

Narayanpet - Telangana

V1 — Authentic Style

Universal Hard Prompt

Create an image in pure authentic source-truth Narayanpet from Telangana.

Treat this as a true Telangana handloom saree-weaving tradition, not as print, not as embroidery, not as generic checked fabric, not as boutique ethnicwear styling, and not as a festive saree with decorative borders added later.

Build the image from the true grammar of Narayanpet:

handloom saree identity,
checked-body structure,
compulsory dual-side borders,
distinct pallu identity,
woven zari or art-silk enrichment in border and pallu,
region-specific Narayanpet saree architecture,
soft drape-capable handloom behavior,
and whole-saree Narayanpet coherence.

The image must feel like it genuinely belongs inside the original Narayanpet tradition.

Keep the whole frame inside one woven saree-authored visual language.

The textile itself must be source-born:

woven checks, not printed checks,
woven border logic, not stitched trim,
woven pallu distinction, not decorative end-panel styling,
handloom planning, not fashion surface design,
regional saree structure, not generic geometric cloth.

Body logic must remain source-faithful:

the body must feel check-structured,
loom-built,
disciplined,
field-based,
and structurally different from the border and pallu.

Do not turn the body into a figurative or heavily decorated fabric field.

Border logic must remain source-faithful:

the border must appear on both sides,
must feel compulsory and saree-defining,
must carry woven geometric or temple-related intelligence where relevant,
must hold zari or art-silk enrichment through loom structure,

not behave like decorative trim.

Pallu logic must remain source-faithful:
the pallu must feel distinct from the body,
more conclusive,
structurally separate,
richer in woven identity,
and clearly part of Narayanpet saree planning.

Variant logic must remain source-faithful:
if the image leans toward the cotton branch, preserve the checked body strongly.
if the image leans toward the silk branch, preserve temple-border and theni-pallu logic where relevant.
if the image leans toward the mixed branch, preserve handloom structural coherence without collapsing into a generic blended saree.

Material memory must remain visible:
handloom cloth,
cotton or silk or silk-cotton regional logic,
woven checks,
woven border,
woven pallu,
soft drape,
not print sharpness,
not embroidery texture,
not jacquard luxury takeover.

Use Narayanpet color logic:
controlled woven contrast,
clear body-versus-border-versus-pallu separation,
zari or art-silk as woven support,
never fashion-gradient atmosphere,
never print-like graphic contrast,
never generic boutique festive color blocking.

Do not add:
printed checked fabric,
embroidered border richness,
generic temple-border saree,
fashion catalogue saree styling,
designer ethnicwear logic,
or any second textile language stronger than Narayanpet.

The final result must feel like true Narayanpet handloom saree structure from Telangana at source-truth level, not a modern festive saree decorated to resemble Narayanpet.

Reusable Variable Template

Create an image in pure authentic source-truth Narayanpet from Telangana.

Treat this as a true Telangana handloom saree-weaving tradition, not as print, not as embroidery, not as generic checked fabric, not as boutique ethnicwear styling, and not as a festive saree with decorative borders added later.

Build the image from the true grammar of Narayanpet:

handloom saree identity,
checked-body structure,
compulsory dual-side borders,
distinct pallu identity,
woven zari or art-silk enrichment in border and pallu,
region-specific Narayanpet saree architecture,
soft drape-capable handloom behavior,
and whole-saree Narayanpet coherence.

The image must feel like it genuinely belongs inside the original Narayanpet tradition.

Keep the whole frame inside one woven saree-authored visual language.

The textile itself must be source-born:

woven checks, not printed checks,
woven border logic, not stitched trim,
woven pallu distinction, not decorative end-panel styling,
handloom planning, not fashion surface design,
regional saree structure, not generic geometric cloth.

Body logic must remain source-faithful:

the body must feel check-structured,
loom-built,
disciplined,
field-based,
and structurally different from the border and pallu.
Do not turn the body into a figurative or heavily decorated fabric field.

Border logic must remain source-faithful:

the border must appear on both sides,
must feel compulsory and saree-defining,
must carry woven geometric or temple-related intelligence where relevant,
must hold zari or art-silk enrichment through loom structure,
not behave like decorative trim.

Pallu logic must remain source-faithful:

the pallu must feel distinct from the body,
more conclusive,
structurally separate,
richer in woven identity,

and clearly part of Narayanpet saree planning.

Variant logic must remain source-faithful:

if the image leans toward the cotton branch, preserve the checked body strongly.

if the image leans toward the silk branch, preserve temple-border and theni-pallu logic where relevant.

if the image leans toward the mixed branch, preserve handloom structural coherence without collapsing into a generic blended saree.

