

Franco-Tamil decorative environment - Puducherry

V1 — Authentic Style

Universal Hard Prompt

For the style **Franco-Tamil Decorative Environment / Puducherry**, create the image in **V1**
= pure authentic source-truth.

Treat this as a true **Puducherry hybrid urban environment**, not as generic French-colonial architecture, not as Tamil vernacular alone, not as Goa-like heritage mood, and not as pastel postcard nostalgia.

Build the whole frame through the real source grammar of Puducherry:

French Quarter and Tamil Quarter duality,
grid-planned old-town order,
continuous Tamil street-wall rhythm,
thinnai and thalvaram threshold logic,
mutram-centered interior organization,
French street-fronted façades,
tall arched openings,
high ceilings,
pilasters,
cornices,
shutters,
porticoes,
courtyard and garden transitions,
and cross-influenced buildings where Tamil lower-level house logic and French upper-level
façade logic coexist in one environment.

The environment itself must be the style.

Do not make one pretty façade carry the identity while the rest of the frame stays generic.

Every major visible element must belong to the same urban language:

streets,
walls,
thresholds,
verandahs,
compound edges,
courtyards,
doors,
windows,
upper floors,
rooflines,
and interior transitions.

If figures appear, they must remain secondary to the environment and feel like they belong naturally inside this built world.

Do not let people turn the image into generic realism.

If an interior appears, it must still feel connected to the same Franco-Tamil urban logic and not become an isolated decorative room.

Keep:

quarter logic,
street-based environment order,
threshold intelligence,
courtyard logic,
Franco-Tamil fusion morphology,
and whole-frame Puducherry specificity.

Do not make:

generic colonial street charm,
Goa drift,
French-only heritage,
Tamil-only heritage,
café-lane nostalgia,
resort-like White Town styling,
or generic realism with a few Franco-Tamil details added later.

The final image must feel like:

the original Franco-Tamil environment of Puducherry itself authored the whole frame.

Reusable Variable Template

For the style **Franco-Tamil Decorative Environment / Puducherry**, create **[SCENE / LOCATION / BUILT WORLD]** in **V1 = pure authentic source-truth**.

Preserve the true source system:

French Quarter and Tamil Quarter duality,
street-wall continuity,
thinnai / thalvaram / mutram logic,
French frontage/opening logic,
and real Franco-Tamil cross-influence.

Keep these scene invariants fixed unless explicitly changed:

[SUBJECT COUNT]
[CHARACTER ROLES]
[RELATIONSHIPS]
[KEY BUILT ELEMENTS]
[ENVIRONMENT FUNCTION]
[ACTION / POSE PURPOSE]
[EMOTIONAL BEAT]

[VIEWER-READ]
[BASIC STAGING LOGIC]

Translate the image like this:

[MAIN ENVIRONMENT CORE] becomes a source-faithful Puducherry townscape built from quarter logic, threshold logic, courtyard logic, and fusion morphology.

[SECONDARY BUILT ELEMENTS] become supporting structures obeying the same Franco-Tamil grammar.

[FIGURES / OBJECTS / GROUND / BACKGROUND] must also belong to the same environment language and must not slip into generic colonial or generic South Indian realism.

Keep:

street structure first,
quarter logic first,
environment authorship first,
fusion morphology first,
and Puducherry-specific built order.

Avoid:

single-façade styling,
generic colonial prettiness,
Goa substitution,
Tamil-only drift,
French-only drift,
or background-more-generic-than-foreground failure.

The final image must feel like:

the source Puducherry environment itself generated the entire frame.

Image-to-Image

Convert this source image into **V1 pure authentic source-truth Franco-Tamil Decorative Environment / Puducherry**.

Preserve the source image's:

[SUBJECT COUNT]
[CORE ACTION]
[MAIN RELATIONSHIPS]
[KEY BUILT ELEMENTS]
[VIEWER-READ]
[BASIC STAGING]

Replace ordinary image logic with:

French Quarter / Tamil Quarter duality,
continuous Tamil street-front logic,

thinnai / thalvaram / mutram spatial intelligence,
French arched-opening and pilaster frontage logic,
high-ceilinged built presence,
street-to-courtyard transitions,
and full Franco-Tamil environment coherence.

Do not simply add arches, shutters, and pastel walls.
Do not keep generic realism underneath.
Do not make it a pretty colonial coast.
Do not let charm replace structure.

Rebuild every visible element so it feels born from the same Puducherry environment grammar.

