

Sohrai - Jharkhand

V1 — Authentic Style

Universal Hard Prompt

Create an image in the authentic source-faithful visual logic of **Sohrai mural painting from Jharkhand**, especially the **Hazaribagh harvest-wall tradition**. Treat this as a **ritual wall-painting system made on mud-house walls by women during harvest and festive time**, using **natural earth pigments** and a **prepared white-mud wall surface**. Do not treat it as generic tribal mural art, not as framed folk painting, not as decorative wall design, and not as Khovar marriage-wall painting.

Build the full image as if the mural is born directly from a **mud-house wall**. The wall must feel absorbent, earthen, domestic, and prepared for painting. The image should feel wall-led, not canvas-led. Preserve the logic of a **white mud or light clay preparation layer**, with the mural colors sitting into the wall surface rather than floating above it. Keep the surface matte, mineral, and hand-worked.

Use a true Sohrai palette made from **earth pigments**: white or pale clay, red ochre / gerua, yellow clay, black earth or mineral black, and closely related earthen tones. Do not let synthetic acrylic brightness take over. Do not let blue or green become dominant colors. The mural must feel dug from soil and clay, not mixed from commercial paint.

The content should come from the Sohrai world: **animals, plants, agrarian motifs, line-and-dot rhythm, and geometric mural structures**, all tied to harvest, cattle, fertility, and domestic ritual life. The animals and plants must not behave like naturalistic illustrations. They must behave like mural forms integrated into a wall field. The image should spread across the wall like a living ceremonial surface rather than a centered framed composition.

Marks must feel direct, simple-tool, and handmade. Let the line quality feel compatible with **bamboo brush, twig, cloth swab, finger, or other direct hand-guided tools**. The mural should feel like it was made by hand on a wet-prepared earthen wall, not designed digitally.

Whole-frame rule: if the image includes wall, doorway, house edge, niche, courtyard-side surface, animals, plants, geometric rhythm, empty ground, and surrounding domestic architecture, all of it must belong to one Sohrai wall ecology. The style must not stop at motif transfer. The wall body, pigment body, composition, and domestic context must all become Sohrai.

Do not generate:

- generic tribal mural styling
- framed folk-art composition
- Khovar-style marriage-wall logic
- synthetic wall décor

- clean vector-like graphics
- animal illustration with earthy colors but no wall-body
- contemporary mural branding language

The final image must feel like a **true Sohrai harvest-wall from Jharkhand: mud-house wall, white-prepared surface, natural earth pigments, women-led ritual mural rhythm, and animal-plant-geometric field logic fused into one living wall.**

Reusable Variable Template

Create **[SUBJECT / WALL TYPE / DOMESTIC SCENE]** in the authentic source-faithful visual logic of **Sohrai mural painting from Jharkhand**, treating it as a **harvest-linked ritual wall system on mud-house surfaces.**

Core style system to preserve:

- mud-wall body
- white-mud or pale clay preparation layer
- natural earth pigments
- women-led domestic ritual memory
- harvest / cattle festival identity
- animal / plant / geometric mural rhythm
- handmade simple-tool marks
- wall-field expansion instead of framed composition
- Sohrai distinct from Khovar

Translate the image like this:

- **[WALL / SURFACE]** becomes a real mud-house wall prepared for Sohrai painting
- **[MAIN MOTIFS]** become Sohrai-style mural forms integrated into the wall field
- **[COLOR SYSTEM]** becomes earth-pigment-based and matte, not synthetic
- **[MARK BEHAVIOR]** becomes hand-guided, direct, and wall-responsive
- **[DOMESTIC CONTEXT]** remains part of a Jharkhand house-surface ecology
- **[FULL FRAME]** must read as one ritual wall-world, not motif stickers on a generic wall

Keep:

- wall first
- ritual first
- harvest-linked identity
- natural clay / earth palette
- animals/plants/geometric rhythm as mural field
- simple-tool handmade marks
- whole-wall coherence

Avoid:

- portable painting logic
- decorative pattern wallpaper
- Khovar marriage-wall confusion
- synthetic palette
- polished illustration
- generic tribal art language

Image-to-Image

Convert this source image into the authentic source-faithful visual logic of **Sohrai wall painting from Jharkhand**.

Preserve the source image's main subject count, basic readability, and overall wall or surface arrangement, but rebuild the full image through **mud-wall body, white-mud preparation, natural earth pigments, harvest-linked women-led mural practice, and animal-plant-geometric wall rhythm**. Replace any generic mural, modern wall art, synthetic paint logic, framed composition, or decorative folk styling with a true Sohrai wall system.

If the source image contains a wall, make it a real earthen mud-house wall. If it contains motifs, rebuild them as Sohrai mural forms rather than generic folk shapes. If it contains color, rebuild it with a true earth-pigment logic. If it contains domestic architecture, make that architecture belong to a living Jharkhand wall ecology. If it contains empty areas, let them participate in the mural field instead of acting like neutral background.

