

# Ramman - Uttarakhand

## V1 — Authentic Style

### Universal Hard Prompt

Create an image in pure authentic source-truth Chamoli Wooden Ramman Mask from Uttarakhand.

Treat this as a true Garhwal ritual-performance wooden mask tradition, not as a generic tribal mask, not as a tourist souvenir, not as rustic decor, and not as a painted wooden face with weak carving underneath.

Build the image from the true grammar of Chamoli Wooden Ramman Mask:

wood-first carved identity,  
subtractive hand-tool carving,  
frontal face-object structure,  
strong carved eyes and nose and lips and ears,  
ritual-performance gravity,  
sacred mask presence,  
hand-resolved finish,  
and whole-object Chamoli Ramman coherence.

The image must feel like it genuinely belongs inside the original Ramman mask tradition.

Keep the whole frame inside one carved-mask-authored visual language.

The object itself must be source-born:

wood block first,  
feature carving first,  
face structure first,  
paint secondary,  
not molded,  
not machine-finished,  
not decor-object-first.

Face logic must remain source-faithful:

frontally legible carved face,  
dominant carved features,  
clear facial planes,  
strong eye sockets,  
nose bridge,  
mouth structure,  
ear structure,  
mask authority stronger than surface paint.

Process logic must remain source-faithful:

sawn wood,  
marked face,  
subtractive carving,  
detail refinement,  
smoothing,  
paint only after form is established,  
not printed facial graphics,  
not molded resin logic,  
not costume-shop mask styling.

Use-world logic must remain source-faithful:

ritual-performance object,  
sacred annual-use feeling,  
performative seriousness,  
not playful prop,  
not wall decor first,  
not collectible souvenir first.

Surface logic must remain source-faithful:

hand-carved wood presence,  
tool-memory still visible,  
refined but not factory-perfect,  
paint may appear but must support the carved form rather than replace it.

Do not add:

generic African/tribal-mask language,  
boho wall-art styling,  
tourism-market charm,  
factory carving,  
or any second mask language stronger than Chamoli Ramman carving.

The final result must feel like true Chamoli Wooden Ramman Mask at source-truth level, not a decorative wooden mask merely inspired by it.

## **Reusable Variable Template**

Create [SUBJECT / MASK OBJECT / RITUAL FACE WORLD / SACRED PERFORMANCE SCENE] using the authentic source-truth grammar of Chamoli Wooden Ramman Mask from Uttarakhand.

Core style system to preserve:

wood-first carved identity,  
subtractive hand-tool carving,  
frontal face-object structure,  
strong carved facial features,

ritual-performance gravity,  
sacred mask authority,  
hand-resolved finish,  
whole-object Chamoli Ramman coherence.

Translate the image like this:

[MAIN MASK / MAIN FACE / MAIN OBJECT] becomes a Chamoli-Ramman-born carved wooden ritual face built through frontal facial carving and sacred performance presence.  
[SECONDARY SURFACES / SUPPORTING ELEMENTS] become supporting carved presences obeying the same wood-first ritual-mask logic.  
[BACKGROUND / WORLD / SURROUNDING AREAS] becomes a Chamoli-Ramman-authored ritual environment rather than neutral realism or generic heritage decor.

Keep:

carved wood mass,  
frontal face structure,  
feature hierarchy,  
ritual seriousness,  
paint secondary to carving,  
Garhwali Ramman mask coherence.

Avoid:

tourist-mask styling,  
decor-object logic,  
generic carved-face language,  
machine-finished polish,  
or a realistic world with Ramman added afterward.

The final image must feel like the Ramman tradition itself authored the full carved-mask world.

## **Image-to-Image**

Convert this source image into an authentic source-truth Chamoli Wooden Ramman Mask world from Uttarakhand.

Preserve the source image's core subject count, structural readability, and main visual organization, but rebuild the entire image through true Ramman-mask grammar.

Replace ordinary image logic with:

wood-first carved identity,  
subtractive hand-tool process,  
frontal carved face structure,  
strong carved eyes and nose and lips and ears,  
ritual-performance authority,

sacred mask gravity,  
and full Chamoli Ramman coherence.

Do not simply paint a face on wood.  
Do not merely add ritual color.  
Do not turn the source into a generic folk mask.

If the source contains figures, objects, architecture, or background, rebuild them through Chamoli Ramman carved-mask logic:  
face-dominant structure,  
wood mass,  
feature hierarchy,  
ritual performance presence,  
and Garhwal mask coherence.

Do not leave the environment as generic realism.  
Do not make it behave like decor, souvenir craft, or stylized heritage product photography.

The final image must feel like a genuine Chamoli Wooden Ramman Mask world from Uttarakhand, not a modern image decorated with carved-face cues.

## **V2 — Artisan Translation**

### **Universal Hard Prompt**

Create an image in V2 = authentic handcrafted dimensional translation of Chamoli Wooden Ramman Mask from Uttarakhand.

This is not a literal wooden-mask mockup.  
This is not a product render.  
This is not a decor-object upgrade.  
This is not paint-first stylization.  
This is not the same mask with better wood texture only.

