

Banaras mural painting - Uttar Pradesh

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Banaras Mural Painting from Uttar Pradesh**, treating it as a **Kashi / Varanasi-rooted sacred architectural wall-painting system** built through **painted plaster or wall surfaces**, **devotional and mythological figuration**, **ornamental framing**, **architectural zoning**, **temple-and-domestic ritual placement**, and **Banaras-specific sacred urban atmosphere**.

Build the image as if it genuinely belongs inside the native Banaras mural tradition itself. The image must be governed first by **wall-surface identity**, **sacred placement**, **architecture-bound composition**, and **devotional mural readability**, not by easel-painting logic, generic mural art, poster-like sacred illustration, tourism décor, or realism-first scene painting.

The support must feel like a real painted wall: plaster-bound, masonry-aware, surface-deep, and built into architecture. The image must feel placed on a niche, shrine wall, facade section, courtyard wall, doorway flank, temple interior band, or sacred urban wall zone, not floating as a portable picture. The composition must respond to the architectural surface through panel logic, border logic, wall zoning, and sacred emphasis areas.

Figures such as deities, saints, ascetics, devotees, sacred symbols, and mythological beings must feel mural-born, wall-readable, devotionally clear, and surface-adapted rather than realism-first. Ornament must feel structurally integrated into the wall: floral bands, sacred borders, framing strips, symbolic motifs, and architecture-supportive patterning. Color must feel clear, direct, wall-bound, and devotionally functional rather than atmospheric or cinematic.

The image must carry the sacred-city pressure of Banaras: Shiva-linked devotion, Ganga-linked sacredness, ritual urban memory, shrine-and-street overlap, and old sacred architecture charged with lived devotional presence. Even when not showing literal ghats, the mural must still feel Kashi-born.

Do not make this generic Indian mural art, generic temple wall decoration, poster-like sacred wall art, miniature-painting logic enlarged onto architecture, or realism with Banaras motifs pasted on top. The final result must feel like **the real Banaras mural system itself made the whole image**.

Reusable Variable Template

Create **[SUBJECT / SACRED WALL IMAGE / ARCHITECTURAL MURAL FIELD / BANARAS DEVOTIONAL SURFACE]** in the pure authentic source-truth visual logic of Banaras Mural Painting from Uttar Pradesh.

Style system that must remain unchanged:

- architectural wall identity
- sacred placement identity
- Banaras urban-sacred identity
- devotional and mythological figuration
- ornamental-framing intelligence
- surface-zoning logic
- whole-frame Banaras mural consistency

Translate the image like this:

- **[MAIN FIGURE / MAIN SACRED IMAGE / MAIN PANEL]** becomes a Banaras-built mural presence governed by wall placement and devotional readability
- **[WALL / PLASTER / MASONRY SURFACE]** must feel real, built, painted, and architecture-bound
- **[PANELS / BANDS / NICHEs / FRAMING / DOORWAY OR SHRINE ZONES]** must feel compositionally necessary, not decorative afterthoughts
- **[BORDERS / FLORAL BANDS / SACRED MOTIFS / FRAMING ELEMENTS]** must support mural structure and sacred wall order
- **[FIGURES / SYMBOLS / SAINTS / MYTHOLOGICAL CONTENT]** must feel wall-readable, devotionally clear, and Banaras-rooted rather than realism-first
- **[IF FIGURES / OBJECTS / ARCHITECTURE APPEAR]** faces, bodies, posture, object logic, and environment logic must all be reorganized through Banaras mural wall intelligence, not realism

Keep:

- wall-surface logic
- sacred architectural placement
- devotional clarity
- ornamental framing
- wall zoning
- sacred-city atmosphere
- lived mural surface feeling
- whole-frame consistency

Avoid:

- generic mural art
- poster-like sacred painting
- realism-first devotional scene
- decorative Banaras theme art

- miniature logic enlarged onto walls
- cinematic shading
- floating picture logic
- realism with Banaras accents added later

The final result must feel like a true Kashi-rooted sacred wall-painting system, not a decorative spiritual mural wearing Banaras cues.

