

Ceremonial Emblem - Manipur

V1 — Authentic Style

Universal Hard Prompt

Create an image built from the native visual logic of a **Manipuri ceremonial emblem-field system**, where the governing force is **prestige-field authority, black-ground dominance, red-edged containment, compressed symbolic sign-forms, honour-cloth stillness, and ceremonially ranked placement**. Do not treat this as black luxury fabric, decorative embroidery, heraldic décor, or ethnic prestige design. Build the entire image as if it comes from a cloth world where reality is organized through **authority, containment, symbolic compression, and rank-bearing stillness**.

Use a visual system where figures are emblematic ceremonial presences rather than realism-first humans. Animals must become symbolic carriers rather than natural creatures. Objects must become rank-bearing signs rather than descriptive props. Trees, mountains, architecture, sky, ground, and distance layers must all inherit the same prestige-field logic: controlled contrast, held space, compressed form, emblematic placement, and ceremonial order. The image must feel like a **prestige emblem-cloth world** generated the full frame.

No decorative embroidered textile styling, no luxury black-and-red mood, no symbolic motif overlay on realism, no generic environment with one ceremonial cloth.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** using the native visual logic of a **Manipuri ceremonial emblem-field system**.

Core style system to preserve:

- prestige-field authority
- black-ground dominance
- red-edged containment
- compressed symbolic sign logic
- ceremonially ranked placement
- honour-cloth stillness
- whole-frame consistency so every visible element belongs to one emblem-field world

Translate the scene like this:

- **[MAIN FIGURE]** becomes a rank-bearing ceremonial presence shaped by symbolic compression and field authority
- **[SECONDARY FIGURES]** also obey the same held ceremonial order
- **[ANIMALS / OBJECTS / PROPS]** become emblematic symbolic carriers
- **[TREES / GROUND / ARCHITECTURE / SKY / DISTANCE]** become prestige-bearing field structures organized by containment, contrast, and sign-placement
- **[ATMOSPHERE / DEPTH]** becomes held, ranked, and ceremonially still rather than naturalistic

Keep:

- black/red structural authority
- symbolic compression
- ceremonial stillness
- prestige hierarchy
- field containment
- whole-frame emblem logic

Avoid:

- luxury textile mood
- decorative embroidery
- naturalistic animals or props
- realism with prestige motifs
- generic world with one emblem-cloth element

Image-to-Image

Convert this source image into the native visual world of a **Manipuri ceremonial emblem-field system**.

Preserve the source image's subject count, action, and readable hierarchy, but rebuild the full frame through **prestige-field authority, red-edged containment, symbolic compression, and ceremonial rank-order**. Replace realism-first figures with emblematic presences. Replace naturalistic animals and objects with compressed symbolic carriers. Replace generic environment with held ceremonial field-space. Rebuild trees, architecture, sky, terrain, horizon, and atmosphere so they all belong to one prestige emblem-world.

Do not only add black-and-red textile cues. Do not keep realism underneath. Do not turn symbols into decorative illustrations. Rebuild the whole scene as if a ceremonial emblem-field system invented it.

V2 — Artisan Translation

Universal Hard Prompt

Create a dimensional image-world rooted in the authentic logic of a **Manipuri ceremonial emblem-field system**, where prestige-field authority, black/red structural control, symbolic compression, and honour-cloth stillness remain primary, but the scene gains richer spatial depth and broader world articulation. This must not become royal fantasy, luxury ethnic styling, or realism with symbolic embroidery. It must still feel generated by **prestige-field logic**.

Keep the branch source-rooted: figures must remain ceremonially held, not realism-first. Animals and objects must remain sign-bearing, not descriptive. Space must expand through rank, contrast, and placement, not through naturalistic observation. Trees, architecture, terrain, and atmosphere must all become part of a controlled symbolic field. Let the image become richer and more dimensional, but keep it **emblem-led first**.

No decorative prestige design, no luxury black-red fantasy, no realism-first staging, no costume-only symbolic translation.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as an authentic dimensional translation rooted in a **Manipuri ceremonial emblem-field system**.

