

Kinnauri - Himachal Pradesh

V1 — Authentic Style

Universal Hard Prompt

Create the image in the authentic visual logic of Kinnauri shawl / weaving from Himachal Pradesh, a handwoven Himalayan wool textile system known for elaborate geometric and symbolic motifs, strong border-and-edge organization, restrained wool grounds, brighter patterned colors, and cloth-first handloom construction.

Do not treat this as generic Himalayan pattern styling, tribal geometry, ethnic print design, decorative motif overlay, fashion textile graphics, or surface styling on ordinary fabric. Rebuild the entire object as a true Kinnauri woven textile world.

The image must read first as:

- handwoven wool cloth
- geometric-symbolic motif system
- structured border placement
- restrained ground field
- brighter patterned color zones
- real shawl / textile objecthood

WHOLE-OBJECT RULE:

Every visible element must belong to the same Kinnauri woven system.

- the base cloth must feel woven, not printed
- all motifs must feel loom-built, not drawn on top
- all borders must feel structurally integrated into the cloth
- all edges, corners, and ends must obey shawl logic
- if the object is worn, folds and drape must still preserve motif order and border hierarchy
- if center joining is visible, it must feel like woven halves joined by hand, not like a graphic seam
- no important element may remain in generic fabric logic

FORM RULE:

Use shawl / cloth geometry, border bands, motif modules, drape field, edge logic, and textile rectangle logic. Do not use pictorial scene logic.

MATERIAL RULE:

Use handwoven wool body, woven texture, slight human variation in regularity, strong textile density, and natural cloth behavior. Do not use printed-fabric smoothness, synthetic gloss, or graphic flatness.

MOTIF RULE:

Use elaborate geometric motifs with symbolic order and woven clarity. Motifs must feel structured, modular, and handloom-born, not decorative doodles or generic ethnic symbols.

COLOR RULE:

Use restrained neutral grounds such as white, black, grey, or brown, contrasted with brighter pattern colors such as red, orange, pink, blue, green, yellow, black, and white. Keep color organized as cloth logic, not diffuse styling.

SYMBOLIC RULE:

Let the pattern system feel meaningful and culturally ordered, not randomly decorative. Preserve the sense that motifs and colors can carry symbolic and religious significance.

NEGATIVE RULE:

no printed ethnic fabric
no generic tribal pattern
no Kullu-like simplified motif shorthand
no surface-only motif overlay
no fashion-scarf realism
no digital graphic textile
no synthetic shine
no generic Himalayan decor styling

OUTPUT GOAL:

The final result must feel like a true Kinnauri handwoven textile object where structure, border, motif, color, drape, and symbolic order are all rebuilt from the base upward through Kinnauri logic.

Reusable Variable Template

Create [SUBJECT / SHAWL / TEXTILE OBJECT / DRAPED TEXTILE MOMENT] in the authentic visual logic of Kinnauri shawl / weaving from Himachal Pradesh.

STYLE SYSTEM:

handwoven wool textile,
elaborate geometric-symbolic motifs,
strong border logic,
neutral woven ground,
brighter pattern colors,
shawl-first object structure,
cloth-born design order.

WHOLE-OBJECT RULE:

Rebuild everything through Kinnauri weaving logic:

- [MAIN CLOTH BODY] becomes a real woven Kinnauri field
- [BORDERS / EDGE BANDS] become structurally integrated motif zones
- [MOTIFS] become geometric woven modules, not printed symbols
- [CORNERS / ENDS / SEAMS] become shawl-built textile details

- [DRAPE / FOLD / WRAP] becomes cloth behavior that preserves border and motif hierarchy
- [WEARER] if present remains secondary and only reveals textile behavior

KEEP:

woven cloth identity
 Kinnauri motif complexity
 border-first structure
 neutral ground / bright pattern contrast
 symbolic order
 shawl objecthood

AVOID:

generic ethnic pattern
 print logic
 surface decoration only
 fashion-scarf genericity
 simplified Kullu-like border shorthand
 synthetic fabric behavior

Image-to-Image

Convert this source image into the authentic visual logic of Kinnauri shawl / weaving from Himachal Pradesh.

Preserve the source image's main textile function, object hierarchy, drape logic, and readable form, but rebuild the full image through:

- handwoven wool cloth identity
- elaborate geometric-symbolic motif construction
- strong border-and-edge organization
- neutral ground versus bright pattern contrast
- Kinnauri shawl objecthood
- real woven structure rather than printed or painted surface

Translate the entire object:

- base fabric into woven wool field
- motif areas into loom-built geometric pattern
- borders into structurally integrated Kinnauri border zones
- folds into textile behavior that preserves motif order
- edges into shawl-built edge logic
- seam or join if present into handloom-consistent joining

Do not simply place Kinnauri motifs on generic cloth.

