

ritual-object systems -Kerala

V1 — Authentic Style

Universal Hard Prompt

Create the image in the authentic visual logic of the Kerala bell-metal ritual-object system, a sacred object tradition centered on bell-metal forms such as Nilavilakku (standing wick lamp), Kindi (spouted ritual pitcher), Uruli (wide vessel), and related devotional objects and deity icons associated with Kerala craft centers like Mannar and Kunhimangalam.

Do not treat this as generic brass décor, generic temple metalware, polished luxury bronze styling, or decorative sacred mood objects. Rebuild the entire object as a true Kerala bell-metal ritual form.

The image must read first as:

- Kerala ritual-object typology
- bell-metal body and mass
- profile-led sacred utility form
- hand-crafted object character
- ritual / devotional / household sacred use logic
- Mannar / Kunhimangalam craft-world identity

WHOLE-OBJECT RULE:

Every visible part must belong to the same Kerala bell-metal object system.

- the object must be a true Kerala ritual-object type, not a generic vessel or lamp
- the silhouette must clearly read through Nilavilakku / Kindi / Uruli / icon logic
- bowl, stem, spout, rim, body, base, and finial relationships must feel typology-led
- the metal must feel dense and cast / formed, not light, plated, or ornamental-sheet-like
- the finish must feel hand-crafted and use-ready, not luxury-showroom-perfect
- if sacred context appears, it must support the object, not replace the object grammar
- no important element may remain in generic metalware logic

MATERIAL RULE:

Use bell-metal object mass and finish. The object must feel like a real Kerala bell-metal artifact, with solid body, cast/form-made presence, and hand-crafted metal character.

FORM RULE:

Use clear ritual-object profiles: standing lamp logic, spouted pitcher logic, wide-mouthed vessel logic, or devotional icon-object logic. The profile must carry the style more than surface ornament does.

USE RULE:

The object must feel ritual-use-led or sacred-household-use-led. It must not read as décor-first.

FINISH RULE:

Keep the surface controlled and hand-crafted. Avoid machine-perfect uniformity, hyper-luxury polish, plated glamour, or lifestyle styling.

NEGATIVE RULE:

no generic brass/bronze décor
no luxury metal home décor object
no generic pooja item styling
no random vessel with Kerala mood
no surface-only warm metal resemblance
no machine-perfect product design
no temple backdrop carrying the style by itself

OUTPUT GOAL:

The final result must feel like a true Kerala bell-metal ritual object where typology, profile, mass, finish, and sacred-use identity are all rebuilt from the base upward.

Reusable Variable Template

Create [SUBJECT / OBJECT / RITUAL OBJECT / SACRED METAL FORM] in the authentic visual logic of the Kerala bell-metal ritual-object system.

STYLE SYSTEM:

Kerala bell-metal sacred-object family,
Nilavilakku / Kindi / Uruli / related devotional-object typology,
profile-led form grammar,
dense bell-metal body,
hand-crafted finish,
ritual-use logic,
Mannar / Kunhimangalam craft identity.

WHOLE-OBJECT RULE:

Rebuild everything through Kerala bell-metal logic:

- [MAIN OBJECT] becomes a true Kerala ritual-object form
- [PROFILE] becomes Nilavilakku / Kindi / Uruli / icon-specific
- [BOWL / STEM / SPOUT / BODY / RIM / BASE / FINIAL] become typology-led structural parts
- [SURFACE / FINISH] becomes hand-crafted bell-metal finish
- [USE CONTEXT] remains sacred-use-led or ritual-household-use-led
- [OVERALL OBJECT] remains Kerala bell-metal-built, not generic metalware

KEEP:

Kerala object-family identity
bell-metal material reading
profile-led sacred utility form
hand-crafted uniqueness

ritual / devotional logic
Mannar / Kunhimangalam reading

AVOID:

generic brass décor
random sacred vessel
luxury-home metal styling
surface-only warmth
machine-perfect product finish
generic temple accessory logic

Image-to-Image

Convert this source image into the authentic visual logic of the Kerala bell-metal ritual-object system.

Preserve the source image's core object function, object hierarchy, and readable sacred or utility purpose, but rebuild the entire object through:

- Kerala ritual-object typology
- bell-metal body and mass
- Nilavilakku / Kindi / Uruli / icon profile logic
- hand-crafted finish
- sacred-use-led object reading
- Kerala craft-world identity

Translate the whole object:

- generic object form into Kerala bell-metal object typology
- silhouette into true ritual-object profile
- body / stem / spout / rim / base into Kerala object-part logic
- surface into hand-crafted bell-metal finish
- product feel into sacred-use / ritual-object feel
- overall identity into a Kerala bell-metal object world

Do not simply recolor the metal warm gold.