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Banaras Mural Painting from Uttar Pradesh**.

Preserve the source image's **subject count, core action, main relationships, and readability**, but rebuild the full image through Banaras mural grammar. Replace generic image support with real architectural wall logic. Replace easel-painting composition with sacred wall placement. Replace floating imagery with shrine / panel / band / facade-based organization. Replace realism-first figures with mural-readable devotional figuration. Replace decorative patterns with structural ornament and framing. Replace generic sacred atmosphere with Banaras urban-sacred presence.

If the image includes figures, make them feel mural-born, devotionally clear, and architecture-adapted. If the image includes built space, it must feel like painted sacred architecture rather than a neutral backdrop. If the image includes symbols, borders, or motifs, they must support zoning and sacred placement rather than behave like filler.

Do not simply add wall texture or Banaras symbols to a normal painting. Do not keep realism underneath. Do not let the mural feel like a poster pasted onto plaster. The final result must feel as if the original image has been fully reauthored inside the true source-truth Banaras mural system.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in the **creative artisan translation of Banaras Mural Painting from Uttar Pradesh**, preserving the same deep source grammar as the authentic source-truth version, but translating it into a **richer, more imaginative, more dimensional 2D + 3D hybrid visual system**.

Keep the core Banaras mural grammar fully unchanged: architectural wall identity, sacred placement identity, Banaras urban-sacred identity, devotional and mythological figuration, ornamental-framing intelligence, surface-zoning logic, and Banaras-born mural composition. Do not turn this into heritage-wall décor styling, tourism mural beautification, poster-like sacred concept art, generic old-city spiritual muralism, or realism with Banaras motifs layered on top.

Translate that same grammar into a more alive and dimensional visual language. The image must no longer behave only as literal wall documentation, but it must also not become full realistic scene-world depth. It should become a **creative hybrid sacred architectural image system** where Banaras mural painting's own wall intelligence generates richer form, stronger visual invention, and more dimensional presence.

The transformation must affect the whole frame. If figures appear, faces, bodies, silhouettes, posture, grouping, and relations must all be rebuilt through Banaras mural wall logic. If objects appear, they must be shaped through sacred placement, mural zoning, and architecture-bound order. If environment appears, it must grow from wall-surface and shrine-city logic rather than remain generic. The mural system must become the larger organizing intelligence, not just an image painted on one surface.

Dimensionality must come from Banaras mural painting itself: from painted plaster behavior, architectural placement, wall-borne sacred clarity, ornamental framing, mural panel zoning, Banaras spiritual atmosphere, and lived sacred-city wall memory. Do not solve dimensionality through generic rendering habits, cinematic realism, tourism-styled beautification, or a normal environment with one mural accent.

Do not create:

heritage mural concept render, décor wall styling, poster-mural fusion, generic spiritual old-city wall art, or a generic dimensional image decorated later by Banaras mural painting.

The final result must feel like **the same Banaras mural grammar has entered a richer, more imaginative, more dimensional artisan translation without losing itself.**

Reusable Variable Template

Create **[SUBJECT / IMAGE / SACRED ARCHITECTURAL WORLD / BANARAS MURAL FIELD]** in the **creative artisan translation of Banaras Mural Painting from Uttar Pradesh.**

Keep unchanged:

- architectural wall identity
- sacred placement identity
- Banaras urban-sacred identity
- devotional and mythological figuration

- ornamental-framing intelligence
- surface-zoning logic
- Banaras mural compositional DNA
- whole-frame style consistency

Translate it into a richer dimensional hybrid visual system like this:

