

gota,zari systems - Rajasthan

V1 — Authentic Style

Universal Hard Prompt

Create an image in pure authentic source-truth Gota / Zari Systems from Rajasthan.

Treat this as a true Rajasthani metallic embellishment textile system, not as block print, not as painted gold motifs on cloth, not as woven brocade, not as sequined fashion fabric, and not as generic bridal glamour.

Build the image from the true grammar of Rajasthan gota/zari systems:

- light ceremonial cloth identity,
- metallic patti and zari unit logic,
- cut and folded appliqué construction,
- stitch and couching fixation,
- reflective ornament hierarchy,
- garment-zone intelligence,
- drape-aware surface behavior,
- and whole-field festive textile coherence.

The image must feel like it genuinely belongs inside the original Rajasthan gota/zari tradition.

Keep the whole frame inside one cloth-authored visual language.

The surface itself must be source-born:

- metallic units applied onto fabric,
- not metallic print,
- not painted shimmer,
- not woven metallic pattern,
- not random glitter.

Motif logic must remain source-faithful:

- paisleys,
- florals,
- vines,
- peacocks,
- birds,
- ceremonial figural units,
- decorative clusters,
- border and pallu structures,
- all built through metallic ribbon/thread application and fixation rather than drawing or printing.

Material memory must remain visible:

- light cloth base,

metallic ribbon or metallic-thread element,
cut/folded patti pieces,
appliqué placement,
stitch-held edges,
couched fixation,
surface radiance controlled by construction,
not by generic sparkle.

Use gota/zari color logic:
cloth ground first,
metallic gold/silver hierarchy second,
supporting festive contrast where needed,
strong luminous surface contrast,
never atmospheric realism,
never printed-ink behavior,
never undifferentiated shine.

Do not add:
block-print motifs,
gold-painted fabric,
ordinary embroidery with shimmer,
brocade weave logic,
sequin-partywear styling,
generic couture embellishment,
or any second textile language stronger than Rajasthan gota/zari construction.

The final result must feel like true Rajasthan metallic ceremonial cloth at source-truth level,
not a modern textile decorated with shiny motifs.

Reusable Variable Template

Create [SUBJECT / OBJECT / TEXTILE FIELD / CLOTH WORLD] using the authentic
source-truth grammar of Gota / Zari Systems from Rajasthan.

Core style system to preserve:
light ceremonial cloth identity,
metallic applied-unit logic,
cut/folded patti construction,
stitch and couching fixation,
reflective ornament hierarchy,
garment-zone organization,
drape-aware textile behavior,
whole-field Rajasthan festive coherence.

Translate the image like this:

[MAIN SURFACE / MAIN FIELD / MAIN SUBJECT] becomes a Rajasthan gota/zari-born ceremonial textile presence built through metallic applied units, fixation logic, and reflective hierarchy.

[SECONDARY SURFACES / SUPPORTING ELEMENTS] become supporting gota/zari textile presences obeying the same applied metallic construction.

[BACKGROUND / WORLD / ENVIRONMENT / SURROUNDING AREAS] becomes a gota/zari-authored textile field rather than neutral realism or generic fashion styling.

Keep:

light cloth identity,
metallic applied construction,
stitched fixation,
ornamental hierarchy,
garment-zone intelligence,
Rajasthan festive authority.

Avoid:

metallic print,
painted gold motifs,
brocade drift,
sequin glamour,
ordinary embroidery,
generic bridalwear realism,
or a realistic world with gota/zari ornament pasted on top.

The final image must feel like the Rajasthan gota/zari tradition itself authored the full ceremonial textile field.

Image-to-Image

Create [SUBJECT / OBJECT / TEXTILE FIELD / CLOTH WORLD] using the authentic source-truth grammar of Gota / Zari Systems from Rajasthan.

Core style system to preserve:

light ceremonial cloth identity,
metallic applied-unit logic,
cut/folded patti construction,
stitch and couching fixation,
reflective ornament hierarchy,
garment-zone organization,
drape-aware textile behavior,
whole-field Rajasthan festive coherence.

Translate the image like this:

[MAIN SURFACE / MAIN FIELD / MAIN SUBJECT] becomes a Rajasthan gota/zari-born ceremonial textile presence built through metallic applied units, fixation logic, and reflective hierarchy.

[SECONDARY SURFACES / SUPPORTING ELEMENTS] become supporting gota/zari textile presences obeying the same applied metallic construction.

[BACKGROUND / WORLD / ENVIRONMENT / SURROUNDING AREAS] becomes a gota/zari-authored textile field rather than neutral realism or generic fashion styling.

Keep:

light cloth identity,
metallic applied construction,
stitched fixation,
ornamental hierarchy,
garment-zone intelligence,
Rajasthan festive authority.

Avoid:

metallic print,
painted gold motifs,
brocade drift,
sequin glamour,
ordinary embroidery,
generic bridalwear realism,
or a realistic world with gota/zari ornament pasted on top.

The final image must feel like the Rajasthan gota/zari tradition itself authored the full ceremonial textile field.

