

Poshina Terracotta - Gujarat

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic visual logic of the **Poshina votive terracotta horse tradition from north Gujarat**. Build the image as if it comes from a real shrine-offering world where terracotta horses are made by kumhar potters and placed in rows as devotional offerings for fulfilled vows, blessing, health, prosperity, protection, luck, or wish fulfilment. The image must read first as a **ritual terracotta horse tradition**, not as generic rustic pottery, not as decorative clay décor, not as realistic horse sculpture, and not as a premium ceramic art object.

Use true material logic. The horse and every related form must feel like **fired terracotta clay**: handmade, earthen, matte, slightly irregular, and potter-built. The form must not feel carved from stone, cast in bronze, molded in plastic, machine-finished, resin-like, glossy, or luxury-polished. Keep the objecthood strong. The horse should feel like a devotional clay offering that belongs to a living shrine tradition.

Use true form logic. The horse must be a **votive type-form**, not an anatomically realistic horse. Avoid racehorse anatomy, equestrian realism, muscular flesh logic, naturalistic hair rendering, or zoological detailing. Keep the horse upright, symbolic, stable, repeatable, shrine-readable, and handmade. The structure should feel built by a potter rather than sculpted as a one-off fine-art animal study.

Use true source-memory logic. The form should remember **hollow terracotta construction and assembled clay body logic**, not dense solid sculptural mass. Keep the body simple, clear, devotional, and serially repeatable. Slight handmade irregularity is good. Over-designed sculptural flourish is wrong.

Use true viewing ecology. If the image includes more than one horse, show them as a **field of offerings**, not as decorative duplicates. If shrine space appears, keep it devotional, earthen, simple, and subordinate to the votive clay presence. If people appear, they must support shrine-offering logic and not pull the image into generic realism. The whole frame must feel born from one Poshina terracotta offering world.

Keep the visual feeling source-faithful, handmade, devotional, clay-based, and region-grounded.

Do not make it generic village pottery.

Do not make it a fantasy clay world.

Do not make it luxury rustic décor.

Do not make it one realistic horse with terracotta texture on top.

Do not let any major element belong to another visual language.

Reusable Variable Template

Create **[SUBJECT / OBJECT / SCENE]** in the authentic visual logic of the **Poshina votive terracotta horse tradition from north Gujarat**.

Treat the style as:

a shrine-offering terracotta system,
a kumhar-made clay object tradition,
a votive horse tradition linked to blessing / vow / fulfilment,
and a repeated devotional object-world rather than generic pottery.

Core style system to preserve:

- votive terracotta horse identity
- fired clay objecthood
- handmade matte earthen surface
- symbolic horse type-form rather than realistic equine anatomy
- simple potter-built structural clarity
- hollow / assembled clay-body memory
- shrine-offering presence
- serial devotional repetition when multiple forms appear
- full-frame consistency so all visible elements belong to the same terracotta offering world

Translate the image like this:

- **[MAIN FORM / MAIN SUBJECT]** becomes a Poshina-style votive terracotta horse or terracotta offering-form with shrine-born clay presence
- **[SECONDARY FORMS / SUPPORTING OBJECTS]** also obey the same fired-clay devotional logic
- **[ENVIRONMENT / GROUND / SHRINE SPACE]** becomes an earthen shrine-supporting field shaped by repeated terracotta offering presence
- **[HUMANS / ANIMALS / ADDITIONAL ELEMENTS IF PRESENT]** must support the same votive terracotta system and must not pull the frame into normal realism

Material logic:

keep fired clay truth, matte terracotta tactility, handmade irregularity, devotional object weight, and potter-built clarity

Form logic:

keep horse-type readability, ritual simplicity, upright silhouette, repeatable structure, and non-naturalistic anatomy

Meaning logic:

keep vow / blessing / offering presence stronger than decoration

Keep:

- source-faithful devotional tone
- object-centered clarity
- shrine-linked repetition
- terracotta material truth
- handmade structural simplicity

Avoid:

- generic rustic pottery
- decorative garden-horse styling as the main reading
- realistic horse anatomy
- polished ceramic finish
- metal / stone / resin misread
- fantasy creature drift
- one styled object inside an unstylized world

Image-to-Image

Convert this source image into the authentic visual world of the **Poshina votive terracotta horse tradition from north Gujarat**.

Preserve the source image's main subject count, core object relationships, overall composition, and readable hierarchy, but rebuild the entire image through **votive terracotta logic**. Replace generic materials with fired clay. Replace realistic animal logic with shrine-born horse type-form. Replace decorative craft mood with true offering-object presence.

If the source image contains a horse, convert it into a **real Poshina votive terracotta horse**, not a realistic horse with clay texture. If the source image contains multiple objects, convert them into a shrine-born terracotta system with repeated devotional presence. If the source image contains people or environment, keep them subordinate to the clay offering world so the whole frame feels born from one terracotta tradition.

