

# tribal clay,mural,domestic surface sys- Jharkhand

## V1 — Authentic Style

### Universal Hard Prompt

Create an image in the authentic source-faithful visual logic of a **Jharkhand tribal clay / mural / domestic surface system**, especially rooted in the **Sohrai–Khovar house-wall ecology of Hazaribagh**. Treat this as a **women-led ceremonial wall-painting family on mud-house surfaces**, built from **clay, earth pigments, ritual domestic activation, and mural fields spreading across architecture**. Do not treat it as generic tribal art, not as framed folk painting, not as decorative ethnic wall design, and not as a flattened mural look with no internal branch structure.

Build the full image as if the **house wall itself is the image-body**. The wall must feel earthen, absorbent, domestic, ceremonial, and clay-based. The mural must feel born from the wall, not placed on top of it. The whole frame should feel like a living domestic surface world where architecture, wall body, ritual meaning, and mural rhythm belong together.

Preserve the family base:

- mud-house wall surfaces
- natural clay and earth pigments
- handmade simple-tool marks
- women-led domestic ceremonial memory
- animal / plant / fertility / geometric mural fields
- house-wall activation rather than neutral decoration

Also preserve the internal branch logic. The family may lean toward:

- **Sohrai branch**: harvest, bumper crops, cattle-linked domestic celebration, earthy painted wall logic
- **Khovar branch**: marriage, chamber-wall activation, black-and-white layered clay contrast, etched or comb-cut reveal logic

If the image leans toward one branch, make that branch clear. If it stays at umbrella level, keep the family shared base strong without flattening both branches into one generic style.

Transform the whole image through domestic wall logic, not just motifs. Change:

- the **support body** so walls feel like real mud-house surfaces
- the **material logic** so color and contrast feel clay-based, mineral, matte, and hand-made
- the **composition logic** so the mural spreads like a wall field, not a framed picture

- the **architectural logic** so doorways, niches, edges, and room surfaces participate in the mural ecology
- the **ritual logic** so the image feels domestically activated rather than merely decorated

Marks must feel hand-guided through brushes, twigs, cloth swabs, fingers, combs, or scratching tools depending on branch. Avoid synthetic smoothness. Avoid digital-clean graphics. Avoid wallpaper repetition.

Do not generate:

- generic tribal mural art
- framed folk illustration
- modern mural branding
- decorative ethnic wall patterning
- synthetic paint logic
- a flattened Sohrai-Khovar blend with no process distinction
- motifs pasted on generic architecture

The final image must feel like **a real Jharkhand domestic clay-wall world where ritual mural making transforms the house surface itself.**

## Reusable Variable Template

Create **[SUBJECT / WALL TYPE / DOMESTIC SCENE]** in the authentic source-faithful visual logic of a **Jharkhand tribal clay / mural / domestic surface system.**

Core family system to preserve:

- mud-house wall body
- clay and earth as the real image medium
- women-led domestic ceremonial making
- mural field spread across architecture
- animal / plant / fertility / geometric symbolic world
- family rooted in Sohrai-Khovar wall ecology
- clear branch distinction when needed

Branch control:

- **[BRANCH MODE: SOHRAI / KHOVAR / CONTROLLED UMBRELLA BLEND]**
- if Sohrai: harvest-wall, earthy applied pigment, agrarian/cattle-linked wall activation
- if Khovar: marriage-wall, black-white layered clay, comb/finger-etched reveal
- if umbrella blend: shared mud-wall family base remains primary, but internal branch cues stay legible and not collapsed

Translate the image like this:

- **[WALL / SURFACE]** becomes a real Jharkhand mud-house domestic wall
- **[MOTIF FIELD]** becomes a clay-born mural ecology, not isolated symbols
- **[COLOR / CONTRAST SYSTEM]** becomes branch-appropriate and earth-based
- **[MARK LOGIC]** becomes hand-made and tool-responsive
- **[DOMESTIC ARCHITECTURE]** becomes part of the mural system
- **[FULL FRAME]** must read as one living house-surface world

Keep:

- wall first
- clay first
- ritual first
- domestic sacredness
- branch clarity
- mural field logic
- whole-frame coherence

Avoid:

- generic tribal style
- framed art logic
- décor-first styling
- synthetic pigment behavior
- branch flattening
- motif transfer on generic walls

## Image-to-Image

Convert this source image into the authentic source-faithful visual logic of a **Jharkhand tribal clay / mural / domestic surface system**.

Preserve the source image's main subject count, overall wall or architectural arrangement, and core readability, but rebuild the full frame through **mud-house wall body, natural clay pigments, women-led ceremonial wall logic, and branch-aware mural structure from the Sohrai–Khovar family**. Replace any generic mural, decorative wall art, synthetic folk styling, or neutral architecture with a true domestic clay-wall world.

If the image leans toward harvest-wall activation, use a clear **Sohrai-type** logic. If it leans toward marriage-wall activation, use a clear **Khovar-type** logic. If it stays umbrella-level, preserve the shared family grammar without erasing internal structure.