Do not just add temple cues.

Do not keep generic object logic underneath.

Do not style it as décor-first brassware.

The final result must feel like the source image was rebuilt from scratch as a true Kerala bell-metal ritual object.

V2 — Artisan Translation

Universal Hard Prompt

Create the image in an authentic handcrafted dimensional translation of the Kerala bell-metal ritual-object system, where the full Kerala object grammar remains primary but the object world becomes richer in mass, profile articulation, edge transitions, metal-body depth, hand-crafted finish memory, and sacred-use presence.

Do not treat this as luxury metal product styling or realistic décor brassware with Kerala cues. Do not use finish transfer. Rebuild the object so the Kerala bell-metal system itself generates the dimensional object world.

Keep the full source grammar active:

- Kerala ritual-object typology
- Nilavilakku / Kindi / Uruli / icon logic
- bell-metal body and mass
- hand-crafted object character
- sacred-use-led function
- profile-first identity

WHOLE-OBJECT RULE:

Everything must still belong to one Kerala bell-metal-built world.

- the object body must gain depth but remain Kerala typology-led
- the profile must gain richness but remain Nilavilakku / Kindi / Uruli / icon specific
- bowl, stem, spout, rim, body, base, and finial must become richer while staying ritual-object-true
- finish must gain body but remain hand-crafted, not machine-luxury
- sacred-use readability must remain active
- no important element may default to generic décor realism

ALLOW THESE TO BECOME RICHER:

- object mass
- profile articulation
- edge and transition clarity
- finish depth
- hand-crafted variation
- sacred-object presence
- whole-object coherence

SHADOW RULE:

Use form-supporting shadow only. No glossy showroom lighting, no luxury product-photo takeover.

NEGATIVE RULE:

- no premium décor brassware realism
- no generic handcrafted metal lifestyle object
- no machine-perfect surface
- no random sacred-metal styling
- no typology loss under realism

no finish-only enhancement

OUTPUT GOAL:

The final result must feel like Kerala bell-metal ritual objects have expanded into a richer handcrafted dimensional object world while keeping full control over typology, mass, profile, finish, and sacred-use logic.

Reusable Variable Template

Create [SUBJECT / OBJECT / RITUAL OBJECT / SACRED METAL FORM] as an authentic handcrafted dimensional translation of the Kerala bell-metal ritual-object system.

STYLE SYSTEM:

Kerala bell-metal object family,
Nilavilakku / Kindi / Uruli / icon grammar,
dense object mass,
profile-led sacred utility form,
hand-crafted finish,
ritual-use objecthood,
Mannar / Kunhimangalam craft memory.

WHOLE-OBJECT RULE:

- [MAIN OBJECT] becomes a dimensional but still Kerala bell-metal ritual object
- [PROFILE] becomes richer while staying object-family-specific
- [BODY / STEM / SPOUT / BOWL / BASE / FINIAL] become deeper but remain typology-led
- [SURFACE / FINISH] becomes richer but stays hand-crafted
- [USE LOGIC] remains sacred-use-led
- [OVERALL OBJECT] remains Kerala-built, not generic metalware

ALLOW:

more metal mass
more profile articulation
more edge clarity
more finish depth
more hand-crafted variation
more object coherence

KEEP:

Kerala object-family identity
bell-metal material reading
ritual-object typology
profile-led structure
sacred-use logic
hand-crafted uniqueness

AVOID:

luxury décor brassware
generic metal lifestyle realism
machine-perfect product finish
surface-only warmth
random temple metal styling
typology drift

Image-to-Image

Convert this source image into an authentic handcrafted dimensional Kerala bell-metal ritual-object world.

Keep the source image's core object function, profile hierarchy, and readable sacred or utility purpose, but rebuild the entire object through:

- Kerala ritual-object typology
- bell-metal body and dense object mass
- Nilavilakku / Kindi / Uruli / icon profile logic
- hand-crafted finish memory
- sacred-use readability
- Kerala craft-family identity

Translate the whole object so that:

- the form becomes true Kerala bell-metal object grammar
- the profile becomes ritual-object-specific
- the body gains dimensional mass without losing typology
- the finish gains richness without becoming luxury-showroom metal
- the object remains sacred-use-led
- the overall identity reads as Kerala bell-metal, not generic brassware

Do not simply deepen reflections.

Do not just add weight to a generic object.

Do not keep ordinary metalware logic underneath.

The final result must feel like the source image was rebuilt as a dimensional Kerala bell-metal ritual object from the base structure upward.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a fully volumetric cinematic sacred-object world generated by the Kerala bell-metal ritual-object system, where the whole object world feels born from Kerala ritual-object typology, bell-metal mass, Nilavilakku / Kindi / Uruli / icon profile logic, sacred-use function, and hand-crafted making rather than merely decorated by warm metal finish.