Retain source-memory:

- fired terracotta material
- handmade matte surface
- symbolic horse type
- potter-built structural simplicity
- hollow / assembled clay-body memory
- shrine-offering meaning
- devotional repetition when appropriate

Do not turn the image into generic folk décor.

Do not turn it into polished ceramic art.

Do not make it realistic equestrian sculpture.

Do not keep normal realism and only recolor it clay-brown.
Do not let background or secondary forms belong to another visual system.

V2 — Artisan Translation

Universal Hard Prompt

Create a **creative 2D + 3D image-world** rooted in the **Poshina votive terracotta horse tradition from north Gujarat**. This version must stay source-rooted, but it can expand beyond strict shrine-documentary object depiction and become a richer visual world built from **votive horse type-form, terracotta objecthood, serial repetition, earthen shrine presence, and potter-built clay intelligence**.

Keep the source grammar real. The image must still feel born from a clay offering tradition, not from generic “folk fantasy.” Fired terracotta must remain the governing material. The horse must remain the main symbolic carrier. The world may become more compositionally designed and more visually layered, but it must still feel like a world generated from **repeated devotional terracotta objects**.

Allow a controlled blend of flat ritual clarity and dimensional clay presence. The horses can organize the frame as repeated forms, clustered forms, shrine rows, terracotta thresholds, or devotional fields. The scene can become more image-rich and spatially shaped, but the style must not drift into cinematic realism, premium product photography, or generic rustic illustration.

Material logic must remain visible: fired clay, matte earthen tactility, handmade irregularity, potter-built simplicity, and devotional object truth. Form logic must remain visible: ritual horse type, upright repeated silhouette, non-anatomical but readable animal identity, and shrine-oriented rather than naturalistic equine design.

If supporting objects, structures, space, people, or background elements appear, they must all inherit the same terracotta-born grammar. The full frame must belong to one Poshina-derived offering world.

Do not make it generic “tribal clay art.”

Do not make it decorative ethnic styling.

Do not make it luxury terracotta product design.

Do not make it a fantasy temple scene with clay horses inserted afterward.

Do not let realism or décor override vow-offering meaning.

Reusable Variable Template

Create **[SUBJECT / OBJECT / SCENE]** as a **creative 2D + 3D translation** rooted in the **Poshina votive terracotta horse tradition from north Gujarat**.

Treat the style as:

a shrine-offering terracotta horse system,
a repeated devotional clay-object world,
and a potter-built material grammar that can expand into a broader image-space without losing source truth.

Preserve these style-core rules:

- votive horse identity remains primary
- fired terracotta remains the governing material
- handmade matte clay tactility stays visible
- horse type-form remains symbolic and shrine-readable
- repetition and clustering remain structural
- potter-built simplicity remains stronger than sculptural flourish
- devotional offering meaning remains stronger than decoration
- the whole frame belongs to one terracotta offering world

Translate the scene like this:

- **[MAIN SUBJECT]** becomes a Poshina-derived terracotta offering-form or horse-led clay presence
- **[SECONDARY SUBJECTS]** also obey the same terracotta devotional grammar
- **[OBJECTS / STRUCTURES / SUPPORTING ELEMENTS]** become clay-born forms shaped by repetition, votive order, and earthen object logic
- **[ENVIRONMENT]** becomes a more spatial but still shrine-born terracotta field, not generic realism

Let these become richer:

- clustering of repeated horse-forms
- broader shrine-field composition
- controlled 2D + 3D clay-world depth
- stronger image rhythm through repeated terracotta presence
- more integrated object-environment relation

Keep unchanged:

- votive function
- terracotta material truth
- non-realistic horse-type logic
- handmade source-memory
- Poshina devotional identity

Avoid:

- generic folk fantasy
- premium terracotta décor styling

- realistic horse sculpture
- generic rustic village art
- decorative repetition without offering meaning
- any major element belonging to another visual language

Image-to-Image

Convert this source image into a **creative 2D + 3D Poshina terracotta translation** from north Gujarat.

Preserve the source image's main subject count, composition, action hierarchy, and overall readability, but reconstruct all visible elements through **Poshina votive terracotta grammar**. Let the image become more spatial and compositionally rich than a simple documentary object-study, but keep it source-rooted in fired clay, shrine-offering logic, repeated horse-form rhythm, and devotional object presence.

If the source image contains one horse, transform it into a Poshina-style terracotta votive horse with handmade clay truth and shrine-born type clarity. If the source image contains multiple forms, rebuild them as a field of terracotta devotional presence. If the source image contains background, props, people, or architecture, convert them so they support the same clay-offering world rather than staying generic realism.

Retain:

- fired terracotta objecthood
- handmade matte clay surface
- repeated horse-form rhythm
- symbolic ritual horse identity
- potter-built structural memory
- devotional rather than decorative reading

Allow:

- richer scene organization
- broader terracotta worldbuilding
- controlled 2D + 3D spatial shaping
- more complete shrine-field atmosphere

Do not simply add a clay texture over a normal scene.

Do not keep realistic horse anatomy.

