

Banarasi brocade - Uttar Pradesh

if translated beyond textile

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Banarasi Brocade from Uttar Pradesh**, treating it as a **Varanasi-rooted silk-brocade weaving system** built through **figured weave intelligence, silk-and-zari material authority, Mughal-derived floral and foliate motif logic, border–field–pallu organization, dense woven ornamental structure, and ceremonial Banaras textile refinement**.

Build the image as if it genuinely belongs inside the native Banarasi brocade tradition itself. The image must be governed first by **loom-built structure, woven silk body, zari as structural richness, Mughal floral-foliate pattern order, and ceremonial textile dignity**, not by embroidery, print, decorative metallic surface styling, or generic luxury silk aesthetics.

The cloth must feel truly woven, not decorated afterward. Motifs must appear to emerge from the textile body itself through weave logic. Silk must feel supple, rich, drape-worthy, and luminous. Zari must feel integrated into the weave, not glittered on top. The ornament must feel dense but controlled, luxurious but disciplined, and structurally inseparable from the fabric.

The motif world must remain **courtly, vegetal, and Banarasi**: kalga, bel, floral and foliate spreads, buti and buta hierarchy, possible jangla expansiveness, jali-like articulation, and meena-like accent integration. The composition must feel like real Banarasi textile zoning: body field, border, pallu, and distributed woven emphasis rather than one flat decorative spread.

The fabric must carry **ceremonial and sari-based gravity**. It should feel suitable for sari, odhani, ritual cloth, bridal cloth, or courtly drape rather than generic fashion fabric. The final result must feel like **the real Banarasi Brocade system itself made the whole image**.

Reusable Variable Template

Create [SUBJECT / CEREMONIAL TEXTILE / BROCADE FIELD / BANARASI WOVEN SURFACE] in the **pure authentic source-truth visual logic of Banarasi Brocade from Uttar Pradesh**.

Style system that must remain unchanged:

- figured-weave identity
- silk-and-zari material authority
- ceremonial textile identity
- Mughal-derived floral and foliate motif intelligence
- border–field–pallu organization
- dense woven ornamental structure
- Banaras weaving refinement
- whole-frame Banarasi consistency

Translate the image like this:

- **[MAIN CLOTH FIELD / MAIN DRAPE / MAIN TEXTILE BODY]** becomes a Banarasi-built woven silk presence governed by figured weave order
- **[MOTIFS / FLORALS / FOLIATES / KALGA / BEL / JALI / MEENA / BUTI / BUTA]** must feel loom-born, not printed, stitched, or painted
- **[ZARI ZONES / METALLIC RICHNESS / HIGHLIGHT STRUCTURE]** must feel woven into the silk, not glittered on top
- **[BORDER / PALLU / FIELD / MOTIF SPREAD]** must feel compositionally necessary and textile-native
- **[CLOTH BODY / FOLD / DRAPE / WEIGHT]** must feel ceremonial, luxurious, and silk-rich
- **[IF FIGURES / OBJECTS / ARCHITECTURE APPEAR]** faces, bodies, posture, object logic, and environment logic must all be reorganized through Banarasi woven order, not realism

Keep:

- woven structure
- silk body
- zari authority
- floral-foliate Mughal grammar
- ceremonial drape
- textile zoning
- Banaras refinement
- whole-frame consistency

Avoid:

- generic silk fabric
- generic gold decoration
- embroidery pretending to be brocade
- printed Banarasi-looking pattern
- fashion-surface styling with no weave logic
- realism-first image translated onto cloth
- metallic glitter effect instead of zari structure
- realism with Banarasi accents added later

The final result must feel like a true Banaras silk-brocade system, not a luxury floral fabric wearing Banarasi cues.

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Banarasi Brocade from Uttar Pradesh**.

Preserve the source image's **subject count, core action, main relationships, and readability**, but rebuild the full image through Banarasi Brocade grammar. Replace generic surface ornament with figured weave structure. Replace plain cloth with silk-and-zari body. Replace decorative metallic effects with woven zari authority. Replace random floral luxury patterning with Banarasi Mughal floral-foliate order. Replace flat spread with border–field–pallu textile hierarchy.

If the image includes fabric zones, make them feel truly woven and drape-aware. If the image includes motifs, make them feel loom-born, dense, and integrated into the silk field. If the image includes figures, objects, or environment, they must also be reorganized through Banarasi Brocade woven intelligence rather than remain generic under a brocade overlay.

Do not simply add gold motifs or floral pattern to the source image. Do not keep print logic underneath. Do not let the textile feel embroidered, appliqued, or costume-like. The final result must feel as if the original image has been fully reauthored inside the true source-truth Banarasi Brocade system.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in the **creative artisan translation of Banarasi Brocade from Uttar Pradesh**, preserving the same deep source grammar as the authentic source-truth version, but translating it into a **richer, more imaginative, more dimensional 2D + 3D hybrid visual system**.

Keep the core Banarasi Brocade grammar fully unchanged: figured-weave identity, silk-and-zari material authority, ceremonial textile dignity, Mughal-derived floral and foliate motif logic, border–field–pallu organization, dense woven ornamental structure, and Banaras refinement. Do not turn this into luxury fashion-fabric concept art, metallic decorative pattern styling, printed brocade simulation, couture surface glamour, or realism with Banarasi motifs layered on top.