Do not only recolor the fabric.

Do not add a decorative border to an ordinary shawl.

Do not keep print logic underneath.

The final result must feel like the source image was rebuilt from scratch as a true Kinnauri woven textile object.

V2 — Artisan Translation

Universal Hard Prompt

Create the image in an authentic handcrafted dimensional translation of Kinnauri shawl / weaving from Himachal Pradesh, where the full Kinnauri grammar remains primary but the textile world becomes richer in wool tactility, weave depth, border relief, fold behavior, and object presence.

Do not treat this as a realistic fashion textile with Kinnauri patterning. Do not use surface styling. Rebuild the object so the Kinnauri weaving system itself generates the dimensional textile world.

Keep the full source grammar active:

- handwoven wool structure
- elaborate geometric-symbolic motifs
- strong border organization
- restrained base field
- brighter pattern colors
- seam and edge logic
- shawl-first objecthood

WHOLE-OBJECT RULE:

Everything must still belong to one Kinnauri-built textile world.

- the cloth body must gain depth but remain woven, not printed
- motifs must gain tactile presence but remain structure-born
- border bands must become richer but remain integral to the cloth
- folds and drape must become more dimensional without breaking motif hierarchy
- edges and corners must remain shawl-built
- if worn, the textile-to-body relation must remain subordinate to shawl logic
- no important element may default to generic fashion realism

ALLOW THESE TO BECOME RICHER:

- wool tactility
- weave density
- fold depth
- edge presence
- border relief
- object coherence
- textile volume

SPACE RULE:

Use textile-object space, not pictorial scene space. The object remains primary even when depth increases.

SHADOW RULE:

Use cloth-supporting shadow only. No glossy fashion lighting takeover, no realism-first studio styling.

NEGATIVE RULE:

no generic premium scarf realism
no ethnic print fashion styling
no Kullu simplification drift
no synthetic sheen
no printed border imitation
no motif decal look
no realism stronger than weave logic

OUTPUT GOAL:

The final result must feel like Kinnauri weaving has expanded into a richer handcrafted dimensional textile world while keeping full control over structure, border, motif, drape, and symbolic order.

Reusable Variable Template

Create [SUBJECT / SHAWL / TEXTILE OBJECT / DRAPED MOMENT] as an authentic handcrafted dimensional translation of Kinnauri weaving.

STYLE SYSTEM:

handwoven wool body,
elaborate Kinnauri geometric motifs,
strong border-and-edge grammar,
neutral ground field,
bright pattern contrast,
symbolic order,
shawl-first textile object.

WHOLE-OBJECT RULE:

- [MAIN CLOTH BODY] becomes a dimensional but still Kinnauri-built woven field
- [BORDERS] become richer structural motif zones
- [MOTIFS] become tactile woven geometry, not surface graphics
- [FOLDS / DRAPE / WRAP] become more dimensional but preserve border hierarchy
- [EDGES / CORNERS / SEAMS] remain textile-built
- [WEARER] if present remains secondary and reveals textile behavior only

ALLOW:

more wool tactility
more weave depth
more edge presence
more fold articulation
more textile volume
more object coherence

KEEP:

woven identity
motif complexity
border logic
ground-versus-pattern contrast
symbolic order
Kinnauri objecthood

AVOID:

fashion realism
print logic
motif overlay
generic Himalayan textile styling
simplified Kullu-like shorthand
synthetic cloth feel

Image-to-Image

Convert this source image into an authentic handcrafted dimensional Kinnauri woven textile world.

Keep the source image's textile function, object hierarchy, drape behavior, and readable form, but rebuild the entire object through:

- handwoven wool structure
- tactile geometric-symbolic motifs
- integrated border logic
- neutral base / bright pattern contrast
- seam and edge coherence
- dimensional textile volume
- Kinnauri shawl object identity

Translate the whole object so that:

- the fabric becomes woven, not printed
- the motifs become structure-born
- the borders become deep textile zones
- the folds preserve motif order
- the edges remain shawl-built
- the overall object reads as Kinnauri, not generic premium handloom

Do not simply add texture.
Do not make it a luxury scarf with ethnic border.
Do not leave the original fabric logic underneath.

The final result must feel like the source image was rebuilt as a dimensional Kinnauri handwoven textile object from the base structure upward.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a fully volumetric cinematic textile world generated by Kinnauri shawl / weaving logic from Himachal Pradesh, where the whole object feels born from handwoven wool structure, geometric-symbolic border order, neutral field versus bright pattern contrast, and real shawl behavior rather than merely decorated by ethnic motifs.

