

Puanlaisen stripe-ground - Mizoram

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **authentic source-faithful visual logic of Puanlaisen stripe-ground from Mizoram**. Treat this as a **Mizo woven center-band ground system**, not as full Mizo Puanchei, not as generic red-striped handloom, not as decorative central band design, and not as fashion textile styling. Build the entire image as if it comes from a lower-body woven cloth tradition whose deepest identity is **one dominant deep red stripe running through the middle along the length of the cloth, surrounding field submission to that center, compact loom-built ground order, and body-bound wrap intelligence**.

The image must feel **ground-first and center-first**. The red middle band must behave as the main structural authority, not as one stripe among many. The surrounding cloth field must support that axis and remain subordinate to it. The result must feel woven and field-organized, not printed, graphic, or ornament-first.

If figures appear, they must not remain generic realistic people wearing a red-striped cloth. Their silhouette, posture, grouping, body organization, and visual hierarchy must also be rebuilt through Puanlaisen logic: center-axis dominance, middle-versus-side order, lower-body wrap structure, and woven compactness. If props, animals, trees, ground, architecture, or background appear, they must also inherit the same center-band intelligence so the whole frame feels generated from one Puanlaisen world.

Preserve:

- deep red center-band authority
- lengthwise middle-axis order
- ground-design logic
- lower-body wrap cloth behavior
- woven compact field restraint
- one dominant structural event organizing the cloth

Do not make this:

- full Puanchei
- generic Mizo red textile
- decorative red band
- graphic stripe illustration
- shawl or scarf behavior
- realism with one red center stripe added later
- a world where only the garment is style-translated

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** in the authentic source-faithful visual logic of **Puanlaisen stripe-ground from Mizoram.**

Use this style engine:

- one dominant deep red middle band
- lengthwise central-axis cloth order
- supporting surrounding field
- ground-design-first hierarchy
- lower-body wrap intelligence
- compact woven field discipline
- loom-built rather than print-built structure

Translate the whole image like this:

- **[MAIN FIGURE / MAIN FORM]** becomes a Puanlaisen-governed presence shaped by center-axis hierarchy and lower-body wrap logic
- **[SECONDARY FIGURES / SECONDARY FORMS]** also obey the same middle-versus-side structural discipline
- **[OBJECTS / PROPS / ANIMALS]** become forms whose divisions and visual mass inherit center-band order
- **[GROUND / TREES / ARCHITECTURE / BACKGROUND]** becomes a world organized by axial field logic, red structural dominance, and woven restraint

Keep:

- center-band identity
- deep red structural force
- field submission to the middle
- lower-body wrap discipline
- compact woven order

Avoid:

- full Puanchei drift
- generic red stripe textile
- decorative central band
- graphic striping
- fashion surface styling
- one styled garment inside a generic world

Image-to-Image

Convert this source image into the **authentic source-faithful visual logic of Puanlaisen stripe-ground from Mizoram**.

Preserve the source image's subject count, main action, pose relationships, and core readability, but rebuild the entire image through **Puanlaisen ground law**: one dominant deep red middle band, lengthwise central-axis order, surrounding field support, lower-body wrap intelligence, and compact woven cloth structure. The result must not look like a normal image dressed in a red-striped textile. It must feel like the whole image has been reconstructed by a center-band ground system.

If the source contains figures, rebuild their body organization, silhouette, grouping, and clothing logic through Puanlaisen structure rather than generic realism. If the source contains props, animals, surfaces, boundaries, or environment, translate them into the same axial field grammar so center-band hierarchy extends across the full frame.

Do not:

- simply add a red stripe to clothing
- drift into full Puanchei ornament
- make the band decorative instead of structural
- turn the result into graphic stripe design
- let the world remain generic while only the garment changes

V2 — Artisan Translation

Universal Hard Prompt

Create an image in a **creative 2D + 3D translation rooted in the source grammar of Puanlaisen stripe-ground from Mizoram**. This is not literal artisan simulation and not “the same cloth with more texture.” It must remain deeply rooted in Puanlaisen’s actual source system: **deep red center-band authority, middle-axis field order, surrounding field support, lower-body wrap intelligence, and compact woven ground logic**. Then translate that grammar into a richer image-world where the center-band begins to control form, hierarchy, spacing, props, figures, animals, and environment.

The image should feel as if **Puanlaisen’s center-band logic has expanded into world logic**. Let the middle band become image-axis. Let red structural authority become scene hierarchy. Let the surrounding field become secondary spatial field. Let wrap-born body organization become wider figure/environment discipline. Let one dominant structural event organize the whole frame.

The result may become more dimensional, more image-capable, and more spatially articulate, but it must still feel **Puanlaisen-born**, not realism-born and not decorative-design-born.

Do not make this:

- generic red graphic world
- decorative central stripe illustration
- modern stripe design with craft flavor
- dimensional scene where only the garment is Puanlaisen
- full Puanchei drift
- a realism-first image with cultural styling on top

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as a **creative 2D + 3D translation rooted in the source grammar of Puanlaisen stripe-ground from Mizoram.**

Preserve this style-core:

- deep red center-band authority
- lengthwise middle-axis order
- surrounding field submission
- ground-design-first hierarchy
- lower-body wrap intelligence
- compact woven discipline
- one dominant structural event controlling the whole image

Translate the whole image like this:

- **[MAIN FIGURE / MAIN FORM]** becomes a hybrid 2D + 3D presence built from center-axis hierarchy rather than generic anatomy-first realism
- **[SECONDARY FIGURES / FORMS]** obey the same middle-versus-side field order
- **[OBJECTS / PROPS / ANIMALS]** inherit axial division and supporting-field logic
- **[GROUND / TREES / ARCHITECTURE / BACKGROUND]** becomes a richer world organized by Puanlaisen's center-band hierarchy and woven ground discipline

