

Garad - West Bengal

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Garad silk sari tradition from West Bengal.**

Treat this as a true **Bengal mulberry-silk sari system** built from:
natural off-white silk ground,
wide red border,
restrained woven buti or aanchal articulation where needed,
compact border authority,
smooth crisp paper-like finished surface,
and ceremonial Bengali sari dignity.

Do not treat this as generic red-and-white Bengali dress.

Do not treat this as generic festive handloom silk.

Do not treat this as Korial by default.

Do not treat this as a motif-led decorative sari.

Build the image through real Garad grammar:

- natural silk ground must remain the primary field
- the red border must remain the primary identity zone
- woven design must stay secondary to ground and border
- finish must feel smooth, crisp, neat, and paper-like
- the sari must remain structurally readable as a Bengal ceremonial silk sari
- the whole frame must feel organized by restraint, purity, border gravity, and woven clarity

If figures appear, they must not be generic fashion figures wearing a styled sari.

Their body, drape, pleats, aanchal fall, cloth posture, and ceremonial stillness must all feel authored by Garad logic.

If the frame includes hands, blouse, jewelry, background objects, ritual elements, architecture, or environment, none of them should overpower the sari grammar.

Everything must support:

ground purity,

border dignity,

woven restraint,

and finish-conscious composure.

The image must not become:
generic Bengali puja styling,
soft luxury silk glamour,
editorial fashion realism,
motif-heavy decorative cloth,
printed or embroidered-looking design,
or a generic scene with a Garad-colored sari placed into it.

The final image must feel like **authentic Garad silk-sari intelligence itself generated the whole frame**.

Reusable Variable Template

Create **[SUBJECT / FIGURE / SCENE / WORLD]** in the **pure authentic source-truth visual logic of Garad silk sari tradition from West Bengal**.

Treat the style as a **ceremonial Bengal silk-sari system** built from:

- natural off-white mulberry silk ground
- wide red border as the main identity-carrier
- restrained woven buti / border / aanchal articulation
- smooth crisp paper-like finished surface
- sari-zone discipline
- ceremonial Bengali dignity
- whole-frame restraint and clarity

Core style system to preserve:

- silk ground must remain primary
- red border must remain structurally dominant
- woven design must remain secondary
- finish must remain crisp, clean, and paper-like
- sari must remain Bengal ceremonial in posture and drape
- the whole image must stay Garad-born rather than Bengal-generic

Translate the image like this:

- **[MAIN FIGURE]** becomes Garad-governed through border placement, aanchal fall, pleat clarity, ground purity, and ceremonial restraint
- **[SECONDARY FIGURES]** must also obey the same Garad visual order rather than generic realism
- **[OBJECTS / PROPS]** must support the sari's visual hierarchy, not compete with it
- **[ENVIRONMENT / BACKGROUND]** must feel ordered, calm, and restrained so the Garad logic remains primary

Keep:

natural silk ground,
wide red border,
woven-not-applied articulation,
paper-like finish,
sari-zone clarity,
and ceremonial Bengali composure.

Avoid:

generic red-and-white sari shorthand,
Korial collapse,
soft luxury silk drape,
motif overload,
printed-looking ornament,
editorial glamour,
or one source-aware sari inside a generic image-world.

The final result must feel like **true Garad silk grammar itself generated the image**.

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Garad silk sari tradition from West Bengal**.

Preserve the source image's subject count, core action, pose logic, and readability,
but rebuild the entire image through **Garad silk-sari grammar**.

Replace ordinary fabric logic with:

- natural off-white silk ground as the primary field
- wide red border as the primary structural identity
- restrained woven buti / border / aanchal articulation
- smooth crisp paper-like finished surface
- Bengal ceremonial sari drape and composure

Do not merely turn the sari white and red.

Do not merely add a border.

Do not merely add puja symbolism.

Do not keep generic fashion realism underneath.

Rebuild:

the drape,
the pleats,
the anchal,
the border weight,
the finish character,

the figure-cloth relation,
and the wider image hierarchy
so the whole frame feels authored by Garad rather than decorated in Garad colors.

