

Phulkari-belt overlap - Haryana

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic source-faithful visual logic of **Phulkari from the Haryana side of the wider Punjab-Haryana Phulkari belt**, specifically the traditional **khaddar-based embroidered cloth** built with **pat silk floss** through **reverse-worked long and short darning stitches**. Treat this as a **belt-based ceremonial and domestic embroidery system**, not as generic Punjabi decorative embroidery, not as generic floral folkwork, not as boutique festive embroidery on arbitrary fabric, and not as a detached Haryana invention outside the Phulkari belt.

Build the whole cloth as if it is a real Phulkari textile made on **handspun, handwoven khaddar**. The embroidery must feel as though it was structurally created from the **reverse side** and revealed on the front through stitch logic, not drawn on the front and decorated later. Let the relationship between the **khaddar ground** and the **luminous pat silk thread** be central. The surface should feel textile-born, not illustration-born.

Field logic: decide clearly whether the cloth behaves as **scattered Phulkari**, **dense Bagh**, **ceremonial Chope**, or **scene-bearing Sainchi**, and then obey that subtype fully. If it is Bagh, the field must feel densely covered and structurally full. If it is Chope, the cloth should carry strong ceremonial discipline and wedding-linked order. If it is Sainchi, daily life, birds, animals, folklore, or social scenes may appear, but they must still remain stitch-built and cloth-held. If it is open Phulkari, the ground must remain visible and active.

Motif logic: floral, geometric, bird, animal, or life-scene imagery may appear, but all motifs must feel generated by **darning-stitch structure** rather than by painted drawing. The shapes should remain thread-compatible and field-compatible. The image must still feel like embroidery on khaddar, not like illustration translated onto cloth.

Color logic: use the traditional relation between **dyed khaddar grounds** such as madder brown, rust red, indigo, or green and **bright silk-floss embroidery**, including subtype-specific color behavior where relevant. The cloth should feel luminous, but never synthetic or random in color.

Cultural logic: the cloth must carry **women-led trousseau memory, ceremonial use, intergenerational domestic authorship, and belt-based identity**. It should feel like a real heirloom or ceremonial textile, not a fashion product first.

Do not make this generic Punjabi bridal embroidery, fashion-dupatta embellishment, floral surface work on luxury cloth, or modern boutique interpretation with no khaddar / pat / reverse-darning memory. The final image must feel like true Haryana-side Phulkari: **khaddar-based, pat-embroidered, reverse-built, subtype-aware, ceremonial, and structurally part of the wider Phulkari belt**.

Reusable Variable Template

Create **[SUBJECT / CLOTH TYPE / SCENE]** in the authentic source-faithful visual logic of **Phulkari from the Haryana side of the wider Phulkari belt**, treating it as a **khaddar-based reverse-darning embroidery system** rather than generic festive embroidery.

Core style system to preserve:

handspun handwoven **khaddar** base

pat silk floss identity

reverse-worked long/short darning stitch logic

women-led trousseau and ceremonial cloth memory

subtype discipline: **Phulkari / Bagh / Chope / Sainchi**

ground-to-embroidery contrast

belt-based Haryana identity inside the wider regional Phulkari system

whole-cloth embroidered coherence

Translate the cloth like this:

[MAIN CLOTH TYPE] becomes a real Phulkari textile with structurally believable khaddar body and silk-floss embroidery

[SUBTYPE CHOICE] clearly behaves as Phulkari, Bagh, Chope, or Sainchi and follows that subtype fully

[MAIN MOTIF OR SCENE] becomes stitch-built rather than drawn or printed

[GROUND COLOR] remains structurally important as khaddar, not empty background

[THREAD FIELD] feels luminous through pat silk but remains embroidery-real, not synthetic

[CULTURAL TONE] may lean toward wedding, trousseau, gifting, ceremony, domestic memory, birds, animals, or daily-life scene, but must remain structurally Phulkari

Keep:

khaddar base memory

pat silk light response

reverse-darning logic

subtype-specific field behavior

women-led trousseau memory

belt-overlap identity

whole-cloth coherence

Avoid:

generic Punjabi decorative embroidery

generic floral embroidery

boutique bridalwear styling

arbitrary luxury fabric base

front-side illustrative stitching

subtype-erased “one-look” Phulkari

a detached Haryana craft identity outside the belt

Image-to-Image

Convert this source image into the authentic source-faithful visual logic of **Phulkari from the Haryana side of the wider Punjab-Haryana Phulkari belt**.

Preserve the source image's core cloth type, main composition, and readable structure, but rebuild the entire textile through **khaddar base logic, pat silk floss, and reverse-worked darning-stitch construction**. Replace any generic fashion embroidery, boutique embellishment, printed textile logic, or illustration-based surface design with a true Phulkari cloth system.

If the source image contains floral, geometric, bird, animal, or daily-life imagery, convert all of it into **stitch-built embroidered field logic** rather than leaving it as drawn decoration. If the source image suggests a subtype, reinforce it clearly: make Bagh dense, make Chope ceremonial and disciplined, make Sainchi narrative and life-scene based, or make open Phulkari structurally scattered with active ground.

