

# wood carving - Nagaland

## V1 — Authentic Style

### Universal Hard Prompt

Create an image built from the authentic wood-carving grammar of Nagaland.

Do not treat this as generic tribal decoration, rustic wood furniture, carved resort decor, or generic Northeast ethnic styling.

Build the entire image as if it comes from a true Nagaland carved-wood world rooted in architectural-object logic, symbolic motif authority, heavy timber mass, worked carved surfaces, and ritual-social meaning.

Use these core style laws:

solid wood mass,  
cut / hewn / carved / scooped form logic,  
relief or sculptural shaping,  
totemic boldness,  
strong frontality or emblematic readability,  
symbol-bearing motifs,  
architectural-object presence,  
ritual-social force,  
hand-worked surface memory,  
stark carved beauty rather than luxury polish.

Motif logic must remain meaningful, not decorative filler:

mithun / bison-head force,  
hornbill authority,  
tiger / elephant / snake symbolic force,  
human-head imagery,  
celestial signs,  
weapon-sign motifs,  
status / fertility / bravery / communal identity coding.

If figures appear, they must be rebuilt through Nagaland wood-carving logic:

carved faces,  
block-built bodies,  
totemic silhouettes,  
structural posture,  
worked timber presence,  
symbolic rather than portrait-naturalistic identity.

If architecture, furniture, gates, posts, drums, objects, or environment appear, they must all inherit the same carved-world grammar.

The world must feel generated from carved timber logic, not from realism with carved details added later.

Do not add:

generic realism,  
generic fantasy tribal art,  
soft sculpture language,  
showroom wood polish,  
luxury craft styling,  
decorative carving on generic forms,  
neutral realistic background with style-coded props.

The final result must feel like a true Nagaland carved-wood source world, not a modern image decorated with tribal wood motifs.

## **Reusable Variable Template**

Create [SUBJECT / SCENE] using the authentic wood-carving grammar of Nagaland.

Core style system to preserve:

worked timber mass,  
cut / carved / hewn form logic,  
relief / sculptural shaping,  
symbol-bearing motif structure,  
totemic boldness,  
architectural-object presence,  
ritual-social symbolic force,  
hand-worked surface behavior,  
whole-frame carved-world consistency.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT] becomes a Nagaland carved-wood form with strong symbolic authority and heavy timber presence.

[SECONDARY FIGURES / OBJECTS] become supporting carved forms obeying the same wood-mass and motif logic.

[ARCHITECTURE / OBJECTS / ENVIRONMENT] become a carved structural world shaped by posts, planks, gates, pillars, drums, heavy wood objecthood, and symbolic carving hierarchy.

Keep:

carved wood mass first,  
motif meaning first,  
architectural-object logic,  
bold silhouette readability,

hand-worked tool memory,  
ritual-social charge.

Avoid:

generic tribal decor,  
rustic wood styling,  
luxury carved furniture look,  
realistic anatomy with carving added later,  
generic Northeast ethnic mood,  
neutral realism with carved props.

The final image must feel like the source Nagaland carving tradition itself generated the whole world.

## **Image-to-Image**

Convert this source image into an authentic Nagaland wood-carving source world.

Preserve the source image's subject count, action, main pose logic, and readability, but rebuild all visible forms through Nagaland carved-wood grammar.

Replace ordinary realism with:

worked timber mass,  
carved relief / sculptural shaping,  
symbol-bearing motif logic,  
totemic silhouette force,  
architectural-object presence,  
hand-cut surface behavior,  
ritual-social symbolic charge.

If the source contains people, do not leave them as generic realistic humans.

Rebuild them as carved wood-born presences with block-built form, symbolic posture, and Nagaland carved-world authority.

If the source contains objects, architecture, ground, or environment, they must also be translated into the same carved-world system.

Do not let the background remain neutral realism.

Do not simply add carving texture.

Do not simply add tribal motifs.

Do not create a realistic world with carved props.

Rebuild the whole image so it feels like Nagaland wood carving itself authored the full frame.

