

Likhai - Uttarakhand

V1 — Authentic Style

Universal Hard Prompt

Create an image in pure authentic source-truth Uttarakhand Likhai wood carving from Kumaon.

Treat this as a true Kumaoni hand wood-carving tradition, not as generic heritage decor, not as rustic furniture styling, not as laser-cut ornament, and not as a wooden surface with decorative motifs added later.

Build the image from the true grammar of Uttarakhand Likhai:
wood-first carved identity,
timber/deodar/pine material seriousness,
subtractive hand-tool carving,
measured guide-line logic,
line-and-relief structural order,
architectural and household object authority,
hand-resolved carved finish,
and whole-system Kumaoni Likhai coherence.

The image must feel like it genuinely belongs inside the original Likhai tradition.

Keep the whole frame inside one carved-wood-surface-authored visual language.

The object itself must be source-born:

timber first,
marking first,
broad shaping first,
relief carving first,
detail after structure,
not molded,
not machine-milled,
not decor-styled wood panel.

Line logic must remain source-faithful:

measured guide lines,
chalk/geru memory,
structural outlines,
carving-guided order,
not casually decorative line,
not surface illustration,
not printed ornament.

Relief logic must remain source-faithful:
broad-to-fine subtractive carving,
raised and recessed hierarchy,
panel depth,
tool-led transitions,
not shallow engraving only,
not embossed print illusion,
not fake carved texture.

Use-world logic must remain source-faithful:
doors,
windows,
pillars,
railings,
temple carving,
cupboards,
vessels,
lamps,
spoons,
household and architectural carved authority,
not gallery-object-first,
not furniture showroom styling.

Motif logic must remain source-faithful:
birds,
trees,
flowers,
Ganesha where relevant,
all wood-native and branch-correct,
never wallpaper pattern,
never applied graphic motif.

Color logic must remain secondary:
wood structure first,
carving first,
color only when supporting carved form,
not paint-first styling.

Do not add:
generic rustic heritage decor,
factory heritage panel logic,
furniture styling with “traditional” carvings,
laser-cut precision,
or any second carved-wood language stronger than Kumaoni Likhai.

The final result must feel like true Uttarakhand Likhai at source-truth level, not a modern carved-wood decor object merely inspired by it.

Reusable Variable Template

Create [SUBJECT / CARVED PANEL / ARCHITECTURAL WOOD WORLD / RELIEF-CARVED SCENE] using the authentic source-truth grammar of Uttarakhand Likhai from Kumaon.

Core style system to preserve:

wood-first carved identity,
subtractive hand-tool process,
measured guide-line logic,
line-and-relief structural order,
architectural/household-object authority,
hand-resolved carved finish,
whole-system Kumaoni Likhai coherence.

Translate the image like this:

[MAIN PANEL / MAIN OBJECT / MAIN SURFACE] becomes a Likhai-born carved wooden presence built through marked structure, subtractive relief, and measured carved order.

[SECONDARY SURFACES / SUPPORTING ELEMENTS] become supporting Likhai presences obeying the same wood-first relief logic.

[BACKGROUND / WORLD / SURROUNDING AREAS] becomes a Likhai-authored carved environment rather than neutral realism or heritage-decor styling.

Keep:

timber/deodar/pine seriousness,
guide-line memory,
broad-to-fine carving hierarchy,
relief depth,
architectural/object authority,
Kumaoni Likhai coherence.

Avoid:

rustic decor drift,
furniture styling,
machine-carved heritage language,
graphic ornament,
or a realistic world with Likhai added afterward.

The final image must feel like the Likhai tradition itself authored the full carved-wood world.

Image-to-Image

Convert this source image into an authentic source-truth Uttarakhand Likhai world from Kumaon.

Preserve the source image's core subject count, structural readability, and main visual organization, but rebuild the entire image through true Likhai grammar.

Replace ordinary image logic with:
wood-first carved identity,
subtractive hand-tool process,
measured guide-line order,
line-and-relief carving hierarchy,
architectural/household-object authority,
hand-resolved finish,
and full Kumaoni Likhai coherence.

Do not simply carve a pattern into wood.
Do not merely add traditional motifs.
Do not turn the source into generic heritage decor.

If the source contains figures, objects, architecture, or background, rebuild them through Likhai carved-wood logic:
marked structural order,
broad-to-fine carving,
relief hierarchy,
architectural/object seriousness,
and Kumaoni carved coherence.

Do not leave the environment as generic realism.
Do not make it behave like showroom heritage styling or furniture design.

The final image must feel like a genuine Uttarakhand Likhai carved world, not a modern image decorated with traditional wood motifs.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Uttarakhand Likhai from Kumaon.