Let these become richer:

- center-to-side field relation
- axial composition
- supporting secondary field
- figure-environment ordering
- dimensional but source-rooted image-body
- whole-frame red-ground hierarchy

Keep unchanged:

- center-band remains primary
- red remains structural, not decorative
- the world remains ground-first
- nothing drifts into full Puanchei or generic stripe design

Avoid:

- decorative stripe art
- generic red geometric illustration
- print-like band logic
- fashion-world styling
- one red-banded garment in a generic scene
- ornamental richness replacing source grammar

Image-to-Image

Convert this source image into a **creative 2D + 3D translation rooted in the source grammar of Puanlaisen stripe-ground from Mizoram**.

Preserve the source image's subject count, action, pose relationships, and scene readability, but reconstruct all visible elements through **Puanlaisen center-band intelligence**. The image must no longer behave like ordinary realism or generic handcrafted illustration. Rebuild it through deep red middle-band authority, center-versus-side hierarchy, lower-body wrap-born order, and woven ground discipline.

Let the image become more hybrid and more image-rich than a strict cloth study, but keep it clearly Puanlaisen-rooted. Figures must become more axis-governed. Props and animals must inherit band-versus-field logic. Trees, ground, architecture, and background must stop being generic and become organized by Puanlaisen's middle-axis ground order.

Do not:

- paste a red band onto a normal image
- turn the style into generic red stripe design
- reduce it to surface ornament
- let the environment stay in another visual language
- keep Puanlaisen only on the garment

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **full 3D realistic dimensional world where the entire Puanlaisen stripe-ground style system becomes believable reality**. “Realistic” here does not mean replacing the style with generic realism. It means believable volume, material behavior, light, depth, gravity, and environmental completion while **Puanlaisen still controls the world**.

Build the image as if **Puanlaisen from Mizoram truly exists as world-law**. Translate its full grammar into reality:

- one dominant deep red middle band
- lengthwise axial field order
- supporting side-field submission
- ground-design-first hierarchy
- lower-body wrap structural intelligence
- compact woven cloth discipline

Every major element must adapt to that system. Figures must feel shaped by center-axis hierarchy rather than ordinary anatomy-first realism. Animals must feel organized by middle-versus-side structural order. Props and architecture must feel divided by axial field logic. Trees, ground, thresholds, and environment must feel generated from one dominant band-led world-order rather than from generic realism.

The realism must remain style-faithful. The red band cannot become decorative trim. The center cannot become one option among many. The surrounding field cannot start competing with the axis. The source must still be identifiable as a Mizo woven center-band ground system that has grown into a believable world.

Do not make this:

- ordinary realism with one red-striped garment
- decorative red-band world design
- full Puanchei world by accident
- generic environment around a styled cloth
- realism that erases center-band ground logic
- costume styling instead of world-law

Reusable Variable Template

Create **[SUBJECT / SCENE / WORLD]** as a **full 3D realistic dimensional world where the entire Puanlaisen stripe-ground style system becomes believable reality**.

Treat the style as a **center-band-generated woven world** and preserve these non-negotiable rules:

- deep red center-band still drives the frame
- middle-axis order remains the main structural event
- the surrounding field still supports the center
- the image remains ground-first, not motif-first
- lower-body wrap-born discipline still matters
- realism remains subordinate to Puanlaisen grammar
- the whole frame belongs to one Puanlaisen world

Translate the whole world like this:

- **[MAIN FIGURE / MAIN FORM]** becomes a believable volumetric presence governed by center-axis hierarchy
- **[SECONDARY FIGURES / FORMS]** become branch-pure dimensional presences under the same middle-versus-side order
- **[OBJECTS / PROPS / ANIMALS / THRESHOLDS]** become structurally bounded forms shaped by red-ground authority and axial field logic
- **[GROUND / TREES / ARCHITECTURE / BACKGROUND / WORLD STRUCTURE]** becomes a full spatial system organized by Puanlaisen's center-band dominance and woven compact discipline

Increase:

- believable volume
- light-material interaction
- figure-ground separation
- environmental completion
- axial field depth
- whole-frame realism under Puanlaisen control

Do not lose:

- center-band identity
- deep red structural authority
- middle-axis hierarchy
- ground-first logic
- wrap-born cloth intelligence
- whole-frame rebuild rule

Avoid:

- generic realism with striped costume
- decorative red stripe worldbuilding
- print-surface logic
- full Puanchei drift
- any important element remaining generic
- realism becoming stronger than Puanlaisen

Image-to-Image

Convert this source image into a **full 3D realistic dimensional world where the entire Puanlaisen stripe-ground style system becomes believable reality.**

Preserve the source image's subject count, major action, pose logic, and core readability, but rebuild the whole frame through **Puanlaisen world-law**. Replace ordinary realism or generic stylization with deep red center-band authority, middle-axis field order, surrounding field submission, lower-body wrap intelligence, and compact woven ground logic.

If the source contains figures, they must become believable volumetric presences shaped by center-band hierarchy rather than ordinary costume realism. If the source contains animals, props, trees, architecture, or environment, they must also be reconstructed through the same axial ground system so the whole world feels built from Puanlaisen. The realism must remain subordinate to the style, not the other way around.

Do not:

- simply add a red middle stripe to a realistic image
- reduce the style to red band decoration
- erase center-band hierarchy into realism
- make only the garment Puanlaisen while the rest stays generic
- let one important element belong to another visual language