Translate that same grammar into a more alive and dimensional visual language. The image must no longer behave only as literal sari or brocade documentation, but it must also not become full realistic scene-world depth. It should become a **creative hybrid woven-textile image system** where Banarasi Brocade's own loom intelligence generates richer form, stronger visual invention, and more dimensional presence.

The transformation must affect the whole frame. If figures appear, faces, bodies, silhouettes, posture, grouping, and relations must all be rebuilt through Banarasi woven logic. If objects appear, they must be shaped through silk-and-zari structure, motif hierarchy, and brocade zoning. If environment appears, it must grow from woven field intelligence, ceremonial drape order, and Banaras refinement rather than remain generic. The brocade system must become the larger organizing intelligence, not just an ornamental overlay.

Dimensionality must come from Banarasi Brocade itself: from figured weave structure, silk body, zari integration, buti/buta hierarchy, jangla spread, jali articulation, meena enrichment, floral-foliate Mughal order, and ceremonial textile logic. Do not solve dimensionality through generic rendering habits, fashion-glamour styling, or a normal image with Banarasi decoration added later.

Do not create:

luxury brocade mockup, metallic floral concept fabric, couture textile render, generic royal silk styling, or a generic dimensional image decorated later by Banarasi Brocade.

The final result must feel like **the same Banarasi Brocade grammar has entered a richer, more imaginative, more dimensional artisan translation without losing itself.**

Reusable Variable Template

Create **[SUBJECT / IMAGE / WOVEN TEXTILE WORLD / BANARASI BROCADE SURFACE SYSTEM]** in the **creative artisan translation of Banarasi Brocade from Uttar Pradesh.**

Keep unchanged:

- figured-weave identity
- silk-and-zari material authority
- ceremonial textile identity
- Mughal-derived floral and foliate motif logic
- border–field–pallu organization
- dense woven ornamental structure
- Banaras refinement
- whole-frame style consistency

Translate it into a richer dimensional hybrid visual system like this:

- **[MAIN CLOTH FIELD / MAIN DRAPE / MAIN BROCADE MASS]** becomes a Banarasi-built woven presence with more dimensional life, but still governed by loom-born structure
- **[SECONDARY FIELDS / BORDERS / PALLU ZONES / MOTIF NETWORKS]** also transform through the same Banarasi grammar rather than generic styling
- **[ZARI / SILK / WEAVE TEXTURE / JALI / MEENA / MOTIF HIERARCHY]** become more spatially alive and structurally expressive while remaining woven and textile-native
- **[MOTIF SYSTEM / FLORAL / FOLIATE / KALGA / BEL / BUTI / BUTA]** must remain brocade-born and compositionally distributed
- **[IF FIGURES APPEAR]** faces, bodies, posture, grouping, object logic, and environment logic must all be rebuilt through Banarasi Brocade order
- **[IF ENVIRONMENT APPEARS]** it must grow from woven textile intelligence, ceremonial drape logic, and Banaras refinement rather than realism

Increase:

- dimensional presence
- visual richness
- artisan-like reinterpretation
- hybrid 2D + 3D form
- structural clarity
- whole-frame transformation
- imaginative woven spatial layering

Do not use:

- generic metallic fabric logic
- printed brocade logic
- embroidery simulation
- couture-glamour styling
- realism with one brocade zone
- generic environment with Banarasi overlay
- only motif carrying the style
- gold decoration replacing weave intelligence

Success condition:

the result feels like the same Banarasi Brocade style has been artistically translated into a richer dimensional hybrid system.

Failure condition:

the result feels like a generic dimensional image decorated later by Banarasi Brocade.

Image-to-Image

Convert this source image into the **creative artisan translation of Banarasi Brocade from Uttar Pradesh**.

Preserve the source image's core subject logic, action logic, grouping logic, and readability, but rebuild the full image through Banarasi Brocade's internal grammar translated into a richer, more dimensional 2D + 3D hybrid visual system.

Replace generic decorative surface with figured weave structure. Replace flat luxurious cloth with silk-and-zari woven intelligence. Replace generic floral richness with Mughal floral-foliage brocade order. Replace random metallic effect with structural zari presence. If figures are present, transform faces, bodies, silhouettes, posture, grouping, object logic, and surrounding structure through Banarasi woven logic, not realism. If objects or environment are present, they must also be rebuilt through brocade structure instead of remaining generic.

Let the image gain more dimensional life, richer woven form, more imaginative layering, and stronger whole-frame coherence. But do not turn it into couture concept art, printed metallic fabric styling, or realism with Banarasi decoration added afterward.

Do not style only one border, pallu, or floral zone. Do not leave the rest of the frame generic. The final result must feel like **the source image has been fully reauthored through a creative artisan translation of Banarasi Brocade**.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in the **fully resolved believable real-world 3D translation of Banarasi Brocade from Uttar Pradesh**, preserving the same authentic source grammar but pushing it into its **most complete, most embodied, most scene-capable volumetric world**.

