

ritual craft systems - Tamil Nadu

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Ritual Craft Systems from Tamil Nadu**, treating it as a **sacred-use craft umbrella** built through **iconographic rule, ritual activation, temple or shrine usability, processional and festival logic, sacred readability, and ceremonially fit object-making**.

Build the image as if it genuinely belongs inside Tamil sacred life itself. The image must be governed first by **ritual function**, not by décor, lifestyle styling, luxury craft finish, or generic heritage aesthetics. Every visible form should feel made to do something sacred: to be worshipped, lit, installed, carried, offered, guarded, staged, narrated through, or used in temple or shrine service.

Sacred forms must feel rule-bound and ritually legible. Deity icons should feel consecration-capable. Lamps should feel flame-worthy and devotional. Temple wood forms should feel shrine- or temple-service ready. Guardian forms should feel votive, protective, and boundary-linked. Puppets should feel ritual-performance bound and epic-narrative capable, not decorative or theatrical in a generic way.

The object, figure, or system must feel embedded in sacred space: temple, shrine, procession, annual temple festival, ritual stage, puja setting, or village-boundary guardian context. Material should behave as a servant of ritual purpose, not as luxury display. Ornament should support sacred readability, not overpower it. Finish should feel ceremonially fit, not showroom-polished.

If figures, objects, architecture, or environment appear, they must all belong to one uninterrupted sacred-use world. Do not let only one idol, lamp, puppet, or offering object signal ritual while the rest of the frame stays generic.

Do not create generic Tamil handicrafts, décor-first sacred-looking objects, fashion craft with temple motifs, luxury-finish heritage styling, or realism with devotional objects inserted later. The final result must feel like **the real Tamil ritual-craft system itself made the whole image-world**.

Reusable Variable Template

Create [SUBJECT / OBJECT / FIGURAL SYSTEM / SACRED WORLD] in the **pure authentic source-truth visual logic of Ritual Craft Systems from Tamil Nadu**.

Style system that must remain unchanged:

- ritual-use identity
- iconographic-rule identity
- sacred-form readability
- temple / shrine / festival embedding
- material-in-service-of-ritual logic
- ceremonial fitness
- whole-frame sacred-use consistency

Translate the image like this:

- **[MAIN FORM / MAIN OBJECT / MAIN FIGURE]** becomes a sacred-use presence governed by ritual purpose, not generic design taste
- **[SECONDARY FORMS / SUPPORT OBJECTS]** also remain inside the same temple/shrine/processional/festival logic
- **[IF ICONIC FORMS APPEAR]** they must feel rule-bound, worship-capable, or shrine-capable
- **[IF LAMPS APPEAR]** they must feel flame-bearing and ceremonial, not decorative
- **[IF GUARDIAN / VOTIVE FORMS APPEAR]** they must feel protective, offering-bound, and site-linked
- **[IF PUPPETS / PERFORMANCE FORMS APPEAR]** they must feel ritual-stage-ready and sacred-narrative capable
- **[IF ENVIRONMENT APPEARS]** it must feel temple-, shrine-, procession-, or ritual-stage-coded rather than generic

Keep:

- ritual readability
- sacred purpose
- formal sacred presence
- temple/shrine embedding
- ceremonial usability
- whole-frame coherence

Avoid:

- generic Tamil craft mood
- décor-first styling
- premium heritage luxury treatment
- fashion craft
- symbolic ornament without sacred-use logic
- realism with one devotional object dropped into a generic scene

The final result must feel like a true Tamil sacred-use craft world, not a decorative cultural image.

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Ritual Craft Systems from Tamil Nadu**.

Preserve the source image's **subject count, core action, main relationships, and readability**, but rebuild the full image through Tamil sacred-use grammar. Replace generic object logic with ritual-function logic. Replace decorative styling with sacred readability. Replace generic traditional cues with iconographic discipline. Replace lifestyle space with temple, shrine, festival, processional, or ritual-stage logic.

If the image includes figures, objects, lamps, guardian forms, ritual furnishings, icons, puppets, or sacred architecture, rebuild them so they feel made for worship, light, offering, narration, procession, or shrine presence. If environment appears, it must also feel governed by sacred-use purpose rather than generic realism.

Do not simply add temple motifs or devotional objects to the source image. Do not keep décor logic underneath. Do not let ritual forms become collectible or lifestyle-styled. The final result must feel as if the original image has been fully reauthored inside the true source-truth Tamil ritual-craft system.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in the **creative artisan translation of Ritual Craft Systems from Tamil Nadu**, preserving the same deep source grammar as the authentic source-truth version, but translating it into a **richer, more imaginative, more dimensional 2D + 3D hybrid visual system**.

