

Pithora painting - Bhil / Bhilala - Madhya Pradesh

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic ritual wall-painting grammar of **Pithora painting from the Bhil and Bhilala communities of western Madhya Pradesh, especially Dhar and Jhabua**. Build the image as a **vow-linked household sacred wall-field**, not as generic tribal mural decoration, not as modern gallery folk art, and not as contemporary Bhil dot-painting. The whole image must feel like a consecrated domestic wall world centered on **Baba Pithora**, where **horses act as major divine carriers**, the wall behaves as a sacred support, and the field is filled through **distributed ceremonial occupancy** rather than through one isolated poster-like subject.

Use a **flat wall-bound painted language** with direct figure construction, painted contours, strong symbolic clarity, and whole-field ritual order. The image should feel born from a **painted household wall**, not from canvas, print, polished illustration, or realistic environment-building. Keep the composition organized as a **sacred field**, with horses, riders, deities, attendant presences, animals, celestial or village-linked motifs, and supporting symbolic elements all belonging to one ritual grammar. The image must feel auspicious, vow-linked, ceremonially active, and deity-centered rather than merely festive or decorative.

Preserve the identity of Pithora as:

- a ritual Bhil / Bhilala wall system
- Baba Pithora-centered sacred image-world
- horse-as-divine-carrier image logic
- distributed wall occupancy
- border and field order
- bright ritual color energy used in service of sacred order, not as the main identity

Keep the image flat and wall-loyal. Do not introduce western perspective depth, scenic realism, naturalistic body modeling, cinematic lighting logic, generic ethnic mural styling, decorative horse-pattern wallpapering, or surface-only folk cues. The whole frame must feel generated by one Pithora wall intelligence.

Reusable Variable Template

Create **[SUBJECT / SCENE / EVENT]** in the authentic ritual wall-painting grammar of **Pithora painting from the Bhil and Bhilala communities of western Madhya Pradesh**.

Core style system to preserve:

- sacred household wall-field identity

- Baba Pithora-centered ritual world
- vow-linked auspicious ceremonial logic
- horses as major divine carriers
- distributed ceremonial occupancy across the field
- direct flat painted figure language
- painted wall support memory
- whole-frame unity under one ritual mural grammar

Translate the image like this:

- **[MAIN SACRED SUBJECT / MAIN EVENT]** becomes the core deity-linked or vow-linked field presence
- **[HORSES / RIDERS / CARRIERS]** become sacred divine-carrier presences, not decorative repeats
- **[SECONDARY FIGURES / ANIMALS / MOTIFS]** become distributed ritual presences that support the wall-field
- **[ENVIRONMENT / GROUND / SKY / HOUSEHOLD / VILLAGE ELEMENTS]** become wall-bound painted supports inside the same sacred grammar
- **[BORDERS / THRESHOLDS / FRAMING]** become field-order devices, not generic decoration

Keep:

- flat wall-born image behavior
- sacred field order over realism
- bright ritual color used structurally
- whole-wall occupancy
- Bhil / Bhilala Pithora identity
- same-world belonging across all visible elements

Avoid:

- generic tribal mural look
- decorative horse art
- modern Bhil dot-painting drift
- realistic depth or landscape space
- poster-style centralization
- random folk motifs detached from ritual order
- any important element staying in another visual language

Image-to-Image

Convert this source image into the authentic ritual wall-painting grammar of **Pithora painting from the Bhil and Bhilala communities of western Madhya Pradesh**.

Preserve the source image's **subject count, core relationships, major action, and basic scene readability**, but rebuild the entire image as a **vow-linked sacred household wall-field** centered on **Pithora ritual order**. Replace ordinary realism, ordinary illustration, or neutral decorative styling with a **flat painted wall-born field**, where **horses function as divine carriers**, figures become direct symbolic presences, and the whole image behaves like a consecrated Bhil / Bhilala ritual mural rather than a generic picture.

Do not simply paste horses, bright colors, or tribal-looking motifs onto the original image.
Rebuild:

- figure logic
- animal logic
- field logic
- border logic
- background logic
- spatial logic

through one Pithora grammar. The wall must feel sacred, occupied, auspicious, and vow-linked. Every visible element must belong to one ritual mural world.