Keep the same deep Banarasi Brocade visual intelligence fully unchanged: figured-weave identity, silk-and-zari material authority, ceremonial textile dignity, Mughal-derived floral and foliate motif logic, border-field-pallu organization, dense woven ornamental structure, and Banaras refinement. Do not turn this into generic fashion realism, luxury-silk realism, metallic décor realism, or a normal world with one Banarasi sari or brocade panel added on top.

Now convert that same grammar into a believable volumetric world. The result must have believable cloth behavior, believable material-light interaction, believable spatial separation, believable object presence, believable environmental completion, and believable three-dimensional world logic. But every visible part of the image must still be generated by Banarasi Brocade grammar.

If figures are present, they must be rebuilt through Banarasi Brocade-born woven textile structure, not normal realism wearing rich fabric. If objects appear, they must be shaped

through silk-and-zari material logic, motif hierarchy, and ceremonial drape order. If environment appears, it must be generated by figured weave intelligence, floral-foliate Mughal structure, border–field–pallu hierarchy, and Banaras ceremonial textile refinement. The world must not become ordinary reality with one Banarasi insert into it.

Depth must now become full scene-world depth, but it must remain style-controlled. The source grammar must still govern figure design, shape logic, composition logic, material identity, environment logic, and total scene organization.

Do not let realism replace the style. Do not let the style survive only in one sari, one pallu, one border, one zari zone, or one floral metallic surface. Do not create a premium cinematic makeover stronger than the source grammar. The final image must feel like **Banarasi Brocade itself has become a believable full world.**

Reusable Variable Template

Create **[SUBJECT / SCENE / FIGURAL WORLD / EXPANDED BANARASI BROCADE WORLD]** in the **fully resolved believable real-world 3D translation of Banarasi Brocade from Uttar Pradesh.**

Keep unchanged:

- figured-weave identity
- silk-and-zari material authority
- ceremonial textile identity
- Mughal-derived floral and foliate motif logic
- border–field–pallu organization
- dense woven ornamental structure
- Banaras refinement
- whole-frame style consistency

Translate it into full world-depth like this:

- **[MAIN FORM / MAIN FIGURE / MAIN CLOTH FIELD / MAIN BROCADE SURFACE]** becomes a fully embodied Banarasi-built presence with believable woven-textile-world logic
- **[SECONDARY FORMS / SUPPORT FIELDS / BORDER ZONES / PALLU SURFACES]** also remain under the same Banarasi-born logic
- **[WEAVE RHYTHM / ZARI / SILK BODY / MOTIF HIERARCHY / JALI / MEENA / DRAPE]** become volumetric world-organizing elements still governed by brocade structure
- **[SURROUNDING WORLD / ENVIRONMENT / SPATIAL FIELD]** becomes a believable scene-world generated by Banarasi Brocade intelligence rather than generic realism

- **[IF FIGURES ARE PRESENT]** faces, bodies, posture, grouping, object logic, and environment logic must all remain Banarasi-born, not realism-first

Increase:

- volumetric world-building
- material-light interaction
- spatial separation
- scene completeness
- object presence
- environmental orchestration
- full-frame readability
- woven-cloth-to-world transformation

Do not lose:

- figured weave order
- silk-and-zari structure
- ceremonial drape
- floral-foliate Mughal grammar
- border-field-pallu hierarchy
- dense woven richness
- Banaras refinement
- whole-frame Banarasi identity

Do not use:

- realistic fashion scene with one Banarasi saree
- generic cinematic illustration
- style-as-brocade patch only
- style-as-gold shine only
- style-as-floral motif only
- style-as-surface ornament only
- premium finish overpowering source grammar
- reality with Banarasi flavor added later

Success condition:

the result feels like Banarasi Brocade itself has become a believable full world.

Failure condition:

the result feels like reality has been coated with Banarasi Brocade.

Image-to-Image

Convert this source image into the **fully resolved believable real-world 3D translation of Banarasi Brocade from Uttar Pradesh.**

Preserve the source image's main subject logic, action logic, relationship logic, and readability, but rebuild the entire image through Banarasi Brocade's source grammar translated into **full world-depth**.

Replace generic forms with Banarasi-built woven-textile volumetric presences. Replace ordinary surfaces with figured silk-and-zari construction. Replace generic decorative order with floral-foliate Mughal brocade logic, border-field-pallu organization, dense woven hierarchy, and Banaras refinement. Replace realism-first staging with Banarasi-born textile-world order. If figures are present, transform faces, bodies, posture, grouping, silhouette, object logic, and environment logic through Banarasi Brocade grammar, not realism.

Allow the result to gain complete volumetric embodiment, stronger material-light interaction, spatial separation, object presence, scene completion, and environmental orchestration. But do not let the image become generic reality with Banarasi Brocade added later. The whole world must remain Banarasi-born.

Do not stylize only one sari edge, one border, one pallu, one floral metal zone, or one silk patch while leaving the rest of the world generic. Do not make it a realism scene with a brocade insert. Do not let the source grammar weaken as depth increases. The final result must feel like **the source image has been fully reauthored as a believable volumetric world generated by Banarasi Brocade itself**.