Keep the core Tamil ritual-craft grammar fully unchanged: ritual-use identity, iconographic-rule identity, sacred-form readability, temple/shrine/festival embedding, material-in-service-of-ritual logic, ceremonial fitness, and sacred-world coherence. Do not turn this into generic spiritual décor, luxury heritage styling, sacred-themed concept art, texture exercise, or realism with devotional objects arranged beautifully.

Translate that same grammar into a more alive and dimensional visual language. The image must no longer behave only as literal ritual-object description, but it must also not become full realistic scene-world depth. It should become a **creative hybrid sacred visual system** where ritual-use intelligence itself generates richer form, stronger visual invention, and more dimensional presence.

The transformation must affect the whole frame. If figures appear, faces, bodies, silhouettes, posture, grouping, and relations must all be rebuilt through sacred-use logic. If objects

appear, they must be shaped through ritual role, iconographic order, and ceremonial usability. If environment appears, it must grow from temple/shrine/festival logic rather than remain generic. The sacred system must become the larger organizing intelligence, not just the subject matter.

Dimensionality must come from the style itself: from iconographic rule, sacred placement, shrine order, processional readiness, ritual activation, guardian force, flame logic, and performance-narrative logic. Do not solve dimensionality through generic rendering habits, lifestyle atmosphere, normal realism, or premium craft photography.

Do not create:

sacred-object showroom styling, luxury heritage mockup, texture-first reinterpretation, decorative spiritual concept art, or a generic dimensional image decorated later by Tamil ritual objects.

The final result must feel like **the same Tamil ritual-craft grammar has entered a richer, more imaginative, more dimensional artisan translation without losing ritual purpose.**

Reusable Variable Template

Create **[SUBJECT / IMAGE / FIGURAL SYSTEM / SACRED WORLD]** in the **creative artisan translation of Ritual Craft Systems from Tamil Nadu.**

Keep unchanged:

- ritual-use identity
- iconographic-rule identity
- sacred-form readability
- temple / shrine / festival embedding
- material-in-service-of-ritual logic
- ceremonial fitness
- sacred-world coherence
- whole-frame style consistency

Translate it into a richer dimensional hybrid visual system like this:

- **[MAIN FORM / MAIN FIGURE / MAIN OBJECT]** becomes a sacred-use presence with more dimensional life, but still governed by ritual logic
- **[SECONDARY FORMS / SUPPORT OBJECTS]** also transform through the same sacred-use grammar rather than generic styling
- **[IF ICONIC FORMS APPEAR]** they become more visually alive but remain rule-bound and consecration-capable
- **[IF LAMPS / GUARDIAN FORMS / PUPPETS / TEMPLE OBJECTS APPEAR]** they become more spatially expressive while remaining ritual-function-first
- **[IF FIGURES APPEAR]** faces, bodies, posture, grouping, silhouette, object logic, and environment logic must all be rebuilt through Tamil sacred-use order

- **[IF ENVIRONMENT APPEARS]** it must grow from shrine/temple/processional/festival intelligence rather than realism

Increase:

- dimensional presence
- visual richness
- artisan-like reinterpretation
- hybrid 2D + 3D form
- structural clarity
- whole-frame transformation
- imaginative sacred spatial layering

Do not use:

- décor logic
- showroom logic
- premium heritage styling
- texture-only translation
- realistic anatomy with sacred props
- generic environment with devotional overlay
- only one object carrying the style

Success condition:

the result feels like the same Tamil ritual-craft style has been artistically translated into a richer dimensional hybrid system.

Failure condition:

the result feels like a generic dimensional image decorated later by Tamil sacred objects.

Image-to-Image

Convert this source image into the **creative artisan translation of Ritual Craft Systems from Tamil Nadu**.

Preserve the source image's core subject logic, action logic, grouping logic, and readability, but rebuild the full image through Tamil sacred-use grammar translated into a richer, more dimensional 2D + 3D hybrid visual system.

Replace generic object logic with ritual-use logic. Replace ordinary arrangement with shrine, temple, processional, stage, offering, or guardian-system intelligence. Replace decorative sacred cues with true iconographic and ceremonial structure. If figures are present, transform faces, bodies, silhouettes, posture, grouping, object logic, and surrounding structure through Tamil ritual-craft logic, not realism. If environment is present, it must also be rebuilt through sacred-use order instead of remaining generic.

Let the image gain more dimensional life, richer structural form, more imaginative layering, and stronger whole-frame coherence. But do not turn it into a luxury devotional scene, a heritage design render, or realism with sacred objects styled beautifully.

Do not style only the sacred object surface. Do not leave the rest of the frame generic. The final result must feel like **the source image has been fully reauthored through a creative artisan translation of Tamil ritual craft systems**.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in the **fully resolved believable real-world 3D translation of Ritual Craft Systems from Tamil Nadu**, preserving the same authentic source grammar but pushing it into its **most complete, most embodied, most scene-capable volumetric world**.