Do not assume prior knowledge of the style. The core system is this:
Kinnauri weaving is a handloom wool textile tradition defined by elaborate geometric motifs, symbolic and religious pattern meaning, restrained grounds, brighter woven pattern colors, and strong border organization, sometimes on all four edges.

This version must not become:

- generic realistic shawl with ethnic print
- premium fashion accessory with Himalayan styling
- Kullu-like simplified border shorthand
- surface motif overlay on generic fabric
- studio-fashion realism with decorative pattern

Instead, let the entire object-world be generated by Kinnauri weaving intelligence.

WHOLE-OBJECT WORLD RULE:

Every visible element must belong to the same Kinnauri-built textile world.

- the cloth body must be woven in structure
- motifs must be loom-built and symbolic, not printed graphics
- borders must govern the object's edge identity
- folds, drape, and body relation must preserve motif and border order
- corners, ends, and seam behavior must remain handloom-consistent
- if a wearer is present, the shawl still remains the style engine
- no important element may remain generic textile realism underneath

ORIGIN-SYSTEM MEMORY RULE:

Even in a fully cinematic object-world, the result must still visibly remember:

- handwoven wool structure
- geometric-symbolic motif complexity
- border discipline
- neutral grounds

- bright pattern colors
- seam and edge logic
- Kinnauri complexity stronger than generic mountain craft styling

SPACE RULE:

Allow full spatial depth, cinematic object presence, drape-world realism, and textile-to-body interaction, but keep the object generated by Kinnauri weave logic rather than fashion-realism logic.

SHADOW RULE:

Use cloth-supporting shadow only. No glamour lighting, no synthetic sheen, no fashion-photo studio takeover.

NEGATIVE RULE:

- no print-look shawl
- no generic ethnic fashion realism
- no Kullu simplification
- no synthetic polish
- no motif overlay
- no generic mountain textile styling
- no realism stronger than weave structure
- no decorative surface-first interpretation

OUTPUT GOAL:

The final result must feel like Kinnauri weaving became an inhabitable textile world, with full transformation of structure, motif, border, drape, seam, and object identity.

Reusable Variable Template

Create [SUBJECT / SHAWL / WEARABLE TEXTILE WORLD / DRAPED OBJECT MOMENT] as a fully volumetric cinematic textile world generated by Kinnauri weaving logic.

STYLE SYSTEM:

- handwoven wool body,
- elaborate geometric-symbolic motifs,
- strong border-and-edge order,
- neutral field / bright pattern contrast,
- symbolic color structure,
- shawl-first object logic,
- handloom-built complexity.

WHOLE-OBJECT WORLD RULE:

- [MAIN CLOTH BODY] becomes a Kinnauri-built volumetric textile field
- [BORDERS] become governing structural identity zones
- [MOTIFS] become woven symbolic modules
- [FOLDS / DRAPE / WRAP] become Kinnauri-ordered textile behavior

- [EDGES / CORNERS / SEAMS / ENDS] remain handloom-consistent
- [WEARER / BODY] if present remains secondary to the shawl system
- [OVERALL OBJECT] remains governed by weave logic, not fashion logic

INCREASE:

object volume
 drape realism
 edge coherence
 border readability
 textile-to-body relation
 whole-object continuity

DO NOT LOSE:

woven identity
 motif complexity
 border discipline
 ground-versus-pattern contrast
 symbolic order
 Kinnauri objecthood

AVOID:

generic fashion realism
 printed ethnic textile
 surface styling only
 Kullu-like simplification
 synthetic fabric feel
 motif decal look

Image-to-Image

Convert this source image into a fully volumetric cinematic Kinnauri woven textile world.

Preserve the source image's main textile function, object hierarchy, drape behavior, and readable structure, but rebuild the entire object through:

- handwoven wool structure
- loom-built geometric-symbolic motifs
- strong border-and-edge order
- neutral ground with brighter patterned zones
- seam and handloom-consistent join logic
- Kinnauri-built drape and object behavior

Translate the whole object:

- fabric into true woven wool
- motifs into structural geometric Kinnauri pattern
- borders into primary governing edge systems
- folds into cloth behavior that preserves motif order

- edges and corners into shawl-built structure
- wearer relation into secondary support for the shawl's identity

Do not simply place Kinnauri motifs on a realistic shawl.

Do not just recolor the cloth.

Do not use print logic underneath.

Do not make it a fashion-realistic garment with decorative ethnic cues.

The final result must feel like the source image was rebuilt into a cinematic Kinnauri textile world from the base structure upward.
