Bundeli painting / Orchha mural-court painting from Bundelkhand, Madhya Pradesh**. Build the entire frame as a **wall-born painted narrative world**, not as generic historical India, not as palace tourism imagery, and not as realism with mural texture added later. The image must feel as though it comes from the painted interior culture of **Orchha and Datia**, where **devotion, storytelling, court life, martial memory, local legend, and everyday life** can coexist in one visual language.

Use a **painted field logic**: clustered scenes, role-readable figures, court-and-devotional hierarchy, setting-aware composition, and **bold earthy-flat color zones** in deep reds, greens, blues, yellows, and ochres. Build the environment as **Bundelkhand-grounded painted setting**, with memory of Orchha, the Betwa, rugged regional landscape, palace chambers, galleries, or temple-space support where relevant. Architecture must support the painted world, not replace it.

Keep the image governed by:

- wall-field identity
- scene clustering
- role clarity
- devotion and court hierarchy
- regional setting memory
- flat, strong painted color structure

Do not allow:

- generic Rajput court painting
- palace mood without painted-world logic
- architecture-first Orchha tourism aesthetic
- mural patina as the main idea
- costume-only period styling
- realism-first anatomy and portrait faces
- soft atmospheric painting that erases Bundeli flat narrative force

Reusable Variable Template

Create **[SCENE / EVENT / SUBJECT / WORLD]** in the authentic source-faithful grammar of **Bundeli painting / Orchha mural-court painting**.

Translate the entire frame through:

- wall-born painted narrative-field logic
- clustered scene construction
- devotional and courtly hierarchy
- Bundelkhand-grounded environment
- bold earthy-flat color organization
- role-readable painted figures

Use this conversion map:

- **[MAIN FIGURES]** become painted narrative figures, not realism-first bodies
- **[DIVINE / COURT / MARTIAL / ORDINARY ROLES]** are separated clearly through hierarchy, pose, grouping, and placement
- **[ENVIRONMENT / LANDSCAPE / ARCHITECTURE]** becomes Bundeli painted setting, grounded in Orchha / Betwa / Bundelkhand memory
- **[COLOR]** becomes bold flat structural color, not atmospheric realism
- **[SPACE]** becomes painted scene-space, not modern cinematic realism
- **[ARCHITECTURAL ELEMENTS]** support the painted world rather than becoming the style by themselves

Keep:

- painted scene logic
- court/devotional/worldly coexistence
- wall-field coherence
- Bundelkhand setting truth
- strong color contrast as structure

Avoid:

- generic historical mural
- architecture-only Orchha look
- realism with costume overlays
- texture-only fresco effect
- one hero-poster image replacing clustered narrative field

Image-to-Image

Convert this source image into the **authentic source-faithful world of Bundeli painting / Orchha mural-court painting**.

Preserve the source image's **subject count, main action, role relations, and basic readability**, but rebuild the entire frame as a **wall-born painted narrative field**. Replace modern realism, neutral illustration, or cinematic space with:

- Bundeli painted figure logic
- clustered scene construction

- devotional and courtly hierarchy
- Bundelkhand-grounded setting
- bold earthy-flat color law
- mural-world coherence

Do not simply add historical costume, wall texture, or Orchha architecture to the existing image. Rebuild the image so it feels like the source scene has become part of an **Orchha-Bundeli painted world**. Architecture must support the painted logic, not dominate it. The final image should read as a narrative mural-world, not as realism with historical decoration.

V2 — Artisan Translation

Universal Hard Prompt

Create a full image in the **authentic handcrafted dimensional version of Bundeli painting / Orchha mural-court painting**. Keep the source Bundeli mural grammar completely intact, but translate it into a **richer dimensional painted image-world** without handing control over to ordinary realism. The result must still feel **paint-authored**, **wall-world-derived**, and **scene-clustered**, but with stronger depth relation between figures, setting, and architectural support.

Retain the full source law:

- wall-field identity remains primary
- painted scene-clustering remains primary
- devotion, court, martial memory, and ordinary life remain able to coexist
- Bundelkhand setting memory remains active
- architecture remains a carrier
- bold earthy-flat color remains structural

Allow richer dimensional presence through:

- more tactile painted scene depth
- stronger relation between foreground and background clusters
- more legible environmental layering
- more present mural-space transitions
- stronger object-to-setting hierarchy

Do not allow:

- realism-first historical painting
- generic miniaturist prettiness
- architecture taking over the image

- atmospheric softness replacing Bundeli force
- decorative heritage romanticism

Reusable Variable Template

Create **[SCENE / EVENT / SUBJECT / WORLD]** in the **authentic handcrafted dimensional version of Bundeli painting / Orchha mural-court painting**.