Keep the same deep Tamil ritual-craft visual intelligence fully unchanged: ritual-use identity, iconographic-rule identity, sacred-form readability, temple/shrine/festival embedding, material-in-service-of-ritual logic, ceremonial fitness, and sacred-world coherence. Do not turn this into generic heritage realism, generic temple realism, decorative devotional atmosphere, or cinematic scene illustration with sacred objects added on top.

Now convert that same grammar into a believable volumetric world. The result must have believable volume, believable material behavior, believable spatial separation, believable object presence, believable sacred environmental completion, and believable three-dimensional world logic. But every visible part of the image must still be generated by Tamil ritual-craft grammar.

If figures are present, they must be rebuilt through sacred-use structure, not normal realism standing near ritual objects. If objects appear, they must be shaped through ritual purpose and sacred rule. If environment appears, it must be generated by temple/shrine logic, procession logic, ritual-stage logic, guardian/votive logic, and ceremonial placement. The world must not become ordinary reality with a few devotional objects inserted into it.

Depth must now become full scene-world depth, but it must remain style-controlled. The source grammar must still govern figure design, shape logic, composition logic, material identity, environment logic, and total scene organization.

Do not let realism replace the style. Do not let the style survive only in icons, lamps, guardian forms, costume, or props. Do not create a premium cinematic makeover stronger than the source grammar. The final image must feel like **Tamil ritual craft itself has become a believable full world**.

Reusable Variable Template

Create **[SUBJECT / SCENE / FIGURAL WORLD / EXPANDED TAMIL RITUAL-CRAFT WORLD]** in the **fully resolved believable real-world 3D translation of Ritual Craft Systems from Tamil Nadu**.

Keep unchanged:

- ritual-use identity
- iconographic-rule identity
- sacred-form readability
- temple / shrine / festival embedding
- material-in-service-of-ritual logic
- ceremonial fitness
- sacred-world coherence
- whole-frame style consistency

Translate it into full world-depth like this:

- **[MAIN FORM / MAIN FIGURE / MAIN GROUP / MAIN OBJECT]** becomes a fully embodied sacred-use presence with believable ritual-world logic
- **[SECONDARY FORMS / SUPPORT OBJECTS]** also remain under the same Tamil ritual-craft-born logic
- **[ICONS / LAMPS / GUARDIAN FORMS / PUPPETS / TEMPLE OBJECTS / SHRINE ELEMENTS]** become volumetric world-organizing elements still governed by sacred-use structure
- **[SURROUNDING WORLD / ENVIRONMENT / SPATIAL FIELD]** becomes a believable scene-world generated by temple/shrine/processional/festival intelligence rather than generic realism
- **[IF FIGURES ARE PRESENT]** faces, bodies, posture, grouping, silhouette, object logic, and environment logic must all remain Tamil ritual-craft-born, not realism-first

Increase:

- volumetric world-building
- material-light interaction
- spatial separation
- scene completeness
- object presence
- environmental orchestration
- full-frame readability

Do not lose:

- ritual purpose
- iconographic law
- sacred placement
- ceremonial usability
- temple/shrine/festival logic

- sacred-world organization
- whole-frame Tamil ritual-craft identity

Do not use:

- realistic temple-tourism scene
- generic cinematic illustration
- style-as-object only
- style-as-prop only
- style-as-devotional décor only
- premium finish overpowering source grammar
- reality with Tamil sacred flavor added later

Success condition:

the result feels like Tamil ritual craft itself has become a believable full world.

Failure condition:

the result feels like reality has been coated with Tamil sacred objects.

Image-to-Image

Convert this source image into the **fully resolved believable real-world 3D translation of Ritual Craft Systems from Tamil Nadu**.

Preserve the source image's main subject logic, action logic, relationship logic, and readability, but rebuild the entire image through Tamil ritual-craft source grammar translated into **full world-depth**.

Replace generic forms with sacred-use-built volumetric presences. Replace ordinary surfaces with ritual-world construction. Replace generic decorative order with temple/shrine/processional/festival intelligence. Replace lifestyle sacred mood with true ceremonial structure. Replace generic environment space with a believable scene-world shaped by Tamil ritual-craft field intelligence. If figures are present, transform faces, bodies, posture, grouping, silhouette, object logic, and environment logic through Tamil sacred-use grammar, not realism.

Allow the result to gain complete volumetric embodiment, stronger material-light interaction, spatial separation, object presence, scene completion, and environmental orchestration. But do not let the image become generic reality with Tamil sacred objects added later. The whole world must remain Tamil ritual-craft-born.

Do not stylize only the icon, lamp, guardian object, or puppet while leaving the rest of the world generic. Do not make it a temple-tourism realism scene. Do not let the source grammar weaken as depth increases. The final result must feel like **the source image has been fully reauthored as a believable volumetric world generated by Tamil ritual craft itself**.
