

Rogan - Gujarat

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic visual logic of Rogan art from Kutch, Gujarat, especially the Nirona lineage tradition. Treat this as a rare oil-paste cloth-painting system, not as generic painted textile, not as embroidery, not as block print, not as fashion print, and not as ordinary floral decoration on fabric.

Build the image as if it belongs to an actual Rogan-painted cloth. The support must be dark cloth, such as black, deep red, or deep blue, used as a contrast field for bright Rogan colors. The design must feel created from thickened oil-based Rogan paste, traditionally castor-oil based, applied by hand with a stylus or metal rod. The line must not behave like brushstroke. It must feel thread-like, suspended, trailed, continuous, and hand-controlled.

Use true Rogan construction logic: create the design as if one half is first drawn and then folded to create a mirrored transfer on the other half. The resulting composition must feel symmetry-built from a central axis, not merely decorative or casually balanced. The image should clearly preserve the sense of hand-made mirrored growth.

Use source-faithful Rogan motif logic where appropriate: floral vines, peacocks, Tree of Life, animals, and folk-geometric units should all feel generated by Rogan line behavior and mirror balance rather than by generic textile ornament. Filled color areas must remain enclosed by the trailed line and should feel vivid against the dark cloth.

The whole image must feel like a Rogan-painted textile object, not a painting pretending to be Rogan. If borders, fields, corners, product edges, or cloth placement are visible, all of them must support cloth-surface logic, oil-paste line tension, and Kutch/Nirona craft identity.

Do not make it brush-painted folk art. Do not make it digitally printed pattern. Do not make it embroidery-like. Do not make it just symmetric floral art on dark fabric. Do not let Tree of Life alone stand in for the whole style.

Reusable Variable Template

Create [SUBJECT / OBJECT / PRODUCT / SCENE] in the authentic visual logic of Rogan art from Kutch, Gujarat.

Treat the style as a Kutch-specific oil-paste cloth-painting system from Nirona, not as generic painted fabric.

Core style system to preserve:

dark-cloth support as contrast field
thick oil-based Rogan paste identity
thread-like stylus-trailed line
half-design then fold-transfer mirror symmetry
vivid bounded color fills
floral / peacock / animal / folk-geometric motif logic shaped by line behavior
cloth-product surface identity
whole-frame consistency so every visible element belongs to the same Rogan-painted world

Translate the image like this:

[MAIN MOTIF / MAIN FORM] becomes a Rogan-painted design built from filament-like line and mirrored balance

[SECONDARY MOTIFS / SUPPORTING FORMS] also obey the same symmetry and line-tension logic

[FILL AREAS] remain enclosed, vivid, and contrast-driven against dark cloth

[EDGES / BORDERS / PRODUCT SHAPE / CLOTH SURFACE] support real painted-textile placement rather than generic graphic layout

Keep:

oil-paste line tension
mirror-built symmetry
dark-ground contrast
cloth-surface identity
Rogan-specific motif generation
Kutch/Nirona lineage reading

Avoid:

ordinary brush-painted ornament
fashion print styling
embroidery or appliqué look
vector-clean decorative symmetry
generic floral art on dark fabric
one Rogan motif inside an unrelated visual language

Image-to-Image

Convert this source image into the authentic visual world of Rogan art from Kutch, Gujarat.

Preserve the source image's main subject relationships, composition, and readability, but rebuild the entire image through Rogan oil-paste cloth-painting logic. Replace ordinary surface treatment with dark-cloth support. Replace normal paint behavior with thickened Rogan paste. Replace brush-like or printed line with stylus-trailed thread-like line. Replace casual symmetry with true half-design mirror-transfer logic.

If the source image contains floral, animal, peacock, tree, or decorative forms, reconstruct them so they feel born from Rogan line tension and fold-built mirrored organization. If the

source contains larger scene elements, convert them into cloth-surface-compatible Rogan design language instead of realism-first illustration. Filled color zones must remain bounded inside the line and should read as vivid, luminous fields against the dark cloth.

Retain the sense that this is a real painted textile object from Nirona lineage practice, not a decorative pattern simulation. The final image must feel like a Rogan-painted cloth where every important form is governed by oil-paste material, stylus line, and mirror logic.

