

# Namda - Kashmir

## V1 — Authentic Style

### Universal Hard Prompt

Create an image in **pure authentic source-truth Namda / Kashmir**.

Treat the style as a **felt-first Kashmiri rug and floor-covering system**, not as woven carpet, not as knotted rug, not as printed mat, and not as luxury furnishing décor.

Build the whole image through true Namda grammar:

- dense felted wool sheet formation,
- compressed soft body,
- warm domestic ground presence,
- fused-fiber material behavior,
- soft but weighty thickness,
- grounded household usefulness,
- and surface ornament that grows on top of real felt mass.

Use the correct source logic:

- the object must feel made from **felting**, not weaving.

It must feel like layered wool was compressed, rolled, wetted, and fused into a dense felt sheet.

The surface must not show woven grid, warp-weft logic, knotted pile, or printed pattern behavior.

Use Namda ornament in a source-faithful way:

- floral patterning,
- geometric order,
- bel or creeper motif behavior,
- field organization,
- and surface enrichment that feels supported by the felt base.

If embroidery appears, it must remain secondary to the felt body and must feel integrated into the felt surface, not floating above it.

Material behavior must remain source-faithful:

- soft,
- dense,
- matte to softly plush,
- slightly fuzzy in a controlled way,
- compressed,
- warm,
- grounded,
- and domestic.

Do not make it glossy.  
Do not make it luxurious in a showroom way.  
Do not make it behave like a blanket or draped cloth.

If the image includes figures, animals, objects, or environment, they must not remain generic realistic forms with Namda applied later.

They must become **Namda-born presences**:

felt-bodied,  
surface-organized,  
grounded,  
soft-edged,  
and built through field logic rather than realism-first logic.

If a room appears, it must still support Namda's grounded domestic identity rather than overpowering it with generic interior styling.

Do not make:

generic decorative rug,  
premium home décor product,  
woven carpet,  
knotted pile rug,  
printed floral mat,  
embroidery-first textile,  
blanket-like felt cloth,  
or realistic furnishing imagery with Kashmiri ornament added afterward.

The final result must feel like authentic Namda itself authored the whole image.

## **Reusable Variable Template**

Create **[SUBJECT / OBJECT / SCENE / WORLD]** in **pure authentic source-truth Namda / Kashmir**.

Treat the style as a **felted wool domestic-ground system** built from:

fused-fiber sheet formation,  
compressed soft density,  
warm grounded body,  
soft but solid thickness,  
and surface ornament supported by real felt mass.

Core style system to preserve:

felt-first identity,  
compressed wool body,  
domestic floor-covering logic,  
floral / geometric / bel field organization,  
ornament growing from felt,

soft-edged contour behavior,  
and grounded useful-object presence.

Translate the image like this:

- **[MAIN SUBJECT / MAIN OBJECT / MAIN IMAGE CORE]** becomes Namda-authored through felt-body logic and field-based surface order.
- **[SECONDARY ELEMENTS]** become supporting Namda-built elements obeying the same soft dense felt grammar.
- **[ENVIRONMENT / BACKGROUND / GROUND]** must also inherit Namda's grounded domestic surface logic instead of staying generic realism.

Keep:

felt-sheet identity,  
compressed softness,  
dense warm presence,  
field order,  
ornament supported by felt,  
and domestic groundedness.

Avoid:

woven rug behavior,  
knotted carpet behavior,  
printed textile behavior,  
luxury décor styling,  
glossy furnishing mood,  
blanket softness,  
or generic realism with Namda-like surface added later.

The final image must feel like true Namda itself generated the entire frame.

## Image-to-Image

Convert this source image into **pure authentic source-truth Namda / Kashmir**.

Preserve the source image's core subject identity, subject count, action relationship, and main composition purpose,  
but rebuild the whole image through true Namda felt grammar.

Replace ordinary image logic with:

felted wool sheet body,  
compressed soft density,  
fused-fiber material presence,  
warm domestic groundedness,

floral / geometric / bel field organization,  
and ornament supported by real felt mass.