## V2 — Artisan Translation

### Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Nagaland wood carving.

Keep the same deep style-core unchanged:

worked timber mass,  
carved relief / sculptural shaping,  
symbol-bearing motif logic,  
architectural-object identity,  
totemic boldness,  
ritual-social force,  
hand-worked surface memory.

Now translate that same source grammar into believable handcrafted dimensional form.

This is not generic 3D.

This is not luxury carved design.

This is not fantasy tribal world-building.

This is not realism with carved motifs pasted on top.

The image must feel like master Nagaland wood artisans expanded the source carving language into a dimensional handcrafted image-world.

Allow:

stronger object thickness,  
clearer carved volume,  
tactile wood surface presence,  
relief hierarchy,  
moderate spatial opening,  
foreground / midground / background readability,  
stronger relation between carved objects and surrounding space,  
deployable scene usability.

Keep unchanged:

carved timber authority,  
motif meaning,  
totemic silhouette,  
architectural-object logic,  
hand-worked cut surface,  
ritual-social symbolic force.

If figures appear, they must remain style-born:

carved faces,

block-built bodies,  
structural posture,  
symbolic identity,  
totemic mass,  
not normal realism.

If environment appears, it must also remain style-born:  
posts, gates, planks, ground objects, carved forms, surrounding built space, and object grouping must all follow Nagaland carved-world logic.

Do not allow:  
generic 3D rendering habits,  
showroom polish,  
decorative carving on normal objects,  
neutral realistic environment,  
soft fantasy sculpture,  
normal humans standing beside carved props,  
motifs carrying the style while the mass remains generic.

The final result must feel like Nagaland wood carving has entered handcrafted dimensional space without losing its identity.

## **Reusable Variable Template**

Create [SUBJECT / SCENE] in V2 = authentic handcrafted dimensional translation of Nagaland wood carving.

Preserve these unchanged style-core rules:  
worked timber mass,  
cut / hewn / carved form logic,  
relief / sculptural shaping,  
symbol-bearing motif hierarchy,  
architectural-object presence,  
totemic readability,  
ritual-social charge,  
whole-frame carved-world consistency.

Translate the image like this:  
[MAIN FIGURE / MAIN OBJECT] becomes a dimensional carved-wood presence with strong symbolic authority and tactile timber mass.  
[SECONDARY FIGURES / OBJECTS] become supporting carved forms obeying the same Nagaland wood logic.  
[ENVIRONMENT / ARCHITECTURE / GROUND / BACKGROUND] become a believable handcrafted carved-world space built from posts, planks, gates, carved surfaces, heavy wood objecthood, and structural motif order.

Increase:

object thickness,  
surface tactility,  
carved depth hierarchy,  
scene readability,  
layered spatial relation,  
dimensional presence.

Do not lose:

motif meaning,  
carved mass,  
totemic strength,  
architectural-object identity,  
hand-worked surface memory.

Avoid:

generic artisan 3D,  
luxury carved furniture styling,  
generic tribal fantasy,  
normal realism with ethnic details,  
environment realism stronger than the style,  
only props being style-coded.

The final image must feel like the same Nagaland carved source grammar has become a handcrafted dimensional image-world.

## **Image-to-Image**

Convert this source image into a V2 authentic handcrafted dimensional Nagaland wood-carving world.

Preserve the source image's main action, subject count, pose relationships, and readability, but rebuild the image through Nagaland carved-wood logic.

Replace ordinary surfaces with:

worked timber mass,  
cut and carved planes,  
relief hierarchy,  
tool-worked tactile wood behavior,  
totemic silhouette structure,  
symbol-bearing motifs,  
architectural-object force.

Let the image become dimensionally believable, but do not let it become generic realism.

If people appear, rebuild them as carved wood-born presences rather than realistic bodies with tribal styling.

If objects or environment appear, rebuild them as Nagaland carved-world forms rather than neutral realistic surroundings.

Do not just add carved texture to a realistic scene.

Do not let only selected props carry the style.

Do not turn the result into premium rustic product design.

