

mat-weaving - Daman & Diu

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of traditional mat-weaving from Daman & Diu, rooted in Daman's inherited mat craft.

Treat this as a real flat woven mat-object system, not as generic woven décor, not as cloth, not as basketry, not as a printed floor mat, and not as interior styling.

Build the image through true mat-weaving grammar:

flat spreadable mat identity,
woven pattern generated through structure,
traditional motifs embedded into the weave,
field-based surface order,
clear edge discipline,
straw / plant-fiber craft behavior,
functional domestic object truth,
and inherited handmade continuity.

The object must read first as a mat.

The pattern must feel woven into the field, never printed on top.

The surface must feel organized through repeat, rhythm, spacing, bands, panels, or woven field control.

The material must feel dry, vegetal, straw-like, handworked, and structurally interlaced.

If the image includes people, hands, tools, floor, room, vessel, or surrounding objects, all of them must remain subordinate to mat logic.

Do not let the scene become generic home décor.

Do not let the mat become a soft textile.

Do not let the image drift into basketry, beach styling, boho styling, or modern lifestyle product photography.

The final image must feel like authentic Daman mat-weaving intelligence itself generated the whole frame.

Reusable Variable Template

Create [SUBJECT / OBJECT / SCENE / WORLD] in the pure authentic source-truth visual logic of traditional mat-weaving from Daman & Diu, rooted in Daman's flat woven mat craft.

Treat the style as a woven mat-object system built from:

flat mat identity,
pattern-through-weave construction,
traditional motif ordering,
field-based surface rhythm,
edge discipline,
straw / plant-fiber material memory,
functional domestic craft truth,
and generational handmade continuity.

Core style system to preserve:

the object must read first as a mat,
the pattern must be structurally woven,
the field must stay organized,
the edges must feel contained and finished,
the material must feel straw / plant-fiber authored,
the craft must feel practical and inherited,
and the whole frame must stay mat-born rather than décor-generic.

Translate the image like this:

[MAIN OBJECT] must become a true woven mat, never just a patterned surface.

[SECONDARY OBJECTS] must support the same craft logic, not pull the image toward generic interior styling.

[ENVIRONMENT / BACKGROUND] must remain restrained and subordinate so the mat-field order stays primary.

[MATERIAL] must feel handwoven, dry, fibrous, and structurally interlaced.

Keep:

flat object identity,
woven field order,
traditional motif rhythm,
edge clarity,
straw craft memory,
functional truth,
and handmade continuity.

Avoid:

generic woven texture,
printed pattern,
basket logic,
cloth drape,
boho décor styling,
or a generic room with one woven mat placed in it.

The final result must feel like true Daman mat-weaving logic itself generated the image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of traditional mat-weaving from Daman & Diu, rooted in Daman mat craft.

Preserve the source image's subject count, main structure, object relationships, and readability,
but rebuild the entire image through flat woven mat grammar.

Replace generic surface treatment with:
true mat-object identity,
pattern-through-weave logic,
traditional motif embedding,
field-based repeat and rhythm,
finished edge containment,
straw / plant-fiber material behavior,
and practical handmade craft truth.

Do not merely add woven texture.
Do not merely add folk motifs.
Do not merely turn the object into a decorative mat.
Do not keep generic realism underneath.

Rebuild the object, surface, edge, material, and whole-field order so the image feels fully authored by Daman mat-weaving logic.

The final result must feel like the source image has been completely re-authored through authentic Daman flat woven mat grammar.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of traditional mat-weaving from Daman & Diu, rooted in Daman's flat woven mat craft.

Preserve the same deep source grammar:
flat mat-object identity,
pattern-through-weave logic,
traditional motif ordering,
field-based repeat structure,
edge discipline,
straw / plant-fiber craft memory,
functional domestic truth,
and inherited handmade continuity.

Now translate that same grammar into believable handcrafted dimensional form.

Dimensionality must come from the mat itself:
clearer interlaced construction,
stronger tactile material presence,
slightly richer relief across the woven field,
better edge binding / edge containment,
more believable pattern-depth through weaving,
stronger object presence,
and clearer distinction between woven zones.

Do not turn the mat into cloth.
Do not turn the mat into lifestyle décor.
Do not turn the mat into printed design on a textured background.
Do not turn the image into product photography.

The mat must still read first as a practical flat woven object.
The pattern must still feel structurally woven.
The material must still feel straw / plant-fiber authored.
The whole frame must still feel generated by mat grammar, not by generic realism.

The final image must feel like Daman mat-weaving logic translated into handcrafted dimensional mat embodiment.

Reusable Variable Template

Create [SUBJECT / OBJECT / SCENE / WORLD] in V2 = authentic handcrafted dimensional translation of traditional mat-weaving from Daman & Diu, rooted in Daman's flat woven mat craft.

Preserve the unchanged deep source core:
flat mat identity,
woven pattern logic,
field-based organization,
traditional motifs,
edge discipline,
straw / plant-fiber craft behavior,
functional domestic truth,
and handmade continuity.

Translate the image into handcrafted dimensional form by increasing:
interlaced clarity,
material tactility,
field relief,
edge resolution,

zone separation,
object presence,
and whole-frame woven coherence.

Build the image like this:

[MAIN OBJECT] must become a dimensional woven mat with stronger structural legibility, not a decorative surface.

