

papier-mâché - Puducherry

V1 — Authentic Style

Universal Hard Prompt

Create a fully self-contained handcrafted object image in the pure authentic source-truth visual grammar of Papier-mâché craft from Puducherry.

Build the object from real paper-pulp composite logic. The result must feel pulp-born and modeled, not surface-decorated. Use lightweight composite mass, hand-shaped form, softened contour, statue or toy or figurine readability, finished handmade surface, and clear object completion as the primary generators of the image.

Keep the object close to true source behavior: a handcrafted papier-mâché statue, toy, figurine, or related decorative display object from the Puducherry papier-mâché branch. The object should feel compact to medium-scale, hand-built, lightweight, materially coherent, and clearly modeled from composite paste rather than carved from a solid material.

Let the form come from built-up mass, contour shaping, and object-readability. Surface treatment may support the object, but the body must remain stronger than decoration. Keep the finish handmade, smoothed, and object-complete, not industrial and not hyper-polished.

Do not make it generic school paper craft, torn-paper collage, cardboard craft, plaster statue, cement cast, terracotta object, carved wood object, glossy ceramic object, or a normal figurine with paper texture added later.

Reusable Variable Template

Create [OBJECT / OBJECT-GROUP / STATUE / TOY / FIGURINE / DISPLAY ARTICLE] in the pure authentic source-truth visual grammar of Papier-mâché craft from Puducherry.

The full result must be built from real paper-pulp composite logic:
lightweight modeled mass,
hand-built body,
softened contour transitions,
clear silhouette,
statue or toy or figurine readability,
finished handmade composite surface,
and object completion through shaping rather than carving.

Show [MAIN OBJECT PURPOSE / SUBJECT / ARRANGEMENT / DISPLAY CONDITION].
Keep the result source-faithful, modeled, composite-bodied, and object-first. Let the form

come from built-up papier-mâché body logic, not from surface graphics or decorative tricks. The object should feel like a real handmade paper-compound article from the Puducherry craft branch.

If detail is needed, use modeled refinement, contour clarification, light surface finishing, or secondary painted accents only after the body is already convincing.

Do not turn it into school craft, paper collage, plaster or cement imitation, carved wood logic, terracotta logic, plastic toy logic, or a normal object with paper texture pasted on top.

Image-to-Image

Use the input image only for object identity, broad silhouette intention, arrangement, and function. Rebuild the full result in the pure authentic source-truth visual grammar of Papier-mâché craft from Puducherry.

Transform the entire object so it feels physically made from paper-pulp composite mass. Replace the full material and form system with true papier-mâché behavior:
lightweight built-up body,
modeled form,
softened handmade contour,
statue or toy or figurine readability,
finished composite surface,
and clear handcrafted object completion.

Preserve the broad object role, but make the result feel like a real handmade papier-mâché object from Puducherry, not a generic figurine or decorative object with paper effects.

Do not apply wrinkled paper texture only. Do not keep plaster, cement, plastic, terracotta, wood, ceramic, or generic product logic underneath. The object must become pulp-born and modeled in its structure, contour, and surface behavior.

V2 — Artisan Translation

Universal Hard Prompt

Create a fully self-contained handcrafted object image in the authentic handcrafted dimensional translation of Papier-mâché craft from Puducherry.

Do not treat this as generic 3D uplift. Keep the same source papier-mâché grammar intact and deepen it through richer handcrafted object-depth. The result must still be built from paper-pulp composite body, lightweight modeled mass, softened handmade contour, statue or toy or figurine readability, and finished composite-surface logic, but now with stronger

tactile presence, clearer mass separation, more readable modeled depth, and stronger handcrafted objecthood.

Use real papier-mâché behavior:
lightweight composite body,
modeled form,
soft contour transitions,
clear silhouette,
finished handmade surface,
and believable built-up object presence.

Increase dimensional readability through stronger volume articulation, clearer contour hierarchy, better front/mid/back object clarity, more tactile composite presence, and stronger modeled-body coherence, but only through papier-mâché logic. It should feel like artisans from the same Puducherry branch expanded the same style into richer object embodiment, not like a premium figurine render.

Do not make it a glossy designer object, generic 3D sculpture, plastic toy render, plaster imitation, cement object, or a normal object with handmade paper styling added later.

Reusable Variable Template

Create [OBJECT / OBJECT-GROUP / STATUE / TOY / FIGURINE / DISPLAY FORM] in the authentic handcrafted dimensional translation of Papier-mâché craft from Puducherry.