Do not simply place a Namda pattern onto a normal object.

Do not keep generic realism underneath.

Do not make the result look woven, knotted, printed, or décor-styled.

Do not let embroidery become the first identity.

If the source contains figures or objects, rebuild them as **Namda-born felt presences**.

If the source contains environment, rebuild it through the same grounded felt-field logic.

Do not let the room or background become more realistic than the Namda system.

The final result must feel like the source image has been fully re-authored by authentic Namda logic.

## V2 — Artisan Translation

### Universal Hard Prompt

Create an image in **V2 = authentic handcrafted dimensional translation of Namda / Kashmir**.

Keep the same deep source grammar unchanged:

felted wool sheet identity,

compressed soft density,

warm domestic ground presence,

fused-fiber material behavior,

floral / geometric / bel field organization,

and ornament supported by a real felt base.

Now translate that same grammar into believable handcrafted dimensional presence.

This is **not** generic 3D rug rendering.

This is **not** premium furnishing realism.

This is **not** a décor makeover.

This is **not** woven carpet realism.

This is **not** plush-pile softness.

This is **not** blanket-like cloth.

This is **not** realism with Namda decoration added later.

Dimensionality must come from Namda itself:

through felt thickness,

through compressed wool mass,

through fused-fiber surface behavior,

through weight and groundedness,

through soft-but-solid edge logic,  
through field organization,  
and through ornament sitting on real felt body.

Allow:

clearer sheet thickness,  
stronger felt edges,  
more tactile fused-wool surface,  
better distinction between felt ground and surface enrichment,  
clearer object weight,  
more believable handcrafted material presence,  
and stronger grounded objecthood.

But keep the dimensionality **felt-specific**.

Do not make it plush like carpet pile.

Do not make it glossy like upholstery.

Do not make it look machine-made.

Do not let ornament overpower the felt body.

If figures, animals, objects, or environment appear, they must already become style-born:

felt-bodied,

soft-edged,

field-organized,

compressed in mass,

and governed by Namda's ground logic.

Do not keep realistic figures or interiors and simply decorate them.

The whole image must feel like authentic Namda has entered handcrafted dimensional presence,

not like a normal 3D image has been themed afterward.

## Reusable Variable Template

Create **[SUBJECT / OBJECT / SCENE / WORLD]** in **V2 = authentic handcrafted dimensional translation of Namda / Kashmir**.

Preserve the unchanged deep source core:

felt-first identity,

fused-fiber sheet body,

compressed soft density,

domestic ground-use logic,

floral / geometric / bel field order,

and ornament supported by real felt.

Translate the image like this:

- **[MAIN IMAGE CORE]** becomes a dimensionally readable Namda-built presence with clearer felt thickness and handcrafted material body.
- **[SECONDARY ELEMENTS]** become supporting felt-born forms obeying the same compressed soft grammar.
- **[ENVIRONMENT / BACKGROUND / GROUND]** gains Namda-authored structure instead of generic realism.

Increase:

felt thickness,  
edge-read,  
surface tactility,  
material presence,  
ground contact,  
weight,  
field clarity,  
and objecthood.

Do not lose:

compressed softness,  
felt-body truth,  
grounded domestic identity,  
ornament-on-felt relation,  
and branch-specific warmth.

Avoid:

generic artisan rug realism,  
woven or knotted rug look,  
plush carpeting,  
glossy luxury décor styling,  
blanket-like cloth behavior,  
or realistic subjects with surface ornament added later.

The final image must feel like authentic Namda translated into handcrafted dimensional presence.

## Image-to-Image

Convert this source image into **V2 authentic handcrafted dimensional Namda / Kashmir**.

Preserve the source image's main identity, action, and readable structure,  
but rebuild the whole image through Namda's felt grammar translated into dimensional presence.

