

Sankheda Woodwork - Gujarat

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic visual logic of Sankheda woodwork from Gujarat as a turned-wood furniture craft with lacquered surface and hand-painted ornament.

Treat this as furniture made from turned wooden components, lacquer-coated and then hand-painted with traditional motifs, not as generic painted furniture, not as carved wooden décor, not as printed furniture graphics, and not as plain glossy wood.

Build the entire image as if it is generated from real Sankheda intelligence:

furniture body first,
lathe-turned rounded wooden members,
symmetrical turned geometry,
lacquer-built glossy surface,
hand-painted floral and geometric motif system,
bright traditional Gujarati color hierarchy,
furniture-use identity,
Sankheda / Vadodara-region craft lineage,
Kharadi Suthar artisan memory.

The object must feel turned first and decorated second.

The visual rhythm must come from rounded legs, posts, rails, spindles, bars, and furniture members shaped on the lathe.

The surface must feel lacquer-built, not merely painted directly on raw wood.

The motifs must feel hand-painted onto furniture, not printed like stickers or digital graphics.

Use strong traditional colors such as maroon, vermilion/red, green, brown, yellow, gold, and silver where appropriate.

Use furniture-bound motifs such as floral forms, geometric borders, conch-shell-like motifs, elephant-footprint-like motifs, leaf motifs, and rhythmic ornamental bands.

Let the finish feel glossy but handcrafted.

If humans, animals, trees, props, architecture, ground, objects, or environment are present, rebuild all of them through Sankheda turned-form and lacquer-motif logic so the whole frame feels born from rounded furniture geometry, lacquered surface build, painted ornament rhythm, and Gujarati household craft intelligence, not like a normal scene with one decorated furniture piece inserted later.

Human skin and faces must remain clean and readable.

The style must enter through turned wood geometry, lacquer gloss, furniture-bound motif rhythm, bright traditional color order, and household-object intelligence across the whole image.

Avoid:

generic painted furniture,
carved wooden ornament,
printed floral graphics,
factory-coated glossy wood,
plain lacquered wood with no painted motif system,
one Sankheda patch inside an unrelated world,
surface-only decoration.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] in the authentic visual logic of Sankheda woodwork from Gujarat.

Treat the style as a turned-wood furniture and lacquer-paint system, not as generic painted wood décor.

Core style lock:

turned wooden furniture body,
rounded lathe-made members,
lacquer-built glossy surface,
hand-painted traditional motifs,
bright Gujarati color hierarchy,
furniture-use identity,
Sankheda / Kharadi Suthar lineage,
whole-frame Sankheda consistency.

Translate the image like this:

[MAIN SUBJECT / MAIN FIELD] becomes a Sankheda-built wooden presence with turned geometry, lacquered gloss, and painted ornament.

[HUMANS] are rebuilt through furniture-like turned segmentation, lacquer-painted surface rhythm, and rounded member logic; skin stays clean and human.

[ANIMALS] are rebuilt through turned wood contour, lacquer color fields, and hand-painted ornamental detailing rather than generic realism.

[TREES / FOLIAGE] are rebuilt through rounded turned masses, lacquered color order, and painted ornamental patterning rather than natural leaf realism.

[OBJECTS / GROUND / ARCHITECTURE] inherit turned wooden structure, lacquered finish, and furniture-bound painted motifs.

[ENVIRONMENT] becomes a Sankheda woodwork world rather than generic realism.

Keep:

turned form as the primary structure,
lacquer as surface build,
painted motif as identity layer,
bright traditional Gujarati color order,

household and ceremonial furniture logic.

Avoid:

generic painted wood,
carved décor,
printed graphics,
plain gloss with no motif system,
one correct Sankheda object inside an unrelated image.

Image-to-Image

Convert this source image into the authentic visual world of Sankheda woodwork from Gujarat.

Preserve the source image's main subject relationships, action, and readability, but rebuild the entire image through Sankheda turned-wood furniture grammar.

Replace ordinary surfaces with rounded lathe-turned wood components.

Replace raw paint logic with lacquer-built glossy color fields.

Replace graphic decoration with hand-painted floral/geometric furniture motifs.

Replace generic object styling with Gujarati furniture rhythm and Sankheda household-craft order.