The final result must feel like:

the source image has been fully rebuilt inside authentic Franco-Tamil Puducherry environment logic.

V2 — Artisan Translation

Universal Hard Prompt

For the style **Franco-Tamil Decorative Environment / Puducherry**, create the image in **V2 = authentic handcrafted dimensional translation**.

Preserve the same unchanged deep style-core:

French Quarter / Tamil Quarter duality,
street-wall continuity,
thinnai / thalvaram / mutram logic,
French frontage/opening logic,
Franco-Tamil fusion morphology,
and full environment authorship.

Now translate that same source grammar into believable handcrafted dimensional environmental presence.

This must still feel fully style-born.

The architecture must remain source-born.

The streets must remain source-born.

The thresholds and courtyards must remain source-born.

If figures appear, they must remain subordinate to the same environment grammar.

Allow:

clearer wall thickness,

deeper verandah and portico recess,
stronger doorway and window depth,
clearer courtyard layering,
stronger upper-floor/lower-floor contrast,
better street-to-interior transitions,
better front / middle / back readability,
and stronger environmental mass.

But all dimensionality must come from the branch's own logic:

street-front continuity,
threshold sequence,
courtyard depth,
arched openings,
pilasters,
parapets,
compound edges,
and fused Tamil/French house morphology.

Do not allow:

generic 3D colonial rendering,
pretty White Town charm,
Goa-like soft heritage mood,
resort polish,
generic urban realism with heritage dressing,
or one environment layer carrying the style while the rest stays neutral.

The final image must feel like:

the same Puducherry Franco-Tamil environment has entered handcrafted dimensional space without losing its identity.

Reusable Variable Template

For the style **Franco-Tamil Decorative Environment / Puducherry**, create **[SCENE / LOCATION / BUILT WORLD]** in **V2 = authentic handcrafted dimensional translation**.

Preserve the same unchanged source core:

quarter duality,
street-wall continuity,
Tamil threshold/courtyard logic,
French frontage/opening logic,
fusion morphology,
and whole-frame environment authorship.

Keep these scene invariants fixed unless explicitly changed:

[SUBJECT COUNT]

[CHARACTER ROLES]

[RELATIONSHIPS]
[KEY BUILT ELEMENTS]
[ENVIRONMENT FUNCTION]
[ACTION / POSE PURPOSE]
[EMOTIONAL BEAT]
[VIEWER-READ]
[BASIC STAGING LOGIC]

Translate the image like this:

[MAIN ENVIRONMENT CORE] becomes a dimensional Puducherry built world with stronger wall depth, verandah recession, threshold layering, courtyard readability, and façade/interior relation.

[SECONDARY BUILT ELEMENTS] become supporting structures obeying the same Franco-Tamil grammar.

[FIGURES / OBJECTS / GROUND / BACKGROUND] must also remain style-born and must not drift into neutral heritage-town realism.

Increase:

architectural mass,
verandah depth,
courtyard presence,
wall thickness,
opening depth,
street-to-interior continuity,
and spatial clarity.

Do not lose:

quarter structure,
fusion logic,
street rhythm,
threshold intelligence,
and whole-frame same-language control.

Avoid:

generic colonial rendering,
White Town postcard mood,
Goa substitution,
Tamil-only or French-only simplification,
or realism-first environment with heritage details added later.

The final image must feel like:

the same Puducherry environment has become dimensional without becoming a different style.

Image-to-Image

Convert this source image into **V2 authentic handcrafted dimensional Franco-Tamil Decorative Environment / Puducherry.**

Preserve the source image's:

[SUBJECT COUNT]

[CORE ACTION]

[MAIN RELATIONSHIPS]

[KEY BUILT ELEMENTS]

[VIEWER-READ]

[BASIC STAGING]

Replace ordinary image logic with:

quarter-based urban structure,
street-front continuity,
threshold and verandah depth,
mutram/courtyard layering,
French arched opening logic,
pilaster and parapet rhythm,
and full Franco-Tamil environmental coherence.

Allow:

stronger built mass,
clearer recess and projection,
better street/court/interior relation,
and stronger architectural objecthood.

Do not:

turn it into premium colonial realism,
make it Goa-like,
make it White Town tourism,
leave the town generic while styling one façade,
or let environment mood overpower actual built grammar.

The final result must feel like:

a handcrafted dimensional expansion of the same Puducherry Franco-Tamil environment system.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

For the style **Franco-Tamil Decorative Environment / Puducherry**, create the image in **V3**
= fully resolved believable dimensional translation of the same source style.