Do not simply add folk embroidery texture onto a normal garment. Do not keep another fabric grammar underneath. Do not let the base cloth behave like satin, net, georgette, or boutique fashion fabric. Rebuild the whole image so it feels as if the source cloth originally emerged from a real Haryana-side Phulkari tradition: **khaddar-based, pat-embroidered, reverse-built, subtype-aware, ceremonial, and regionally belt-linked**.

V2 — Artisan Translation

Universal Hard Prompt

Create a creative **2D + 3D translation** rooted in the visual grammar of **Phulkari from the Haryana side of the wider Phulkari belt**, but keep the style source-faithful at its structural core. This must not become generic designer Phulkari, generic Punjabi bridal embroidery, or a floral textile fantasy. It should feel like authentic Haryana-side Phulkari intelligence expanding into a richer cloth world while still remaining **khaddar-based, pat-luminous, reverse-darn-constructed, subtype-aware, and trousseau-linked**.

Keep the native Phulkari engine intact: **khaddar base cloth, pat silk floss, reverse-worked darning stitch, ceremonial and trousseau memory, women-led domestic authorship, and subtype-specific field logic**. Then allow a controlled creative expansion where the cloth gains richer field rhythm, stronger relation between ground and embroidery, clearer texture depth, more articulate motif clustering, and more dimensional textile presence. Depth

may appear only as **thread relief, field density, cloth fold, and stitch-built surface presence**, never as print, painting, or generic fashion embroidery.

Subtype logic must remain clear. If working in **Bagh**, let the cloth feel richly dense and fully field-dominant. If working in **Chope**, maintain strong ceremonial discipline and marriage-cloth structure. If working in **Sainchi**, daily-life or folklore imagery may become more legible, but must still remain embroidery-born. If working in open Phulkari, preserve ground visibility and structural spacing.

Material logic: the khaddar should feel more tactile, and the pat silk should feel more luminous, but the work must still remain clearly hand-led and embroidery-real. The cloth should feel like a textile world, not like designer surface glamour.

Do not make this generic luxury embroidery, fashion-market Phulkari styling, painted floral cloth, or region-erased festive ethnicwear. The final image must feel like Haryana-side Phulkari creatively expanded while still remaining true to **khaddar base, pat silk, reverse-darning structure, subtype logic, trousseau memory, and belt-overlap identity**.

Reusable Variable Template

Create **[SUBJECT / CLOTH TYPE / SCENE]** as a creative **2D + 3D translation** rooted in the visual grammar of **Phulkari from the Haryana side of the wider Phulkari belt**.

Preserve these style-core rules:

- khaddar remains structurally primary
- pat silk remains the luminous thread identity
- reverse-worked darning remains the hidden construction engine
- subtype logic remains explicit
- women-led ceremonial/trousseau memory remains possible
- Haryana remains inside the wider Phulkari belt
- whole-cloth embroidered coherence remains intact

Translate the cloth like this:

[MAIN CLOTH TYPE] becomes a richer Haryana-side Phulkari textile with stronger khaddar and thread presence

[SUBTYPE CHOICE] clearly organizes the field as Phulkari, Bagh, Chope, or Sainchi

[MAIN MOTIF / MAIN SCENE] becomes more articulated but remains stitch-built, not drawn

[GROUND / FIELD RELATION] becomes more textured and spatially alive while staying cloth-based

[THREAD LUMINOSITY] becomes richer without becoming synthetic or metallic

[CULTURAL TONE] may lean toward trousseau, ceremony, gifting, folklore, birds, animals, or daily life while staying structurally Phulkari

Let these become richer:

- field rhythm
- ground-to-thread relation

cloth texture
thread relief
subtype clarity
textile presence

Keep unchanged:

khaddar base memory
pat silk identity
reverse-darning logic
subtype discipline
women-led cloth memory
belt-overlap identity
whole-cloth coherence

Avoid:

generic designer Phulkari
Punjabi bridalwear cliché
arbitrary luxury fabric base
painted florals disguised as embroidery
front-side embroidery logic
subtype collapse
detached Haryana identity

Image-to-Image

Convert this source image into a creative **2D + 3D Haryana-side Phulkari translation** rooted in the wider Phulkari belt tradition.

Preserve the source image's cloth type, main compositional structure, and readable motif or scene, but reconstruct all visible embroidery through **khaddar-based reverse-darning logic and pat silk field behavior**. The result must no longer behave like generic festive embroidery or boutique ethnicwear. Rebuild it through subtype-aware field organization, khaddar ground presence, silk-floss luminosity, and believable embroidery density.

If the source image contains floral, geometric, bird, animal, or daily-life imagery, turn it into a true Phulkari field rather than surface decoration. If the source implies **Bagh**, make the field richly dense; if it implies **Chope**, make it ceremonial and ordered; if it implies **Sainchi**, allow more narrative clarity but still keep it stitch-born; if it implies open **Phulkari**, preserve visible ground and structured spacing.

