

Mata ni Pachedi

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic visual logic of the Mata ni Pachedi tradition of Gujarat, specifically as a sacred shrine-cloth tradition of the Vaghri / Devipujak community. Treat this as a portable temple-cloth or ritual backdrop for the Mother Goddess, not as generic painted fabric, not as fashion print, not as ordinary folk textile, and not as broad Kalamkari-style decoration.

Build the image as if it belongs to an actual shrine-cloth used for worship. The cloth must function as a sacred image-field. The central Mother Goddess must be the commanding devotional center of the composition. Surround her with the correct supporting world: devotees, attendants, musicians, animals, ritual symbols, and narrative episodes that reinforce her sacred presence rather than compete with it.

Use shrine-field composition, not open scenic composition. Organize the cloth like a bounded sacred enclosure, often like a portable temple space. Use strong framing through borders and architecture-like divisions where appropriate, such as shrine-like columns, arches, doors, or compartments. The image must feel like a worship space on cloth, not just an illustrated story on fabric.

Use authentic process logic in the image language: hand-block-printed border and repeated structural areas, and hand-painted main figures and sacred details. The line work should feel deliberate, black-outline-based, and ritual-drawing-led. The cloth should feel treated and worked, not digitally flat or mechanically perfect.

Keep the traditional palette disciplined and source-rooted: black, red or maroon, and white as the main sacred structure. Additional color should not overpower this grammar. The result must feel process-bound and devotional, not broadly colorful or decorative.

Do not make it generic goddess art on fabric. Do not make it secular textile illustration. Do not make it luxury ethnic décor. Do not make it all-over pattern without sacred hierarchy. Do not let one goddess figure sit in the middle of an otherwise unrelated cloth world.

Reusable Variable Template

Create [SUBJECT / GODDESS / SHRINE CLOTH / SCENE] in the authentic visual logic of the Mata ni Pachedi tradition of Gujarat.

Treat the style as a sacred portable shrine-cloth of the Vaghri / Devipujak community, not as generic painted textile.

Core style system to preserve:

- cloth-as-shrine identity
- central Mother Goddess hierarchy
- bounded sacred enclosure composition
- portable temple-backdrop logic
- hand-block-printed structural zones and borders
- hand-painted iconographic figures and sacred details
- black-red-white ritual palette
- devotional figure ordering
- whole-frame consistency so every visible element belongs to the same shrine-cloth world

Translate the image like this:

[MAIN GODDESS / MAIN SHRINE FIGURE] becomes the unquestioned sacred center of the cloth

[SECONDARY FIGURES / DEVOTEES / ANIMALS / MUSICIANS / SYMBOLS] support the central deity and sacred field

[BORDERS / REPEATED AREAS] feel block-printed, rhythmic, and shrine-framing

[MAIN FIGURES / ICONIC DETAILS] feel hand-painted, black-outlined, and devotion-led

[BACKGROUND / FIELD] becomes a sacred cloth enclosure rather than open scenic space

Keep:

- goddess-first hierarchy
- portable shrine logic
- devotional composition
- process memory of print plus paint
- disciplined sacred palette
- ritual cloth identity

Avoid:

- generic goddess fabric art
- fashion print styling
- all-over decorative patterning
- open scenic illustration
- uniform digital-print look
- one central deity inside a generic textile world

Image-to-Image

Convert this source image into the authentic visual world of the Mata ni Pachedi tradition of Gujarat.

Preserve the source image's main subject relationships, core action, and readability, but rebuild the entire image through Mata ni Pachedi shrine-cloth logic. Replace ordinary image-space with sacred cloth-space. Replace decorative fabric logic with portable-shrine logic. Replace realism-first staging with goddess-centered devotional hierarchy.

If the source image includes a goddess or sacred central figure, make her the commanding center of the cloth. Surround her with supporting devotees, attendants, animals, musicians, ritual signs, and narrative support only in ways that strengthen her sacred presence. If the source image includes multiple scenes, organize them into a bounded shrine-field rather than open storytelling space.

Convert borders and repeated zones into block-printed structural fields. Convert major sacred figures and iconographic details into hand-painted black-outline forms. Restrict the visual grammar to a disciplined black-red-white shrine-cloth logic, with only minimal additional color if absolutely necessary.

The final image must feel like a real portable shrine cloth used in worship, not like a modern illustration printed on fabric. Do not turn it into generic goddess art, decorative ethnic cloth, or fashion textile. Rebuild the full image so it feels authored by Mata ni Pachedi shrine grammar.

