

Chola Bronze - Tamil Nadu

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of Chola Bronze from Tamil Nadu.

Treat this as a real Tamil sacred bronze-icon system, not as generic bronze sculpture, not as generic Hindu idol styling, not as museum-object realism, not as fantasy metallic deity art, and not as a realistic world with one bronze deity added later.

Build the entire image as if it comes from true Chola / Swamimalai bronze intelligence:
sacred icon-body identity,
Shilpa-Shastra proportion discipline,
deity-centered posture,
symbolic mudra logic,
wax-modeled lost-wax cast-object truth,
Panchaloha / copper-alloy sacred body,
hand-finished bronze presence,
ritual and processional object-world,
and temple/home worship legitimacy.

The body must not read like a human body turned into bronze.
It must read like a sacred icon-body from the beginning.

The style must control the whole frame:
face construction,
eye logic,
mouth logic,
body proportion,
limb rhythm,
posture,
mudra,
ornament integration,
crown logic,
support/base logic,
bronze surface behavior,
ritual placement,
background structure,
and same-language world control.

If figures appear, do not build them as normal realistic humans first.
Build them as source-born sacred icon presences:

canonically proportioned,
non-photoreal in logic,
divine in bodily order,
and shaped by bronze icon grammar rather than by realism-first anatomy.

Do not treat the branch like generic temple statue art.
Do not turn it into decorative bronze craft.
Do not reduce it to shiny metal deity styling.
Do not let normal anatomy sit underneath sacred accessories.
Do not let generic realism sit underneath the style.

The image must still feel like Chola Bronze:
sacred icon-body truth,
lost-wax cast-object identity,
ritual usability,
deity-centered posture and mudra,
and Tamil temple/processional presence.

Preserve true branch identity:
icon-first,
casting-first,
Shilpa-Shastra-first,
ritual-object-first,
bronze-body-first,
and same-language world logic.

Do not make it:
generic bronze statue art,
generic Hindu idol styling,
museum-display neutrality,
fantasy metallic deity design,
normal anatomy cast in bronze,
or realism with one bronze icon used as local flavor.

The final image must feel like the original Chola / Swamimalai bronze system itself made this image.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in the pure authentic source-truth visual logic of Chola Bronze from Tamil Nadu.

Treat the style as a sacred bronze-icon system built from:
Shilpa-Shastra proportion discipline,
deity-centered posture,
symbolic mudra logic,

wax-modeled lost-wax casting,
Panchaloha / copper-alloy body,
hand-finished cast-object presence,
and ritual/processional object-world identity.

Core style system to preserve:
sacred icon-body identity,
canonically governed face and body logic,
lost-wax cast-object truth,
ritual usability,
deity-specific body order,
temple/home/processional legitimacy,
Tamil-rooted sacred bronze intelligence,
whole-frame consistency.

Translate the image like this:

[MAIN FIGURES] must become sacred icon-bodies, not normal people
[FACES] must become canonically governed, divine, non-photoreal, and structurally clear
[BODIES / GESTURE / POSTURE] must obey Shilpa-Shastra logic, deity stance, and mudra discipline
[PROPS / OBJECTS] must become ritual-object-born, not generic objects with Indian ornament
[GROUND / SUPPORTS] must become sacred icon placement logic, not generic flooring or museum display
[ENVIRONMENT / BACKGROUND] must also inherit the same sacred bronze language

Keep:

icon-body truth,
cast-object identity,
bronze-body authority,
mudra/posture discipline,
ritual/processional presence,
same-language world control.

Avoid:

generic bronze statue styling,
generic Hindu idol shorthand,
museum realism,
fantasy metallic deity art,
normal anatomy with sacred accessories,
or one bronze icon inside an unstylized world.

The final result must feel like true Chola Bronze logic itself generated the whole image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of Chola Bronze from Tamil Nadu.

Preserve the source image's subject count, main action, pose relationships, and basic readability,
but rebuild the entire image through real Chola / Swamimalai sacred bronze intelligence.

Replace normal realism with:
sacred icon-body identity,
Shilpa-Shastra proportion logic,
deity-centered posture,
symbolic mudra logic,
wax-modeled lost-wax cast-object truth,
Panchaloha / copper-alloy body,
hand-finished bronze presence,
and ritual/processional object-world legitimacy.

Do not merely turn the subject into a bronze statue.
Do not merely add crowns, mudras, or ornaments.
Do not keep realistic anatomy while only the surface becomes bronze.
Do not keep realistic environment logic while only one icon changes.

Rebuild:
faces as sacred icon faces,
bodies as sacred icon bodies,
objects as ritual bronze objects,
supports as sacred icon supports,
space as temple/processional sacred space,
and the whole frame as one Chola-Bronze-authored visual language.

The final result must feel like the source image has been completely re-authored by authentic Chola Bronze logic, not decorated with it.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Chola Bronze from Tamil Nadu.

