

Bengal Patachitra - West Bengal

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of Bengal Patachitra from West Bengal.

Treat this as a true patua / chitrakar narrative-painting system, not as generic Indian folk painting, not as decorative ethnic wall art, not as realism-first illustration, and not as a modern painting with patachitra flavor added later.

Build the image through real Bengal Patachitra logic:

story-first image construction,
scroll- or panel-based narrative organization,
patua storytelling intelligence,
bold readable contour,
expressive stylized figures,
vivid narrative color,
clear scene legibility,
and sung/spoken storytelling memory.

The image must feel like painted storytelling from the beginning.
It must not feel like a normal illustration that has been flattened or decorated afterward.

The style must control the whole frame:

figure construction,
facial expression,
gesture clarity,
panel or episode logic,
border framing,
color separation,
story emphasis,
and overall narrative readability.

If the image is a single frame, it must still feel born from scroll-and-panel storytelling intelligence.

If the image is multi-part, each section must read clearly and connect to the next with strong narrative staging.

Do not make it:

generic folk art,
generic mythological painting,
realistic illustration,

museum-style decorative panel with no storytelling energy,
or ordinary painting with bright colors and thick outlines only.

The final image must feel like authentic Bengal Patua painting itself generated the image.

Reusable Variable Template

Create [SUBJECT / SCENE / STORY / WORLD] in the pure authentic source-truth visual logic of Bengal Patachitra from West Bengal.

Treat the style as a patua / chitrakar narrative-painting system built from:
story-image logic,
scroll/panel structure,
bold readable contour,
expressive figure construction,
vivid color fields,
bordered composition,
and sung storytelling memory.

Core style system to preserve:
narrative-paint truth,
patua authorship feeling,
story-first composition,
bold contour-led form,
vivid readable color,
performance-linked image logic,
and whole-frame same-language control.

Translate the image like this:

[MAIN FIGURES] must become stylized narrative figures, not realism-first bodies
[SCENE STRUCTURE] must read as story staging, not generic illustration space
[CONTOURS] must be bold, readable, and meaning-bearing
[COLOR] must be vivid and narrative-driven, not tonal-naturalistic
[BORDERS / FRAMING] must contain and organize the image as a story-field
[SUBJECT MATTER] must feel patua-born whether mythological, folkloric, social, or contemporary

Keep:
storytelling clarity,
scroll/panel memory,
patua/chitrakar identity,
bold contour,
vivid narrative color,
and performance memory.

Avoid:

generic Indian folk look,
decorative ethnic painting,
realism-first illustration,
silent museumified panel treatment,
or modern visual language stronger than the Bengal Patachitra grammar.

The final result must feel like true Bengal Patachitra logic itself generated the whole image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of Bengal Patachitra from West Bengal.

Preserve the source image's subject count, main action, and narrative clarity,
but rebuild the entire image through real patua storytelling intelligence.

Replace generic illustration or realism with:
scroll/panel story logic,
bold readable contour,
stylized expressive figures,
vivid narrative color,
bordered story-field organization,
and sung storytelling memory.

Do not merely add folk colors.
Do not merely add thick outlines.
Do not merely add decorative borders.
Do not keep realistic figure logic while only the surface becomes patachitra-like.

Rebuild:
figures as patua-born painted figures,
space as story-organization,
color as vivid narrative separation,
contour as the main form carrier,
and the whole frame as one Bengal Patachitra-authored visual language.

The final result must feel like the source image has been completely re-authored by authentic Bengal Patachitra logic, not decorated with it.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Bengal Patachitra from West Bengal.

Preserve the same deep source grammar of the style:

patua narrative-painting identity,
story-first composition,
scroll/panel storytelling structure,
bold readable contour,
expressive stylized figures,
vivid narrative color,
bordered story-field organization,
and sung storytelling memory.

Now translate that same grammar into stronger handcrafted painted-surface embodiment.

This must not become generic illustration realism.

This must not become polished folk-fantasy art.

This must not become decorative wall-art styling.

This must not become premium gallery painting with patachitra features added later.