If the source contains people, animals, trees, props, objects, architecture, ground, or environment, convert all of them so they feel generated by Sankheda woodwork intelligence instead of remaining normal realism.

Do not simply add painted flowers onto wood.

Do not leave the environment generic.

Do not make it look carved, printed, or factory-finished.

The final image must feel like a real Sankheda furniture system expanded across the whole frame.

V2 — Artisan Translation

Universal Hard Prompt

Create a creative 2D + 3D image translation rooted in Sankheda woodwork from Gujarat.

This is not generic painted furniture and not a full realistic world yet.

It must remain source-rooted in Sankheda grammar:

turned wooden furniture members,

lathe-made rounded geometry,
lacquer-built glossy surface,
hand-painted floral and geometric motifs,
bright traditional Gujarati color hierarchy,
household and ceremonial furniture identity.

Let the image gain dimensional body, stronger rounded turned contour, richer lacquer tactility, clearer relation between wooden form and painted ornament, and more visible layering between form, lacquer, and motif.
But keep the image furniture-field-first.
It should still feel like Sankheda intelligence is constructing the image, not generic realism.

Extend Sankheda across all elements:
humans are shaped through turned-form segmentation, lacquered color fields, and furniture-bound motif rhythm;
animals are shaped through rounded wooden form logic, painted ornament bands, and lacquered contour;
trees are shaped through cylindrical/rounded turned masses and decorative painted-lacquer pattern order;
props, ground, and architecture are shaped through furniture-member rhythm, glossy lacquer surfaces, and hand-painted ornamental structure.

Faces and skin stay readable and human.
No carved-surface shortcut.
No printed graphics.
No generic premium painted furniture styling.

Avoid:
generic painted wood décor,
factory gloss,
printed pattern surfaces,
carved ornament replacing turned form,
surface decoration added afterward,
normal realism with one Sankheda furniture piece inserted.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] as a creative 2D + 3D translation rooted in Sankheda woodwork from Gujarat.

Preserve these source-core rules:
turned form remains primary,
lacquer-built surface remains structural,
hand-painted motif remains active,
bright traditional color order remains visible,
furniture-use identity remains present,

the whole frame remains inside one Sankheda system.

Translate the image like this:

[MAIN SUBJECT / MAIN FIELD] becomes a dimensionalized Sankheda furniture-image zone.

[HUMANS] are rebuilt through rounded turned segmentation, lacquered color structure, and painted furniture-motif rhythm; skin remains clean.

[ANIMALS] are rebuilt through turned wood contour, lacquer shine, and hand-painted ornamental order.

[TREES / FOLIAGE] are rebuilt through cylindrical turned clustering and furniture-bound painted-lacquer logic.

[OBJECTS / GROUND / ARCHITECTURE] gain richer layering but remain governed by turned member rhythm, lacquer build, and painted ornament system.

[ENVIRONMENT] becomes a Sankheda image-field rather than generic realism.

Let these become richer:

turned contour depth,

lacquer tactility,

motif readability,

gloss structure,

color hierarchy,

image-body.

Keep unchanged:

turned wood as main structure,

lacquer as surface build,

motif as hand-painted identity layer,

Gujarati household-furniture intelligence,

Sankheda/Kharadi lineage.

Avoid:

generic painted furniture,

carved décor,

printed floral graphics,

plain gloss with no motif intelligence,

one Sankheda section inside an unrelated image.

Image-to-Image

Convert this source image into a creative 2D + 3D Sankheda translation from Gujarat.

Preserve the source image's main action, subject count, and readability, but reconstruct the full image through Sankheda turned-wood furniture grammar.

Replace ordinary surfaces with rounded lathe-turned wooden structures.

Replace plain paint with lacquer-built glossy color surfaces.

Replace generic ornament with hand-painted floral/geometric furniture motifs.
Replace generic object styling with furniture-bound rhythm, rounded component logic, and Gujarati household craft order.

Allow the image to gain layered wooden depth, richer lacquer tactility, stronger motif contrast, and more visible image-body.
But do not let it become full realism.
It must still behave like a dimensionalized Sankheda furniture field.

Do not paste motifs onto a normal image.
Do not leave humans, trees, animals, or environment generic.
Do not turn it into printed décor or carved luxury wood.

