

Sozni - Kashmir

V1 — Authentic Style

Universal Hard Prompt

Create an image in pure authentic source-truth **Sozni / Kashmir**.

Treat this as a **fine needle Kashmiri embroidery system**, not as generic luxury floral styling, not as print, not as weave, and not as thick decorative embroidery.

Build the whole image through real Sozni intelligence:

fine needle-built surface order,
Sozni-stitch delicacy,
clean reinforcing stitched line behavior,
double-sided neatness and refinement,
buti-led planning,
hashia border logic,
kingri running-border rhythm,
controlled field spacing,
nature-derived Kashmiri motif intelligence,
and refined shawl-or-garment surface elegance.

The image must feel as if it genuinely belongs inside the original Sozni tradition.

Use true Sozni motif grammar:

buti,
chinar leaf,
cypress,
almond,
grapes,
pomegranate,
cotton seed,
iris,
narcissus,
lotus,
daffodil,
pansy,
lily,
rose,
and related Kashmiri floral-paisley-natural motif families,
all translated through fine stitched precision, not through painted realism or printed design.

Line behavior must remain source-faithful:

fine,

controlled,
needle-built,
clean,
repeatable,
delicate,
and structurally clear.

Do not make the motif edges look printed, digitally stamped, woven, chain-stitched, or machine embroidered.

The embroidery must feel organized through field-and-border planning:

the main field,
the buti distribution,
the border containment,
and the smaller running ornamental rhythm must all work together as one surface-authored system.

If the image uses sparse spread, it should feel like **Jaaldar** or **Butidaar** logic.

If it uses dense coverage, it should feel like **Jamawaar** logic.

If it emphasizes edge or pallu zones, it should feel like **Palladar** logic.

Do not mix density randomly.

Material behavior must remain refined:

soft textile ground,
fine surface embroidery,
quiet richness,
no heavy raised thread mass,
no coarse crewel-like texture,
no thick rustic stitch body,
no boutique fashion embellishment.

If figures appear, they must not remain normal realistic humans with Sozni applied afterward.

They must become **needle-readable Sozni-born presences**:

clean reduced facial logic,
surface-oriented drapery logic,
refined silhouette behavior,
and motif-and-border-aware form organization.

If environment appears, it must also obey Sozni order, not generic realism.

Do not make:

generic Kashmiri luxury shawl mood,
printed paisley pattern,
fashion-editorial styling,
Aari/chain-stitch heaviness,
Kani weave behavior,
machine-perfect boutique embroidery,
or realism with embroidered garments added later.

The final result must feel like the source Sozni tradition itself authored the whole image.

Reusable Variable Template

Create **[SUBJECT / SCENE / TEXTILE / GARMENT / WORLD]** in pure authentic source-truth **Sozni / Kashmir**.

Treat the style as a fine needle embroidery system built from:

Sozni-stitch delicacy,
needle-built contour logic,
double-sided refinement,
buti intelligence,
hashia and kingri border planning,
controlled field spacing,
nature-derived Kashmiri motif vocabulary,
and refined textile-surface authorship.

Core style system to preserve:

fine-needle identity,
clean stitched line,
surface elegance,
field-and-border organization,
coverage discipline,
motif-through-stitch logic,
and quiet Kashmiri refinement.

Translate the image like this:

[MAIN FIGURE / MAIN TEXTILE SURFACE / MAIN IMAGE CORE] becomes
Sozni-authored through fine stitched line and buti/border discipline.

[SECONDARY FIGURES / OBJECTS / MOTIFS] become supporting Sozni-built elements
obeying the same refined needle logic.

[ENVIRONMENT / BACKGROUND / SURROUNDING SPACE] must also inherit Sozni
ordering instead of staying generic realism.

Keep:

needle delicacy,
clean line control,
motif spacing,
refined surface behavior,
border-field structure,
coverage clarity,
and branch-specific elegance.

Avoid:

generic floral embroidery,
printed shawl pattern,

machine embroidery feel,
luxury fashion editorial mood,
Aari or crewel heaviness,
Kani woven pattern behavior,
generic realism with decorative Sozni added later,
or border-only styling.

The final image must feel like true Sozni itself generated the whole frame.

Image-to-Image

Convert this source image into pure authentic source-truth **Sozni / Kashmir**.

Preserve the source image's core subject count, action relationship, main object identity, and readable composition purpose,
but rebuild the whole image through genuine Sozni embroidery intelligence.