Do not turn it into fashion print, embroidery, generic folk painting, or digital surface pattern. Rebuild the full image so it feels authored by Rogan grammar.

V2 — Artisan Translation

Universal Hard Prompt

Create a creative 2D + 3D image world rooted in Rogan art from Kutch, Gujarat. Treat this as a rare oil-paste painted-cloth system from Nirona expanded into a richer visual language, not as generic painted textile, not as ethnic décor, and not as ornamental symmetry for its own sake.

Keep the style source-rooted: dark-cloth support, thick oil-based Rogan paste, stylus-trailed thread-like line, fold-transfer mirror symmetry, vivid enclosed color, and motif logic shaped by the line itself. The world must still feel Rogan-first. Do not let visual richness replace oil-paste logic.

Allow the image to become more compositionally alive while preserving authentic Rogan construction. The central axis may become stronger. Mirrored halves may become more spatially dynamic. Floral, peacock, tree, animal, and folk-geometric motifs may become more layered and internally rich, but they must still feel generated through hand-trailed paste and folded symmetry rather than through generic illustration.

The line must remain filament-like and hand-suspended. The fill must remain enclosed and bright against dark cloth. The cloth should still feel like a real painted textile object, not a poster, mural, or digital print. If product context appears, the design must still sit on cloth logically and remain faithful to painted-surface placement.

The whole frame must feel like Rogan intelligence is expanding into a richer 2D + 3D painted-cloth field without losing Kutch/Nirona lineage specificity.

Do not make it luxury textile branding. Do not make it mural painting. Do not make it embroidery-inspired. Do not turn it into merely symmetric floral graphics on dark fabric. Do not let process-memory disappear behind richness.

Reusable Variable Template

Create [SUBJECT / OBJECT / PRODUCT / SCENE] as a creative 2D + 3D translation rooted in Rogan art from Kutch, Gujarat.

Preserve these style-core rules:

- dark cloth remains the support field
- oil-paste identity remains primary
- thread-like stylus line remains active
- mirror-fold symmetry stays structural
- bounded vivid color fill stays subordinate to line
- motifs remain generated by Rogan process
- cloth-product identity stays legible
- the whole frame remains inside one Rogan-painted world

Translate the image like this:

- [MAIN MOTIF / MAIN STRUCTURE] becomes a richer Rogan-painted presence shaped by line tension and mirrored balance
- [SECONDARY MOTIFS / SUPPORTING FIELDS] also obey the same process-shaped symmetry
- [FILL ZONES / COLOR FIELDS] remain vivid, enclosed, and dark-ground dependent
- [EDGES / BORDERS / PRODUCT SURFACES / CLOTH AREAS] support painted-textile placement rather than graphic poster logic

Let these become richer:

- central-axis strength
- motif layering
- surface depth
- fill articulation
- 2D + 3D cloth-painting presence

Keep unchanged:

- oil-paste behavior
- stylus-line identity
- fold-transfer logic
- dark-ground contrast
- Kutch/Nirona craft specificity

Avoid:

- generic floral symmetry
- fashion textile print
- embroidery look
- vector-like clarity
- mural or poster treatment
- a generic scene decorated with Rogan motifs

Image-to-Image

Convert this source image into a creative 2D + 3D Rogan translation from Kutch, Gujarat.

Preserve the source image's main subject count, composition, and readability, but reconstruct the full image through Rogan oil-paste cloth-painting logic. Replace ordinary painted or printed surfaces with dark-cloth support. Replace normal line with stylus-trailed filament-like paste line. Replace casual decorative balance with true fold-built mirror symmetry.

If the source contains floral, peacock, animal, tree, border, or ornamental forms, rebuild them as Rogan motifs generated through paste tension and mirrored organization. If the source contains larger compositional zones, convert them into cloth-surface-compatible Rogan fields instead of realism-first scenic space. Fill zones should remain enclosed by the line and luminous against the dark base.

The final image should feel like an actual Rogan-painted textile expanded into a richer 2D + 3D field while still staying faithful to the craft's material and process. Every important element must still feel authored by oil-paste, stylus line, and symmetry transfer.