Do not let the result become:

- decorative folk art
- colorful horse wallpaper
- contemporary dotted Bhil painting
- scenic village illustration
- realism with ethnic surface treatment
- a normal image with a few Pithora motifs added later

V2 — Artisan Translation

Universal Hard Prompt

Create an image in the **authentic handcrafted dimensional version of Pithora painting from the Bhil and Bhilala communities of western Madhya Pradesh**. The image must still be rooted in the **ritual household wall-field system** of Pithora painting, centered on **Baba Pithora, vow-linked auspicious purpose, horses as major divine carriers**, and **distributed ceremonial wall occupancy**, but now translated into a richer **handmade dimensional presence**.

This is **not** full cinematic realism. This is **not** relief sculpture. This is **not** generic folk art with extra texture. The correct result should feel like a **Pithora wall-world gaining tactile handmade depth**, while still remaining wall-born, source-rooted, ceremonial, and structurally flat-first. Let painted figures, horses, animals, borders, and supporting motifs gain

slightly stronger handmade material presence, layered painted density, and controlled depth separation, but do not allow scenic realism, perspective space, or normal environmental realism to take over.

Keep the strongest source locks:

- ritual Bhil / Bhilala wall identity
- Baba Pithora-centered sacred order
- horses as divine carriers
- distributed sacred occupancy
- whole-frame unity
- bright ritual color serving sacred structure
- wall support memory stronger than free-floating illustration

Allow richer handcrafted qualities:

- thicker painted material memory
- stronger tactile separation between major motif groups
- clearer handmade surface presence
- more legible grouping hierarchy
- slight depth layering inside the field without breaking wall-logic

Do not let the image become generic dimensional folk decor, sculpted tribal relief, poster illustration, or realism with ethnic paint styling.

Reusable Variable Template

Create **[SUBJECT / SCENE / EVENT]** in the **authentic handcrafted dimensional version of Pithora painting from the Bhil and Bhilala communities of western Madhya Pradesh.**

Preserve these style-core rules:

- ritual household wall-field remains primary
- Baba Pithora-centered sacred world remains intact
- horses still function as divine carriers
- distributed ceremonial occupancy still governs the field
- whole-frame Pithora unity remains unbroken
- wall support memory stays stronger than realistic environment logic

Translate the scene like this:

- **[MAIN SUBJECT / MAIN SACRED EVENT]** becomes a source-rooted Pithora wall presence with slightly richer handmade depth
- **[HORSES / RIDERS / DIVINE CARRIERS]** become more tactile but remain sacred wall-field presences, not decorative pattern units

- **[SECONDARY FIGURES / ANIMALS / SUPPORTING MOTIFS]** become slightly more separated and handcrafted in presence while staying in one ritual mural language
- **[BACKGROUND / GROUND / SKY / HOUSEHOLD CONTEXT]** becomes a dimensionalized wall field, not a scenic environment
- **[BORDERS / THRESHOLDS / FRAMING]** remain structural field-order devices

Let these become richer:

- tactile painted-surface memory
- handmade dimensional layering
- grouping clarity
- material density
- motif separation

Keep unchanged:

- source-rooted Pithora identity
- vow-linked sacred function
- horse-carrier law
- ritual wall-field logic
- distributed ceremonial order
- whole-frame belonging

Avoid:

- sculptural relief look
- generic ethnic texture transfer
- perspective-heavy depth
- normal realism
- decorative folk postering
- contemporary Bhil dot drift
- any important element falling out of the Pithora system

Image-to-Image

Convert this source image into the **authentic handcrafted dimensional version of Pithora painting from the Bhil and Bhilala communities of western Madhya Pradesh**.

Preserve the source image's **subject count, key relationships, main action, and scene readability**, but rebuild the entire image as a **ritual Pithora household wall-field** with **slightly richer handmade dimensional presence**. The result must still read first as **source-rooted Pithora wall intelligence**, not as generic dimensional folk painting.

Translate the original image through:

- Baba Pithora-centered sacred ordering
- horse-as-divine-carrier logic
- distributed wall occupancy
- direct Bhil / Bhilala painted figure structure
- border and field-order organization
- tactile painted surface memory
- controlled handmade depth without scenic realism

Do not just add texture, shadow, or thickness to a normal image. Rebuild the full frame so it feels like a Pithora ritual mural has developed greater handcrafted dimensional presence while still remaining wall-born, consecrated, and unified.

