

The PigmentRuleColor-Blocked Indo-Portuguese - Goa

V1 — Authentic Style

Universal Hard Prompt

Create the image in the authentic visual logic of a Goan Indo-Portuguese color-blocked house-front, where the dominant image-making system comes from painted architectural wall planes, white or light trim around openings, red-tiled roof contrast, balcony or porch articulation, and narrow-lane frontage rhythm.

Do not treat this as generic colorful colonial architecture, beach-town pastel mood, decorative surface styling, Caribbean street imagery, Mediterranean façade styling, or random Portuguese nostalgia. Rebuild the entire visible image as if it belongs to a real Goan street-facing residential front, especially the kind seen in old Panaji / Fontainhas-type Indo-Portuguese lanes.

The image must read first as:

- a strong painted wall-plane color field
- lighter trim around windows, doors, edges, and façade details
- red-tiled roof or roofline contrast above
- balcony, porch, or frontage articulation
- compact lane-facing residential frontage
- row-house rhythm or frontage logic even if only one house is visible

WHOLE-FRAME RULE:

Every visible element must belong to the same façade-color system.

- the house front must be composed through architectural color blocking, not through decoration added later
- windows, shutters, balcony edges, door surrounds, cornices, porch fronts, and façade divisions must all obey trim-versus-wall logic
- if adjacent houses appear, they must contribute to a rhythm of distinct but related frontage color fields
- if people appear, they must remain secondary and help reveal scale, threshold use, balcony life, porch depth, and lane relation
- ground, lane, steps, and frontage edges must support the reading of a lived Indo-Portuguese street, not generic scenic atmosphere

FORM RULE:

Use strong wall-plane dominance. The main façade color must lead the image. Openings must be clearly framed. Balconies, porches, roof edges, and adjoining fronts must read as coherent frontage composition.

COLOR RULE:

Use one dominant façade color field per house-front, supported by white or light trim around openings and façade edges. Use roof-red or clay-tile contrast above when relevant. Keep color architectural, not atmospheric. Do not diffuse the house into soft pastel haze.

SPACE RULE:

Use frontage-and-lane space, not mural-space and not deep scenic panorama as the main engine. The image should feel like a public house front in a narrow Goan street. Even when depth exists, the façade must remain structurally primary.

MATERIAL RULE:

Use painted or limewashed wall surfaces with believable exterior house-front behavior. The wall must feel architectural and habitable, not graphic or poster-like. The trim should feel built into the façade, not drawn on top.

NEGATIVE RULE:

- no generic colorful colonial town
- no Caribbean / Mediterranean drift
- no pastel moodboard styling
- no random bright walls with no trim logic
- no normal architecture with color added later
- no surface-decoration-first thinking
- no beach-tourism postcard look
- no facade as mere background

OUTPUT GOAL:

The final result must feel like a real Goan Indo-Portuguese residential frontage where color is used as architectural structure: wall-plane, trim, roof, balcony, opening, and row rhythm all working together.

Reusable Variable Template

Create the image in the authentic visual logic of a Goan Indo-Portuguese color-blocked house-front, where the dominant image-making system comes from painted architectural wall planes, white or light trim around openings, red-tiled roof contrast, balcony or porch articulation, and narrow-lane frontage rhythm.

Do not treat this as generic colorful colonial architecture, beach-town pastel mood, decorative surface styling, Caribbean street imagery, Mediterranean façade styling, or random Portuguese nostalgia. Rebuild the entire visible image as if it belongs to a real Goan street-facing residential front, especially the kind seen in old Panaji / Fontainhas-type Indo-Portuguese lanes.

The image must read first as:

- a strong painted wall-plane color field
- lighter trim around windows, doors, edges, and façade details
- red-tiled roof or roofline contrast above

- balcony, porch, or frontage articulation
- compact lane-facing residential frontage
- row-house rhythm or frontage logic even if only one house is visible

WHOLE-FRAME RULE:

Every visible element must belong to the same façade-color system.

