

Bastar tribal mural, painted-wall-Chhattisgarh

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **authentic source-faithful visual logic of Muria Ghotul Painting / Muria Wall Painting from Bastar, Chhattisgarh**. Treat this as a **painted-wall mural tradition of the Muria community**, not as generic tribal art, canvas folk painting, ethnic pattern design, or decorative rustic illustration. Build the image as if it belongs to a real **ghotul-linked communal wall world**, where painting is part of architecture, ritual-social life, and symbolic community expression.

The image must preserve the full source structure: **mud wall or floor origin, clay-smoothed earthen surface, white chalk/lime prepared base, natural pigments from earth, plant, and mineral sources, hand-painted mural figures and motifs, and finishing through dots, lines, and symbols**. The wall must still matter. The image must feel painted into a prepared earthen architectural surface, not placed on top of a normal picture or clean modern wall.

Use the native Muria subject world: **animals, trees, deities, ancestors, hunting, dancing, fertility, nature, balance, and divine presence**. Human and animal figures must remain **symbolic mural forms**, not realism-first bodies or cartoon characters. Trees, sacred forms, movement, and activity should all feel like parts of one painted communal field. Geometry may appear, but it must support the mural system rather than replace it.

The ground must feel like a real prepared mural surface: matte, chalky, earthen, naturally pigmented, hand-painted, slightly irregular, and architecturally embedded. The white base should remain structurally important. Color should feel natural, mineral, plant-derived, and wall-born rather than synthetic, glossy, or digitally graphic. Dots, lines, and symbols must function as structural finishing logic, not decorative garnish.

Do not make this generic Bastar art, tourist tribal décor, framed folk illustration, scenic village realism, printed ethnic pattern, vector mural, or rustic graphic design. Do not lose the wall. Do not lose the prepared white base. Do not turn the painting into ordinary realism with tribal motifs added later.

Reusable Variable Template

Create [SUBJECT / WALL SCENE / MURAL FIELD] in the **authentic source-faithful visual logic of Muria Ghotul Painting / Muria Wall Painting from Bastar, Chhattisgarh**.

Treat the style as a **prepared-wall tribal mural system** built from:

- mud wall or floor origin
- clay-smoothed earthen surface
- white chalk/lime base preparation
- natural pigments from earth, plant, and mineral sources
- hand-painted symbolic figures and motifs
- dot-line-symbol finishing
- ghotul-linked social and ritual meaning

Preserve these non-negotiable style rules:

- the image must feel wall-born, not canvas-born
- the white base must remain structurally active
- the surface must feel earthen, matte, and hand-painted
- figures must remain symbolic mural forms, not realism-first anatomy
- the subject field must belong to Muria life-world logic: animals, trees, deities, ancestors, hunting, dancing, fertility, balance, divine presence
- dots, lines, and symbols must remain structural finishing
- the whole frame must behave like a communal painted wall field

Translate the subject like this:

- **[MAIN FIGURE / MAIN ACTION / MAIN SACRED OR SOCIAL FORM]** becomes the dominant mural focus inside the wall field
- **[SECONDARY FIGURES / ANIMALS / TREES / SUPPORT SYMBOLS]** become subordinate painted forms that reinforce communal and symbolic meaning
- **[BACKGROUND / WALL FIELD / SURROUNDING SPACE]** becomes a prepared earthen mural surface with white-base logic and hand-painted symbolic organization
- **[DETAIL WORK]** becomes dots, lines, symbols, and geometric supports integrated into the mural field

Keep:

- wall-origin truth
- white-ground preparation
- natural-pigment matte material feel
- symbolic mural figures
- ghotul communal meaning
- hand-painted irregularity

Avoid:

- generic tribal décor
- framed picture logic
- scenic realism
- glossy paint or modern acrylic poster feel
- vector-clean surfaces
- motifs added on top of ordinary architecture

Image-to-Image

Convert this source image into the **authentic source-faithful visual logic of Muria Ghotul Painting / Muria Wall Painting from Bastar, Chhattisgarh**.

Preserve the source image's **subject count, main action, pose relationships, object relationships, and overall readability**, but rebuild the entire image as a **prepared earthen communal mural field**. Replace ordinary surfaces with **mud-wall or floor origin, clay smoothing, white chalk/lime base, natural-pigment mural application, symbolic hand-painted figures, and dots-lines-symbols finishing**.

If the source contains people, animals, trees, sacred forms, or activities, rebuild all of them as **Muria mural presences** rather than realism-first figures. If the source contains architecture or background, it must be reinterpreted as a **painted wall system**, not as normal environment. The final result must feel like the whole image was generated from a Bastar Muria painted communal wall, not like a normal image decorated with tribal motifs.