Replace ordinary image logic with:
fine needle-built line,
Sozni-stitch delicacy,
clean reinforcing stitch behavior,
double-sided refinement memory,
buti-led motif planning,
hashia border order,
kingri running rhythm,
controlled field spacing,
and refined Kashmiri surface elegance.

Do not simply place Sozni on a shawl or garment.
Do not merely add paisleys or flowers.
Do not make the result look printed.
Do not keep generic realism underneath and decorate the textile afterward.

If the source contains figures, rebuild them as Sozni-born presences rather than realistic humans.

If the source contains objects or environment, rebuild them through the same fine stitched surface intelligence.

Do not let the border become more Sozni than the main image core.

The final result must feel like the source image has been fully re-authored by the original Sozni system.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in **V2 = authentic handcrafted dimensional translation of Sozni / Kashmir.**

Keep the same deep source grammar unchanged:

fine needle embroidery identity,
Sozni-stitch delicacy,
clean reinforcing stitched line,
double-sided refinement memory,
buti-and-border planning,
nature-derived Kashmiri motif intelligence,
and refined shawl-or-garment surface order.

Now translate that same grammar into believable handcrafted dimensional form.

This is not generic 3D textile realism.

This is not luxury Kashmiri fashion photography.

This is not printed pattern on soft cloth.

This is not thick raised embroidery.

This is not Aari, crewel, or machine embroidery.

This is not realism with Sozni decoration added later.

Dimensionality must come from Sozni itself:

through layered stitched line,
through border-field separation,
through motif density hierarchy,
through thread-over-ground behavior,
through textile-body relation,
through sparse-versus-dense coverage logic,
and through refined surface articulation.

Allow:

slightly stronger textile thickness,
more tactile stitched presence,
better separation between main field and border,
clearer motif layering,
controlled relief of thread over cloth,
stronger objecthood,
and more believable handcrafted surface depth.

But keep the dimensionality **fine and controlled**.

Do not make the embroidery bulky.

Do not create heavy thread masses.

Do not create coarse ornamental projection.
Do not let the style lose delicacy.

If the image includes figures, they must already become style-born:
faces simplified into refined stitch-compatible logic,
bodies organized through surface refinement,
drapery behaving as motif-bearing Sozni space,
silhouettes controlled by border-field intelligence,
not by generic realism.
If environment appears, it must also begin to inherit Sozni ordering.

The whole image must feel like Sozni has entered handcrafted dimensional presence,
not like a realistic world has been decorated with Kashmiri embroidery.

Reusable Variable Template

Create **[SUBJECT / SCENE / TEXTILE / GARMENT / WORLD]** in **V2 = authentic handcrafted dimensional translation of Sozni / Kashmir.**

Preserve the unchanged deep source core:
fine-needle identity,
Sozni-stitch line logic,
double-sided refinement memory,
buti-and-border planning,
refined motif spacing,
coverage discipline,
and elegant Kashmiri textile order.

Translate the image like this:

[MAIN CORE] becomes a dimensionally readable Sozni-built surface or presence with finer tactile stitch depth.

[SECONDARY ELEMENTS] become supporting handcrafted Sozni forms obeying the same line delicacy and spacing logic.

[ENVIRONMENT / BACKGROUND / SURROUNDING SPACE] gains Sozni-authored structure rather than generic realism.

Increase:
stitched tactility,
border-field separation,
motif layering,
surface depth,
textile thickness,
refined material presence,
and handcrafted readability.

Do not lose:

needle delicacy,
clean stitched contour,
motif discipline,
coverage logic,
surface elegance,
and branch-specific quiet refinement.

Avoid:

generic artisan luxury textile look,
thick embroidery mass,
machine-perfect boutique finish,
printed or woven behavior,
Aari/crewel heaviness,
normal realistic figures with decorated garments,
or a realistic environment stronger than the embroidery grammar.

The final image must feel like authentic Sozni translated into handcrafted dimensional presence.

Image-to-Image

Convert this source image into **V2 authentic handcrafted dimensional Sozni / Kashmir**.

Preserve the source image's main identity, action, and readable structure,
but rebuild the whole image through Sozni's fine needle grammar translated into dimensional presence.

Replace ordinary image logic with:

needle-built contour,
Sozni-stitch delicacy,
double-sided neatness memory,
buti planning,
hashia/kingri border-field organization,
controlled density behavior,
and refined Kashmiri stitched elegance.

Allow:

more tactile stitched depth,
clearer thread-over-ground relation,
slightly stronger material articulation,
better border separation,
clearer sparse-versus-dense field behavior,
and more believable handcrafted textile presence.