Do not make it generic painted fabric, decorative digital pattern, mural art, or luxury craft styling. Rebuild the full image so it feels generated by Rogan grammar.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a believable full 3D dimensional world generated from Rogan art of Kutch, Gujarat. Treat this as a rare oil-paste painted-cloth system from Nirona translated into reality, not as generic realism, not as decorative textile design, and not as ordinary painted fabric.

The realism must remain fully governed by Rogan grammar. Build the world through dark-cloth support, thick oil-based Rogan paste, thread-like stylus-trailed line, fold-transfer mirror symmetry, vivid bounded color fields, and motif logic shaped by the process itself. Every major form must still feel like it comes from real Rogan-painted cloth intelligence rather than from generic ornament.

The line must remain filament-like and hand-suspended even in realism. The symmetry must still feel transfer-built from a central axis, not just graphically bilateral. The fill must remain contained and contrast-driven against dark cloth. Floral, peacock, tree, animal, and folk-geometric forms must still behave like Rogan motifs rather than like realism-first illustration.

If the design exists on garments, wall hangings, home textiles, or other surfaces, the cloth placement and product identity must remain believable and faithful to painted-textile logic.

The final world should feel like Rogan-painted cloth has become dimensional reality while preserving Kutch/Nirona craft specificity and process memory.

Do not make it a generic luxury textile photograph. Do not make it fashion print. Do not make it embroidery-like. Do not let realism erase the oil-paste, stylus-line, and fold-transfer intelligence. Every major element must still belong to the Rogan system.

Reusable Variable Template

Create [SUBJECT / OBJECT / PRODUCT / WORLD TYPE] as a full 3D realistic dimensional world generated from Rogan art of Kutch, Gujarat.

Style system that must remain unchanged:

- dark-cloth support
- oil-paste material identity
- thread-like stylus-trailed line
- mirror-fold transfer symmetry
- vivid enclosed fill on dark ground
- process-shaped floral / peacock / animal / tree / folk motifs
- cloth-product placement logic
- whole-frame Rogan consistency

Translate the world like this:

- [MAIN MOTIF / MAIN PRODUCT / MAIN SURFACE] becomes a fully dimensional Rogan-painted presence
- [SECONDARY FIELDS / SUPPORTING MOTIFS] become volumetric but still symmetry-built and line-generated
- [FILL ZONES / COLOR AREAS] remain enclosed and contrast-dependent
- [EDGES / CLOTH AREAS / PRODUCT CONTOURS] support real painted-textile behavior rather than poster layout

Increase:

- surface tactility
- light on paste-like line
- cloth-material realism
- mirror-field coherence
- whole-world painted-textile presence

Do not lose:

- oil-paste feel
- filament-like line
- fold-transfer symmetry
- dark-ground contrast
- Kutch/Nirona lineage identity

Avoid:

generic decorated fabric
fashion-print realism
embroidery look
vector-clean symmetry
poster or mural treatment
a realistic world with one Rogan motif inserted

Image-to-Image

Convert this source image into a full 3D realistic Rogan world from Kutch, Gujarat.

Preserve the source image's main composition, subject relationships, and readability, but rebuild all visible elements through Rogan oil-paste cloth-painting grammar. Replace ordinary surfaces with dark-cloth support. Replace normal paint logic with thickened Rogan paste. Replace brush-like line with stylus-trailed thread-like line. Replace decorative bilateral balance with true fold-built mirrored structure.

If the source includes floral, peacock, animal, tree, border, or ornamental forms, reconstruct them as Rogan motifs governed by central-axis symmetry and hand-suspended paste line. If the source includes product surfaces, make them feel like actual painted cloth objects from Kutch/Nirona lineage practice rather than generic decorative textiles.

Maintain vivid enclosed color fields against the dark ground, and preserve the sense that the line holds the color in place. The final result should feel like Rogan-painted cloth has become a believable dimensional reality without losing process-memory.

Do not turn it into luxury textile styling, print design, embroidery, or generic painted fabric. Rebuild the full image so it feels authored by Rogan grammar.