This is not a literal carved-panel mockup.
This is not decor rendering.
This is not furniture styling.
This is not machine-clean heritage design.
This is not the same wood object with better grain only.

Preserve the same deep Likhai grammar unchanged:

wood-first carved identity,
subtractive hand-tool process,
measured guide-line logic,
line-and-relief structural order,
architectural/household-object authority,
hand-resolved finish,
and whole-system Kumaoni coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid image-form.

The added dimensionality must come from Likhai's own logic:
marked structure,
broad-to-fine carving sequence,
relief depth hierarchy,
tool-cut transitions,
panel and frame order,
architectural/object authority,
and full-frame carved-surface intelligence.

Do not only improve wood texture.
Do not only increase polish.
Do not only add more detail.
Transform the full image logic:
form,
construction,
grouping,
silhouette,
objects,
environment,
spatial organization,
and full-frame visual language.

If figures appear, they must not remain generic people in a heritage setting.
They must become Likhai-born presences:
face logic influenced by carved symbolic simplification,
body logic shaped by line-and-relief hierarchy,
silhouettes built through carved structural order rather than decor styling,
objects and props translated into the same measured carved-wood system.

If environment appears, it must not remain neutral realism.
It must already begin to feel re-authored by Likhai:
marked carved-surface world logic,
relief-based spatial rhythm,
architectural/object carving hierarchy,
wood-first structured intelligence,
not just normal scenery with carved wood somewhere inside it.

Believable depth must come from Likhai itself,
not from default realism,
not from heritage-decor rendering,
not from generic 3D wood shading.

Keep:

source-rooted Likhai identity,
line-guided carving logic,
relief structure,
creative artisan translation,
architectural/object authority,
full-frame style control.

Do not allow:

panel mockup logic,
showroom styling,
machine-cut polish,
furniture-design language,
generic heritage ornament,
or a normal image underneath with Likhai decoration added later.

The final result must feel like Kumaoni Likhai itself has creatively re-authored the image into a richer, more dimensional, more inventive carved-wood world while still remaining fully Likhai-born.

Reusable Variable Template

Create [SUBJECT / SCENE / CARVED PANEL WORLD / RELIEF-WOOD ENVIRONMENT]
in V2 = authentic handcrafted dimensional translation of Uttarakhand Likhai from Kumaon.

Preserve these unchanged deep style-core rules:

wood-first carved identity,
subtractive hand-tool process,
measured guide-line logic,
line-and-relief structural order,
architectural/household-object authority,
hand-resolved finish,
whole-system Kumaoni Likhai coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN SURFACE] becomes a Likhai-born dimensional presence built through marked structure, carved relief hierarchy, and architectural/object carved authority.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become supporting Likhai presences governed by the same carved-wood system.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a creatively re-authored Likhai space where grouping, depth, and spatial rhythm come from relief order rather than neutral realism.

Increase:

dimensional presence,
line-to-relief relation,
tool-cut clarity,
panel/object authority,
structural depth hierarchy,
architectural seriousness,
inventive Likhai world-building.

Do not lose:

wood-first identity,
subtractive carving logic,
guide-line memory,
measured structural order,
hand-resolved finish,
whole-system Likhai control.

Avoid:

decor mockup,
showroom styling,
furniture language,
machine-perfect heritage carving,
or a realistic world with Likhai added afterward.

The final image must feel like the same Likhai grammar has been creatively translated into a richer, more dimensional, more scene-capable carved form.

Image-to-Image

Convert this source image into a V2 authentic handcrafted dimensional Uttarakhand Likhai world from Kumaon.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Likhai grammar translated into a richer, more dimensional, more inventive hybrid image-form.

Replace ordinary image logic with:

wood-first carved identity,
subtractive hand-tool process,
measured guide-line structure,
line-and-relief hierarchy,
architectural/household-object authority,

hand-resolved finish,
and full-frame Kumaoni Likhai coherence.

Do not simply improve wood grain.
Do not just deepen carved details.
Do not make it a heritage-product render.

Rebuild the image so that:
forms are organized through Likhai's own marked and carved structural logic,
depth comes from relief hierarchy and tool-cut order,
objects and environments begin to behave like a Likhai-authored world,
and the whole frame feels generated by Likhai carving itself rather than realism with
traditional wood carving added on top.

If figures appear, rebuild them as Likhai-born presences rather than generic bodies in carved
heritage surroundings.
If environments appear, rebuild them through Likhai visual ontology rather than neutral
realism.

The final image must feel like a true creative artisan translation of Uttarakhand Likhai into a
richer dimensional carved-wood world, not a normal image with heritage wood ornament.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Uttarakhand
Likhai from Kumaon while keeping the same source grammar unchanged.

