

Gollabhama - Telangana

V1 — Authentic Style

Universal Hard Prompt

Create an image in pure authentic source-truth Gollabhama from Telangana.

Treat this as a true Siddipet handloom saree-weaving tradition, not as print, not as embroidery, not as painted textile, not as generic figured handloom, and not as a fashion saree with a symbolic woman motif added later.

Build the image from the true grammar of Gollabhama:

handloom saree cloth identity,
extra-weft milkmaid motif construction,
compulsory Gollabhama figure authority in the pallu,
border-body-pallu weave organization,
bright woven contrast,
drape-aware saree behavior,
and whole-saree Siddipet coherence.

The image must feel like it genuinely belongs inside the original Gollabhama tradition.

Keep the whole frame inside one woven saree-authored visual language.

The textile itself must be source-born:

woven motif, not printed motif,
extra-weft figure, not embroidered figure,
loom-built structure, not surface decoration,
saree-zone planning, not all-over random figured cloth,
handloom discipline, not boutique ethnic styling.

Motif logic must remain source-faithful:

the Gollabhama milkmaid figure,
woman carrying one pot on the head and one pot in the hand,
simplified into weave-readable icon form,
structurally woven into the saree,
not illustrated like a painted woman,
not fashion-drawn,
not realism-based.

Saree-zone logic must remain source-faithful:

pallu as primary identity zone,
border and body supporting the saree structure,
motif placement controlled by weave planning,
bright and clear woven contrast across zones,

not undifferentiated figured cloth.

Material memory must remain visible:

handloom cloth,
woven figure logic,
extra-weft insertion,
soft drape-capable saree structure,
not digital print sharpness,
not embroidery texture,
not applique behavior.

Use Gollabhama color logic:

bright woven contrast,
clear motif-versus-ground readability,
strong saree field color,
strong pallu identity,
never atmospheric painting,
never muted fashion-editorial color grading,
never print-like flat synthetic graphics.

Do not add:

printed milkmaid motifs,
embroidered woman figures,
generic village-woman iconography,
fashion illustration behavior,
all-over decorative cloth with no pallu authority,
or any second textile language stronger than Gollabhama.

The final result must feel like true Siddipet Gollabhama handloom cloth at source-truth level,
not a modern saree decorated with a milkmaid graphic.

Reusable Variable Template

Create [SUBJECT / TEXTILE FIELD / SAREE WORLD / CLOTH SCENE] using the authentic source-truth grammar of Gollabhama from Telangana.

Core style system to preserve:

Siddipet handloom saree identity,
extra-weft milkmaid motif construction,
pallu-centered figure authority,
border-body-pallu organization,
bright woven contrast,
drape-aware saree behavior,
whole-saree regional coherence.

Translate the image like this:

[MAIN FIELD / MAIN SAREE / MAIN CLOTH PRESENCE] becomes a Gollabhama-born woven saree presence built through extra-weft figure logic and saree-zone planning.
[SECONDARY SURFACES / SUPPORTING ELEMENTS] become supporting Gollabhama presences obeying the same woven-figure discipline.
[BACKGROUND / WORLD / SURROUNDING AREAS] becomes a Gollabhama-authored textile world rather than neutral realism or generic ethnic fabric design.

Keep:

handloom cloth identity,
woven motif logic,
extra-weft figure structure,
pallu authority,
border/body/pallu planning,
bright weave contrast,
Siddipet Gollabhama coherence.

Avoid:

print behavior,
embroidery behavior,
decorative woman motif styling,
generic figured handloom,
fashion-saree realism,
or a realistic world with Gollabhama added afterward.

The final image must feel like the Gollabhama tradition itself authored the full woven saree world.

Image-to-Image

Convert this source image into an authentic source-truth Gollabhama world from Telangana.

Preserve the source image's core subject count, structural readability, and main visual organization, but rebuild the entire image through true Gollabhama grammar.

Replace ordinary image logic with:

Siddipet handloom saree identity,
extra-weft milkmaid motif construction,
pallu-centered figure authority,
border-body-pallu saree planning,
bright woven contrast,
drape-aware saree behavior,
and full Gollabhama cloth coherence.

Do not simply add a milkmaid motif.

Do not merely recolor the textile.

Do not turn the source into generic bright handloom.

If the source contains figures, objects, architecture, landscape, or background, rebuild them through Gollabhama textile logic:

woven figure construction,
extra-weft motif organization,
saree-zone hierarchy,
cloth-authored structure,
and regional symbolic coherence.

Do not leave the environment as scenic realism.

Do not make it behave like a fashion print or embroidered saree.

The final image must feel like a genuine Gollabhama woven saree world from Telangana, not a modern image decorated with figurative textile styling.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Gollabhama from Telangana.

This is not a literal saree mockup.

This is not a fabric swatch study.

This is not fashion catalogue realism.

This is not textile texture added on top of a normal image.