Rebuild the wall so it becomes the true body of the image. Rebuild motifs so they behave like a mural field. Rebuild color or contrast so it feels clay-derived and branch-correct. Rebuild room edges, niches, or wall divisions so they belong to the same domestic ceremonial ecology.

Do not simply place tribal motifs on the source image. Do not keep another visual language underneath. Rebuild the full wall-world so **surface, clay, marks, motif rhythm, domestic architecture, and ritual identity all become one Jharkhand family system.**

## V2 — Artisan Translation

### Universal Hard Prompt

Create a **creative 2D + 3D translation** of a **Jharkhand tribal clay / mural / domestic surface system**. This is not generic tribal styling, not motif transfer, and not decorative wall treatment. It should feel like the full **domestic clay-wall grammar** of the Sohrai–Khovar family has begun to reorganize the image more powerfully while still remaining source-rooted and branch-aware.

Let the wall stop behaving like passive background and become the main compositional force. Let domestic architecture feel more deeply absorbed into the mural system. Let clay, contrast, pigment, marks, and wall-field organization become more structurally active. Let the mural world feel more fully authored across the house surface. But do not flatten Sohrai and Khovar into one decorative fusion.

This version must transform more than surface. Change:

- the **wall-body logic** so support becomes compositionally active
- the **field organization** so motifs interlock as one domestic ceremonial ecology
- the **space construction** so 2D wall plane and subtle 3D architecture become one system
- the **mark logic** so hand-tool rhythm becomes more visually authored without becoming graphic design
- the **branch structure** so shared family base stays clear while branch identity remains legible
- the **environment logic** so room edges, doors, niches, and wall divisions all belong to one Jharkhand clay-wall world

Branch rule:

- if the image leans Sohrai, let harvest-wall painted earthy spread dominate
- if it leans Khovar, let layered black-white etched contrast dominate
- if it stays umbrella-level, preserve the family as a controlled house-surface system where shared base is strong and branch cues remain readable

Do not generate:

- tribal-modern design branding
- generic earthy mural design

- wallpaper-like pattern systems
- vector-clean folk graphics
- decorative branch fusion
- portable art logic disguised as wall translation

The final result must feel like **the full Jharkhand domestic clay-wall family has reauthored the image through wall-body, house-space, mark logic, and branch-aware ceremonial mural spread.**

## Reusable Variable Template

Create **[SUBJECT / WALL TYPE / DOMESTIC SCENE]** as a **creative 2D + 3D translation** of a **Jharkhand tribal clay / mural / domestic surface system.**

Preserve these family-core rules:

- wall-body remains primary
- clay and earth remain the real image medium
- women-led domestic ceremonial logic remains present
- mural field remains house-surface based
- family remains branch-aware
- the image must be rebuilt, not decorated after the fact

Branch control:

- **[BRANCH MODE: SOHRAI / KHOVAR / CONTROLLED UMBRELLA BLEND]**
- preserve branch-specific process logic and visual behavior
- do not flatten the family into one generic style

Translate the image like this:

- **[WALL / SURFACE]** becomes a stronger active clay-wall body
- **[MOTIF SYSTEM]** becomes more structurally woven into one mural ecology
- **[DOMESTIC ARCHITECTURE]** becomes more integrated into the wall grammar
- **[MARKS / RHYTHMS / CONTRAST OR COLOR FIELDS]** become more compositionally decisive while staying handmade
- **[BRANCH VISUAL LANGUAGE]** becomes stronger without erasing the shared family base
- **[FULL FRAME]** must feel reauthored by Jharkhand domestic wall logic

Mandatory transformation rule:

Do not transfer only motif, texture, or palette.

Also transform:

- wall-body behavior
- field structure

- house-space relation
- mark cadence
- environment logic
- branch clarity
- whole ceremonial wall ecology

Let these become richer:

- mural spread
- architectural absorption
- branch articulation
- clay-body presence
- domestic ritual atmosphere
- full-surface coherence

Keep unchanged:

- wall first
- clay first
- ritual first
- branch structure
- women-led domestic memory
- whole-frame coherence

Avoid:

- generic tribal-modern style
- wall décor language
- portable-folk-art logic
- decorative branch blending
- graphic-clean mural systems
- synthetic palette or finish

## Image-to-Image

Convert this source image into a **creative 2D + 3D Jharkhand domestic clay-wall world**.

Preserve the source image's main subject count, wall or architectural arrangement, and overall readability, but rebuild the full frame through **mud-house wall body, clay and earth material logic, women-led ceremonial mural authorship, and a branch-aware Sohrai–Khovar domestic surface system**. Let the image become more compositionally transformed than a literal reference while staying fully rooted in the family.

Rebuild the wall so it actively organizes the image. Rebuild motifs so they become part of one expanded mural field. Rebuild domestic edges, niches, thresholds, or openings so they participate in the same clay-wall grammar. Rebuild mark behavior so it feels handmade and

branch-correct. Rebuild color or contrast behavior so it reflects the family and branch structure rather than generic folk styling.