Preserve the same deep source grammar of the style:
sacred icon-body identity,
Shilpa-Shastra proportion discipline,

deity-centered posture,
symbolic mudra logic,
wax-modeled lost-wax casting,
Panchaloha / copper-alloy body,
hand-finished cast-object presence,
and ritual/processional object-world truth.

Now translate that same grammar into believable handcrafted dimensional presence.

This must not become generic sculpture realism.
This must not become premium temple décor styling.
This must not become a realistic scene with a bronze deity added later.

Dimensionality must come from the style itself:
through icon-body mass,
cast-form rhythm,
wax-modeled contour logic,
mudra-bearing structure,
ornament integrated into sacred body order,
bronze material weight,
hand-finished surface articulation,
and ritual-object usability.

This is not realism-first bronze sculpture.
This is the same sacred icon-body gaining cast-body depth.

Allow:
moderate volume,
clearer cast-object presence,
tactile bronze materiality,
stronger icon-body relief,
more believable sacred mass,
handcrafted structural thickness,
and stronger relation between sacred icon and surrounding ritual world.

Figures or wider image-world elements, if present, must remain style-born:
not realism-first,
not sculpture-gallery-first,
not normal humans near a bronze icon.
They must inherit sacred bronze body logic, ritual-object truth, and same-language world construction.

Do not let metallic rendering fake the translation.
Do not let the environment stay generic while only one bronze gains style.
Do not let museum-display realism replace ritual presence.
Do not let realism replace icon DNA.

The whole image must feel like Chola Bronze has entered handcrafted dimensional space without losing itself.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V2 = authentic handcrafted dimensional translation of Chola Bronze from Tamil Nadu.

Preserve the unchanged deep source core:

sacred icon-body identity,
Shilpa-Shastra proportion discipline,
deity-centered posture,
symbolic mudra logic,
lost-wax cast-object truth,
Panchaloha / copper-alloy body,
hand-finished bronze presence,
and ritual/processional object-world logic.

Translate the image into handcrafted dimensional form by increasing:

volume,
icon-object presence,
bronze mass,
surface articulation,
mudra clarity,
ornament integration,
figure-ground separation,
and same-language spatial structure.

Build the image like this:

[MAIN FORMS / OBJECTS] become handcrafted dimensional presences still governed by sacred bronze icon grammar

[FACES if present] remain canonically governed, divine, and non-photoreal, never realism-first

[BODIES / GESTURE / POSTURE] gain dimensional body but still read as source-born through Shilpa-Shastra order

[PROPS / SUPPORTING OBJECTS] gain structure and tactility through ritual bronze logic, not generic realism

[GROUND / SURFACES] become sacred icon placement space, not generic museum or room fill

[ENVIRONMENT / BACKGROUND] gains same-language ritual bronze structure, not generic cinematic realism

Keep:

icon-body truth,
cast-object identity,
bronze-body authority,

mudra/posture discipline,
ritual-processional presence,
same-language world control.

Avoid:

generic sculpture realism,
premium sacred décor styling,
museum-object neutrality,
fantasy metallic deity art,
normal anatomy in bronze,
or one bronze icon inside an unstylized world.

The final image must feel like authentic Chola Bronze grammar translated into handcrafted cast-body depth.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of Chola Bronze from Tamil Nadu.

Keep the source image's subject count, core action, and readability,
but rebuild the entire image through Chola / Swamimalai sacred bronze grammar translated
into handcrafted dimensional form.

The image must no longer behave like generic sculpture realism.

Replace that with:

sacred icon-body identity,
Shilpa-Shastra proportion,
deity-centered posture,
symbolic mudra logic,
lost-wax cast-object truth,
Panchaloha / copper-alloy body,
hand-finished bronze presence,
and ritual/processional object-world authority.

Add:

moderate dimensional presence,
tactile cast-object presence,
clear icon-body relief,
strong bronze mass,
and handcrafted ritual spatial logic.

But do not let dimensionality come from generic realistic rendering or museum staging.
Do not keep normal environment or figures while only one bronze becomes local.

Rebuild all visible elements so they feel born from Chola Bronze logic.

The result must feel like the source image has entered the branch's handcrafted dimensional world, not that a bronze deity has been placed into an ordinary scene.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of the same source grammar of Chola Bronze from Tamil Nadu.

Keep the authentic Chola / Swamimalai sacred bronze style system unchanged and push it into its most complete, most embodied, most scene-capable, most volumetric image-world.

This is maximum world-depth, not realism replacement.

Preserve the same unchanged deep Chola Bronze core:

sacred icon-body identity,
Shilpa-Shastra proportion discipline,
deity-centered posture,
symbolic mudra logic,
wax-modeled lost-wax cast-object truth,
Panchaloha / copper-alloy body,
hand-finished bronze presence,
ritual/processional object-world,
and same-language sacred bronze world construction.

Important:

do not create generic temple realism,
do not create museum-display realism,
do not create normal humans,
do not create generic ceremonial scenery,
do not create a normal world with one bronze deity added later.

The entire world must be rebuilt through Chola Bronze logic.