V2 — Artisan Translation

Universal Hard Prompt

Create a creative 2D + 3D image world rooted in the Mata ni Pachedi tradition of Gujarat. Treat this as a sacred shrine-cloth system of the Vaghri / Devipujak community expanded into a richer visual language, not as generic folk textile, not as goddess décor, and not as broad Kalamkari-inspired illustration.

Keep the style source-rooted: central Mother Goddess supremacy, portable shrine/backdrop function, bounded sacred enclosure, block-printed structural rhythm, hand-painted iconographic detailing, and a disciplined black-red-white devotional palette. The world must still feel shrine-cloth-first. Do not let visual richness replace ritual hierarchy.

Allow the image to become more compositionally alive while preserving the cloth's sacred intelligence. The central goddess may gain stronger formal dominance. Devotees, attendants, animals, musicians, symbols, and narrative segments may become more integrated into one sacred field. Architectural shrine divisions, columns, arches, and compartments may become more spatially active, but they must still serve cloth-as-temple logic rather than become generic scenic architecture.

The line must remain black-outline-led and iconographic. Printed borders and repeated elements must remain structurally distinct from hand-painted sacred figures. The cloth should still feel prepared, dyed, printed, painted, and devotional, not mechanically reproduced.

Keep the palette disciplined and shrine-bound. Red, black, and white must remain the governing sacred structure. The whole frame should feel like Mata ni Pachedi intelligence is expanding into a richer 2D + 3D sacred field without losing shrine-cloth identity.

Do not make it mural art, luxury textile décor, generalized spiritual illustration, or all-over decorative fabric. Do not let goddess hierarchy weaken. Do not let the print-paint hybrid disappear.

Reusable Variable Template

Create [SUBJECT / GODDESS / SHRINE CLOTH / SCENE] as a creative 2D + 3D translation rooted in the Mata ni Pachedi tradition of Gujarat.

Preserve these style-core rules:

- portable shrine-cloth identity remains primary
- central goddess hierarchy stays dominant
- sacred enclosure composition remains visible
- block-printed borders and structural zones stay active
- hand-painted iconographic figures remain distinct
- black-red-white devotional palette remains governing
- devotional support figures reinforce the sacred center
- the whole frame remains inside one Mata ni Pachedi shrine world

Translate the image like this:

- [MAIN GODDESS / MAIN CENTRAL FIGURE] becomes a stronger sacred center shaped by shrine-cloth logic
- [SECONDARY FIGURES / ANIMALS / SYMBOLS / NARRATIVE SEGMENTS] integrate into one bounded devotional field
- [BORDERS / REPETITIVE ZONES] remain structurally block-printed and shrine-framing
- [MAIN ICONOGRAPHIC DETAILS] remain hand-painted and black-outline-led
- [BACKGROUND / FIELD / COMPARTMENTS] become a richer sacred enclosure instead of generic scenic space

Let these become richer:

- sacred field depth
- architectural partition energy
- narrative integration
- devotional hierarchy
- 2D + 3D shrine-cloth presence

Keep unchanged:

- cloth-as-shrine identity
- goddess-first composition
- print-paint hybrid logic
- ritual palette discipline
- Vaghri sacred image-field character

Avoid:

fashion-print styling

mural-like scenic expansion

generic spiritual poster art

uniform digital-print finish

all-over decorative textile treatment

a generic fabric world with one correct goddess

Image-to-Image

Convert this source image into a creative 2D + 3D Mata ni Pachedi translation from Gujarat.

Preserve the source image's main subject count, major action, and overall readability, but reconstruct the full image through Mata ni Pachedi shrine-cloth logic. Replace ordinary image-space with bounded sacred cloth-space. Replace decorative or secular textile behavior with portable-shrine hierarchy. Replace realism-first grouping with central deity supremacy and devotional support structure.

If the source includes a goddess or sacred figure, rebuild her as the unquestioned center of the cloth. If the source contains multiple secondary figures, animals, worshippers, attendants, or narrative elements, reorganize them into a sacred enclosure that reinforces shrine logic instead of open storytelling or decorative filling.

Convert borders and repetitive structural areas into block-printed shrine-framing zones. Convert major figures and sacred iconographic details into hand-painted black-outline forms. Preserve a disciplined black-red-white palette as the governing structure, using additional color only if it does not damage the ritual grammar.