[SECONDARY OBJECTS] must remain compatible with the same mat-craft world.

[ENVIRONMENT / BACKGROUND] must stay restrained so the woven field remains primary.

[MATERIAL] must feel richer and more tactile, but never soft like cloth or polished like a design product.

Keep:

mat identity,
woven structure,
traditional motif order,
edge containment,
straw craft memory,
functional truth,
and inherited craft continuity.

Avoid:

textile softness,
printed pattern,
basket volume,
boho interior styling,
product-shot realism,
or one source-aware mat inside a generic scene.

The final image must feel like authentic Daman mat-weaving grammar translated into handcrafted dimensional presence.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of traditional mat-weaving from Daman & Diu, rooted in Daman mat craft.

Keep the source image's subject count, core structure, and readability, but rebuild the entire image through Daman mat grammar translated into dimensional mat embodiment.

Replace generic surface realism with:

flat woven mat-object logic,
interlaced pattern construction,
traditional motif embedding,

field rhythm,
edge discipline,
straw / plant-fiber material tactility,
and practical handmade object truth.

Add:

clearer woven depth,
stronger interlace visibility,
better edge definition,
richer field organization,
and stronger mat-object presence.

But do not let dimensionality come from generic décor realism.
Do not make it a styled home-product image.
Do not keep generic realism underneath and only texture the surface.

Rebuild all visible elements so they feel born from Daman woven-mat dimensional logic.

The result must feel like the source image has entered the handcrafted dimensional state of the same Daman mat-weaving system.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable dimensional world of traditional mat-weaving from Daman & Diu, rooted in Daman's flat woven mat craft.

Preserve the same unchanged deep style-core:

flat mat-object identity,
pattern-through-weave logic,
traditional motif ordering,
field-based woven rhythm,
edge discipline,
straw / plant-fiber material behavior,
functional domestic truth,
and inherited handmade continuity.

Now push that same grammar into its most believable, fully embodied dimensional world.

Believable here means:

believable woven material presence,
believable interlaced construction,
believable edge containment,
believable field order across the whole surface,
believable object-world presence,

believable scene coherence,
and full same-style control across the frame.

It does NOT mean:
interior décor styling,
boho lifestyle imagery,
coastal home-product realism,
printed pattern realism,
generic handcrafted product photography,
or cloth-like textile softness.

The entire frame must still obey mat-weaving intelligence.
The object must still read first as a mat.
The pattern must still feel born from structure.
The environment must still support mat logic rather than overwhelm it.
The craft must still feel local, practical, inherited, and woven.

The final image must feel like Daman mat-weaving intelligence itself has become a believable dimensional world.

Reusable Variable Template

Create [SUBJECT / OBJECT / SCENE / WORLD] in V3 = fully resolved believable dimensional world of traditional mat-weaving from Daman & Diu, rooted in Daman's flat woven mat craft.

Keep the same unchanged deep style-core:
mat-object identity,
woven pattern construction,
field-based order,
traditional motifs,
edge discipline,
straw / plant-fiber craft memory,
functional domestic truth,
and inherited continuity.

Now fully embody that style into a believable dimensional world.

Increase:
material believability,
interlaced clarity,
field coherence,
edge authority,
scene completion,
spatial separation,
and whole-frame mat-world readability.

Build the image like this:

[MAIN OBJECT] must be fully style-born and fully embodied as a real woven mat, not a decorative product.

[SECONDARY OBJECTS] must also inherit the same mat-craft logic where relevant.

[ENVIRONMENT / BACKGROUND] must become a complete world that still behaves like Daman mat-weaving, not ordinary interior realism.

[MATERIAL] must remain straw / plant-fiber authored, woven, dry, practical, and structured.

Keep unchanged:

flat mat identity,

pattern-through-weave logic,

field rhythm,

edge control,

functional object truth,

and same-style whole-frame coherence.

Avoid:

décor-world drift,

basketry drift,

cloth drift,

printed-surface drift,

product-shot styling,

or any second visual language overpowering the craft.

The final image must feel like the same Daman mat-weaving system has become fully embodied as a believable world.

Image-to-Image

Convert this source image into V3 = fully resolved believable dimensional world of traditional mat-weaving from Daman & Diu, rooted in Daman mat craft.

Preserve the source image's subject count, core action, scene purpose, and readability, but rebuild every visible element through Daman flat woven mat grammar fully embodied as a world.

Replace ordinary realism with:

true mat-object identity,

pattern-through-weave logic,

traditional motif integration,

field-based woven order,

edge discipline,

straw / plant-fiber material presence,

functional domestic-object truth,

and whole-frame craft continuity.

Expand the source into:
fully embodied woven mat presence,
clear interlaced material believability,
strong field rhythm,
complete edge containment,
full scene coherence,
and total Daman mat-world control.

But keep the same source grammar intact.
Do not let realism replace the branch.
Do not add mat-weaving only as a surface texture.
Do not turn the image into a décor setting.
Do not let V3 become a lifestyle remake.

Rebuild the entire frame so it feels like authentic Daman mat-weaving logic itself has become a fully resolved dimensional world.

If the result feels like reality coated with woven décor styling, it has failed.
If it feels like Daman mat-weaving itself has become a whole world, it is correct.