The result must feel like Sankheda woodwork logic has gained image-body across the whole frame.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a believable full 3D realistic dimensional world generated from Sankheda woodwork of Gujarat.

The realism must remain fully governed by Sankheda furniture grammar, not by generic realism.

Build the whole world through:
turned wooden furniture form,
rounded lathe-made members,
lacquer-built glossy surface,
hand-painted floral and geometric motifs,
bright traditional Gujarati color hierarchy,
household and ceremonial furniture identity,
Sankheda / Vadodara-region / Kharadi Suthar lineage.

The world must feel as if Sankheda intelligence has become a complete dimensional reality. Figures, clothing, objects, architecture, surfaces, environment, and spatial divisions must all belong to one Sankheda system.

The forms must still feel turned.

The surface must still feel lacquer-built.

The motifs must still feel hand-painted and furniture-bound, not printed or pasted.

Humans must be rebuilt through rounded turned segmentation, lacquered color fields, and hand-painted ornament rhythm while skin remains clean and human.

Animals must be rebuilt through turned wooden contour and furniture-bound painted motif logic.

Trees must be rebuilt through cylindrical rounded turned masses and lacquer-motif structure.

Ground, props, and architecture must all inherit Sankheda turned-form and lacquer-paint intelligence.

Make the space fully volumetric and believable, but do not let realism erase the furniture-first origin.

This is not normal realism with one colorful painted furniture accent.

This is Sankheda grammar becoming world structure.

Avoid:

generic premium painted furniture realism,

carved wooden décor,

factory-finished gloss,

printed motifs,

plain lacquer with no painted system,

one Sankheda patch inside a non-Sankheda world.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] as a full 3D realistic dimensional world generated from Sankheda woodwork of Gujarat.

Style system that must remain unchanged:

turned wooden form remains primary,

lacquer-built surface remains structural,

hand-painted motif system remains active,

bright traditional Gujarati color hierarchy remains present,

furniture identity remains visible,

whole-frame Sankheda consistency remains intact.

Translate the world like this:

[MAIN SUBJECT / MAIN FIELD] becomes a fully dimensional Sankheda-governed turned-wood presence.

[HUMANS] become volumetric but remain organized through rounded turned segmentation, lacquered color structure, and hand-painted furniture-motif rhythm.

[ANIMALS] become volumetric but remain shaped by turned wooden contour and lacquer-paint order.

[TREES / FOLIAGE] become volumetric but remain organized through cylindrical turned clustering and painted-lacquer motif logic.

[OBJECTS / GROUND / ARCHITECTURE] continue to structure the world through turned member rhythm, lacquer build, and furniture-bound ornament.

[ENVIRONMENT] becomes a believable spatial field organized by Sankheda intelligence rather than generic realism.

Increase:

full spatial depth,

material presence,

wood tactility,
lacquer gloss,
motif continuity,
world completion.

Do not lose:
turned-form logic,
lacquer as built surface,
hand-painted motif identity,
Gujarati household-furniture intelligence,
Sankheda/Kharadi lineage.

Avoid:
generic painted wood realism,
carved décor styling,
factory finish look,
printed ornament,
Sankheda as accent instead of world structure.

Image-to-Image

Convert this source image into a full 3D realistic Sankheda world from Gujarat.

Preserve the source image's main composition, subject relationships, and readability, but rebuild the whole image through Sankheda turned-wood furniture world grammar.

Replace normal realism with a world governed by rounded lathe-turned wooden form, lacquer-built glossy surface, hand-painted floral/geometric motifs, bright traditional Gujarati color order, and furniture-use intelligence.

If the source contains figures, garments, props, objects, architecture, animals, trees, ground, or environment, convert all of them so they behave as if generated from Sankheda woodwork intelligence.

Keep the turned form structurally plausible.

Keep the lacquer as built glossy surface rather than mere paint shine.

Keep the motifs hand-painted and furniture-bound.

Keep the whole frame organized by furniture-member rhythm rather than generic realistic arrangement.

Do not simply apply floral motifs over the image.

Do not leave secondary forms generic.

Do not turn it into generic painted furniture, carved décor, or printed wood graphics.

The final result must feel like Sankheda itself generated the world.