Dimensionality must come from the style itself:

through stronger painted-surface presence,
clearer border-field containment,
clearer episode and scene articulation,
stronger figure weight within the same contour logic,
richer but still flat-and-readable color body,
and stronger handcrafted image-object coherence.

This is not realism-first depth.

This is the same Bengal Patachitra grammar gaining stronger painted embodiment.

Allow:

clearer painted object presence,
stronger surface body,
better figure-scene separation,
better scroll/panel readability,
and stronger story movement.

Do not let realism replace contour logic.

Do not let painterly atmosphere replace story clarity.

Do not let rich surface treatment weaken patua readability.

The whole image must feel like Bengal Patachitra has gained stronger painted-surface embodiment without losing its native storytelling system.

Reusable Variable Template

Create [SUBJECT / SCENE / STORY / WORLD] in V2 = authentic handcrafted dimensional translation of Bengal Patachitra from West Bengal.

Preserve the unchanged deep source core:
patua narrative-image truth,
scroll/panel storytelling logic,
bold readable contour,
expressive figure construction,
vivid narrative color,
bordered story-field control,
and performance-linked storytelling memory.

Translate the image into handcrafted painted-surface form by increasing:
surface body,
painted presence,
panel clarity,
figure weight,
border-field relation,
story readability,
and same-language painted-world structure.

Build the image like this:
[MAIN FIGURES] become more fully embodied as painted figures, but remain stylized and contour-led
[SCENE STRUCTURE] becomes more clearly staged as story, never realism-first space
[CONTOURS] remain the main carriers of form and meaning
[COLOR] gains stronger painted-body presence, not tonal realism
[BORDERS / FRAMES / PANELS] gain stronger containment and story articulation
[SUBJECT] remains patua-born whether sacred, folkloric, social, or contemporary

Keep:
narrative-paint truth,
bold contour,
vivid color,
scroll/panel memory,
patua authorship feeling,
and whole-frame same-language control.

Avoid:
generic illustration realism,
gallery-folk modernism,

decorative ethnic wall-art polish,
realistic anatomy or depth,
or any second visual language stronger than the Bengal Patachitra grammar.

The final image must feel like authentic Bengal Patachitra grammar translated into handcrafted painted-surface embodiment.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of Bengal Patachitra from West Bengal.

Keep the source image's subject count, core action, and narrative readability,
but rebuild the entire image through Bengal Patua painting grammar translated into stronger painted-surface embodiment.

The image must no longer behave like generic illustration or realism.

Replace that with:

story-first panel or scene organization,
bold readable contour,
stylized expressive figures,
vivid narrative color,
bordered story-field containment,
and patua storytelling presence.

Add:

stronger painted-surface body,
clearer figure-to-figure relation,
stronger panel or staged-scene readability,
clearer border-field organization,
and stronger handcrafted image-object coherence.

But do not let dimensionality come from realism, atmospheric depth, or premium illustration polish.

Do not keep ordinary visual logic while only the surface becomes folk-like.

Rebuild all visible elements so they feel born from Bengal Patachitra logic.

The result must feel like the source image has entered the branch's handcrafted painted narrative world, not that patachitra styling has been placed onto an ordinary image.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world translation of the same source grammar of Bengal Patachitra from West Bengal.

Keep the authentic Bengal Patachitra patua / chitrakar narrative-painting system unchanged and push it into its most complete, most embodied, most scene-capable story-world.

This is story-world embodiment, not realism replacement.

Preserve the same unchanged deep Bengal Patachitra core:

story-first painted image logic,
scroll/panel narrative structure,
bold readable contour,
expressive stylized figures,
vivid narrative color,
bordered composition,
patua storytelling intelligence,
and sung/spoken performance memory.

Important:

do not create realism-first illustration,
do not create cinematic fantasy art,
do not create premium editorial myth painting,
do not create a normal illustration world with only patachitra accents added later.

The entire world must be rebuilt through Bengal Patachitra logic.

Every visible category must become source-born:

figures,
objects,
animals,
architecture,
landscape elements,
borders,
scene transitions,
foreground, midground, background relations,
and full narrative staging.

Believability here means:

believable story-world coherence,
believable episode relation,
believable painted scene logic,
believable figure interaction,

believable panel or staged-sequence continuity,
but still fully generated by the same patua painted grammar.