- the house front must be composed through architectural color blocking, not through decoration added later
- windows, shutters, balcony edges, door surrounds, cornices, porch fronts, and façade divisions must all obey trim-versus-wall logic
- if adjacent houses appear, they must contribute to a rhythm of distinct but related frontage color fields
- if people appear, they must remain secondary and help reveal scale, threshold use, balcony life, porch depth, and lane relation
- ground, lane, steps, and frontage edges must support the reading of a lived Indo-Portuguese street, not generic scenic atmosphere

FORM RULE:

Use strong wall-plane dominance. The main façade color must lead the image. Openings must be clearly framed. Balconies, porches, roof edges, and adjoining fronts must read as coherent frontage composition.

COLOR RULE:

Use one dominant façade color field per house-front, supported by white or light trim around openings and façade edges. Use roof-red or clay-tile contrast above when relevant. Keep color architectural, not atmospheric. Do not diffuse the house into soft pastel haze.

SPACE RULE:

Use frontage-and-lane space, not mural-space and not deep scenic panorama as the main engine. The image should feel like a public house front in a narrow Goan street. Even when depth exists, the façade must remain structurally primary.

MATERIAL RULE:

Use painted or limewashed wall surfaces with believable exterior house-front behavior. The wall must feel architectural and habitable, not graphic or poster-like. The trim should feel built into the façade, not drawn on top.

NEGATIVE RULE:

- no generic colorful colonial town
- no Caribbean / Mediterranean drift
- no pastel moodboard styling
- no random bright walls with no trim logic
- no normal architecture with color added later
- no surface-decoration-first thinking
- no beach-tourism postcard look
- no facade as mere background

OUTPUT GOAL:

The final result must feel like a real Goan Indo-Portuguese residential frontage where color is used as architectural structure: wall-plane, trim, roof, balcony, opening, and row rhythm all working together.

Image-to-Image

Create [SUBJECT / SCENE / HOUSE FRONT / STREET MOMENT] in the authentic visual logic of a Goan Indo-Portuguese color-blocked façade system.

STYLE SYSTEM:

Goan painted residential frontage, strong wall-plane color field, white or light trim around windows and edges, red-tiled roof contrast, balcony or porch articulation, narrow-lane house-front logic, row-house rhythm.

WHOLE-FRAME RULE:

Rebuild every visible element through the same façade-color system:

- [MAIN HOUSE / MAIN STRUCTURE] becomes a frontage led by a dominant painted wall field
- [WINDOWS / DOORS / SHUTTERS / EDGES] become trim-structured openings
- [BALCONY / PORCH / STEPS / THRESHOLD] become façade articulation, not decoration
- [ADJACENT HOUSES] if present become related but distinct color-blocked fronts
- [LANE / GROUND / STREET EDGE] supports the reading of a compact Goan residential street
- [PEOPLE] if present remain secondary and reveal lived relation to the house front

KEEP:

dominant wall-plane color
white or light trim logic
frontage composition
roof contrast
Goan Indo-Portuguese lane-house grounding
color acting as structure

AVOID:

generic colonial colorfulness
pastel mood only
one bright wall in neutral architecture
decorative paint with no façade logic
Caribbean / Mediterranean drift
normal house with Goa colors added later

V2 — Artisan Translation

Universal Hard Prompt

Create the image in the authentic visual logic of a Goan Indo-Portuguese color-blocked house-front, where the dominant image-making system comes from painted architectural wall planes, white or light trim around openings, red-tiled roof contrast, balcony or porch articulation, and narrow-lane frontage rhythm.

Do not treat this as generic colorful colonial architecture, beach-town pastel mood, decorative surface styling, Caribbean street imagery, Mediterranean façade styling, or random Portuguese nostalgia. Rebuild the entire visible image as if it belongs to a real Goan street-facing residential front, especially the kind seen in old Panaji / Fontainhas-type Indo-Portuguese lanes.

The image must read first as:

- a strong painted wall-plane color field
- lighter trim around windows, doors, edges, and façade details
- red-tiled roof or roofline contrast above
- balcony, porch, or frontage articulation
- compact lane-facing residential frontage
- row-house rhythm or frontage logic even if only one house is visible

WHOLE-FRAME RULE:

Every visible element must belong to the same façade-color system.