Build the full result through the same source grammar:
paper-pulp composite body,
lightweight modeled mass,
softened contour,
statue or toy or figurine readability,
finished handmade composite surface,
and object completion through shaping rather than carving.

Show [MAIN OBJECT PURPOSE / SUBJECT / ARRANGEMENT / DISPLAY CONDITION], but deepen the result through stronger tactile modeled presence, clearer mass hierarchy, richer contour readability, more believable built-up relief, and stronger handcrafted dimensional objecthood.

The result must still feel artisan-built from papier-mâché, not premium-commercial, not glossy, and not generic 3D. The dimensionality must come from composite mass, modeled contour, and handmade object logic, not from render polish.

Do not turn it into a collectible plastic toy, showroom figurine, plaster-statue realism, terracotta or wood substitution, or a normal object with paper texture and extra lighting added later.

Image-to-Image

Use the input image only for object identity, arrangement, scale intention, and broad composition. Rebuild the full result in the authentic handcrafted dimensional translation of Papier-mâché craft from Puducherry.

Transform all important visible parts into true papier-mâché logic:
lightweight paper-pulp composite body,
modeled mass,
softened contour transitions,
finished handmade surface,
statue or toy or figurine readability,
and stronger handcrafted dimensional object presence.

Increase contour readability, mass separation, tactile surface embodiment, and object depth while keeping the exact same source grammar unchanged. The final result must feel like a richer artisan-built papier-mâché object from Puducherry, not a generic figurine with craft styling.

Do not apply paper texture only. Do not keep plaster, cement, plastic, terracotta, wood, or generic toy logic underneath. Do not make it premium décor, collectible render, or realism-first object styling with handmade surface cues.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create a fully self-contained complete world in the fully realized believable dimensional-world translation of Papier-mâché craft from Puducherry.

This is not a cinematic makeover and not generic realism with one handmade object inserted. Keep the same source papier-mâché grammar unchanged:
paper-pulp composite body,
lightweight modeled mass,
softened contour-led form,
statue or toy or figurine-capable object logic,
finished handmade composite surface,
and same-language object-world control.

Build a fully resolved papier-mâché object ecosystem or expanded papier-mâché world where every important visible form still obeys the same modeled composite logic. Increase world completion, material believability, object presence, contour clarity, foreground/midground/background resolution, and same-language whole-frame consistency, but do not introduce a second visual language.

The final result must feel like Puducherry papier-mâché itself has become a believable complete dimensional world. If the result expands beyond a single object, all major visible forms must still feel pulp-born, modeled, lightweight, handmade, and object-truthful.

Do not create realistic décor scenes, cinematic prop worlds, collectible-toy renders, plaster-statue realism, luxury gift-object styling, or a normal world with one papier-mâché object placed inside it.

Reusable Variable Template

Create [OBJECT / OBJECT-ECOSYSTEM / MODELED PAPER-COMPOUND WORLD / EXPANDED PAPIER-MÂCHÉ SCENE] in the fully realized believable dimensional-world translation of Papier-mâché craft from Puducherry.

The full result must remain governed by one papier-mâché system:
paper-pulp composite body,
lightweight modeled mass,
softened contour behavior,
statue or toy or figurine object logic,
finished handmade composite surface,
and same-language whole-frame control.

Show [MAIN OBJECT PURPOSE / SUBJECT / ARRANGEMENT / WORLD CONDITION], but make every important visible form belong to the same papier-mâché grammar. Increase full-world completion, object presence, contour readability, material believability, and near/mid/far resolution compared to V2 while keeping the source style-core unchanged.

Do not make it realistic décor styling, cinematic world-building, plastic collectible logic, plaster/cement imitation, or a generic realistic world with one local paper-craft object inserted.

Image-to-Image

Use the input image only for object identity, arrangement, broad world structure, and scene readability. Rebuild the entire result as a fully realized believable dimensional world in Papier-mâché grammar from Puducherry.

Transform every important visible form into one continuous modeled paper-compound system:
lightweight composite body,
built-up mass,
softened handmade contour,
statue or toy or figurine-capable objecthood,

finished composite surface,
and same-language object-world consistency.

Preserve the broad scene meaning, but replace the full image-making system so the entire result belongs to Puducherry papier-mâché logic. The final image must feel like the craft itself has become fully real and fully complete without changing into another style.

Do not stylize one object only. Do not keep generic realism underneath. Do not make a normal display or room scene and add one handmade object later. Do not introduce plastic toy language, plaster-statue realism, or premium décor polish as the dominant language.