The final image should feel like a shrine cloth that has expanded into a richer 2D + 3D devotional field while still remaining cloth-first and sacred. Do not turn it into general folk textile art, mural illustration, or décor fabric. Rebuild the full image so it feels authored by Mata ni Pachedi shrine intelligence.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a believable full 3D dimensional world generated from the Mata ni Pachedi tradition of Gujarat. Treat this as a sacred shrine-cloth system of the Vaghri / Devipujak community translated into reality, not as generic realism, not as fashion textile styling, not as poster art, and not as generalized temple illustration.

The realism must remain fully governed by Mata ni Pachedi shrine-cloth grammar. Build the world through cloth-as-shrine logic, central Mother Goddess hierarchy, bounded sacred enclosure, block-printed structural framing, hand-painted iconographic figure language, and a disciplined black-red-white devotional palette. Every major element must still feel authored by sacred cloth intelligence rather than by ordinary realism.

The goddess must remain the unquestioned center. Attendants, worshippers, animals, musicians, and narrative segments must support her within a clearly bounded sacred field. Shrine-like partitions, arches, temple-like framing, and structured visual compartments may become more dimensional, but they must still belong to a portable cloth-temple logic rather than a generic built environment.

Keep the line and process memory alive even in realism: black-outline-led figure structure, visible distinction between block-printed structural areas and hand-painted sacred figures, and cloth-treated surface intelligence. The final world should feel like Mata ni Pachedi shrine logic has become dimensional reality while preserving ritual hierarchy and sacred textile authorship.

Do not make it a realistic goddess poster. Do not make it a normal temple scene with textile references. Do not make it fashion décor. Do not let realism erase shrine-cloth identity. Every important element must still belong to the Mata ni Pachedi system.

Reusable Variable Template

Create [SUBJECT / GODDESS / SCENE / WORLD TYPE] as a full 3D realistic dimensional world generated from the Mata ni Pachedi tradition of Gujarat.

Style system that must remain unchanged:

- cloth-as-shrine identity
- central goddess supremacy
- sacred enclosure composition
- portable temple-backdrop logic
- block-printed structural borders and repeated zones
- hand-painted iconographic figures
- disciplined black-red-white ritual palette
- whole-frame Mata ni Pachedi consistency

Translate the world like this:

[MAIN GODDESS / MAIN SACRED FIGURE] becomes a fully dimensional but still shrine-cloth-authored center

[SECONDARY FIGURES / ANIMALS / SYMBOLS / ATTENDANTS] become dimensional but remain devotion-led and subordinate

[BORDERS / FRAMES / REPETITIVE ZONES] remain structurally block-printed in feeling

[MAIN ICONOGRAPHIC FIGURES / SACRED DETAILS] remain hand-painted in logic even in realism

[ENVIRONMENT / ENCLOSURE / COMPARTMENTS] become a believable sacred field organized by cloth-temple intelligence rather than generic realism

Increase:

believable sacred depth
field hierarchy
architectural enclosure presence
cloth-world coherence
dimensional devotional integration

Do not lose:

goddess-first hierarchy
portable shrine identity
print-paint hybrid distinction
ritual palette discipline
sacred cloth authorship

Avoid:

generic temple realism
poster-like goddess art
fashion or décor textile styling
uniform print finish
mural-like scenic drift
a realistic world with one Mata ni Pachedi cloth element inserted

Image-to-Image

Convert this source image into a full 3D realistic Mata ni Pachedi world from Gujarat.

Preserve the source image's main composition, subject relationships, and readability, but rebuild all visible elements through Mata ni Pachedi shrine-cloth grammar. Replace ordinary spatial logic with portable-shrine cloth logic. Replace secular or decorative textile behavior with sacred enclosure. Replace realism-first arrangement with central goddess hierarchy and devotion-led support figures.

If the source includes a goddess or central sacred figure, make her the unquestioned center of the entire world. Reorganize all secondary figures, animals, attendants, musicians, and narrative support around her within a bounded sacred field. Convert border zones and repeated framing areas into block-printed structural fields, and convert major iconographic figures into hand-painted black-outline-led sacred forms.

Maintain the disciplined black-red-white palette as the governing devotional structure. Preserve the distinction between cloth-framing logic and iconographic figure logic even inside dimensional realism. The final image should feel like a Mata ni Pachedi shrine cloth has become a believable sacred world without losing its textile-shrine authorship.

Do not make it a realistic goddess illustration with fabric ornament. Do not make it a generic temple scene. Do not make it décor textile. Rebuild the full image so it feels authored by Mata ni Pachedi sacred cloth intelligence.