Do not:

turn it into a luxury fashion image,

thicken the embroidery into coarse mass,
make it look printed,
make it behave like Kani weave,
make it behave like Aari chain-stitch,
or keep the figures and environment realistic while only the textile changes.

Rebuild all visible elements so they feel born from Sozni's own surface intelligence.
The final result must feel like the source image has entered a handcrafted dimensional Sozni world.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in **V3 = fully resolved believable real-world 3D translation of Sozni / Kashmir.**

This must become a fully embodied dimensional world,
but it must still be ruled by the same Sozni grammar:
fine needle-built line,
Sozni-stitch delicacy,
double-sided refinement memory,
buti-and-border planning,
nature-derived Kashmiri motif intelligence,
coverage discipline,
and refined surface elegance.

This is **not** a premium fashion remix.

This is **not** a cinematic makeover.

This is **not** luxury realism with Sozni accents.

This is **not** a campaign image.

This is **not** realism plus paisleys.

This is the same authentic Sozni system translated into its most complete believable form.

Increase:

full material clarity,
stronger stitched-surface believability,
stronger motif hierarchy,
stronger field-and-border coherence,
stronger object presence,
stronger spatial completion,
stronger figure-ground separation,
stronger focal hierarchy,
and stronger whole-frame control.

But do not introduce a second visual language.
Do not let premium finish overpower stitch logic.
Do not let fashion styling replace branch intelligence.
Do not let the environment become more realistic than the Sozni-built core.
Do not let the embroidery survive only in garments, borders, or accessories.

V3 depth must come from Sozni itself:
through fine stitched surface articulation,
through motif structure,
through border-field orchestration,
through coverage intelligence,
through textile-ground realism,
through quiet but decisive material completion,
not through generic cinematic lighting or luxury ad mood.

If figures appear, they must still remain Sozni-born:
refined reduced facial logic,
surface-led drapery,
needle-readable silhouette control,
motif-aware body organization,
and branch-authored elegance.
If objects or environment appear, they must also obey the same Sozni grammar.

The final result must feel like Sozni itself has become a fully resolved believable world,
not like reality has been coated with Kashmiri embroidery.

Reusable Variable Template

Create **[SUBJECT / SCENE / TEXTILE / GARMENT / WORLD]** in **V3 = fully resolved believable real-world 3D translation of Sozni / Kashmir.**

Keep the same unchanged source core:
fine-needle identity,
Sozni-stitch delicacy,
clean reinforcing stitched line,
double-sided refinement memory,
buti-and-border organization,
motif discipline,
coverage logic,
and refined Kashmiri surface elegance.

Translate the image like this:
[MAIN IMAGE CORE] becomes a fully embodied Sozni-authored presence with believable stitched material reality.

[SECONDARY ELEMENTS] become equally style-born, obeying the same needle-built contour and border-field intelligence.

[ENVIRONMENT / BACKGROUND / SPACE] becomes a complete inhabitable world still governed by Sozni surface logic, not generic realism.

Increase:

material-light interaction,
stitched-surface clarity,
object presence,
motif hierarchy,
field completion,
environmental coherence,
focal control,
and whole-frame completion.

Do not lose:

delicacy,
line precision,
motif planning,
border-field discipline,
quiet refinement,
and source-authentic branch identity.

Avoid:

premium fashion tableau,
campaign-photo mood,
generic cinematic polish,
printed paisley look,
machine embroidery feel,
thick embroidery mass,
generic realism with Sozni garments,
or any second visual language stronger than the Sozni system.

The final image must feel like the same Sozni grammar fully embodied into believable reality.

Image-to-Image

Convert this source image into **V3 fully resolved believable real-world Sozni / Kashmir**.

Preserve the source image's main purpose, subject count, action logic, and readable composition,
but rebuild every visible element through Sozni's authentic fine needle grammar fully embodied.

Replace ordinary realism with:

needle-built contour,

Sozni-stitch delicacy,
double-sided neatness memory,
buti-led motif intelligence,
hashia and kingri organization,
controlled density behavior,
and refined Kashmiri stitched surface order.

Expand the image into:
fully believable material presence,
clear field-and-border hierarchy,
strong stitched-surface realism,
full object presence,
full environmental completion,
clear spatial separation,
and strong whole-frame coherence.

Do not merely decorate fabric.
Do not make a premium shawl ad.
Do not keep generic realistic people, space, or mood.
Do not let realism replace the stitch system.
Do not let the border become the only strong carrier.
Do not let V3 become a more glamorous cousin of V1.

Rebuild the whole image so it feels like authentic Sozni itself has become a complete believable lived image-world.