Material memory must remain visible:

handloom cloth,

cotton or silk or silk-cotton regional logic,

woven checks,

woven border,

woven pallu,

soft drape,

not print sharpness,

not embroidery texture,

not jacquard luxury takeover.

Use Narayanpet color logic:

controlled woven contrast,

clear body-versus-border-versus-pallu separation,

zari or art-silk as woven support,

never fashion-gradient atmosphere,

never print-like graphic contrast,

never generic boutique festive color blocking.

Do not add:

printed checked fabric,

embroidered border richness,

generic temple-border saree,

fashion catalogue saree styling,

designer ethnicwear logic,

or any second textile language stronger than Narayanpet.

The final result must feel like true Narayanpet handloom saree structure from Telangana at source-truth level, not a modern festive saree decorated to resemble Narayanpet.

Image-to-Image

Create an image in pure authentic source-truth Narayanpet from Telangana.

Treat this as a true Telangana handloom saree-weaving tradition, not as print, not as embroidery, not as generic checked fabric, not as boutique ethnicwear styling, and not as a festive saree with decorative borders added later.

Build the image from the true grammar of Narayanpet:
handloom saree identity,
checked-body structure,
compulsory dual-side borders,
distinct pallu identity,
woven zari or art-silk enrichment in border and pallu,
region-specific Narayanpet saree architecture,
soft drape-capable handloom behavior,
and whole-saree Narayanpet coherence.

The image must feel like it genuinely belongs inside the original Narayanpet tradition.

Keep the whole frame inside one woven saree-authored visual language.
The textile itself must be source-born:
woven checks, not printed checks,
woven border logic, not stitched trim,
woven pallu distinction, not decorative end-panel styling,
handloom planning, not fashion surface design,
regional saree structure, not generic geometric cloth.

Body logic must remain source-faithful:
the body must feel check-structured,
loom-built,
disciplined,
field-based,
and structurally different from the border and pallu.
Do not turn the body into a figurative or heavily decorated fabric field.

Border logic must remain source-faithful:
the border must appear on both sides,
must feel compulsory and saree-defining,
must carry woven geometric or temple-related intelligence where relevant,
must hold zari or art-silk enrichment through loom structure,
not behave like decorative trim.

Pallu logic must remain source-faithful:
the pallu must feel distinct from the body,
more conclusive,
structurally separate,
richer in woven identity,
and clearly part of Narayanpet saree planning.

Variant logic must remain source-faithful:
if the image leans toward the cotton branch, preserve the checked body strongly.
if the image leans toward the silk branch, preserve temple-border and theni-pallu logic where relevant.

if the image leans toward the mixed branch, preserve handloom structural coherence without collapsing into a generic blended saree.

Material memory must remain visible:
handloom cloth,
cotton or silk or silk-cotton regional logic,
woven checks,
woven border,
woven pallu,
soft drape,
not print sharpness,
not embroidery texture,
not jacquard luxury takeover.

Use Narayanpet color logic:
controlled woven contrast,
clear body-versus-border-versus-pallu separation,
zari or art-silk as woven support,
never fashion-gradient atmosphere,
never print-like graphic contrast,
never generic boutique festive color blocking.

Do not add:
printed checked fabric,
embroidered border richness,
generic temple-border saree,
fashion catalogue saree styling,
designer ethnicwear logic,
or any second textile language stronger than Narayanpet.

The final result must feel like true Narayanpet handloom saree structure from Telangana at source-truth level, not a modern festive saree decorated to resemble Narayanpet.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Narayanpet from Telangana.

This is not a literal saree mockup.
This is not a fabric swatch study.
This is not fashion catalogue realism.
This is not texture-only styling.

This is not a generic checked festewear render.

Preserve the same deep Narayanpet grammar unchanged:

- handloom saree identity,
- checked-body structure,
- compulsory dual-side borders,
- distinct pallu identity,
- woven zari or art-silk border-pallu enrichment,
- branch-sensitive Narayanpet logic,
- soft drape-capable saree behavior,
- and whole-saree regional coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid image-form.

The added dimensionality must come from Narayanpet's own logic:

- warp-weft check structure,
- body-versus-border separation,
- border-to-pallu hierarchy,
- loom-built geometric rhythm,
- zari or art-silk woven support,
- soft drape carrying checks through folds,
- temple-border or theni-pallu logic where relevant,
- and full-frame handloom intelligence.

Do not only improve texture.

Do not only increase realism.