Do not just apply Jharkhand mural motifs to the existing image. Do not keep another decorative logic underneath. Rebuild the full wall-world so **wall body, field rhythm, branch identity, domestic architecture, and ceremonial house-surface ecology** all become one **Jharkhand family system**.

## V3 — 3D / Realistic / Cinematic Translation

### Universal Hard Prompt

Create a **full 3D realistic dimensional world** generated from a **Jharkhand tribal clay / mural / domestic surface system**. This is not a realistic house with tribal motifs painted on later. It is a believable world in which **mud-house wall body, clay and earth process, women-led ceremonial mural making, and branch-aware Sohrai-Khovar wall logic** govern every visible element.

Translate the full family system into reality. Every part of the frame must adapt:

- walls must behave like real mud-house domestic surfaces
- clay, pigment, or reveal logic must behave like actual material process
- motifs must behave like mural fields integrated into architecture
- domestic room or house space must behave like a living support for ritual wall activation
- shadows, wall depth, wear, and surface tactility must support clay-body truth rather than generic realism
- the environment must feel like a real Jharkhand house-surface ecology with branch-aware ceremonial identity

This version must not stop at realistic texture. It must rebuild:

- **wall-body logic** so support becomes physically credible
- **material-process logic** so paint/reveal/contrast remain branch-correct
- **space** so the 3D house-world still feels governed by mural-surface priorities
- **mark behavior** so the wall retains handmade authorship even in realism
- **domestic environment** so thresholds, niches, room edges, and adjoining surfaces all belong to the same ceremonial family ecology
- **whole-frame coherence** so nothing looks like ordinary realism plus folk motifs

Branch control:

- if the image leans Sohrai, the realism must preserve painted earth-pigment harvest-wall logic

- if the image leans Khovar, the realism must preserve black-white layered clay and etched reveal logic
- if the image stays umbrella-level, the family base must dominate while branch differentiation remains visible and controlled

Do not generate:

- generic village-wall realism
- ethnic wall décor realism
- flattened tribal mural realism
- branch-confused hybrid surfaces
- portable-art realism disguised as architecture
- decorative mural branding language

The final image must feel like **a real Jharkhand house-surface world in which the full domestic clay-wall family has become materially and spatially believable reality.**

## Reusable Variable Template

Create **[SUBJECT / WALL TYPE / DOMESTIC SCENE]** as a **full 3D realistic dimensional world** generated from a **Jharkhand tribal clay / mural / domestic surface system**.

Style system that must remain unchanged:

- mud-house wall body remains primary
- clay and earth remain the real image medium
- women-led domestic ceremonial memory remains present
- branch-aware Sohrai/Khovar structure remains active
- mural field remains structurally integrated into architecture
- the entire frame must be rebuilt through one domestic clay-wall family grammar

Translate the image like this:

- **[WALL / HOUSE SURFACE]** becomes a believable prepared or layered clay-wall body
- **[MOTIF SYSTEM]** becomes a real mural field integrated into domestic architecture
- **[DOMESTIC EDGES / OPENINGS / NICHES]** become part of the same house-surface ecology
- **[MATERIAL PROCESS]** becomes physically convincing and branch-correct
- **[SURFACE DEPTH / WEAR / SHADOW]** becomes realistic without breaking mural primacy
- **[FULL ENVIRONMENT]** becomes a coherent domestic ceremonial world rather than ordinary realism

Increase:

- wall tactility
- material-process realism
- mural-field integration
- domestic spatial completion
- branch clarity
- environmental coherence

Do not lose:

- wall first
- clay first
- ritual domestic meaning
- branch distinction
- women-led authorship
- whole-frame house-surface ecology

Avoid:

- realistic wall décor
- generic tribal realism
- synthetic mural logic
- branch collapse
- ordinary realism with folk graphics added on top

## Image-to-Image

Convert this source image into a **full 3D realistic Jharkhand domestic clay-wall world**.

Preserve the source image's main subject count, overall architectural arrangement, and readable action structure, but rebuild every visible element through **mud-house wall body, clay and earth material logic, women-led ceremonial mural authorship, and a branch-aware Sohrai-Khovar domestic surface system**. Replace generic walls, generic paints, decorative ethnic wall styling, or generic village realism with a full Jharkhand house-surface ecology.

Rebuild the wall so it becomes the true physical support of the image. Rebuild motifs so they integrate into the wall field. Rebuild color or contrast so it behaves like real clay-based process. Rebuild domestic architectural elements so they belong to a living ceremonial house-world. Rebuild shadows and surface depth so they strengthen wall-body realism rather than making the mural float away from the support.

Do not simply add realistic texture to folk motifs. Do not keep the original base-world underneath. Rebuild the full frame so **wall, clay process, mark system, motif rhythm, domestic architecture, and branch identity all become one believable Jharkhand family reality**.