V2 — Artisan Translation

Universal Hard Prompt

Convert this source image into an authentic source-truth Gota / Zari Systems world from Rajasthan.

Preserve the source image's core subject count, structural readability, and main visual organization, but rebuild the entire image through true Rajasthan gota/zari grammar.

Replace ordinary image logic with:

light ceremonial cloth identity,
metallic applied-unit construction,
cut/folded patti logic,
stitch and couching fixation,
reflective ornament hierarchy,

garment-zone intelligence,
and full festive textile coherence.

Do not simply add gold.
Do not merely overlay shiny motifs.
Do not turn the source into generic embellished bridal fabric.

If the source contains figures, objects, architecture, landscape, or background, rebuild them through gota/zari textile logic:
applied metallic structure,
stitched fixation,
zone-aware ornament placement,
cloth-led hierarchy,
and ceremonial textile organization.

Do not leave the environment as scenic realism.
Do not make it behave like fashion styling or metallic print design.

The final image must feel like a genuine Rajasthan gota/zari textile world, not a modern image decorated in shiny ornamental fabric style.

Reusable Variable Template

Create an image in V2 = authentic handcrafted dimensional translation of Gota / Zari Systems from Rajasthan.

This is not a literal fabric mockup.
This is not couture product photography.
This is not metallic texture added on top of a normal image.
This is not generic handmade bridal styling.
This is not realism-first embellished cloth.

Preserve the same deep Rajasthan gota/zari grammar unchanged:
light ceremonial cloth identity,
metallic applied-unit logic,
cut and folded patti construction,
stitch and couching fixation,
reflective ornament hierarchy,
garment-zone intelligence,
drape-aware textile behavior,
and whole-field festive coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid image-form.

The added dimensionality must come from gota/zari's own logic:

applied metallic fragments,
attached ornamental planes,
stitched edge behavior,
couched directional paths,
folded unit layering,
cloth-to-metal relation,
drape-generated hierarchy,
zone-based ornament intelligence,
and full-frame ceremonial surface authorship.

Do not only change texture.
Transform the full image logic:
form,
construction,
grouping,
silhouette,
objects,
environment,
spatial organization,
and full-frame visual language.

If figures appear, they must not remain generic humans wearing embellished clothing.
They must become gota/zari-born presences:
face logic influenced by applied metallic segmentation,
body logic shaped by drape, border, field, and attached-unit hierarchy,
silhouettes built through ceremonial surface layering,
objects and props translated into the same reflective applied-ornament system.

If environment appears, it must not remain generic realism.
It must already begin to feel re-authored by gota/zari:
layered ornamental planes,
reflective zone hierarchy,
surface-world logic,
attached-unit spatial rhythm,
not just normal scenery with embellished fabric inside it.

Believable depth must come from gota/zari itself,
not from default realism,
not from fashion-editorial rendering,
not from generic 3D cloth shading.

Keep:
source-rooted Rajasthan gota/zari identity,
applied metallic construction,
stitched fixation memory,
reflective hierarchy,
creative artisan translation,
zone intelligence,

full-frame style control.

Do not allow:

metallic print logic,
gold-painted cloth,
brocade behavior,
sequin-partywear drift,
ordinary embroidery realism,
couture-fashion realism,
surface-only styling,
or a normal image underneath with gota/zari decoration added later.

The final result must feel like Rajasthan gota/zari itself has creatively re-authored the image into a richer, more dimensional, more inventive ceremonial textile world while still remaining fully style-born.

Image-to-Image

Convert this source image into a V2 authentic handcrafted dimensional Gota / Zari Systems world from Rajasthan.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Rajasthan gota/zari grammar translated into a richer, more dimensional, more inventive hybrid image-form.

Replace ordinary image logic with:

light ceremonial cloth identity,
metallic applied-unit construction,
cut/folded patti logic,
stitch and couching fixation,
reflective ornament hierarchy,
garment-zone intelligence,
and full-frame Rajasthan festive coherence.

Do not simply overlay metallic motifs.

Do not just make the image more luxurious.

Do not make it a bridal fabric mockup.

Rebuild the image so that:

forms are organized through applied metallic construction,
surfaces feel attached and fixed rather than printed,
depth comes from cloth-to-ornament relation and layered ceremonial zones,
objects and environment begin to behave like a gota/zari-authored world,
not a normal realistic world with embellishment added later.

If figures appear, rebuild them as gota/zari-born presences rather than generic bodies in decorated cloth.

If objects or environments appear, rebuild them through Rajasthan metallic-ornament ontology rather than neutral realism.

The final image must feel like a true creative artisan translation of Rajasthan gota/zari into a richer dimensional image-world, not a normal image with shiny textile styling.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Gota / Zari Systems from Rajasthan while keeping the same source grammar unchanged.

This is not realism replacing style.

This is not couture realism with traditional ornament.

This is not fashion editorial photography.

This is not generic luxurious bridalwear with metallic decoration.