Every visible category must become source-born:

faces,
bodies,
hands,
supports,
pedestals,
ritual objects,
ground,
architectural structures,
foreground, midground, background,
negative space,

and spatial rhythm.

Believable real-world 3D here means:

- believable volume,
- believable material behavior,
- believable light on bronze form,
- believable spatial separation,
- believable object presence,
- believable scene-world logic.

But the style must still control:

- face design,
- body order,
- mudra,
- shape logic,
- object logic,
- composition logic,
- material identity,
- environment logic,
- and scene organization.

Increase:

- full same-style world embodiment,
- full spatial completion,
- full object presence,
- full environmental completion,
- strong figure-ground separation through sacred bronze logic,
- strong readability through sacred bronze logic,
- strong whole-frame coherence through sacred bronze logic.

Absolute rule:

- the Chola Bronze system must not decorate the world.
- the Chola Bronze system must generate the world.

The environment must not be generic realism with a bronze idol later.

The objects must not be generic ritual props.

The bodies must not be normal anatomy in bronze.

Everything must feel reconstructed by the Chola / Swamimalai sacred bronze system itself.

Do not introduce:

- generic realism,
- museum neutrality,
- premium temple décor polish,
- fantasy metallic deity spectacle,
- normal anatomy under sacred ornament,
- or a second visual language stronger than the source grammar.

The final image must feel like:

the same Chola Bronze style itself has become a fully embodied complete volumetric scene-world.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] in V3 = fully resolved believable real-world 3D translation of the same source grammar of Chola Bronze from Tamil Nadu.

Keep the authentic Chola / Swamimalai sacred bronze style system unchanged and push it into maximum world-depth.

Preserve the same unchanged deep core:

sacred icon-body identity,
Shilpa-Shastra proportion discipline,
deity-centered posture,
symbolic mudra logic,
lost-wax cast-object truth,
Panchaloha / copper-alloy body,
hand-finished bronze presence,
and ritual/processional object-world logic.

Important:

the whole world must be rebuilt through Chola Bronze logic.
Do not keep normal realism and then add bronze-icon flavor later.

Build the image like this:

[MAIN FORMS / OBJECTS] must become source-born sacred bronze presences, not normal objects with local ornament

[FACES if present] must become canonically governed sacred faces, not default human realism

[BODIES if present] must become icon-bodies, not generic people

[SUPPORT OBJECTS / RITUAL OBJECTS] must become Chola-bronze-world constructions, not generic temple props

[GROUND / SURFACES] must become sacred icon space, not generic flooring or museum platform

[ENVIRONMENT / BACKGROUND] must become same-language sacred bronze world-space, not generic temple or gallery realism

Believable real-world 3D here means:

believable volume,
believable material behavior,
believable light on bronze form,
believable spatial separation,
believable object presence,
believable scene-world coherence.

Increase:

full world embodiment,
full spatial completion,
full object presence,
full environmental completion,
strong figure-ground separation,
strong scene readability,
strong whole-frame orchestration.

Keep unchanged:

icon-body truth,
cast-object identity,
bronze-body authority,
mudra/posture discipline,
ritual-processional presence,
same-language world control.

Avoid:

generic realism,
generic sacred décor,
museum display language,
fantasy metallic deity art,
normal anatomy with sacred accessories,
style only in bronze color,
or any second visual language overpowering the source grammar.

The final image must feel like:

the same Chola Bronze grammar itself has become a believable volumetric scene-world.

Image-to-Image

Convert this source image into V3 = fully resolved believable real-world 3D translation of the same source grammar of Chola Bronze from Tamil Nadu.

Preserve the source image's subject count, core action, scene purpose, and main relationships,

but rebuild every visible element through Chola / Swamimalai sacred bronze intelligence fully embodied as reality.

Keep the authentic branch unchanged and push it into maximum world-depth.

Replace ordinary realism with:

sacred icon-body identity,
Shilpa-Shastra proportion discipline,
deity-centered posture,
symbolic mudra logic,

lost-wax cast-object truth,
Panchaloha / copper-alloy body,
hand-finished bronze presence,
and same-language ritual/processional world construction.

Do not keep a normal temple and add a bronze icon later.
Do not keep generic people and cast them in bronze later.
Do not keep generic ritual objects and only localize one centerpiece.
Do not let the style survive only in bronze color, crown, or mudra.

Rebuild:
faces as sacred icon faces,
bodies as sacred icon bodies,
objects as sacred bronze ritual objects,
supports as icon-world supports,
space as ritual/processional sacred space,
environment as same-language bronze world-space,
and the whole frame as one uninterrupted Chola Bronze scene-world.

Expand the source into:
full volumetric embodiment,
full object presence,
full environmental completion,
coherent material-light behavior,
clear spatial separation,
and complete scene readability,
but only through Chola Bronze grammar.

Absolute rule:
the Chola Bronze system must generate the world, not decorate the world.

The final result must feel like:
the same Chola Bronze style itself has become a believable fully embodied volumetric scene-world.
If it feels like reality coated with sacred bronze flavor, it has failed.