The final result must feel like the source image has been completely re-authored through **authentic Garad silk-sari logic**.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in **V2 = authentic handcrafted dimensional translation of Garad silk sari tradition from West Bengal**.

Preserve the same deep Garad source grammar:

- natural off-white mulberry silk ground
- wide red border as the main structural identity
- restrained woven border / buti / aanchal logic
- compact border authority
- smooth crisp paper-like finish
- Bengal ceremonial sari dignity
- whole-frame Garad coherence

Now translate that same grammar into believable handcrafted dimensional form.

This must not become generic luxury silk realism.

This must not become premium Bengali fashion styling.

This must not become glossy ceremonial sari photography.

Dimensionality must come from Garad itself:

- stronger silk-body presence without losing ground purity
- stronger border edge authority without turning decorative
- clearer anchal and pleat structure without soft glamour drift
- more tactile woven finish
- more believable crisp cloth-body interaction
- stronger sense of loom-made completion
- more readable whole-frame Garad order

Let the image gain:

moderate dimensional presence,
tactile cloth reality,
clearer pleat and anchal articulation,

stronger figure-cloth-environment relationship,
and richer material presence.

But keep unchanged:
natural silk body priority,
red border dominance,
woven restraint,
paper-like finish,
and ceremonial calm.

Do not allow:
soft luxury drape,
glossy silk glamour,
editorial fashion beauty,
generic festive Bengal realism,
or realism where only the cloth color carries Garad identity.

The whole image must feel like **Garad silk grammar translated into handcrafted dimensional embodiment.**

Reusable Variable Template

Create [SUBJECT / FIGURE / SCENE / WORLD] in V2 = **authentic handcrafted dimensional translation of Garad silk sari tradition from West Bengal.**

Preserve the unchanged deep source core:

- natural off-white silk ground
- wide red border
- restrained woven articulation
- crisp paper-like finish
- Bengal ceremonial sari posture
- Garad-specific whole-frame restraint

Translate the image into handcrafted dimensional form by increasing:

- cloth-body presence
- pleat clarity
- anchal readability
- border compactness
- tactile material behavior
- figure-ground separation
- whole-frame Garad coherence

Build the image like this:

- **[MAIN FIGURE]** becomes a dimensional Garad-bearing figure whose sari still reads through ground purity, border gravity, finish crispness, and Bengali ceremonial composure
- **[SECONDARY FIGURES]** must remain subordinate to the same Garad visual order
- **[PROPS / OBJECTS]** must feel compatible with Garad dignity, not generic décor
- **[ENVIRONMENT / BACKGROUND]** must become calmer, cleaner, and more restraint-driven so the Garad system remains primary

Keep:

natural silk body,
red border structure,
woven-not-applied design,
paper-like finish,
ceremonial stillness,
and Garad-born hierarchy.

Avoid:

generic festive silk,
luxury Bengali fashion realism,
Korial collapse,
motif-first beautification,
gloss,
soft fluid glamour drape,
or one Garad sari inside a generic world.

The final image must feel like **authentic Garad silk logic translated into handcrafted dimensional presence**.

Image-to-Image

Convert this source image into **V2 = authentic handcrafted dimensional translation of Garad silk sari tradition from West Bengal**.

Keep the source image's subject count, core action, and scene readability,
but rebuild the entire image through Garad grammar translated into dimensional silk embodiment.

The image must no longer behave like normal premium textile realism.

Replace that with:

- natural silk body as the primary field
- red border as structural identity
- woven restraint rather than motif display
- crisp pleat and anchal clarity
- smooth paper-like finish

- ceremonial Bengali composure

Add:

more tactile cloth presence,
clearer drape-body relationship,
stronger border-body contrast,
more believable sari structure,
and fuller Garad-authored scene coherence.

But do not let dimensionality come from glossy luxury silk realism.

Do not keep generic festive Bengali image logic under a Garad surface.

Do not turn the result into a fashion-shot sari image.

Rebuild all visible elements so they feel born from **Garad silk-sari dimensional logic**.

The result must feel like the source image has entered the handcrafted dimensional state of the same Garad system.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in **V3 = fully resolved believable dimensional world of Garad silk sari tradition from West Bengal**.

