

Temple Mural - Karnataka

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic source-faithful visual logic of **Temple Mural from Karnataka**, specifically a **Vijayanagara-period temple-ceiling and mandapa mural system** rooted in the **Virupaksha Temple at Hampi**. Treat this as a **sacred architectural painting tradition**, not as generic South Indian mural art, not as domestic wall painting, and not as portable mythological panel art.

Build the image as if it belongs to a **temple ceiling or mandapa surface**. The painted field must feel inseparable from sacred architecture. The composition must behave like a **panelized temple program**: clearly bounded sacred panels, inset divisions, ornamental framing bands, and mythological or puranic figure groups arranged for temple-space viewing rather than for a framed picture.

The subject world should come from:

- divine and epic narratives
- Mahabharata-related episodes
- Siva-related themes
- sacred marriage scenes
- processional or royal-devotional scenes
- richly adorned gods, goddesses, and divinities in a Vijayanagara temple atmosphere

The image must preserve the real temple-mural logic:

- ceiling or overhead orientation
- narrative episodes arranged in panels
- inset sub-panels or internal divisions where useful
- ornamental border bands structuring the painted field
- sacred figures integrated into architectural order
- temple-space devotional storytelling rather than decorative spread

The figures should feel formal, temple-bound, and narratively grouped rather than isolated like poster-icons. Costumes, jewelry, crowns, and sacred adornment should feel rich and period-sensitive, with a Vijayanagara court-temple atmosphere. The painted field should feel measured, bounded, and architecturally contained.

Whole-frame rule: if the image includes ceiling field, painted panels, border bands, divine figures, mythological scenes, inset structures, or surrounding temple architecture, all of them must belong to one **Karnataka temple-mural grammar**. The style must not stop at “old mural texture.” Surface, composition, narrative sequencing, framing, and temple-space identity must all become this branch.

Do not generate:

- generic South Indian mural art
- folk or domestic wall painting
- free-spread decorative temple painting
- portable mythological panel art
- heritage texture with generic devotional imagery underneath
- mural styling detached from temple architecture
- ceiling painting with no panel order

The final image must feel like a **true Karnataka temple mural: sacred ceiling or mandapa painting, panelized narrative order, divine and epic figure groups, ornamental framing, and Vijayanagara temple-space storytelling integrated into architecture itself.**

Reusable Variable Template

Create **[SUBJECT / SCENE / TEMPLE-SPACE MOMENT]** in the authentic source-faithful visual logic of **Temple Mural from Karnataka**, treating it as a **sacred temple-ceiling or mandapa painting system** rooted in **Vijayanagara-Hampi mural culture**.

Core style system to preserve:

- temple-architectural surface identity
- ceiling or mandapa placement
- panelized sacred narrative structure
- inset logic when needed
- divine and epic figure grouping
- ornamental border framing
- Vijayanagara temple-space atmosphere
- whole-surface architectural integration

Translate the image like this:

- **[SURFACE / ARCHITECTURAL ZONE]** becomes a real temple ceiling or mandapa field
- **[MAIN NARRATIVE / FIGURE GROUP]** becomes a sacred episode arranged as a temple panel
- **[BORDER / FRAMING SYSTEM]** becomes structural and ornamental, not decorative-only
- **[INSET / SUB-PANEL LOGIC]** becomes part of the narrative organization where useful
- **[COSTUME / JEWELRY / DIVINE DETAIL]** becomes rich and Vijayanagara-court-temple in feeling
- **[FULL FRAME]** must read as one temple-mural system integrated into sacred architecture

Keep:

- temple surface first
- ceiling/mandapa identity first
- panel order first
- sacred narrative grouping
- border framing
- Vijayanagara atmosphere
- whole-frame coherence

Avoid:

- generic mural spread
- domestic wall-painting logic
- framed devotional art logic
- decorative temple wallpapering
- mythological illustration detached from architecture
- heritage texture only

Image-to-Image

Convert this source image into the authentic source-faithful visual logic of **Temple Mural from Karnataka**, specifically a **Virupaksha-type Vijayanagara temple-ceiling and mandapa mural system**.

Preserve the source image's main subject count, broad figure arrangement, and readable narrative structure, but rebuild the full image through **sacred temple-surface identity, panelized organization, inset logic, divine and epic figure grouping, ornamental framing bands, and Vijayanagara temple-space atmosphere**. Replace any generic mural, decorative temple art, folk wall-painting behavior, or portable mythological picture logic with a true Karnataka temple-mural system.

If the source image contains mythological figures, rebuild them as part of a temple narrative panel. If it contains architecture, make that architecture feel like ceiling or mandapa support. If it contains decorative borders, rebuild them as structural sacred framing. If it contains one broad scene, reorganize it into a Virupaksha-type panel system rather than leaving it as free pictorial spread.

Do not simply add an aged mural look to the source image. Do not keep another painting language underneath. Rebuild the full image so **surface, panel order, narrative sequence, border framing, divine figure grouping, and temple-space identity all become one authentic Karnataka temple-mural system**.