Preserve these style-core rules:

- prestige-field authority remains primary
- black/red containment remains structural
- symbolic compression remains active
- ceremonial stillness remains dominant
- rank-bearing placement remains visible
- whole-frame branch purity remains intact

Translate the image like this:

- **[MAIN FIGURE]** becomes a dimensional but still emblematic ceremonial presence
- **[SECONDARY FIGURES]** become supporting ranked presences under the same field logic

- **[ANIMALS / OBJECTS / PROPS]** become dimensional sign-forms rather than naturalistic things
- **[ENVIRONMENT]** becomes a broader but still prestige-held symbolic field-space organized by contrast, containment, and rank
- **[DEPTH / SPATIAL STAGING]** becomes ceremonially structured rather than observationally real

Let these become richer:

- dimensional sign-presence
- figure-environment relation
- symbolic worldbuilding
- field depth
- rank-based spatial organization

Keep unchanged:

- symbolic compression
- ceremonial stillness
- prestige field authority
- black/red structural logic
- whole-frame emblem control

Avoid:

- royal fantasy décor
- luxury ethnic styling
- realism with symbolic overlays
- decorative black-red richness
- generic environment with one ceremonial cloth

Image-to-Image

Convert this source image into an authentic dimensional **Manipuri ceremonial emblem-field translation**.

Preserve the source image's main action, staging, and readable scene hierarchy, but rebuild the entire frame through **prestige-field authority, red-edged containment, symbolic compression, and ceremonial spatial order**. Turn figures into emblematic ranked presences. Turn objects and animals into dimensional sign-forms. Turn terrain, trees, architecture, sky, and atmosphere into held ceremonial field-space. The result may become more dimensional, but it must still feel built by emblem-field intelligence rather than by realism with symbolic styling.

Do not only upgrade the cloth. Do not keep the world generic. Do not turn the branch into premium decorative design. Rebuild the whole scene as if prestige-field logic generated it.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a premium, fully orchestrated, depth-rich image-world generated from the authentic grammar of a **Manipuri ceremonial emblem-field system**. The result must feel highly finished, highly readable, and spatially complete, but still fully governed by **prestige-field authority, black-ground dominance, red-edged containment, symbolic compression, ceremonial stillness, and rank-bearing composition**. Premium here must not become luxury fantasy or cinematic realism with decorative prestige motifs. It must remain emblem-led.

Use strong focal hierarchy, controlled contrast, complete environment orchestration, and deliberate symbolic center-of-gravity, but keep every visual zone under the same ceremonial field logic. Figures must remain emblematic, not realism-first. Animals and objects must remain sign-bearing. Environment must become a complete prestige-field world rather than a generic cinematic location. Trees, mountains, architecture, sky, and atmosphere must all feel held, ranked, and symbolically ordered. The world must feel like a **premium final image built by a ceremonial emblem-field system**, not a realistic scene with royal textile references.

No luxury black-red fantasy, no prestige décor styling, no symbolic embroidery glamour, no generic cinematic world with one branch-coded cloth.

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as a premium orchestrated cinematic translation of a **Manipuri ceremonial emblem-field system**.

Style system that must remain unchanged:

- prestige-field authority
- black-ground dominance
- red-edged containment
- symbolic compression
- ceremonial stillness
- ranked placement
- whole-frame branch ownership

Translate the scene like this:

- **[MAIN FIGURE]** becomes a premium, highly readable ceremonial presence shaped by emblematic rank and field authority
- **[SECONDARY FIGURES]** become supporting ranked presences inside the same symbolic order
- **[ANIMALS / OBJECTS / PROPS]** become premium sign-bearing forms rather than descriptive realism
- **[ENVIRONMENT / TERRAIN / ARCHITECTURE / SKY]** becomes a complete but still ceremonially held prestige-field world
- **[DEPTH / ATMOSPHERE]** becomes ranked and controlled rather than generic cinematic space

Increase:

- focal hierarchy
- contrast control
- symbolic center
- environmental completion
- premium finish under branch control

Do not lose:

- emblematic compression
- ceremonial stillness
- prestige authority
- black/red structural logic
- whole-frame symbolic ownership

Avoid:

- luxury fantasy
- royal décor styling
- realism-first staging
- decorative black-red mood
- any generic zone outside the branch
-

Image-to-Image

Convert this source image into a premium cinematic **Manipuri ceremonial emblem-field world**.

Preserve the source image's main subject count, dominant action, and readable staging, but rebuild the full frame through **prestige-field authority, symbolic compression, ceremonial stillness, and rank-bearing image order**. Turn figures into premium emblematic

presences. Turn animals and objects into controlled symbolic carriers. Turn environment into a complete ceremonial field-space with held contrast, strong containment, and ranked depth. The result should feel premium and complete, but it must still feel born from emblem-field logic rather than from realism with decorative prestige textile added on top.

Do not only intensify the costume. Do not let premium finish become luxury fantasy. Do not keep a generic environment underneath. Rebuild the entire world as if it were generated by ceremonial emblem-field intelligence.