Preserve the same unchanged deep style-core:

- natural off-white mulberry silk ground
- wide red border as the primary identity zone
- restrained woven border / buti / aanchal articulation
- compact border character
- smooth crisp paper-like finish
- ceremonial Bengali sari dignity
- Garad-born whole-frame restraint

Now push that same grammar into its most believable, fully embodied dimensional world.

Believable here means:

- believable silk-material presence without luxury gloss
- believable border-body relationship
- believable pleat and aanchal structure
- believable finish character
- believable figure-ground separation
- believable full-frame completion
- believable Garad-authored world coherence

It does NOT mean:

- cinematic sari glamour
- premium editorial beauty-lighting
- glossy fashion realism
- generic Bengali puja scene realism
- Korial-family collapse
- realism with a Garad-colored sari layered on later

The same Garad logic must still govern:

- body field
- red border
- restrained woven ornament
- anchal hierarchy
- cloth stiffness-versus-flow balance
- composure and ceremonial calm
- environment ordering

Increase:

full material clarity,
whole-frame completion,
spatial coherence,
figure-cloth-environment integration,
and stronger object presence.

But do not introduce another style layer.

Do not let beauty replace Garad.

Do not let realism become stronger than the source grammar.

Do not let the environment become more generic than the sari.

Do not let Garad survive only as color coding.

The final image must feel like **Garad silk-sari intelligence itself has become a believable dimensional world.**

Reusable Variable Template

Create **[SUBJECT / FIGURE / SCENE / WORLD]** in **V3 = fully resolved believable dimensional world of Garad silk sari tradition from West Bengal.**

Keep the same unchanged deep style-core:

- natural off-white silk ground
- wide red border
- restrained woven articulation
- crisp paper-like finish

- ceremonial Bengali sari dignity
- Garad-authored whole-frame restraint

Now fully embody that style into a believable dimensional world.

Increase:

- material believability
- border and anchal authority
- cloth-body integration
- spatial separation
- environmental completion
- whole-frame consistency
- Garad-world readability

Build the image like this:

- **[MAIN FIGURE]** must be fully Garad-born, not a generic realistic figure wearing a white-red sari
- **[SECONDARY FIGURES]** must also inherit the same ceremonial Garad visual order
- **[PROPS / OBJECTS]** must support the same restraint, clarity, and sari-centered hierarchy
- **[ENVIRONMENT / BACKGROUND]** must become a complete world that still behaves like Garad, not ordinary Bengali festive realism

Keep unchanged:

natural silk ground priority,
red border primacy,
woven restraint,
paper-like finish,
ceremonial composure,
and same-style whole-frame control.

Avoid:

premium silk glamour,
fashion-editorial realism,
generic puja spectacle,
Korial/general Bengal silk drift,
motif-first beauty,
or any second visual language overpowering Garad.

The final image must feel like **the same Garad silk-sari system has become fully embodied as a believable world.**

Image-to-Image

Convert this source image into **V3 = fully resolved believable dimensional world of Garad silk sari tradition from West Bengal.**

Preserve the source image's subject count, core action, scene purpose, and main readability,
but rebuild every visible element through **Garad silk-sari grammar fully embodied as a world.**

Replace ordinary realism with:

- natural off-white silk ground as primary field
- wide red border as structural identity
- restrained woven border / buti / aanchal articulation
- smooth crisp paper-like finish
- ceremonial Bengali sari composure
- whole-frame Garad-born restraint

Expand the source into:

- fully embodied Garad-governed figures
- believable crisp sari drape and aanchal behavior
- strong border and ground authority
- clear material presence without glamour gloss
- full environmental completion under Garad logic
- total same-style coherence

But keep the same source grammar intact.

Do not let realism replace the branch.

Do not add Garad only as color and border styling.

Do not let the background become a generic Bengali festival scene.

Do not let V3 turn into premium sari-fashion imagery.

Do not let the image become a more beautiful but less Garad version of V1.

Rebuild the entire frame so it feels like **authentic Garad silk-sari logic itself has become a fully resolved dimensional world.**

If the result feels like reality coated with elegant Bengali sari styling, it has failed.

If it feels like Garad itself has become a whole world, it is correct.