V2 — Artisan Translation

Universal Hard Prompt

Create a **creative 2D + 3D translation** of **Temple Mural from Karnataka**. This is not generic mythological mural styling, not heritage texture transfer, and not simply placing epic figures on a painted ceiling. It should feel like the full **Karnataka temple-mural grammar** has begun to reorganize the image more powerfully while still remaining unmistakably rooted in the **Virupaksha-Hampi ceiling and mandapa tradition**. The source anchor remains the documented **ceiling program, panel arrangement, and Vijayanagara narrative-devotional atmosphere**.

Let the architectural surface stop behaving like a neutral support and become the main compositional force. Let the ceiling field become more active. Let panel divisions, inset logic, border framing, and sacred narrative grouping become more visually decisive. Let divine figures, processions, mythic episodes, and sacred events feel more strongly woven into temple architecture. But keep the image unmistakably **temple-architectural mural**, not free mural spread and not portable panel art.

This version must transform more than surface. Change:

- the **surface logic** so the ceiling or mandapa field becomes compositionally active
- the **panel system** so sacred episodes become more structurally legible
- the **inset rhythm** so internal divisions shape the whole reading
- the **figure-group logic** so narrative scenes become more architecturally ordered
- the **border system** so framing becomes more integrated into temple-space design
- the **temple-space atmosphere** so the full image feels like a sacred painted architecture, not just a mural image

Keep the source truth intact:

- temple surface remains primary
- ceiling or mandapa identity remains active
- panel order remains stronger than free-spread painting
- mythological and puranic storytelling remains structured
- Vijayanagara sacred-court atmosphere remains present
- the style remains architectural and temple-bound, not decorative

Do not generate:

- generic South Indian mural design
- domestic wall-painting drift
- free pictorial spread with no panel order
- decorative border transfer without architectural logic
- old mural texture on generic mythological art
- portable devotional-art logic

The final result must feel like **Karnataka temple-mural grammar has reauthored the image through sacred ceiling/mandapa surface, panel hierarchy, inset rhythm, divine figure grouping, border containment, and Vijayanagara temple-space atmosphere.**

Reusable Variable Template

Create **[SUBJECT / SCENE / TEMPLE-SPACE MOMENT]** as a **creative 2D + 3D translation of Temple Mural from Karnataka.**

Preserve these style-core rules:

- temple-architectural surface remains primary
- ceiling or mandapa identity remains active
- panelized sacred narrative structure remains structural
- inset logic remains available where needed
- divine and epic figure groups remain temple-bound
- ornamental border framing remains integrated
- the whole image must be rebuilt through Karnataka temple-mural grammar

Translate the image like this:

- **[SURFACE / ARCHITECTURAL FIELD]** becomes a stronger active temple-ceiling or mandapa body
- **[MAIN PANEL / NARRATIVE GROUP]** becomes more structurally woven into sacred order
- **[INSET STRUCTURE]** becomes more compositionally useful where needed
- **[BORDER / ORNAMENTAL FRAMING]** becomes more architecturally integrated
- **[DIVINE FIGURES / PROCESSIONS / EPISODES]** become more clearly grouped and sequenced
- **[FULL FRAME]** must feel reauthored by temple-space mural logic, not decorated afterward

Mandatory transformation rule:

Do not transfer only texture, age, or motif.

Also transform:

- surface identity
- panel hierarchy
- inset structure
- figure-group sequencing
- border containment
- temple-space logic
- whole-image sacred architecture

Let these become richer:

- ceiling-field composition
- panel readability
- divine grouping
- border orchestration
- Vijayanagara atmosphere
- temple-space coherence

Keep unchanged:

- temple first
- panel order first
- sacred narrative first
- architecture-bound identity
- Vijayanagara atmosphere
- whole-frame coherence

Avoid:

- generic mural treatment
- decorative mythological spread
- domestic wall-painting energy
- portable panel-art feel
- heritage texture overlay
- free-floating epic illustration

Image-to-Image

Convert this source image into a **creative 2D + 3D Karnataka temple-mural world**.

Preserve the source image's main subject count, broad narrative readability, and overall arrangement, but rebuild the full frame through **temple-ceiling / mandapa surface identity, panelized sacred structure, inset logic, divine and epic figure grouping, ornamental border framing, and Vijayanagara temple-space atmosphere**. Let the image become more compositionally transformed than a literal mural reference while staying fully rooted in the Karnataka temple-mural grammar.

Rebuild the surface so it becomes an active sacred architectural field. Rebuild the scene so it fits into a temple-panel system. Rebuild insets so they support the narrative. Rebuild borders so they become structural framing. Rebuild figures so they belong to grouped temple episodes instead of free mythological illustration. Rebuild the whole environment so the painting feels inseparable from temple space.