Transform the full image logic:

- form,
- construction,
- grouping,
- silhouette,
- objects,
- environment,
- spatial organization,
- and full-frame visual language.

If figures appear, they must not remain generic humans wearing a saree.

They must become Narayanpet-born presences:

- face logic influenced by woven ceremonial simplification,
- body logic shaped by checked field plus border-pallu hierarchy,
- silhouettes built through drape and loom-structured saree zoning,
- objects and props translated into the same Narayanpet woven system.

If environment appears, it must not remain neutral realism.

It must already begin to feel re-authored by Narayanpet:

- check-structured field logic,
- border-led spatial rhythm,

pallu-based conclusion logic,
handloom structural grouping,
not just normal scenery with a Narayanpet saree somewhere inside it.

Believable depth must come from Narayanpet itself,
not from default realism,
not from fashion-editorial rendering,
not from generic 3D cloth shading.

Keep:
source-rooted Narayanpet identity,
woven check logic,
dual-border authority,
distinct pallu hierarchy,
creative artisan translation,
regional saree authorship,
full-frame style control.

Do not allow:
print logic,
embroidery drift,
fashion styling realism,
saree mockup behavior,
generic checked textile language,
or a normal image underneath with Narayanpet decoration added later.

The final result must feel like Narayanpet itself has creatively re-authored the image into a richer, more dimensional, more inventive handloom saree world while still remaining fully Narayanpet-born.

Reusable Variable Template

Create [SUBJECT / SCENE / TEXTILE FIELD / SAREE WORLD] in V2 = authentic handcrafted dimensional translation of Narayanpet from Telangana.

Preserve these unchanged deep style-core rules:
handloom saree identity,
checked-body structure,
compulsory dual-side borders,
distinct pallu identity,
woven zari or art-silk border-pallu enrichment,
branch-sensitive Narayanpet logic,
soft drape-capable saree behavior,
whole-saree regional coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a Narayanpet-born dimensional presence built through woven checks, strong border authority, and pallu-led saree zoning. [SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become supporting Narayanpet presences governed by the same handloom system. [ENVIRONMENT / BACKGROUND / WORLD] becomes a creatively re-authored Narayanpet space where grouping, depth, and spatial rhythm come from loom-built saree structure rather than neutral realism.

Increase:
dimensional presence,
weave-to-check relation,
body-versus-border clarity,
pallu conclusion,
soft drape intelligence,
branch-aware Narayanpet structure,
inventive Narayanpet world-building.

Do not lose:
handloom identity,
checked body discipline,
dual-side border authority,
distinct pallu,
woven zari/art-silk support,
whole-saree Narayanpet control.

Avoid:
fabric mockup,
print drift,
embroidery drift,
fashion realism,
generic checked festewear,
or a realistic world with Narayanpet added afterward.

The final image must feel like the same Narayanpet grammar has been creatively translated into a richer, more dimensional, more scene-capable visual form.

Image-to-Image

Convert this source image into a V2 authentic handcrafted dimensional Narayanpet world from Telangana.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Narayanpet grammar translated into a richer, more dimensional, more inventive hybrid image-form.

Replace ordinary image logic with:

handloom saree identity,
checked-body structure,
compulsory dual-side borders,
distinct pallu identity,
woven zari or art-silk border-pallu enrichment,
branch-sensitive Narayanpet structure,
and full-frame Narayanpet coherence.

Do not simply add checks and borders.
Do not just make the cloth look more handloom.
Do not make it a saree-product mockup.

Rebuild the image so that:
forms are organized through Narayanpet's own loom logic,
depth comes from checked body relation, border authority, and pallu structure,
objects and environments begin to behave like a Narayanpet-authored world,
and the whole frame feels generated by Narayanpet itself rather than realism with a checked saree added on top.

If figures appear, rebuild them as Narayanpet-born presences rather than generic bodies in festive dress.
If environments appear, rebuild them through Narayanpet visual ontology rather than neutral realism.

The final image must feel like a true creative artisan translation of Narayanpet into a richer dimensional handloom saree world, not a normal image with checked festive textile styling.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Narayanpet from Telangana while keeping the same source grammar unchanged.

This is not realism replacing style.
This is not fashion editorial saree realism.
This is not couture festewear styling.
This is not a normal world with a Narayanpet saree added afterward.
This is not generic checked luxury textile realism.

Preserve the same deep Narayanpet grammar unchanged:
handloom saree identity,
checked-body structure,
compulsory dual-side borders,
distinct pallu identity,
woven zari or art-silk border-pallu enrichment,

branch-sensitive Narayanpet logic,
soft drape-capable saree behavior,
and whole-saree regional coherence.