Do not assume prior knowledge of the style. The core system is this:

Kerala bell-metal ritual objects are a sacred object family associated with Mannar and Kunhimangalam, including Nilavilakku, Kindi, Uruli, and deity icons, with hand-crafted bell-metal forms still largely made without machines.

This version must not become:

- generic luxury brassware realism
- décor-first temple metal styling
- sacred-context product photography
- warm-metal finish on generic forms
- generic pooja object realism

Instead, let the entire object world be generated by Kerala bell-metal object intelligence.

WHOLE-OBJECT WORLD RULE:

Every visible element must belong to the same Kerala bell-metal-built object world.

- the object must be a true Kerala ritual-object family member
- profile must remain the primary carrier
- body / bowl / stem / spout / rim / base / finial logic must remain typology-led
- bell-metal body and finish must remain hand-crafted in character
- sacred-use logic must remain active and legible
- no important element may remain generic metal-product realism underneath

ORIGIN-SYSTEM MEMORY RULE:

Even in a fully cinematic object world, the result must still visibly remember:

- Kerala bell-metal object family
- Nilavilakku / Kindi / Uruli / icon typology
- Mannar / Kunhimangalam craft identity
- hand-crafted object uniqueness
- sacred-use / devotional-use function
- bell-metal body and finish

SPACE RULE:

Allow full object depth, cinematic sacred-object presence, and environmental placement, but keep the object generated by Kerala bell-metal logic rather than luxury-metal realism or product-photography logic.

SHADOW RULE:

Use object-form-supporting shadow only. No showroom lighting takeover, no décor-lifestyle atmosphere overpowering typology.

NEGATIVE RULE:

- no generic brass décor realism
- no luxury metal product styling
- no warm-metal finish on generic forms
- no décor-first sacred object
- no generic pooja item realism

no product-photo logic stronger than object-family grammar
no machine-perfect finish

OUTPUT GOAL:

The final result must feel like Kerala bell-metal ritual objects became an inhabitable sacred object world, with full transformation of typology, profile, mass, finish, sacred-use identity, and whole-object structure.

Reusable Variable Template

Create [SUBJECT / OBJECT / SACRED-OBJECT WORLD / RITUAL METAL FORM] as a fully volumetric cinematic world generated by the Kerala bell-metal ritual-object system.

STYLE SYSTEM:

Kerala bell-metal object family,
Nilavilakku / Kindi / Uruli / icon typology,
profile-led sacred utility form,
dense bell-metal body,
hand-crafted finish,
Mannar / Kunhimangalam craft identity,
ritual-use objecthood.

WHOLE-OBJECT WORLD RULE:

- [MAIN OBJECT] becomes a Kerala bell-metal-built volumetric sacred object
- [PROFILE] remains Nilavilakku / Kindi / Uruli / icon specific
- [BODY / STEM / BOWL / SPOUT / RIM / BASE / FINIAL] remain object-family structural parts
- [FINISH] remains hand-crafted bell-metal finish
- [USE CONTEXT] remains sacred-use-led
- [OVERALL OBJECT] remains Kerala-built, not generic metalware

INCREASE:

object volume
profile clarity
metal mass
finish depth
sacred-object presence
whole-object continuity

DO NOT LOSE:

Kerala object-family identity
bell-metal material reading
ritual-object typology
hand-crafted uniqueness
sacred-use logic
Mannar / Kunhimangalam reading

AVOID:

generic brass décor realism
lifestyle metal styling
surface-only warm finish
machine-perfect product polish
generic pooja item logic
product-photography aesthetics stronger than typology

Image-to-Image

Convert this source image into a fully volumetric cinematic Kerala bell-metal ritual-object world.

Preserve the source image's core object function, object hierarchy, and readable sacred or utility purpose, but rebuild the entire object through:

- Kerala ritual-object typology
- Nilavilakku / Kindi / Uruli / icon profile logic
- bell-metal body and dense mass
- hand-crafted finish memory
- sacred-use readability
- Kerala craft-family identity

Translate the whole object:

- generic form into Kerala bell-metal ritual-object form
- silhouette into true Kerala object profile
- body / bowl / stem / spout / base logic into typology-led structure
- finish into hand-crafted bell-metal behavior
- use-read into sacred-use / devotional-use object identity
- overall object-world into Kerala bell-metal reality

Do not simply recolor the metal warm gold.

Do not keep generic object logic underneath.

Do not place a Kerala sacred setting around a non-Kerala object.

The final result must feel like the source image was rebuilt into an inhabitable Kerala bell-metal ritual-object world from the base structure upward.