This is not a generic ethnicwear render.

Preserve the same deep Gollabhama grammar unchanged:

Siddipet handloom saree identity,
extra-weft milkmaid motif construction,
pallu-centered figure authority,
border-body-pallu hierarchy,
bright woven contrast,
drape-aware saree behavior,
and whole-saree regional coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid image-form.

The added dimensionality must come from Gollabhama's own logic:

woven figure insertion,
extra-weft thickness and rhythm,

warp-weft field behavior,
pallu-to-body hierarchy,
border-band structuring,
motif spacing,
drape-driven motif distortion,
cloth-flow relation,
and full-frame handloom intelligence.

Do not only improve texture.
Do not only increase textile realism.
Transform the full image logic:
form,
construction,
grouping,
silhouette,
objects,
environment,
spatial organization,
and full-frame visual language.

If figures appear, they must not remain generic humans wearing a saree.
They must become Gollabhama-born presences:
face logic influenced by woven simplification,
body logic shaped by border-body-pallu textile hierarchy,
silhouettes built through drape and loom-structured figure placement,
objects and props translated into the same woven-symbolic system.

If environment appears, it must not remain neutral realism.
It must already begin to feel re-authored by Gollabhama:
woven-field world logic,
motif-zone spatial rhythm,
handloom structural grouping,
cloth-authored visual organization,
not just normal scenery with a Gollabhama saree somewhere inside it.

Believable depth must come from Gollabhama itself,
not from default realism,
not from fashion-editorial rendering,
not from generic 3D cloth shading.

Keep:
source-rooted Gollabhama identity,
extra-weft figure logic,
saree-zone hierarchy,
drape intelligence,
creative artisan translation,
regional symbolic authority,
full-frame style authorship.

Do not allow:

print logic,
embroidery logic,
fashion-styling realism,
fabric mockup behavior,
generic figured handloom,
or a normal image underneath with Gollabhama decoration added later.

The final result must feel like Gollabhama itself has creatively re-authored the image into a richer, more dimensional, more inventive handloom saree world while still remaining fully Gollabhama-born.

Reusable Variable Template

Create [SUBJECT / SCENE / TEXTILE FIELD / SAREE WORLD] in V2 = authentic handcrafted dimensional translation of Gollabhama from Telangana.

Preserve these unchanged deep style-core rules:

Siddipet handloom saree identity,
extra-weft milkmaid motif construction,
pallu-centered figure authority,
border-body-pallu hierarchy,
bright woven contrast,
drape-aware saree behavior,
whole-saree regional coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a Gollabhama-born dimensional presence built through woven figure logic, extra-weft structure, and saree-zone planning.
[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become supporting Gollabhama presences governed by the same handloom system.
[ENVIRONMENT / BACKGROUND / WORLD] becomes a creatively re-authored Gollabhama space where grouping, depth, and spatial rhythm come from weave logic rather than neutral realism.

Increase:

dimensional presence,
weave-to-motif relation,
pallu-to-body hierarchy,
drape intelligence,
extra-weft figure clarity,
inventive Gollabhama world-building.

Do not lose:

handloom identity,
woven milkmaid motif,

pallu authority,
border/body/pallu planning,
bright woven contrast,
Siddipet symbolic coherence,
full-frame Gollabhama control.

Avoid:
fabric mockup,
print drift,
embroidery drift,
fashion realism,
generic figured saree design,
or a realistic world with Gollabhama added afterward.

The final image must feel like the same Gollabhama grammar has been creatively translated into a richer, more dimensional, more scene-capable visual form.

Image-to-Image

Convert this source image into a V2 authentic handcrafted dimensional Gollabhama world from Telangana.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Gollabhama grammar translated into a richer, more dimensional, more inventive hybrid image-form.

Replace ordinary image logic with:
Siddipet handloom saree identity,
extra-weft milkmaid motif construction,
pallu-centered figure authority,
border-body-pallu planning,
bright woven contrast,
drape-aware saree behavior,
and full-frame Gollabhama coherence.

Do not simply overlay a milkmaid motif.
Do not just make the cloth look more handloom.
Do not make it a saree-product mockup.

Rebuild the image so that:
forms are organized through Gollabhama's own weave logic,
depth comes from woven figure relation and saree-zone structure,
objects and environments begin to behave like a Gollabhama-authored world,
and the whole frame feels generated by Gollabhama itself rather than realism with a figurative saree added on top.

If figures appear, rebuild them as Gollabhama-born presences rather than generic bodies in a culturally styled garment.

If environments appear, rebuild them through Gollabhama visual ontology rather than neutral realism.

The final image must feel like a true creative artisan translation of Gollabhama into a richer dimensional handloom saree world, not a normal image with regional textile styling.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Gollabhama from Telangana while keeping the same source grammar unchanged.

This is not realism replacing style.

This is not fashion editorial saree realism.

This is not couture ethnicwear styling.