Now push that same grammar into its most complete, most fully embodied, most fully resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by Narayanpet logic.

That means the transformation must affect everything:

faces,
bodies,
hands,
feet,
hair,
posture,
gesture,
props,
objects,
ground,
architecture,
plants,
sky treatment,
empty space,
environment rhythm,
foreground,
midground,
background,
and the full-frame visual language.

Nothing important may remain generic realism.

Narayanpet must control reality through its own logic:

woven check structure,
dual-side border authority,
pallu-led saree hierarchy,
zari/art-silk woven support,
temple-border or theni-pallu logic where relevant,
soft handloom drape,
and full-world Narayanpet ontology.

Believable here must mean:

believable volume,
believable spatial relation,
believable material embodiment,
believable environmental completion,
believable inhabitable world logic.

It must not mean:

fashion photography,
couture realism,
normal anatomy wearing a checked saree,
generic architecture with festive textile cues,
boutique ethnicwear styling,
or realism-first image making.

If figures appear, they must be fully Narayanpet-born:

face construction shaped by woven ceremonial simplification,
body logic shaped by checked field plus border-pallu hierarchy,
silhouette logic shaped by soft drape and strong saree zoning,
gesture and posture integrated into the same Narayanpet world system.

If environment appears, it must also be fully Narayanpet-born:

ground, structures, objects, space, and atmosphere must all belong to one uninterrupted Narayanpet world,
not a normal realistic environment underneath.

If you remove decorative cues, the image should still feel Narayanpet through:

form construction,
body logic,
object logic,
environment logic,
spatial organization,
checked-body structure,
border-pallu hierarchy,
and full-world visual ontology.

Keep:

same deep Narayanpet grammar,
full world embodiment,
full environmental completion,
stronger figure-ground hierarchy,
stronger spatial separation,
stronger object presence,
stronger total-frame style control.

Do not allow:

print realism,
embroidery drift,
fashion editorial styling,
couture festiwewear realism,
generic checked saree logic,
or any second textile language stronger than Narayanpet.

The final result must feel like Narayanpet itself has taken over the whole visible world and fully generated reality through Telangana handloom saree logic, not like realism with Narayanpet decoration.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable real-world 3D translation of Narayanpet from Telangana.

Keep these unchanged deep style-core rules:

handloom saree identity,
checked-body structure,
compulsory dual-side borders,
distinct pallu identity,
woven zari or art-silk border-pallu enrichment,
branch-sensitive Narayanpet logic,
soft drape-capable saree behavior,
whole-saree regional coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a fully embodied Narayanpet-born presence generated through woven check logic, dual-border structure, pallu authority, and full handloom world control.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become equally style-born Narayanpet presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Narayanpet world where spatial structure, environmental rhythm, and full-scene organization are all controlled by the same Telangana handloom grammar.

Increase:

full world embodiment,
full environmental translation,
stronger spatial relation,
stronger figure-ground separation,
stronger material presence,
stronger world coherence,
stronger full-frame Narayanpet control.

Do not lose:

handloom identity,
checked-body structure,
dual-side border authority,
distinct pallu,
woven zari/art-silk support,
branch-aware Narayanpet logic,
whole-world Narayanpet ontology.

Avoid:

fashion realism,
print logic,
embroidery drift,
couture saree styling,
generic checked festewear,
or a normal world with Narayanpet decoration added afterward.

The final image must feel like the same deep Narayanpet grammar has fully generated an entire believable world.

Image-to-Image

Convert this source image into a V3 fully resolved believable real-world Narayanpet world from Telangana.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Narayanpet grammar.

Replace ordinary realism with:

handloom saree identity,
checked-body structure,
compulsory dual-side borders,
distinct pallu identity,
woven zari or art-silk border-pallu enrichment,
branch-sensitive Narayanpet structure,
and full-world Narayanpet coherence.

Do not simply place a checked saree on a figure.

Do not just convert the textile into a richer bordered garment.

Do not leave the environment generic.

Rebuild the full image so that:

faces, bodies, objects, props, and environment all belong to the same Narayanpet handloom ontology,
depth comes from Narayanpet's own check structure, border authority, and pallu hierarchy,
space is organized through soft handloom drape and saree-zone logic,
the world becomes fully inhabitable but remains completely Narayanpet-born,
not realism-first.

If any part of the frame remains normal realism underneath, the conversion has failed.

The final image must feel like Narayanpet itself has fully generated the entire visible world, not like a normal image decorated with Telangana checked saree styling.