Do not place Muria patterns or figures on top of a realistic scene. Do not turn the image into folk illustration on canvas, tourist décor, or generic ethnic mural art. The final image must feel like a true source-faithful Muria ghotul wall painting.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in the **authentic handcrafted dimensional visual logic of Muria Ghotul Painting / Muria Wall Painting from Bastar, Chhattisgarh**. Keep the full source grammar intact, but translate it into a richer handcrafted dimensional mural-world. This version must still feel completely **wall-born**, not realism-born and not decorative folk illustration.

Preserve the full source grammar: **mud wall or floor origin, clay-smoothed surface, white chalk/lime base, natural-pigment mural painting, symbolic subject field, and dot-line-symbol finishing logic**. Then allow the wall and painted forms to become more tactile, more materially present, and more spatially integrated while still remaining a Bastar Muria mural system. The dimensionality must deepen wall truth, not replace it.

The prepared white base must still remain visible in spirit. The earthen surface must still feel structural. Natural pigments must still feel matte and hand-applied. Figures, animals, trees, ancestors, deities, hunters, dancers, and symbolic forms must still remain mural signs rather than realism-first bodies. The environment must still feel like painted architecture and communal ritual-social surface rather than a normal scenic world.

Use richer surface depth: subtle mud-wall irregularity, clay-smoothed undulations, hand-laid pigment variation, chalky white base memory, and slightly raised or embedded hand-painted finish. The image should feel more tactile and dimensional than the source-faithful version, but it must still read first as a **painted wall tradition**, not as a stylized 3D scene.

Do not make this decorative 3D tribal art, plaster fantasy mural, polished hand-painted village illustration, or rustic concept art. Do not let dimensionality erase white-ground logic, wall origin, or symbolic mural figure language.

Reusable Variable Template

Create **[SUBJECT / WALL SCENE / MURAL FIELD]** in the **authentic handcrafted dimensional visual logic of Muria Ghotul Painting / Muria Wall Painting from Bastar, Chhattisgarh**.

Treat the style as a **prepared-wall tribal mural system** and translate it into a richer handcrafted dimensional mural-world while preserving these non-negotiable rules:

- wall-origin remains primary
- clay-smoothed earthen preparation remains visible
- white chalk/lime base remains structurally active
- natural pigments still feel matte, hand-applied, and wall-born
- symbolic figures still behave like mural presences, not realism-first beings
- dots, lines, and symbols remain structural finishing
- the whole frame remains organized as one communal painted wall field

Translate the subject like this:

- **[MAIN FIGURE / MAIN ACTION / MAIN SACRED OR SOCIAL FORM]** becomes a tactile dimensional mural focus
- **[SECONDARY FIGURES / ANIMALS / TREES / SYMBOLIC SUPPORTS]** become subordinate wall-embedded painted forms
- **[WALL GROUND / SURFACE / SURROUNDING SPACE]** becomes a dimensional earthen mural surface with prepared white-base memory
- **[DETAIL FINISHING]** becomes integrated dot-line-symbol work that deepens the mural logic

Let these become richer:

- earthen wall tactility
- white-ground surface memory
- pigment deposition and edge behavior
- architectural embedding
- wall-field depth and handmade evidence

Keep unchanged:

- prepared-wall identity
- natural-pigment mural logic
- symbolic subject world
- hand-painted mural figure language
- ghotul communal meaning

Avoid:

- polished 3D folk art
- decorative rustic mural design
- realism-first village scene
- synthetic color treatment
- poster-paint smoothness
- wall as mere backdrop

Image-to-Image

Convert this source image into the **authentic handcrafted dimensional visual logic of Muria Ghotul Painting / Muria Wall Painting from Bastar, Chhattisgarh**.

Preserve the source image's **subject count, main action, pose relationships, object structure, and readability**, but rebuild the full image through a **dimensional Muria wall system**. Replace ordinary materials and surfaces with **mud-wall origin, clay-smoothed preparation, white chalk/lime base memory, natural-pigment mural application, symbolic painted figures, and hand-finished dot-line-symbol logic**.

Allow the image to gain richer tactile wall presence, stronger surface depth, more visible handmade pigment behavior, and more integrated architectural embedding than the source-faithful version, but keep the style fully mural-first. Every person, animal, tree, sacred form, and activity must still behave like a Muria wall-painted presence, not like realism-first content with tribal treatment.

Do not texture-map rough mud and motifs onto a normal image. Do not turn it into stylized village mural art or decorative folk illustration. The final image must feel like the source image has been rebuilt through a handcrafted dimensional Muria ghotul wall intelligence.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **fully volumetric cinematic translation of Muria Ghotul Painting / Muria Wall Painting from Bastar, Chhattisgarh**. Convert the complete source grammar into a

believable three-dimensional world while keeping **Muria wall intelligence** in control. This must not become generic Bastar realism, rustic village cinema, or tribal décor world-building. It must feel like **a Bastar Muria communal painted wall became a real world**.

Keep the full source grammar intact: **mud wall or floor base, clay smoothing, white chalk/lime preparation, natural pigments from earth, plant, and mineral sources, symbolic figures and motifs, dot-line-symbol finishing, and ghotul-linked social-ritual meaning**. Then translate that grammar into full volume: stronger wall architecture, clearer figure-ground separation, richer material-light interaction, deeper environmental completion, and cinematic readability — but only under the authority of the mural system.