- **[MAIN FIGURE / MAIN SACRED PANEL / MAIN IMAGE ZONE]** becomes a Banaras-built mural presence with more dimensional life, but still governed by wall placement and sacred architectural order
- **[SECONDARY FIGURES / SUPPORT PANELS / BORDER BANDS / SHRINE ZONES]** also transform through the same Banaras mural grammar rather than generic styling
- **[WALL SURFACE / PLASTER / PANEL DIVISIONS / BORDER STRUCTURES]** become more spatially alive and structurally expressive while remaining mural-born
- **[FIGURAL / SYMBOLIC / ORNAMENTAL CONTENT]** must remain wall-readable and Banaras-rooted, not realism-first
- **[IF FIGURES APPEAR]** faces, bodies, posture, grouping, object logic, and environment logic must all be rebuilt through Banaras mural order
- **[IF ENVIRONMENT APPEARS]** it must grow from shrine-city wall logic, sacred placement, and mural zoning rather than realism

Increase:

- dimensional presence
- visual richness
- artisan-like reinterpretation
- hybrid 2D + 3D form
- structural clarity
- whole-frame transformation
- imaginative sacred architectural layering

Do not use:

- generic mural concept-art logic
- poster-devotional logic
- tourism beautification logic
- cinematic realism
- generic environment with Banaras overlay
- only one wall zone carrying the style
- sacred old-wall mood without real mural order

Success condition:

the result feels like the same Banaras mural style has been artistically translated into a richer dimensional hybrid system.

Failure condition:

the result feels like a generic dimensional image decorated later by Banaras mural painting.

Image-to-Image

Convert this source image into the **creative artisan translation of Banaras Mural Painting from Uttar Pradesh**.

Preserve the source image's core subject logic, action logic, grouping logic, and readability, but rebuild the full image through Banaras mural painting's internal grammar translated into a richer, more dimensional 2D + 3D hybrid visual system.

Replace generic support with sacred architectural wall logic. Replace ordinary composition with mural zoning and wall placement. Replace realism-first figures with wall-readable devotional figuration. Replace decorative framing with Banaras mural structural ornament. Replace generic sacred atmosphere with Kashi urban-sacred surface intelligence. If figures are present, transform faces, bodies, silhouettes, posture, grouping, object logic, and surrounding structure through Banaras mural logic, not realism. If objects or environment are present, they must also be rebuilt through sacred wall order instead of remaining generic.

Let the image gain more dimensional life, richer mural form, more imaginative layering, and stronger whole-frame coherence. But do not turn it into heritage décor concept art, generic sacred muralism, or realism with Banaras mural styling added afterward.

Do not style only the wall texture or border. Do not leave the rest of the frame generic. The final result must feel like **the source image has been fully reauthored through a creative artisan translation of Banaras mural painting**.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in the **fully resolved believable real-world 3D translation of Banaras Mural Painting from Uttar Pradesh**, preserving the same authentic source grammar but pushing it into its **most complete, most embodied, most scene-capable volumetric world**.

Keep the same deep Banaras mural visual intelligence fully unchanged: architectural wall identity, sacred placement identity, Banaras urban-sacred identity, devotional and mythological figuration, ornamental-framing intelligence, surface-zoning logic, and Banaras-born mural composition. Do not turn this into generic Banaras realism, tourism-city realism, poster-like sacred realism, or a normal world with one sacred mural added on top.

Now convert that same grammar into a believable volumetric world. The result must have believable material behavior, believable spatial separation, believable object presence,

believable environmental completion, and believable three-dimensional world logic. But every visible part of the image must still be generated by Banaras mural grammar.

If figures are present, they must be rebuilt through Banaras mural-born architectural surface structure, not normal realism standing near painted walls. If objects appear, they must be shaped through shrine placement, mural zoning, sacred wall order, and Banaras spiritual atmosphere. If environment appears, it must be generated by painted wall intelligence, sacred architecture, ornamental framing, and Kashi urban-sacred logic. The world must not become ordinary reality with one Banaras-style painted wall inserted into it.