Do not simply overlay folk embroidery texture on a normal fashion garment. Do not keep another cloth system underneath. Do not let the work drift into generic Punjabi festive embroidery. Rebuild the whole image so it feels as if the source cloth naturally expanded into a richer Haryana-side Phulkari world while preserving **khaddar, pat, reverse-darning, subtype logic, and belt-based identity**.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a believable **full 3D dimensional world** generated from the visual grammar of **Phulkari from the Haryana side of the wider Phulkari belt**, but keep the world governed by Phulkari structure rather than by generic realism or boutique ethnicwear styling. This is not a realistic garment with decorative Phulkari motifs added later. It is a fully dimensional cloth world in which **khaddar base body, pat silk luminosity, reverse-worked darning logic, subtype-based field behavior, women-led trousseau memory, and Haryana's place inside the wider Phulkari belt** have become materially real.

Convert the entire style system into dimensional form without losing its laws. The cloth must still feel like **khaddar carrying silk embroidery**, not like smooth luxury fashion fabric. The embroidery must still feel structurally tied to reverse darning, even if the viewer is seeing the finished front. The field must still behave according to subtype: dense Bagh, ceremonial Chope, open Phulkari, or narrative Sainchi.

Material logic: let khaddar texture, thread relief, silk sheen, and cloth folds become tactically and visually convincing. The embroidery should sit in and on the cloth as real stitched labor, not as printed ornament. The light response of pat silk should feel bright but still textile-specific, never plastic or metallic.

Cultural logic: the cloth should still carry the memory of marriage, gifting, women's domestic authorship, and intergenerational making. Even as the image becomes more dimensional, it must never feel like generic fashion embroidery detached from trousseau culture.

Do not make this into generic Punjabi bridalwear realism, designer ethnic luxury, smooth embroidered boutique fabric, or floral glamour cloth with folk branding. The final image must feel like a fully dimensional Haryana-side Phulkari world: **khaddar-based, pat-luminous, reverse-darn-structured, subtype-aware, ceremonial, and belt-linked**.

Reusable Variable Template

Create **[SUBJECT / CLOTH TYPE / SCENE]** as a believable **full 3D dimensional world** generated from the visual grammar of **Phulkari from the Haryana side of the wider Phulkari belt**.

Style system that must remain unchanged:

khaddar remains the structural base

pat silk remains the luminous thread identity

reverse-darning remains the hidden construction logic

subtype structure remains active
women-led trousseau memory remains possible
Haryana remains inside the wider Phulkari regional belt
the whole cloth belongs to one true Phulkari system

Translate the cloth like this:

[MAIN CLOTH TYPE] becomes a fully dimensional Haryana-side Phulkari textile with real khaddar body and silk embroidery presence

[SUBTYPE CHOICE] clearly governs coverage, structure, and field behavior

[MAIN MOTIF OR SCENE] becomes materially real while still remaining embroidery-born

[GROUND / EMBROIDERY RELATION] becomes tactile and convincing without losing subtype logic

[THREAD RESPONSE TO LIGHT] becomes rich and believable but remains pat-silk-like, not synthetic

[CULTURAL TONE] may lean toward ceremony, trousseau, gifting, folklore, birds, animals, or daily life while staying structurally Phulkari

Increase:

cloth tactility
thread relief
field realism
khaddar texture
subtype presence
ceremonial cloth-world realism

Do not lose:

khaddar base memory
pat silk identity
reverse-darning logic
subtype discipline
trousseau and women-led cloth memory
belt-overlap identity
whole-cloth coherence

Avoid:

generic festive embroidery realism
Punjabi bridalwear cliché
designer boutique styling
smooth luxury fabric base
painted/printed florals
subtype collapse
detached Haryana invention

Image-to-Image

Convert this source image into a believable **full 3D Haryana-side Phulkari world** generated from the wider Phulkari belt tradition.

Preserve the source image's cloth type, basic composition, and main motif or scene readability, but rebuild every major element through **khaddar base logic, pat silk luminosity, reverse-darning structure, and subtype-based field behavior**. Replace generic embroidery, boutique ethnicwear, or fashion-surface styling with a true Phulkari cloth system.

If the source image contains floral, geometric, bird, animal, or daily-life imagery, rebuild it as real Phulkari embroidery integrated into the cloth. If the source suggests **Bagh**, make the dense embroidered field materially convincing. If it suggests **Chope**, build strong ceremonial order and wedding-cloth discipline. If it suggests **Sainchi**, turn the scene into believable stitched daily-life imagery. If it suggests open **Phulkari**, preserve visible khaddar and structured motif spacing.

Do not merely add embroidery realism to a generic garment. Do not keep another fabric grammar underneath. Do not make the cloth into generic Punjabi or North Indian festive embroidery. Rebuild the whole image so it feels as if the source cloth originally emerged from a fully dimensional Haryana-side Phulkari tradition: **khaddar-based, pat-embroidered, reverse-built, subtype-aware, ceremonial, and structurally part of the wider Phulkari belt**.