Do not turn it into generic "folk terracotta aesthetic."

Do not turn repetition into ornament only.

Do not let the world stop feeling like a Poshina offering system.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **full 3D realistic dimensional world** generated from the **Poshina votive terracotta horse tradition from north Gujarat**. The image must feel believable, spatial, and materially convincing, but its realism must remain controlled by **Poshina terracotta logic**, not by ordinary realism with clay horses added later.

Build the world from the inside out through Poshina grammar: votive horse identity, fired terracotta material truth, handmade matte clay tactility, potter-built structural simplicity, repeated shrine offering, and devotional object-presence. The world should feel inhabitable and complete, but still governed by the same offering logic that produces rows of terracotta horses at shrine sites.

Material logic is critical. The clay must feel genuinely fired, earthen, matte, handmade, and object-based. Do not turn terracotta into polished ceramic luxury, glossy product design, sculptural bronze logic, or photoreal animal skin translated into brown clay. Keep the clay truth stronger than the realism.

Form logic is critical. The horse must remain a **votive terracotta type-form**, not a naturalistic horse body. The realism should enrich volume, light, and spatial presence, but should never replace ritual horse-type clarity with equestrian anatomy or fine-art animal sculpture.

World logic is critical. If the frame includes humans, shrine architecture, platforms, offerings, animals, vessels, trees, pathways, or landscape, all of them must feel organized by the same terracotta-derived devotional system. The frame must read as a real Poshina-born shrine world, not as a generic realistic village or temple with a few clay objects placed inside it.

Use believable depth, light on clay surfaces, environmental completion, and repeated terracotta presence. Keep the image fully dimensional, but make sure that **devotional offering function, serial repetition, and terracotta objecthood** remain stronger than decorative realism.

Do not make it a realistic shrine scene with souvenir horses.

Do not make it premium sculptural realism.

Do not make it luxury terracotta design photography.

Do not make the horse anatomically real.

Do not let the environment become generic while only one object carries Poshina identity.

Reusable Variable Template

Create **[SUBJECT / OBJECT / SCENE]** as a **full 3D realistic dimensional world** generated from the **Poshina votive terracotta horse tradition from north Gujarat**.

Treat the style as:

a shrine-offering terracotta horse system,

a fired-clay devotional object-world,

and a believable spatial environment controlled by repeated votive terracotta logic.

Style system that must remain unchanged:

- Poshina votive horse identity
- fired terracotta material truth
- handmade matte earthen surface behavior
- symbolic horse type-form instead of naturalistic anatomy
- potter-built structural simplicity
- repeated offering logic
- shrine-linked devotional worldbuilding
- whole-frame consistency across every visible element

Translate the scene like this:

- **[MAIN SUBJECT]** becomes a fully dimensional Poshina-derived terracotta offering-form or horse-led ritual presence
- **[SECONDARY SUBJECTS]** become dimensional but still terracotta-world-consistent forms
- **[OBJECTS / PROPS / STRUCTURES]** become tactile devotional clay-world elements shaped by offering logic
- **[ENVIRONMENT]** becomes a believable spatial field organized by shrine repetition, terracotta accumulation, and earthen ritual presence

Increase:

- believable volume
- light-material interaction on clay
- spatial depth
- environmental completion
- full-frame cohesion
- repeated terracotta field presence

Do not lose:

- votive meaning
- terracotta objecthood
- non-naturalistic horse type
- potter-built source-memory
- devotional repetition
- Poshina regional identity

Avoid:

- generic realism with clay props
- realistic horse anatomy
- decorative garden-horse look
- polished ceramic luxury finish
- museum-sculpture logic
- any non-Poshina visual language taking over the frame

Image-to-Image

Convert this source image into a **full 3D realistic Poshina terracotta world** from north Gujarat.

Preserve the source image's main subject count, object hierarchy, spatial composition, and scene readability, but rebuild all visible forms through **Poshina votive terracotta grammar**. Convert ordinary materials into believable fired clay. Convert decorative animal logic into votive horse-type logic. Convert generic space into a shrine-born devotional terracotta world.

If the source image contains a horse or horse-like central form, transform it into a fully dimensional Poshina votive terracotta horse with handmade clay truth, ritual type-form clarity, and shrine-offering presence. If the source image contains multiple objects or figures, rebuild them so they all belong to one terracotta-derived devotional system. If the source image contains environment, architecture, people, or supporting objects, translate them so the whole frame feels born from repeated terracotta offering logic rather than from normal realism.

Retain:

- fired clay truth
- matte handmade surface
- symbolic votive horse identity
- potter-built structural simplicity
- repeated offering-world presence
- shrine-linked devotional meaning

Increase:

- believable volume
- light on terracotta surfaces
- environmental depth
- spatial completion
- dimensional coherence

Do not paste terracotta over an ordinary scene.

Do not keep realistic horse-body logic under the clay finish.

Do not turn the image into rustic décor realism.

Do not make it a high-end sculptural showroom world.
Do not allow one major element to remain in another visual language.