The final image must feel like a handcrafted dimensional expansion of the same Nagaland carved source grammar.

## V3 — 3D / Realistic / Cinematic Translation

### Universal Hard Prompt

Create [SUBJECT / SCENE] in V3 = fully resolved believable real-world 3D translation of Nagaland wood carving.

Keep these unchanged style-core rules:

worked timber mass,  
cut / carved / hewn shaping,  
symbol-bearing motif hierarchy,  
architectural-object force,  
totemic silhouette,  
ritual-social symbolic charge,  
hand-worked surface behavior,  
whole-frame carved-world consistency.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT] becomes a fully embodied carved-wood presence with real weight, volume, and symbolic authority.

[SECONDARY FIGURES / OBJECTS] become equally style-born dimensional presences.

[ENVIRONMENT / ARCHITECTURE / BACKGROUND] become a complete inhabitable carved-world space shaped by Nagaland timber logic, carved structural identity, and symbolic object-world order.

Increase:

real object weight,  
full carved volume,  
material-light response,  
scene completion,  
environmental embodiment,  
spatial staging,  
figure-ground clarity,  
full-world coherence.

Do not lose:  
carved mass,  
motif meaning,  
totemic boldness,  
architectural-object identity,  
hand-worked character,  
source Nagaland visual DNA.

Avoid:  
generic realism,  
cinematic makeover,  
soft natural modeling,  
luxury finish,  
tribal atmosphere instead of true carving grammar,  
only props carrying the style,  
background realism overpowering the source system.

The final image must feel like the same Nagaland carved grammar has become fully embodied reality.

## **Reusable Variable Template**

Create [SUBJECT / SCENE] in V3 = fully resolved believable real-world 3D translation of Nagaland wood carving.

Keep these unchanged style-core rules:  
worked timber mass,  
cut / carved / hewn shaping,  
symbol-bearing motif hierarchy,  
architectural-object force,  
totemic silhouette,  
ritual-social symbolic charge,  
hand-worked surface behavior,  
whole-frame carved-world consistency.

Translate the image like this:  
[MAIN FIGURE / MAIN OBJECT] becomes a fully embodied carved-wood presence with real weight, volume, and symbolic authority.  
[SECONDARY FIGURES / OBJECTS] become equally style-born dimensional presences.  
[ENVIRONMENT / ARCHITECTURE / BACKGROUND] become a complete inhabitable carved-world space shaped by Nagaland timber logic, carved structural identity, and symbolic object-world order.

Increase:  
real object weight,

full carved volume,  
material-light response,  
scene completion,  
environmental embodiment,  
spatial staging,  
figure-ground clarity,  
full-world coherence.

Do not lose:  
carved mass,  
motif meaning,  
totemic boldness,  
architectural-object identity,  
hand-worked character,  
source Nagaland visual DNA.

Avoid:  
generic realism,  
cinematic makeover,  
soft natural modeling,  
luxury finish,  
tribal atmosphere instead of true carving grammar,  
only props carrying the style,  
background realism overpowering the source system.

The final image must feel like the same Nagaland carved grammar has become fully embodied reality.

## **Image-to-Image**

Convert this source image into a V3 fully resolved believable real-world Nagaland wood-carving world.

Preserve the source image's main action, subject count, pose logic, and overall readability, but rebuild all visible forms through Nagaland carved-wood grammar.

Replace ordinary realism with:  
worked timber mass,  
carved relief / sculptural shaping,  
totemic silhouette force,  
symbol-bearing motifs,  
architectural-object authority,  
hand-worked cut surfaces,  
ritual-social symbolic charge.

Expand the image into a fully completed dimensional world:

real volume,

real carved weight,

believable timber presence,

full environment embodiment,

strong figure-ground separation,

clear spatial staging,

complete whole-frame style consistency.

Do not just insert carved objects into a realistic scene.

Do not let the background remain neutral realism.

Do not make the world a generic cinematic village with tribal props.

Do not let realism override carving logic.

Rebuild the full image so it feels like Nagaland wood carving itself has become fully inhabitable reality.