Preserve the origin-material memory. By default, render the world as if it grows directly out of a **prepared mud wall and floor lineage**: earthen wall mass, clay-smoothed surfaces, white chalk/lime preparation, hand-applied mineral and plant pigments, matte mural deposition, slightly uneven built architecture, and symbol finishing integrated into the surface. Even in full 3D, the world must still visibly remember that its deepest origin is a **communal painted earthen wall**, not a smooth CGI set, plaster fantasy environment, or realistic village scene with motifs added afterward.

The wall must still govern the world. Figures must still feel like mural-born presences. Trees, animals, ancestors, deities, hunting, dancing, fertility, and divine presence must still belong to one symbolic Bastar wall-field logic. The architecture must not merely host the style; the architecture must feel generated by the style's mural intelligence.

Do not create generic Bastar village realism, cinematic folk décor, glossy painted plaster surfaces, ordinary mud-house realism with tribal motifs, fantasy ancient-wall spectacle, or tourist-style ethnic environment. Do not let realism become the main engine. Do not erase the prepared wall, the white ground, the matte pigment memory, or the communal mural-field logic.

Reusable Variable Template

Create **[SUBJECT / WALL WORLD / MURAL SCENE]** as a **fully volumetric cinematic translation of Muria Ghotul Painting / Muria Wall Painting from Bastar, Chhattisgarh**.

Treat the style as a **prepared-wall communal mural system** and translate it into a believable three-dimensional world without losing these non-negotiable rules:

- the wall remains the primary source intelligence
- mud wall or floor origin remains visible
- clay-smoothed preparation remains active
- white chalk/lime base memory remains structurally important
- natural-pigment matte mural behavior remains visible
- symbolic figures remain mural-born presences, not realism-first characters
- dot-line-symbol finishing remains structural
- the whole frame remains tied to ghotul communal and ritual-social meaning

Material-origin rule:

- default to **prepared mud wall and floor origin memory**
- preserve earthen wall mass, clay smoothing, chalk/lime white preparation, matte mineral and plant pigment deposition, handmade irregularity, and built-surface mural integration
- keep the wall visibly hand-made and communally painted
- even in full 3D, the world must still feel **born from painted earthen architecture**, not from rustic fantasy realism

Translate the subject like this:

- **[MAIN FIGURE / MAIN ACTION / MAIN SACRED OR SOCIAL CORE]** becomes the dominant volumetric mural-born presence
- **[SECONDARY FIGURES / ANIMALS / TREES / ANCESTORS / DEITIES / SUPPORT SYMBOLS]** become subordinate wall-born symbolic presences
- **[ARCHITECTURE / WALL / FLOOR / SURROUNDING FIELD]** becomes a cinematic but still mural-governed earthen environment
- **[DETAIL FINISHING]** becomes structural dot-line-symbol work integrated into the built surface

Increase:

- wall volume and architectural presence
- figure-ground separation
- material-light interaction on earthen surfaces
- spatial readability
- cinematic coherence
- communal wall-world continuity

Do not lose:

- wall-origin intelligence
- white-ground preparation memory
- natural-pigment matte truth
- symbolic mural figure logic
- ghotul communal meaning
- hand-built surface truth

Avoid:

- generic village realism
- decorative ethnic environment
- glossy mural surfaces
- rustic fantasy set design
- motifs applied after the fact
- realism overpowering the wall-field logic

Image-to-Image

Convert this source image into a **fully volumetric cinematic translation of Muria Ghotul Painting / Muria Wall Painting from Bastar, Chhattisgarh.**

Preserve the source image's **subject count, main action, pose relationships, object hierarchy, and scene readability**, but rebuild the entire frame as if **Muria communal mural grammar became a cinematic three-dimensional world**. Replace ordinary picture composition and ordinary material logic with **prepared mud wall and floor origin, clay-smoothed earthen surfaces, white chalk/lime base memory, hand-applied natural pigments, symbolic mural-born figures, and dot-line-symbol finishing integrated into architecture**.

Then expand that structure into full volume: stronger wall mass, clearer spatial staging, richer earthen material behavior, stronger figure-ground separation, and fuller environmental completion. But every part of the frame must still obey Muria wall law. The wall must remain active. The painted forms must still feel born from the wall. The world must still read as a communal painted architecture made real, not as a realistic Bastar environment with tribal decoration added later.

Do not add Muria motifs to a normal realistic scene. Do not create rustic cinematic folk décor. Do not turn the image into generic Bastar village realism. Do not lose the origin-material memory of mud wall, clay smoothing, white base, matte natural pigments, and mural-built symbolic life.

The final image must feel like the source image has been fully rebuilt through **fully volumetric Muria ghotul wall intelligence with sacred-social function, symbolic field logic, and origin-material truth all intact**.