This is not realism replacing style.
This is not heritage-decor realism.
This is not furniture-showroom styling.
This is not product photography.
This is not a normal world with Likhai carving added afterward.

Preserve the same deep Likhai grammar unchanged:
wood-first carved identity,
subtractive hand-tool process,
measured guide-line logic,
line-and-relief structural order,
architectural/household-object authority,
hand-resolved finish,
and whole-system Kumaoni coherence.

Now push that same grammar into its most complete, most fully embodied, most fully
resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by Likhai logic.

That means the transformation must affect everything:

faces,
bodies,
hands,
feet,
hair,
posture,
gesture,
props,
objects,
ground,
architecture,
plants,
sky treatment,
empty space,
environment rhythm,
foreground,
midground,
background,
and the full-frame visual language.

Nothing important may remain generic realism.

Likhai must control reality through its own logic:

wood mass,
measured guide-line order,
subtractive relief carving,
panel and object hierarchy,
architectural carved authority,
tool-built finish,
and full-world Kumaoni carved-wood ontology.

Believable here must mean:

believable volume,
believable spatial relation,
believable material embodiment,
believable environmental completion,
believable inhabitable world logic.

It must not mean:

decor realism,
showroom heritage styling,
furniture photography,
normal architecture with carved trim,
product-catalog polish,

or realism-first image making.

If figures appear, they must be fully Likhai-born:

face construction shaped by carved symbolic simplification,
body logic shaped by relief hierarchy and measured order,
silhouette logic shaped by architectural/object carving structure rather than decor ambiance,
gesture and posture integrated into the same Likhai world system.

If environment appears, it must also be fully Likhai-born:

ground, structures, objects, space, and atmosphere must all belong to one uninterrupted Likhai world,
not a normal realistic environment underneath.

If you remove decorative cues, the image should still feel Likhai through:

form construction,
body logic,
object logic,
environment logic,
spatial organization,
line-and-relief carved grammar,
and full-world visual ontology.

Keep:

same deep Likhai grammar,
full world embodiment,
full environmental completion,
stronger figure-ground hierarchy,
stronger spatial separation,
stronger object presence,
stronger total-frame style control.

Do not allow:

decor realism,
product styling,
furniture language,
machine-cut heritage polish,
generic carved-wood ambiance,
or any second carved-object language stronger than Kumaoni Likhai.

The final result must feel like Likhai carving itself has taken over the whole visible world and fully generated reality through Kumaoni carved-wood logic, not like realism with Likhai decoration.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable real-world 3D translation of Uttarakhand Likhai from Kumaon.

Keep these unchanged deep style-core rules:

wood-first carved identity,
subtractive hand-tool process,
measured guide-line logic,
line-and-relief structural order,
architectural/household-object authority,
hand-resolved finish,
whole-system Kumaoni Likhai coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN SURFACE] becomes a fully embodied Likhai-born presence generated through measured carved order, relief hierarchy, and full wood-world control.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become equally style-born Likhai presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Likhai world where spatial structure, environmental rhythm, and full-scene organization are all controlled by the same Kumaoni carved-wood grammar.

Increase:

full world embodiment,
full environmental translation,
stronger spatial relation,
stronger figure-ground separation,
stronger material presence,
stronger world coherence,
stronger full-frame Likhai control.

Do not lose:

wood-first identity,
subtractive carving logic,
guide-line memory,
relief hierarchy,
architectural/object authority,
hand-resolved finish,
whole-world Likhai ontology.

Avoid:

decor realism,
showroom styling,
furniture language,
product-catalog polish,
generic carved-wood ambiance,
or a normal world with Likhai added afterward.

The final image must feel like the same deep Likhai grammar has fully generated an entire believable world.

Image-to-Image

Convert this source image into a V3 fully resolved believable real-world Uttarakhand Likhai world from Kumaon.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Likhai grammar.

Replace ordinary realism with:
wood-first carved identity,
subtractive hand-tool process,
measured guide-line structure,
line-and-relief hierarchy,
architectural/household-object authority,
hand-resolved finish,
and full-world Kumaoni Likhai coherence.

Do not simply place carved wood into the frame.
Do not just deepen relief detail.
Do not leave the environment generic.

Rebuild the full image so that:
faces, bodies, objects, props, and environment all belong to the same Likhai carved-wood ontology,
depth comes from Likhai's own measured order and relief hierarchy,
space is organized through structural carved logic,
the world becomes fully inhabitable but remains completely Likhai-born,
not realism-first.

If any part of the frame remains normal realism underneath, the conversion has failed.

The final image must feel like Likhai carving itself has fully generated the entire visible world, not like a normal image decorated with Kumaoni wood carving.