This is not a normal world with gota/zari styling added afterward.

Preserve the same deep Rajasthan gota/zari grammar unchanged:

light ceremonial cloth identity,

metallic applied-unit logic,

cut and folded patti construction,

stitch and couching fixation,

reflective ornament hierarchy,

garment-zone intelligence,

drape-aware textile behavior,

and whole-field festive coherence.

Now push that same grammar into its most complete, most fully embodied, most fully resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by gota/zari logic.

That means the transformation must affect everything:

faces,

bodies,

hands,

feet,

hair,

posture,

gesture,

props,

objects,

ground,

architecture,
plants,
sky treatment,
empty space,
environment rhythm,
foreground,
midground,
background,
and the full-frame visual language.

Nothing important may remain generic realism.

Rajasthan gota/zari must control reality through its own logic:
applied metallic fragments,
stitched fixation systems,
reflective hierarchy,
zone-based ceremonial organization,
drape-structured form,
surface-authored world construction,
attached-unit rhythm,
and luminous textile ontology.

Believable here must mean:
believable volume,
believable spatial relation,
believable material embodiment,
believable environmental completion,
believable inhabitable world logic.

It must not mean:
couture realism,
fashion photography,
normal anatomy with embellished clothing,
generic architecture with metallic trim,
luxury bridalwear takeover,
or realism-first image making.

If figures appear, they must be fully gota/zari-born:
face construction shaped by segmented reflective logic,
body logic shaped by drape and applied-unit hierarchy,
silhouette logic shaped by ceremonial border-field construction,
gesture and posture integrated into the same metallic-ornament system.

If environment appears, it must also be fully gota/zari-born:
ground, objects, structures, plants, space, and atmosphere must all belong to one
uninterrupted Rajasthan gota/zari world,
not a normal realistic environment underneath.

If you remove decorative cues, the image should still feel gota/zari through:
form construction,
body logic,
object logic,
environment logic,
spatial organization,
zone hierarchy,
and full-world visual ontology.

Keep:
same deep Rajasthan gota/zari grammar,
full world embodiment,
full environmental completion,
stronger figure-ground hierarchy,
stronger spatial separation,
stronger object presence,
stronger total-frame style control.

Do not allow:
metallic print behavior,
gold-painted cloth behavior,
brocade weave takeover,
sequin glamour,
couture fashion realism,
editorial bridalwear language,
or any second textile or realism language stronger than Rajasthan gota/zari.

The final result must feel like Rajasthan gota/zari itself has taken over the whole visible world and fully generated reality through applied metallic ceremonial textile logic, not like realism with ornament added later.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable real-world 3D translation of Gota / Zari Systems from Rajasthan.

Keep these unchanged deep style-core rules:
light ceremonial cloth identity,
metallic applied-unit logic,
cut/folded patti construction,
stitch and couching fixation,
reflective ornament hierarchy,
garment-zone intelligence,
drape-aware textile behavior,
whole-field Rajasthan festive coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a fully embodied Rajasthan gota/zari-born presence generated through applied metallic construction, stitched hierarchy, ceremonial zoning, and luminous surface-world control.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become equally style-born gota/zari presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Rajasthan gota/zari world where spatial structure, environmental rhythm, and full-scene organization are all controlled by the same metallic-ornament grammar.

Increase:

full world embodiment,
full environmental translation,
stronger spatial relation,
stronger figure-ground separation,
stronger material presence,
stronger world coherence,
stronger full-frame Rajasthan gota/zari control.

Do not lose:

light cloth identity,
metallic applied construction,
stitched fixation,
reflective hierarchy,
zone intelligence,
ceremonial authority,
Rajasthan festive ontology.

Avoid:

couture realism,
fashion editorial styling,
brocade logic,
metallic print,
sequin-partywear drift,
generic bridal glamour,
or a normal world with gota/zari decoration.

The final image must feel like the same deep Rajasthan gota/zari grammar has fully generated an entire believable world.

Image-to-Image

Convert this source image into a V3 fully resolved believable real-world Gota / Zari Systems world from Rajasthan.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Rajasthan gota/zari grammar.

Replace ordinary realism with:
light ceremonial cloth identity,
metallic applied-unit logic,
cut/folded patti construction,
stitch and couching fixation,
reflective ornament hierarchy,
garment-zone intelligence,
drape-aware textile behavior,
and full-world Rajasthan festive coherence.

Do not simply paste metallic ornament onto the image.
Do not just convert clothing into embellished bridalwear.
Do not leave the environment generic.

Rebuild the full image so that:
faces, bodies, objects, props, and environment all belong to the same Rajasthan gota/zari visual ontology,
depth comes from applied-unit hierarchy and ceremonial zoning,
space is organized through drape logic and reflective structure,
the world becomes fully inhabitable but remains completely gota/zari-born,
not realism-first.

If any part of the frame remains normal realism underneath, the conversion has failed.

The final image must feel like Rajasthan gota/zari itself has fully generated the entire visible world, not like a normal image decorated with metallic textile ornament.