- the house front must be composed through architectural color blocking, not through decoration added later
- windows, shutters, balcony edges, door surrounds, cornices, porch fronts, and façade divisions must all obey trim-versus-wall logic
- if adjacent houses appear, they must contribute to a rhythm of distinct but related frontage color fields
- if people appear, they must remain secondary and help reveal scale, threshold use, balcony life, porch depth, and lane relation
- ground, lane, steps, and frontage edges must support the reading of a lived Indo-Portuguese street, not generic scenic atmosphere

FORM RULE:

Use strong wall-plane dominance. The main façade color must lead the image. Openings must be clearly framed. Balconies, porches, roof edges, and adjoining fronts must read as coherent frontage composition.

COLOR RULE:

Use one dominant façade color field per house-front, supported by white or light trim around openings and façade edges. Use roof-red or clay-tile contrast above when relevant. Keep color architectural, not atmospheric. Do not diffuse the house into soft pastel haze.

SPACE RULE:

Use frontage-and-lane space, not mural-space and not deep scenic panorama as the main engine. The image should feel like a public house front in a narrow Goan street. Even when depth exists, the façade must remain structurally primary.

MATERIAL RULE:

Use painted or limewashed wall surfaces with believable exterior house-front behavior. The wall must feel architectural and habitable, not graphic or poster-like. The trim should feel built into the façade, not drawn on top.

NEGATIVE RULE:

no generic colorful colonial town
no Caribbean / Mediterranean drift
no pastel moodboard styling
no random bright walls with no trim logic
no normal architecture with color added later
no surface-decoration-first thinking
no beach-tourism postcard look
no facade as mere background

OUTPUT GOAL:

The final result must feel like a real Goan Indo-Portuguese residential frontage where color is used as architectural structure: wall-plane, trim, roof, balcony, opening, and row rhythm all working together.

Reusable Variable Template

Create [SUBJECT / SCENE / HOUSE FRONT / STREET MOMENT] in the authentic visual logic of a Goan Indo-Portuguese color-blocked façade system.

STYLE SYSTEM:

Goan painted residential frontage, strong wall-plane color field, white or light trim around windows and edges, red-tiled roof contrast, balcony or porch articulation, narrow-lane house-front logic, row-house rhythm.

WHOLE-FRAME RULE:

Rebuild every visible element through the same façade-color system:

- [MAIN HOUSE / MAIN STRUCTURE] becomes a frontage led by a dominant painted wall field
- [WINDOWS / DOORS / SHUTTERS / EDGES] become trim-structured openings
- [BALCONY / PORCH / STEPS / THRESHOLD] become façade articulation, not decoration
- [ADJACENT HOUSES] if present become related but distinct color-blocked fronts
- [LANE / GROUND / STREET EDGE] supports the reading of a compact Goan residential street
- [PEOPLE] if present remain secondary and reveal lived relation to the house front

KEEP:

dominant wall-plane color
white or light trim logic
frontage composition

roof contrast
Goan Indo-Portuguese lane-house grounding
color acting as structure

AVOID:

generic colonial colorfulness
pastel mood only
one bright wall in neutral architecture
decorative paint with no façade logic
Caribbean / Mediterranean drift
normal house with Goa colors added later

Image-to-Image

Convert this source image into the authentic visual logic of a Goan Indo-Portuguese color-blocked residential façade.

Preserve the source image's main architectural hierarchy, subject count, core frontage or street action, and basic scene readability, but rebuild the entire image through:

- one dominant wall-plane color field
- white or light trim around openings and façade edges
- balcony / porch / frontage articulation
- red-tiled roof contrast where relevant
- narrow-lane residential frontage logic
- row-house rhythm if neighboring houses are visible

Translate the whole frame:

- walls become architectural color fields
- openings become trim-defined frontage elements
- balconies, porches, roof edges, and steps become part of the façade grammar
- adjacent structures become related colored fronts, not generic buildings
- people if present become scale and habitation cues, not style carriers
- lane, threshold, and street edges support the frontage composition

Do not simply recolor the house.

Do not apply a pastel filter.

Do not add white trim to an otherwise generic building.

Do not turn the image into a tourist-postcard color scene.