This is not a normal world with a Gollabhama saree added afterward.

This is not printed textile realism with a traditional motif.

Preserve the same deep Gollabhama grammar unchanged:

Siddipet handloom saree identity,
extra-weft milkmaid motif construction,
pallu-centered figure authority,
border-body-pallu hierarchy,
bright woven contrast,
drape-aware saree behavior,
and whole-saree regional coherence.

Now push that same grammar into its most complete, most fully embodied, most fully resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by Gollabhama logic.

That means the transformation must affect everything:

faces,
bodies,
hands,
feet,
hair,
posture,
gesture,
props,
objects,
ground,

architecture,
plants,
sky treatment,
empty space,
environment rhythm,
foreground,
midground,
background,
and the full-frame visual language.

Nothing important may remain generic realism.

Gollabhama must control reality through its own logic:
woven figure construction,
extra-weft motif intelligence,
border-body-pallu world hierarchy,
pallu-centered symbolic authority,
warp-weft structural rhythm,
drape-governed spatial organization,
and full-world handloom saree ontology.

Believable here must mean:
believable volume,
believable spatial relation,
believable material embodiment,
believable environmental completion,
believable inhabitable world logic.

It must not mean:
fashion photography,
couture realism,
normal anatomy wearing a special saree,
generic architecture with a traditional motif,
boutique ethnicwear styling,
or realism-first image making.

If figures appear, they must be fully Gollabhama-born:
face construction shaped by woven symbolic simplification,
body logic shaped by saree-zone hierarchy and handloom structure,
silhouette logic shaped by drape and figure-weave relation,
gesture and posture integrated into the same Gollabhama world system.

If environment appears, it must also be fully Gollabhama-born:
ground, structures, objects, space, and atmosphere must all belong to one uninterrupted
Gollabhama world,
not a normal realistic environment underneath.

If you remove decorative cues, the image should still feel Gollabhama through:

form construction,
body logic,
object logic,
environment logic,
spatial organization,
saree-zone hierarchy,
and full-world visual ontology.

Keep:
same deep Gollabhama grammar,
full world embodiment,
full environmental completion,
stronger figure-ground hierarchy,
stronger spatial separation,
stronger object presence,
stronger total-frame style control.

Do not allow:
print realism,
embroidery logic,
fashion editorial styling,
couture ethnicwear realism,
generic figured handloom,
or any second textile language stronger than Gollabhama.

The final result must feel like Gollabhama itself has taken over the whole visible world and fully generated reality through Siddipet handloom saree logic, not like realism with Gollabhama decoration.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable real-world 3D translation of Gollabhama from Telangana.

Keep these unchanged deep style-core rules:
Siddipet handloom saree identity,
extra-weft milkmaid motif construction,
pallu-centered figure authority,
border-body-pallu hierarchy,
bright woven contrast,
drape-aware saree behavior,
whole-saree regional coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a fully embodied Gollabhama-born presence generated through weave logic, extra-weft figure structure, pallu authority, and full saree-world control.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become equally style-born Gollabhama presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Gollabhama world where spatial structure, environmental rhythm, and full-scene organization are all controlled by the same Siddipet handloom grammar.

Increase:

full world embodiment,
full environmental translation,
stronger spatial relation,
stronger figure-ground separation,
stronger material presence,
stronger world coherence,
stronger full-frame Gollabhama control.

Do not lose:

handloom identity,
extra-weft figure logic,
pallu-centered authority,
border/body/pallu structure,
bright woven contrast,
drape intelligence,
whole-world Gollabhama ontology.

Avoid:

fashion realism,
print logic,
embroidery drift,
couture saree styling,
generic figured handloom,
or a normal world with Gollabhama decoration added afterward.

The final image must feel like the same deep Gollabhama grammar has fully generated an entire believable world.

Image-to-Image

Convert this source image into a V3 fully resolved believable real-world Gollabhama world from Telangana.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Gollabhama grammar.

Replace ordinary realism with:
Siddipet handloom saree identity,
extra-weft milkmaid motif construction,
pallu-centered figure authority,
border-body-pallu hierarchy,
bright woven contrast,
drape-aware saree behavior,
and full-world Gollabhama coherence.

Do not simply place a milkmaid motif on the saree.
Do not just convert the fabric into bright handloom cloth.
Do not leave the environment generic.

Rebuild the full image so that:
faces, bodies, objects, props, and environment all belong to the same Gollabhama
handloom ontology,
depth comes from Gollabhama's own weave and saree-zone logic,
space is organized through pallu authority, figure-weave relation, and cloth-structured
rhythm,
the world becomes fully inhabitable but remains completely Gollabhama-born,
not realism-first.

If any part of the frame remains normal realism underneath, the conversion has failed.

The final image must feel like Gollabhama itself has fully generated the entire visible world,
not like a normal image decorated with a Siddipet milkmaid motif.