Preserve the same deep Ramman-mask grammar unchanged:  
wood-first carved identity,  
subtractive hand-tool carving,  
frontal face-object structure,  
strong carved eyes and nose and lips and ears,  
ritual-performance gravity,  
sacred mask authority,  
hand-resolved finish,  
and whole-object Chamoli Ramman coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid image-form.

The added dimensionality must come from Ramman's own logic:

wood mass,  
carved facial planes,  
feature depth hierarchy,  
mask-object presence,  
ritual-performance charge,  
tool-cut transitions,  
paint supporting form,  
and full-frame carved-mask intelligence.

Do not only improve texture.

Do not only increase realism.

Do not only add polish.

Transform the full image logic:

form,  
construction,  
grouping,  
silhouette,  
objects,  
environment,  
spatial organization,  
and full-frame visual language.

If figures appear, they must not remain generic people wearing or holding a wooden object.

They must become Ramman-born presences:

face logic shaped by carved ritual-mask authority,  
body logic shaped by sacred performance-object hierarchy,  
silhouettes built through face-object dominance rather than costume styling,  
objects and props translated into the same carved-mask system.

If environment appears, it must not remain neutral realism.

It must already begin to feel re-authored by Ramman:

carved-mask world logic,  
ritual-performance spatial rhythm,  
frontal face-object authority,  
wood-first sacred presence,  
not just normal scenery with a wooden mask somewhere inside it.

Believable depth must come from Ramman carving itself,

not from default realism,

not from product-studio rendering,

not from generic heritage-object styling.

Keep:

source-rooted Ramman identity,  
carved face structure,  
feature hierarchy,  
creative artisan translation,  
ritual-performance authority,  
full-frame style control.

Do not allow:  
souvenir craft language,  
decor styling,  
gallery-object polish,  
generic carved-face behavior,  
or a normal image underneath with Ramman decoration added later.

The final result must feel like Chamoli Ramman mask carving itself has creatively re-authored the image into a richer, more dimensional, more inventive carved ritual-mask world while still remaining fully Ramman-born.

## **Reusable Variable Template**

Create [SUBJECT / SCENE / MASK FIELD / RITUAL CARVED WORLD] in V2 = authentic handcrafted dimensional translation of Chamoli Wooden Ramman Mask from Uttarakhand.

Preserve these unchanged deep style-core rules:

wood-first carved identity,  
subtractive hand-tool carving,  
frontal face-object structure,  
strong carved facial features,  
ritual-performance gravity,  
sacred mask authority,  
hand-resolved finish,  
whole-object Chamoli Ramman coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN MASK] becomes a Ramman-born dimensional carved presence built through wood mass, facial-plane hierarchy, and ritual-mask authority.  
[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become supporting Ramman presences governed by the same carved-mask system.  
[ENVIRONMENT / BACKGROUND / WORLD] becomes a creatively re-authored Ramman space where grouping, depth, and spatial rhythm come from carved face-object logic rather than neutral realism.

Increase:  
dimensional presence,  
wood-to-feature relation,  
facial-plane clarity,  
mask-object authority,

ritual gravity,  
tool-cut presence,  
inventive Ramman world-building.

Do not lose:  
wood-first identity,  
subtractive carving logic,  
frontal face structure,  
paint secondary to carving,  
sacred performance force,  
whole-object Ramman control.

Avoid:  
mask mockup,  
tourist-object styling,  
decor realism,  
product photography polish,  
generic folk-mask language,  
or a realistic world with Ramman added afterward.

The final image must feel like the same Ramman grammar has been creatively translated into a richer, more dimensional, more scene-capable carved form.

## **Image-to-Image**

Convert this source image into a V2 authentic handcrafted dimensional Chamoli Wooden Ramman Mask world from Uttarakhand.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Ramman-mask grammar translated into a richer, more dimensional, more inventive hybrid image-form.

Replace ordinary image logic with:  
wood-first carved identity,  
subtractive hand-tool carving,  
frontal face-object structure,  
strong carved feature hierarchy,  
ritual-performance authority,  
sacred mask gravity,  
and full-frame Chamoli Ramman coherence.

Do not simply improve wood grain.  
Do not just make the mask more detailed.  
Do not make it a heritage-object render.

Rebuild the image so that:

forms are organized through Ramman's own carved-mask logic,  
depth comes from wood mass and facial-plane hierarchy,  
objects and environments begin to behave like a Ramman-authored world,  
and the whole frame feels generated by Ramman carving itself rather than realism with a  
ritual mask added on top.

If figures appear, rebuild them as Ramman-born presences rather than generic bodies  
around a carved object.

If environments appear, rebuild them through Ramman visual ontology rather than neutral  
realism.

The final image must feel like a true creative artisan translation of Chamoli Wooden  
Ramman Mask into a richer dimensional carved-mask world, not a normal image with ritual  
wood-object styling.

## V3 — 3D / Realistic / Cinematic Translation

### **Universal Hard Prompt**

Create an image in V3 = fully resolved believable real-world 3D translation of Chamoli  
Wooden Ramman Mask from Uttarakhand while keeping the same source grammar  
unchanged.