The style must still control:
contour logic,
figure grammar,
story sequencing,
color behavior,
scene organization,
performance-linked readability,
and community-authored narrative intelligence.

Increase:
full same-style world embodiment,
full scene completion,
full narrative continuity,
stronger story movement,
stronger whole-frame orchestration through patua logic,
and stronger sense that the image could still be sung or narrated.

Absolute rule:
the Bengal Patachitra system must not decorate the world.
the Bengal Patachitra system must generate the world.

Do not keep generic illustration realism and then add patachitra flavor later.
Do not let the style survive only in border, color, or contour.
Do not let polish overpower source grammar.

The final image must feel like:
the same Bengal Patachitra style itself has become a fully embodied complete story-world.

Reusable Variable Template

Create [SUBJECT / SCENE / STORY / WORLD] in V3 = fully resolved believable real-world translation of the same source grammar of Bengal Patachitra from West Bengal.

Keep the authentic Bengal Patachitra patua narrative-painting system unchanged and push it into full story-world embodiment.

Preserve the same unchanged deep core:
story-first image logic,
scroll/panel narrative organization,
bold readable contour,
expressive figure construction,
vivid narrative color,

patua storytelling memory,
and bordered story-field containment.

Important:

the whole world must be rebuilt through Bengal Patachitra logic.

Do not keep normal illustration logic and then add Bengal folk flavor later.

Build the image like this:

[MAIN FIGURES] must become source-born patua figures, not realism-based bodies

[SCENE] must become story-stage or episode-space, not generic illustration depth

[OBJECTS / ANIMALS / SETTINGS] must obey the same contour-led narrative grammar

[COLOR] must remain vivid, legible, and story-driven

[BORDERS / PANELS / FRAMES] must organize and contain the story-world

[SUBJECT MATTER] must remain patua-born whether mythological, folkloric, social, or contemporary

[ENTIRE FRAME] must feel paint-authored and narration-ready

Believable story-world embodiment here means:

believable painted coherence,

believable episode relation,

believable figure-to-figure storytelling,

believable full-scene readability,

but no realism takeover.

Increase:

full world embodiment,

full story continuity,

full scene completion,

stronger figure relation,

stronger painted-world orchestration,

and stronger same-language control.

Keep unchanged:

narrative-paint truth,

scroll/panel memory,

bold contour,

vivid color,

patua authorship feeling,

and performance memory.

Avoid:

generic illustration realism,

cinematic folk-fantasy art,

decorative ethnic painting,

realistic world with patachitra accents,

or any second visual language overpowering the source grammar.

The final image must feel like:

the same Bengal Patachitra grammar itself has become a believable full story-world.

Image-to-Image

Convert this source image into V3 = fully resolved believable real-world translation of the same source grammar of Bengal Patachitra from West Bengal.

Preserve the source image's subject count, core action, story purpose, and main relationships,
but rebuild every visible element through Bengal Patachitra patua storytelling intelligence fully embodied as a complete painted story-world.

Keep the authentic branch unchanged and push it into full story-world embodiment.

Replace ordinary illustration or realism with:
story-first painted organization,
scroll/panel narrative logic,
bold readable contour,
expressive stylized figures,
vivid narrative color,
bordered scene containment,
and sung/storytelling memory.

Do not keep normal image logic and then add patachitra later.
Do not keep realistic figures and only localize borders or color.
Do not let the style survive only in decorative accents.

Rebuild:
figures as true patua figures,
scene as narrated story-space,
objects and settings as contour-led painted elements,
color as vivid story separation,
borders and paneling as true narrative organization,
and the whole frame as one uninterrupted Bengal Patachitra-authored story-world.

Expand the source into:
full painted-world embodiment,
full narrative continuity,
full scene completion,
clear figure relation,
clear story progression,
and complete patua readability,
but only through Bengal Patachitra grammar.

Absolute rule:
the Bengal Patachitra system must generate the world, not decorate the world.

The final result must feel like:
the same Bengal Patachitra style itself has become a believable fully embodied story-world.
If it feels like generic illustration coated with Bengal folk flavor, it has failed.