Do not simply add earthy motifs to the existing image. Do not keep another painting language underneath. Rebuild the full wall so **surface, pigment, marks, motif rhythm, and domestic wall context all become one authentic Sohrai system**.

V2 — Artisan Translation

Universal Hard Prompt

Create a **creative 2D + 3D translation** of **Sohrai mural painting from Jharkhand**. This is not generic tribal styling, not texture transfer, and not simply placing Sohrai motifs on a wall. It should feel like the full **mud-wall, earth-pigment, harvest-ritual mural grammar** of Sohrai has begun to reorganize the image more powerfully while still remaining source-rooted.

Let the wall stop behaving like passive background and become the main compositional force. Let the mural field spread more decisively. Let animals, plants, geometric motifs, line rhythms, and earth-color zones become more structurally integrated into the full wall image. Let the domestic architecture around the mural feel more deeply absorbed into the painting grammar. But keep the image unmistakably **Sohrai**, not Khovar, and not generic “tribal mural art.”

This version must transform more than surface. Change:

- the **wall-body logic** so the support surface becomes more compositionally active
- the **field organization** so motifs interact as one expanded mural ecology rather than isolated pictures
- the **space construction** so the 2D wall plane and subtle 3D domestic architecture work together as one system
- the **mark logic** so hand-drawn rhythm becomes more visually authored without becoming graphic design
- the **color-body relation** so earth pigments become more structurally expressive while staying matte and mineral
- the **environment logic** so doorway edges, niches, frames, house contours, and empty wall fields all belong to one Sohrai world

Keep the source truth intact:

- mud wall remains primary
- natural earth pigments remain dominant
- harvest/cattle ritual memory remains active
- women-led domestic practice remains implicit
- blue and green must not become major design colors
- Sohrai must stay distinct from marriage-linked Khovar

Do not generate:

- wallpaper-like folk patterning
- vector-clean mural design
- generic tribal-modern wall art
- decorative motif transfer on a generic wall
- synthetic palette enhancement
- Khovar-style scratch/etch marriage-wall logic

The final result must feel like **Sohrai’s wall-field grammar has reauthored the full image through mud-wall body, earth pigments, ritual rhythm, and domestic mural expansion.**

Reusable Variable Template

Create [SUBJECT / WALL TYPE / DOMESTIC SCENE] as a creative 2D + 3D translation of **Sohrai mural painting from Jharkhand.**

Preserve these style-core rules:

- mud-wall support remains primary
- white preparation layer remains active
- earth pigments remain matte and mineral
- harvest-wall identity remains stronger than decoration
- animal / plant / geometric mural field remains structurally Sohrai
- women-led domestic ritual memory remains present
- the image must be rebuilt as a wall system, not decorated after the fact

Translate the image like this:

- **[WALL / SURFACE]** becomes a stronger active mural body
- **[MAIN MOTIFS]** become more structurally woven into a unified wall field
- **[DOMESTIC ARCHITECTURE]** becomes more integrated into the Sohrai grammar
- **[MARKS / RHYTHMS / PATTERN FIELDS]** become more compositionally decisive while staying handmade
- **[COLOR / PIGMENT BODY]** becomes richer but still earth-born and matte
- **[FULL FRAME]** must feel reauthored by Sohrai wall logic, not just painted over

Mandatory transformation rule:

Do not transfer only motif, texture, or palette.

Also transform:

- wall-body behavior
- composition structure
- mark rhythm
- space relation between wall and house
- environment logic
- full mural field organization

Let these become richer:

- mural spread
- wall-field integration
- mark cadence
- domestic architectural absorption
- earthen pigment body
- full-surface coherence

Keep unchanged:

- mud wall first
- harvest-wall identity
- earth pigment truth
- Sohrai not Khovar
- women-led ritual memory
- whole-frame wall coherence

Avoid:

- framed art logic
- wallpaper design
- generic mural graphics
- decorative ethnic surface treatment
- synthetic or overclean rendering
- marriage-chamber Khovar cues

Image-to-Image

Convert this source image into a **creative 2D + 3D Sohrai wall world from Jharkhand**.

Preserve the source image's main subject count, wall or architectural arrangement, and overall readability, but rebuild the full frame through **mud-house wall body, white preparation layer, natural earth pigments, harvest-linked ritual mural rhythm, and women-led domestic wall-painting logic**. Let the image become more compositionally transformed than a literal wall reference, while staying fully rooted in Sohrai.

Rebuild the wall so it actively organizes the image. Rebuild motifs so they become part of one expanded mural field. Rebuild domestic edges, niches, or openings so they participate in the same wall grammar. Rebuild marks so they feel handmade, direct, and mural-born. Rebuild the pigment logic so all colors feel mineral, matte, and earth-derived.