Do not just add an old mural effect to the source image. Do not keep another painting logic underneath. Rebuild the full image so **surface, panel order, inset rhythm, figure grouping, framing, and temple-space identity all become one Karnataka temple-mural system**.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **full 3D realistic dimensional world** generated from **Temple Mural / Karnataka**. This is not a realistic temple with old mythological paintings pasted on later. It is a believable world in which **temple-ceiling and mandapa surface identity, panelized sacred narrative structure, inset logic, divine and epic figure groups, ornamental border framing, and Vijayanagara temple-space atmosphere** govern every visible element. The real anchor is the surviving **Virupaksha Temple ceiling program at Hampi**.

Translate the full style-system into reality. Every part of the frame must adapt:

- the painted field must behave like a real temple ceiling or mandapa program
- panels must behave like true sacred architectural compartments
- insets must behave like real internal narrative divisions
- divine and epic figures must behave like temple episodes rather than free illustration
- ornamental bands must behave like structural sacred framing
- the surrounding architecture must behave like a real Vijayanagara temple-space support
- the whole image must feel temple-bound, not detachable

This version must not stop at realistic texture. It must rebuild:

- **surface identity** so the ceiling / mandapa body remains primary
- **panel logic** so sacred order governs the painted field
- **inset rhythm** so internal narrative divisions remain active
- **figure grouping** so episodes remain temple-space narrative scenes
- **border containment** so the image remains architecturally measured
- **temple atmosphere** so the mural feels inseparable from sacred Vijayanagara space

If the image contains deities, processions, sacred marriages, heroic scenes, or puranic events, they must still remain part of a temple-bound narrative field. If it contains architecture, that architecture must still feel like a painted sacred hall environment. The final result must still feel like a Karnataka temple mural, not generic realism.

Do not generate:

- generic realistic mythological painting
- temple interior with framed devotional art logic
- old mural texture over unrelated imagery
- generic heritage mural realism
- free narrative spread with no panel structure
- temple atmosphere without sacred painted order

The final image must feel like a **real Karnataka temple-mural world where sacred ceiling or mandapa space, panel order, inset structure, divine figure groups, and Vijayanagara devotional architecture have become materially and spatially believable reality.**

Reusable Variable Template

Create **[SUBJECT / SCENE / TEMPLE-SPACE MOMENT]** as a **full 3D realistic dimensional world** generated from **Temple Mural / Karnataka.**

Style system that must remain unchanged:

- temple-architectural surface remains primary
- ceiling / mandapa identity remains active
- panelized sacred narrative structure remains structural
- inset logic remains part of the image system
- divine and epic figure grouping remains temple-bound
- ornamental framing remains integrated
- Vijayanagara temple-space atmosphere remains active
- the entire frame must be rebuilt through one Karnataka temple-mural grammar

Translate the image like this:

- **[SURFACE / ARCHITECTURAL FIELD]** becomes a believable temple ceiling or mandapa painting body
- **[PANEL SYSTEM]** becomes materially real and structurally ordered
- **[INSET / SECONDARY DIVISION]** becomes a real narrative subdivision
- **[FIGURE GROUP / EPISODE]** becomes part of one temple-bound sacred scene
- **[BORDER / ORNAMENTAL FRAME]** becomes physically and compositionally convincing
- **[FULL TEMPLE ENVIRONMENT]** becomes a coherent Karnataka temple-mural world rather than generic realism

Increase:

- surface tactility
- panel readability
- figure-group realism inside sacred order
- border-structure integration
- temple-space immersion
- Vijayanagara atmosphere

Do not lose:

- temple first
- ceiling / mandapa first

- panel order first
- sacred narrative grouping
- architecture-bound identity
- whole-frame coherence

Avoid:

- realistic generic mural art
- framed mythological painting logic
- decorative temple nostalgia
- free mural spread
- heritage texture realism with weak structure
- generic South Indian devotional atmosphere

Image-to-Image

Convert this source image into a **full 3D realistic Karnataka temple-mural world**.

Preserve the source image's main subject count, narrative readability, and broad arrangement, but rebuild every visible element through **temple-ceiling / mandapa surface identity, panelized sacred narrative order, inset logic, divine and epic figure grouping, ornamental border framing, and Vijayanagara temple-space atmosphere**. Replace generic mural painting, portable devotional-art logic, decorative temple motifs, or generic realism with a full Karnataka temple-mural system.

Rebuild the surface so it becomes the true architectural body of the painting. Rebuild panel order so the sacred narrative becomes structurally real. Rebuild insets so they hold internal scene divisions. Rebuild figures so they function as grouped temple episodes. Rebuild border framing so it measures and contains the sacred field. Rebuild the surrounding architecture so the mural remains inseparable from temple space.

Do not simply add realistic old-paint texture to the source image. Do not keep the original pictorial logic underneath. Rebuild the full image so **surface, panel order, inset divisions, figure groups, border framing, and temple-space identity all become one believable Karnataka temple-mural reality**.