Do not let the result become:

- sculpted mural relief
- generic textured tribal wall art
- folk illustration with fake materiality
- realistic environment with painted motifs inserted
- decorative horse-centric pattern image

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **fully volumetric cinematic version of Pithora painting from the Bhil and Bhilala communities of western Madhya Pradesh**, where the entire image becomes a believable inhabitable world generated from **Pithora ritual intelligence**. The result must still be unmistakably rooted in:

- **Baba Pithora-centered sacred order**
- **vow-linked household auspicious function**
- **horses as major divine carriers**
- **distributed ceremonial occupancy**
- **whole-frame unity under one Pithora system**

This is not ordinary realism plus folk styling. This is not a generic mythic village scene decorated with tribal motifs. This is not surface transfer. The world itself must feel as though **Pithora painting became reality**.

Translate the native wall logic into volumetric cinematic form while preserving its core laws:

- sacred field order becomes world-order
- horse-carrier hierarchy remains intact
- figures, animals, motifs, and environmental elements all belong to one ritual system
- bright ritual color remains purposeful

- reality is governed by symbolic sacred structure, not by neutral realism

Build a believable world with:

- volumetric figures and horses
- strong material presence
- cinematic depth and world readability
- environmental completion
- spatial hierarchy
- deity-centered ceremonial organization

But do not lose:

- ritual household sacred identity
- vow-linked auspicious charge
- distributed ceremonial occupancy
- wall-born structural memory
- same-world belonging across all elements

Avoid:

- realistic village scene with a few painted horses
- fantasy spectacle detached from Bhil / Bhilala Pithora logic
- ethnographic realism without sacred field structure
- poster-like focal hero staging
- decorative tribal ornament spread
- contemporary Bhil dot-painting contamination
- any important element remaining generic

Reusable Variable Template

Create **[SUBJECT / SCENE / EVENT]** as a **fully volumetric cinematic version of Pithora painting from the Bhil and Bhilala communities of western Madhya Pradesh.**

Style system that must remain unchanged:

- Baba Pithora-centered sacred image-world
- vow-linked auspicious function
- horses as divine carriers
- distributed ceremonial occupancy
- whole-frame Pithora unity
- source-rooted Bhil / Bhilala ritual logic
- bright ritual color as structural activation
- world generated from Pithora intelligence, not decorated afterward

Translate the scene like this:

- **[MAIN SUBJECT / MAIN SACRED ACTION]** becomes a fully volumetric Pithora-rooted sacred presence
- **[HORSES / RIDERS / DIVINE CARRIERS]** become major world-structuring carriers of deity logic
- **[SECONDARY FIGURES / ANIMALS / MOTIFS]** become dimensional but branch-consistent Pithora presences
- **[ENVIRONMENT / ARCHITECTURE / GROUND / SKY / DOMESTIC CONTEXT]** becomes a believable spatial world reorganized by Pithora ritual structure
- **[BORDERS / THRESHOLDS / FIELD ORDER]** are translated into world-order devices rather than discarded

Increase:

- believable volume
- spatial depth
- form separation
- cinematic readability
- environmental completion
- material richness

Do not lose:

- ritual sacred order
- horse-carrier law
- Bhil / Bhilala Pithora identity
- distributed ceremonial occupancy
- whole-frame belonging
- source-rooted structure over neutral realism

Avoid:

- generic realism
- fantasy-folk fusion
- ethnic surface ornament on a normal scene
- decorative horse motif wallpaper
- a few Pithora-coded objects inside an otherwise unrelated world
- any drift into another style system

Image-to-Image

Convert this source image into a **fully volumetric cinematic Pithora world rooted in the Bhil and Bhilala ritual wall-painting tradition of western Madhya Pradesh**.

Preserve the source image's **subject count, central action, core relationships, and basic scene readability**, but rebuild the entire scene so it feels as though **Pithora painting**

became a believable cinematic world. Replace neutral realism, generic illustration, and surface styling with a world generated by:

- Baba Pithora-centered sacred order
- vow-linked auspicious function
- horses as divine carriers
- distributed ceremonial field logic translated into spatial hierarchy
- whole-frame ritual unity

Rebuild:

- figures
- horses
- animals
- motifs
- environment
- ground
- sky
- architectural context
- background logic

through one volumetric Pithora grammar. The world must not merely display Pithora motifs. It must behave according to Pithora structure.

Do not let the output become:

- a realistic village or mythic scene with tribal painting added later
- generic cinematic folk fantasy
- a concept-art world loosely inspired by horse murals
- decorative ethnicity over ordinary realism
- only partially translated style