Do not just apply Sohrai motifs onto the existing image. Do not keep another mural logic underneath. Rebuild the full wall-world so **wall body, field rhythm, motif integration, domestic context, and pigment behavior all become one Sohrai system**.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a **full 3D realistic dimensional world** generated from **Sohrai mural painting from Jharkhand**. This is not a realistic house with Sohrai motifs painted on later. It is a believable world in which **mud-house wall body, white-mud preparation, natural earth pigments, harvest-linked ritual painting, women-led domestic authorship, and animal-plant-geometric mural rhythm** govern every visible element.

Translate the full style-system into reality. Every part of the frame must adapt:

- walls must behave like real mud-house surfaces prepared for painting

- pigments must behave like earth and clay integrated into the wall, not acrylic paint on plaster
- motifs must behave like mural fields, not isolated illustrations
- domestic architecture must behave like a living support for ritual wall painting
- shadows, surface depth, and wear must support wall-body truth rather than generic realism
- the environment must feel like a real Jharkhand domestic harvest-wall ecology

This version must not stop at realistic texture. It must rebuild:

- **wall-body logic** so support becomes physically and visually credible
- **pigment-body logic** so color remains matte, mineral, and embedded
- **space** so the 3D house-world still feels governed by mural-surface priorities
- **mark behavior** so the wall retains direct handmade authorship even in realism
- **domestic environment** so thresholds, niches, courtyard edges, and adjoining surfaces all belong to the same ritual mural ecology
- **whole-frame coherence** so nothing looks like ordinary realism plus painted folk motifs

If people appear, they must belong to harvest-time domestic mural practice or the living house-world around it. If no people appear, the environment must still feel actively inhabited, renewed, and ritually charged.

Do not generate:

- generic village-wall realism
- wall décor realism
- synthetic paint realism
- framed-painting logic on a realistic wall
- Khovar-like marriage-wall confusion
- contemporary mural branding or installation art

The final image must feel like **a real Jharkhand mud-house world in which Sohrai mural grammar has become materially and spatially believable reality.**

Reusable Variable Template

Create **[SUBJECT / WALL TYPE / DOMESTIC SCENE]** as a **full 3D realistic dimensional world** generated from **Sohrai mural painting from Jharkhand.**

Style system that must remain unchanged:

- mud-wall body remains primary
- white preparation layer remains active
- natural earth pigments remain matte and embedded
- harvest-wall identity remains central

- women-led domestic ritual memory remains present
- animal / plant / geometric mural field remains structurally Sohrai
- the entire frame must be rebuilt through one wall-system grammar

Translate the image like this:

- **[WALL / HOUSE SURFACE]** becomes a believable prepared mud-wall body
- **[MOTIF SYSTEM]** becomes a real mural field integrated into the architecture
- **[DOMESTIC EDGES / OPENINGS / NICHES]** become part of the same ritual wall ecology
- **[PIGMENT / COLOR BODY]** becomes physically convincing earth-based surface behavior
- **[SURFACE DEPTH / WEAR / SHADOW]** becomes realistic without breaking mural primacy
- **[FULL ENVIRONMENT]** becomes a coherent harvest-wall world rather than ordinary realism

Increase:

- wall tactility
- pigment-body realism
- mural-field integration
- domestic spatial completion
- mark-material truth
- environmental coherence

Do not lose:

- mud wall first
- earth pigment truth
- harvest ritual identity
- Sohrai not Khovar
- women-led domestic authorship
- whole-frame mural ecology

Avoid:

- realistic wall décor
- synthetic village mural
- poster-like motifs on a wall
- decorative ethnic branding
- marriage-wall confusion
- ordinary realism with Sohrai graphics added on top

Image-to-Image

Convert this source image into a **full 3D realistic Sohrai wall world from Jharkhand**.

Preserve the source image's main subject count, overall architectural arrangement, and readable action structure, but rebuild every visible element through **prepared mud-wall body, white clay coating, natural earth pigments, harvest-linked ritual mural spread, and women-led domestic wall-painting logic**. Replace generic walls, generic paints, decorative mural language, or generic village realism with a full Sohrai wall ecology.

Rebuild the wall so it becomes the true physical support of the image. Rebuild motifs so they integrate into the wall field. Rebuild color so it behaves like mineral earth pigment. Rebuild domestic architectural elements so they belong to a living house-surface world. Rebuild shadows and surface depth so they strengthen wall-body realism rather than making the mural float away from the support.

Do not simply add realistic texture to a folk mural. Do not keep the original base-world underneath. Rebuild the full frame so **wall, pigment, mark, motif rhythm, domestic architecture, and environment all become one believable Sohrai reality**.