Translate the entire frame through:

- painted wall-field logic
- clustered narrative scene-building
- devotional/court/worldly hierarchy
- Bundelkhand-grounded setting
- stronger dimensional painted depth
- bold earthy-flat color as structural law

Use this map:

- **[MAIN FIGURES]** become richer painted presences without turning realistic
- **[SCENE CLUSTERS]** become more layered and spatially articulated
- **[ENVIRONMENT / LANDSCAPE / COURT / TEMPLE SPACE]** becomes more dimensional while staying paint-authored
- **[ARCHITECTURAL SUPPORT]** becomes more spatially legible without becoming the main style
- **[COLOR AND VALUE]** remain painted and bold, not cinematic-naturalistic

Keep:

- mural-world truth
- narrative clustering
- Bundeli hierarchy
- regional setting memory
- paint-led structure

Avoid:

- realism-first depth
- generic historical mural prettiness
- architecture-led composition
- costume-only transformation
- fresco texture as substitute for style logic

Image-to-Image

Convert this source image into the **authentic handcrafted dimensional world of Bundeli painting / Orchha mural-court painting**.

Preserve the original image's **main action, subject relationships, and readability**, but rebuild the entire frame as a **dimensional painted Bundeli mural-world**. Replace neutral realism or generic illustration with:

- role-readable painted figures
- clustered devotional/court/worldly scene logic
- Bundelkhand-grounded setting
- architecture as mural support
- bold earthy-flat color structure
- richer painted depth without realism takeover

Do not simply add historical costume, old-wall surface, or palace imagery. Rebuild the scene so it feels like a **painted Bundeli narrative field gaining dimensional presence**, not like realism decorated with mural cues.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **fully volumetric cinematic world** generated by the grammar of **Bundeli painting / Orchha mural-court painting**. The full scene must feel as though **Bundeli mural-world logic itself became inhabitable reality**. This is not ordinary realism with Bundeli costumes, Orchha fort views, and old wall texture. The entire frame must obey:

- painted narrative hierarchy
- devotional and court clustering
- martial and ordinary-life coexistence
- Bundelkhand-grounded environment
- architecture as mural-supportive world structure
- bold earthy-flat color law translated into cinematic organization

Build a believable cinematic world, but keep it governed by painted logic:

- figures remain role-readable before they become psychologically realistic
- scenes remain cluster-readable before they become naturalistic
- environment remains Orchha/Bundelkhand grounded
- architecture remains part of the painted-world law
- color remains structural, not merely atmospheric

Do not allow:

- generic historical India realism
- palace tourism imagery
- realism plus mural texture
- architecture replacing painting
- costume-only Bundeli styling
- cinematic realism with only a palette shift

Reusable Variable Template

Create **[SCENE / WORLD / EVENT / SUBJECT]** as a **fully volumetric cinematic version of Bundeli painting / Orchha mural-court painting**.

Translate the whole frame through:

- painted narrative-world logic
- devotional/court/worldly hierarchy
- clustered scene-building
- Bundelkhand setting memory
- architecture as supportive mural-world carrier
- bold earthy-flat color structure translated cinematically

Use this map:

- **[MAIN FIGURES]** become cinematic Bundeli painted-world beings, not ordinary realistic people
- **[DIVINE / ROYAL / MARTIAL / ORDINARY LAYERS]** remain clearly organized in one visual language
- **[ENVIRONMENT / LANDSCAPE / RIVER / PALACE / TEMPLE SPACE]** becomes Bundelkhand-grounded cinematic setting authored by mural logic
- **[ARCHITECTURE]** supports the painted world instead of replacing it
- **[LIGHT / VALUE / COLOR]** reveal a cinematic world still governed by Bundeli painted structure

Keep:

- narrative field intelligence
- hierarchy
- regional setting truth
- court/devotional/worldly coexistence
- architecture-as-carrier
- paint-authored organization

Avoid:

- generic historical realism
- heritage-postcard Orchha

- mural texture overlay
- costume-first translation
- scene-naturalism that erases Bundeli painted clustering

Image-to-Image

Convert this source image into a **fully volumetric cinematic world generated by Bundeli painting / Orchha mural-court grammar**.

Preserve the original image's **subject count, main action, scene readability, and key relationships**, but rebuild every visible element through:

- Bundeli role-readable figure logic
- devotional/court/worldly clustering
- Bundelkhand-grounded environment
- Orchha mural-support architecture
- bold structural color
- cinematic space ruled by painted-world hierarchy

Do not merely add Orchha palace elements, period clothing, mural textures, or earthy colors. Rebuild the entire frame so it feels like the original scene has become a **cinematic Bundeli mural-world**. The final result must be world-authored by the style, not surface-decorated by it.