The final result must feel like the source image was rebuilt from the ground up as a real Goan Indo-Portuguese house-front world where pigment distribution is part of the architecture itself.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create the image in an authentic handcrafted dimensional translation of a Goan Indo-Portuguese color-blocked façade system, where the full frontage-color grammar remains primary but the architectural world becomes more tactile, more spatially legible, and more materially present.

Do not treat this as a prettier colorful building render, decorative heritage postcard, or normal house with nice paint. Rebuild the image so the same source logic remains in control:

- dominant wall-plane color field
- white or light trim around openings and edges
- balcony, porch, and threshold articulation
- red-tiled roof contrast
- narrow-lane frontage logic
- row-house rhythm in spirit or in full view

WHOLE-FRAME RULE:

Everything must still belong to the same frontage-color system.

- wall color must remain structurally dominant
- trim must still actively organize windows, doors, corners, and façade divisions
- balcony and porch depth must strengthen frontage reading, not replace it
- adjacent buildings if visible must participate in controlled lane rhythm
- steps, thresholds, lane edges, and human presence must all support a lived painted house-front world

ALLOW THESE TO BECOME RICHER:

- wall surface tactility
- trim thickness and edge presence
- balcony projection
- threshold depth
- porch-front articulation
- roof-and-wall contrast
- subtle age and weathering of the painted frontage

SPACE RULE:

Use shallow to moderate dimensional street-front space. The façade remains primary even when the world gains more depth. This is still a frontage-first system, not a realism-first environment.

MATERIAL RULE:

Use believable painted exterior surfaces, trim relief, shutters, rails, porch edges, and roof tiles, but keep them subordinate to the façade-color composition. Do not let texture overpower color structure.

NEGATIVE RULE:

no generic charming heritage render

no mood-first nostalgia
no random pretty colors
no realistic street scene with Goa paint added later
no Caribbean drift
no decorative surface treatment without frontage hierarchy

OUTPUT GOAL:

The final result must feel like a real Goan house-front color system translated into a richer tactile architectural world while remaining fully controlled by façade composition.

Reusable Variable Template

Create [SUBJECT / SCENE / HOUSE FRONT / STREET MOMENT] as an authentic handcrafted dimensional translation of a Goan Indo-Portuguese color-blocked façade system.

STYLE SYSTEM:

painted wall-plane architecture,
white or light trim logic,
balcony / porch / threshold articulation,
roof contrast,
row-house rhythm,
lane-facing frontage composition.

WHOLE-FRAME RULE:

- [MAIN HOUSE] becomes a tactile but still façade-led color-composed frontage
- [OPENINGS / TRIMS / SHUTTERS / DOORS] become stronger structural frontage details
- [BALCONY / PORCH / STEPS / THRESHOLD] gain depth while staying subordinate to the façade logic
- [ADJACENT HOUSES] if present continue the row-house rhythm
- [LANE / GROUND / STREET EDGE] supports frontage depth and lived street relation
- [PEOPLE] remain secondary habitation cues

ALLOW:

wall tactility
trim edge thickness
porch depth
balcony projection
subtle weathering
stronger threshold presence

KEEP:

wall-plane color dominance
trim-led opening structure
frontage composition
Goan Indo-Portuguese lane-house identity

color as architecture

AVOID:

pretty colorful realism only

mood-first nostalgia

decorative paint effects

generic colonial architecture

soft pastel haze

normal buildings with bright walls added later

Image-to-Image

Convert this source image into an authentic handcrafted dimensional Goan Indo-Portuguese color-blocked frontage world.

Keep the source image's main architectural hierarchy, subject relationships, and scene readability, but rebuild the whole image through:

- dominant façade wall color blocking
- white or light trim around openings
- balcony / porch / threshold depth
- red-tiled roof contrast where relevant
- narrow-lane frontage logic
- row-house rhythm or frontage-neighbor relation

Translate the frame so that:

- walls become tactile architectural color fields
- openings become trim-structured frontage components
- balconies and porches gain dimensional presence without overpowering the wall field
- adjacent structures reinforce the lane-house system
- people remain secondary lived-use cues

Do not just add texture and depth.

Do not turn it into a charming heritage illustration.

Do not make the scene realism-first and then paint it Goan.

The final result must feel like the source image was rebuilt as a tactile frontage-color architecture system from Goa.