Preserve the same unchanged deep style-core:

French Quarter / Tamil Quarter duality,
street-wall continuity,
thinnai / thalvaram / mutram house intelligence,
French façade/opening logic,
cross-influenced hybrid buildings,
and full environment authorship.

Now push the same source environment into its most complete and believable dimensional world.

Increase:

full architectural material clarity,
clearer street/courtyard/verandah/interior hierarchy,
stronger figure-ground separation,
clearer upper-floor/lower-floor fusion readability,
stronger environmental completion,
stronger urban coherence,
stronger focal hierarchy,
attention control,
and stronger whole-frame orchestration.

But do not introduce:

generic cinematic heritage polish,
White Town luxury styling,
French-colonial romance,
Goa-like prettification,
café-street nostalgia,
resort mood,
or a second visual language.

The architecture must still be made from the style itself.

The thresholds must still be made from the style itself.

The whole environment must still belong to the same Puducherry grammar.

Critical V3 rule:

if removing the “resolved” finish would make the Franco-Tamil grammar disappear, the prompt is wrong.

The realism must come from quarter logic, threshold logic, courtyard logic, and fusion morphology itself, not from generic realism layered over it.

The final image must feel like:

the same Puducherry Franco-Tamil environment fully embodied into believable reality, not reality coated with colonial charm.

Reusable Variable Template

For the style **Franco-Tamil Decorative Environment / Puducherry**, create **[SCENE / LOCATION / BUILT WORLD]** in **V3 = fully resolved believable dimensional translation of the same source style**.

Keep the same unchanged core:

quarter duality,
street-wall continuity,
Tamil threshold/courtyard logic,
French frontage/opening logic,
fusion morphology,
and whole-frame environment authorship.

Keep these invariants fixed unless explicitly changed:

[SUBJECT COUNT]
[CHARACTER ROLES]
[RELATIONSHIPS]
[KEY BUILT ELEMENTS]
[ENVIRONMENT FUNCTION]
[ACTION / POSE PURPOSE]
[EMOTIONAL BEAT]
[VIEWER-READ]
[BASIC STAGING LOGIC]

Translate the image like this:

[MAIN ENVIRONMENT CORE] becomes a fully embodied Puducherry built world with believable quarter logic, threshold depth, courtyard structure, façade mass, and full Franco-Tamil spatial coherence.

[SECONDARY BUILT ELEMENTS] become equally style-born structures obeying the same environment grammar.

[FIGURES / OBJECTS / GROUND / BACKGROUND / SPACE] become a complete believable world still governed by the same source logic, not by generic colonial-town realism.

Increase:

material believability,
environmental hierarchy,
spatial completion,
architectural coherence,
threshold clarity,
focal control,
and whole-frame unity.

Do not lose:

quarter identity,
fusion morphology,
street rhythm,

courtyard/verandah logic,
Puducherry specificity,
and same-style full-frame control.

Avoid:

White Town lifestyle fantasy,
French-colonial prettiness,
Goa drift,
generic South Indian town with French details,
background genericity,
or any realism stronger than the environment grammar.

The final image must feel like:

the same Puducherry Franco-Tamil environment fully embodied into believable reality.

Image-to-Image

Convert this source image into **V3 fully resolved believable Franco-Tamil Decorative Environment / Puducherry**.

Preserve the source image's:

[SUBJECT COUNT]
[CORE ACTION]
[MAIN RELATIONSHIPS]
[KEY BUILT ELEMENTS]
[VIEWER-READ]
[BASIC STAGING]

Replace ordinary realism with:

French Quarter / Tamil Quarter duality,
street-front continuity,
threshold/verandah/courtyard structure,
French opening logic,
Tamil house logic,
hybrid upper-floor/lower-floor morphology,
and complete Puducherry environmental coherence.

Expand the image into:

full architectural material clarity,
full spatial layering,
clear environmental hierarchy,
strong street-to-interior continuity,

strong figure-ground separation,
and complete whole-frame same-language unity.

Do not merely add colonial details.

Do not make a heritage-tourism image.

Do not keep a generic town and style one façade.

Do not let realism replace Franco-Tamil grammar.

Do not let V3 become a more glamorous cousin of V1.

The final result must feel like:

**the source image has been fully rebuilt as a complete believable world of the same
Puducherry Franco-Tamil environment logic.**