Depth must now become full scene-world depth, but it must remain style-controlled. The source grammar must still govern figure design, shape logic, composition logic, material identity, environment logic, and total scene organization.

Do not let realism replace the style. Do not let the style survive only in one painted panel, one old wall, one deity patch, or one border strip. Do not create a premium cinematic makeover stronger than the source grammar. The final image must feel like **Banaras mural painting itself has become a believable full world.**

Reusable Variable Template

Create **[SUBJECT / SCENE / FIGURAL WORLD / EXPANDED BANARAS MURAL WORLD]** in the **fully resolved believable real-world 3D translation of Banaras Mural Painting from Uttar Pradesh.**

Keep unchanged:

- architectural wall identity
- sacred placement identity
- Banaras urban-sacred identity
- devotional and mythological figuration
- ornamental-framing intelligence
- surface-zoning logic
- Banaras mural compositional DNA
- whole-frame style consistency

Translate it into full world-depth like this:

- **[MAIN FORM / MAIN FIGURE / MAIN WALL ZONE / MAIN SACRED PANEL]** becomes a fully embodied Banaras-built mural presence with believable sacred-architectural-world logic
- **[SECONDARY FORMS / SUPPORT FIGURES / BANDS / PANELS / SHRINE SURFACES]** also remain under the same Banaras-born logic
- **[WALL SURFACE / PANEL DIVISIONS / BORDERS / FRAMES / PLACEMENT RELATIONS]** become volumetric world-organizing elements still governed by mural structure

- **[SURROUNDING WORLD / ENVIRONMENT / SPATIAL FIELD]** becomes a believable scene-world generated by Banaras mural intelligence rather than generic realism
- **[IF FIGURES ARE PRESENT]** faces, bodies, posture, grouping, object logic, and environment logic must all remain Banaras-born, not realism-first

Increase:

- volumetric world-building
- material-light interaction
- spatial separation
- scene completeness
- object presence
- environmental orchestration
- full-frame readability
- sacred-wall-to-world transformation

Do not lose:

- wall-surface logic
- sacred placement
- Banaras sacred-city identity
- devotional clarity
- ornamental framing
- mural zoning
- lived mural surface feeling
- whole-frame Banaras mural identity

Do not use:

- realistic Banaras lane with one mural
- generic cinematic illustration
- style-as-wall-patch only
- style-as-old-plaster only
- style-as-sacred motif only
- style-as-surface ornament only
- premium finish overpowering source grammar
- reality with Banaras mural flavor added later

Success condition:

the result feels like Banaras mural painting itself has become a believable full world.

Failure condition:

the result feels like reality has been coated with Banaras mural painting.

Image-to-Image

Convert this source image into the **fully resolved believable real-world 3D translation of Banaras Mural Painting from Uttar Pradesh**.

Preserve the source image's main subject logic, action logic, relationship logic, and readability, but rebuild the entire image through Banaras mural painting's source grammar translated into **full world-depth**.

Replace generic forms with Banaras-built mural volumetric presences. Replace ordinary surfaces with sacred wall construction. Replace generic decorative order with architectural placement, mural zoning, devotional figure clarity, ornamental framing, and Banaras sacred-city atmosphere. Replace realism-first sacred staging with Banaras mural-born surface-world order. If figures are present, transform faces, bodies, posture, grouping, silhouette, object logic, and environment logic through Banaras mural grammar, not realism.

Allow the result to gain complete volumetric embodiment, stronger material-light interaction, spatial separation, object presence, scene completion, and environmental orchestration. But do not let the image become generic reality with Banaras mural painting added later. The whole world must remain Banaras-born.

Do not stylize only one wall panel, one border, or one plaster surface while leaving the rest of the world generic. Do not make it a Banaras realism scene with a sacred mural insert. Do not let the source grammar weaken as depth increases. The final result must feel like **the source image has been fully reauthored as a believable volumetric world generated by Banaras mural painting itself**.