This is not realism replacing style.

This is not gallery-object realism.

This is not decor realism.

This is not product photography.

This is not a normal world with a Ramman mask added afterward.

Preserve the same deep Ramman grammar unchanged:

wood-first carved identity,

subtractive hand-tool carving,

frontal face-object structure,

strong carved eyes and nose and lips and ears,

ritual-performance gravity,

sacred mask authority,

hand-resolved finish,

and whole-object Chamoli Ramman coherence.

Now push that same grammar into its most complete, most fully embodied, most fully  
resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by Ramman logic.

That means the transformation must affect everything:  
faces,

bodies,  
hands,  
feet,  
hair,  
posture,  
gesture,  
props,  
objects,  
ground,  
architecture,  
plants,  
sky treatment,  
empty space,  
environment rhythm,  
foreground,  
midground,  
background,  
and the full-frame visual language.

Nothing important may remain generic realism.

Ramman must control reality through its own logic:

wood mass,  
subtractive carving,  
frontal face-object authority,  
ritual-performance hierarchy,  
feature-led structure,  
paint supporting carved form,  
and full-world Garhwal ritual-mask ontology.

Believable here must mean:

believable volume,  
believable spatial relation,  
believable material embodiment,  
believable environmental completion,  
believable inhabitable world logic.

It must not mean:

collectible-object realism,  
decor-object styling,  
tourist-mask realism,  
normal anatomy with a mask nearby,  
generic heritage ambiance,  
or realism-first image making.

If figures appear, they must be fully Ramman-born:  
face construction shaped by carved ritual-mask authority,  
body logic shaped by mask-object hierarchy,

silhouette logic shaped by frontal carved presence rather than costume styling,  
gesture and posture integrated into the same Ramman world system.

If environment appears, it must also be fully Ramman-born:  
ground, structures, objects, space, and atmosphere must all belong to one uninterrupted  
Ramman world,  
not a normal realistic environment underneath.

If you remove decorative cues, the image should still feel Ramman through:  
form construction,  
body logic,  
object logic,  
environment logic,  
spatial organization,  
carved-face ritual grammar,  
and full-world visual ontology.

Keep:  
same deep Ramman grammar,  
full world embodiment,  
full environmental completion,  
stronger figure-ground hierarchy,  
stronger spatial separation,  
stronger object presence,  
stronger total-frame style control.

Do not allow:  
decor realism,  
gallery-object styling,  
product-shot language,  
tourist craft behavior,  
generic folk-mask realism,  
or any second mask language stronger than Ramman carving.

The final result must feel like Ramman carving itself has taken over the whole visible world  
and fully generated reality through Garhwal ritual-mask logic, not like realism with Ramman  
decoration.

## **Reusable Variable Template**

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable real-world  
3D translation of Chamoli Wooden Ramman Mask from Uttarakhand.

Keep these unchanged deep style-core rules:  
wood-first carved identity,  
subtractive hand-tool carving,

frontal face-object structure,  
strong carved facial features,  
ritual-performance gravity,  
sacred mask authority,  
hand-resolved finish,  
whole-object Chamoli Ramman coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN MASK] becomes a fully embodied Ramman-born presence generated through carved face-object logic, ritual hierarchy, and full wood-world control.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become equally style-born Ramman presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Ramman world where spatial structure, environmental rhythm, and full-scene organization are all controlled by the same Garhwali ritual-mask grammar.

Increase:

full world embodiment,  
full environmental translation,  
stronger spatial relation,  
stronger figure-ground separation,  
stronger material presence,  
stronger world coherence,  
stronger full-frame Ramman control.

Do not lose:

wood-first identity,  
subtractive carving logic,  
frontal face hierarchy,  
ritual-performance force,  
paint secondary to carved form,  
whole-world Ramman ontology.

Avoid:

decor realism,  
product styling,  
tourist-mask language,  
gallery-object polish,  
generic carved-mask behavior,  
or a normal world with Ramman added afterward.

The final image must feel like the same deep Ramman grammar has fully generated an entire believable world.

## Image-to-Image

Convert this source image into a V3 fully resolved believable real-world Chamoli Wooden Ramman Mask world from Uttarakhand.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Ramman grammar.

Replace ordinary realism with:  
wood-first carved identity,  
subtractive hand-tool carving,  
frontal face-object structure,  
strong carved feature hierarchy,  
ritual-performance authority,  
sacred mask gravity,  
and full-world Chamoli Ramman coherence.

Do not simply place a wooden mask into the frame.  
Do not just improve carving detail.  
Do not leave the environment generic.

Rebuild the full image so that:  
faces, bodies, objects, props, and environment all belong to the same Ramman ritual-mask ontology,  
depth comes from Ramman's own carved facial planes and object hierarchy,  
space is organized through sacred face-object authority,  
the world becomes fully inhabitable but remains completely Ramman-born,  
not realism-first.

If any part of the frame remains normal realism underneath, the conversion has failed.

The final image must feel like Ramman carving itself has fully generated the entire visible world, not like a normal image decorated with a Garhwali ritual mask.