Replace ordinary image logic with:

felted wool sheet body,  
compressed soft mass,  
fused-fiber tactility,

clearer felt thickness,  
grounded domestic object presence,  
floral / geometric / bel field organization,  
and ornament integrated into the felt surface.

Allow:

more visible felt edges,  
stronger tactile surface,  
better relation between body and ornament,  
clearer thickness,  
more believable handcrafted objecthood,  
and stronger groundedness.

Do not:

turn it into premium décor realism,  
make it plush like carpet,  
make it woven or knotted,  
make it glossy,  
make it blanket-like,  
or keep the figures and environment realistic while only the surface changes.

Rebuild all visible elements so they feel born from Namda's own felted material intelligence.  
The final result must feel like the source image has entered a handcrafted dimensional  
Namda world.

## V3 — 3D / Realistic / Cinematic Translation

### Universal Hard Prompt

Create an image in **V3 = fully resolved believable real-world 3D translation of Namda / Kashmir**.

This must become a fully embodied dimensional world,  
but it must still be ruled by the same Namda grammar:  
felted wool sheet body,  
compressed soft density,  
warm domestic ground presence,  
fused-fiber material behavior,  
floral / geometric / bel field organization,  
and ornament supported by real felt mass.

This is **not** a premium décor remix.

This is **not** an interior-design glamour shot.

This is **not** a product-ad makeover.

This is **not** generic furnishing realism.

This is **not** a realistic room with a Namda rug inserted afterward.

This is the same authentic Namda system translated into its most complete believable form.

Increase:

full material clarity,  
believable felt-body presence,  
stronger fused-fiber surface realism,  
stronger thickness and edge clarity,  
stronger ground contact,  
stronger object weight,  
stronger field-and-ornament coherence,  
stronger whole-frame completion,  
stronger figure-ground separation,  
and stronger full-frame readability.

But do not introduce a second visual language.

Do not let realism overpower felt logic.

Do not let room styling overpower Namda.

Do not let ornament overpower felt mass.

Do not let the result become a showroom object.

Do not let it behave like luxury furnishing.

V3 realism must come from Namda itself:

through dense felt-sheet body,  
through compressed soft thickness,  
through believable fused-wool material,  
through grounded use-object presence,  
through ornament supported by felt,  
through domestic warmth,  
and through full material completion.

If figures, objects, or environment appear, they must remain **Namda-born**:

felt-built,  
soft-edged,  
field-organized,  
grounded,  
and governed by compressed mass rather than generic realism.  
The entire frame must belong to one Namda-authored world.

The final result must feel like Namda itself has become a fully resolved believable reality,  
not like reality has been coated with Namda decoration.

## Reusable Variable Template

Create [SUBJECT / OBJECT / SCENE / WORLD] in V3 = fully resolved believable  
real-world 3D translation of Namda / Kashmir.

Keep the same unchanged source core:

felted wool body,  
fused-fiber sheet logic,  
compressed soft density,  
warm domestic ground-use identity,  
floral / geometric / bel field order,  
and ornament supported by real felt.

Translate the image like this:

- **[MAIN IMAGE CORE]** becomes a fully embodied Namda-authored presence with believable felt material reality.
- **[SECONDARY ELEMENTS]** become equally style-born, obeying the same compressed soft felt grammar.
- **[ENVIRONMENT / BACKGROUND / GROUND / SPACE]** becomes a complete believable world still governed by Namda logic, not generic realism.

Increase:

material-light interaction on felt,  
surface clarity,  
body thickness,  
ground contact,  
object presence,  
field coherence,  
environmental completion,  
and whole-frame control.

Do not lose:

felt-first identity,  
compressed softness,  
grounded domestic logic,  
ornament-on-felt relation,  
branch-specific warmth,  
and source-authentic Namda behavior.

Avoid:

premium décor mood,  
luxury furnishing styling,  
woven or knotted rug behavior,  
plush carpeting,  
blanket-like softness,  
generic realistic interior with Namda inserted,  
or any second visual language stronger than the Namda system.

The final image must feel like the same Namda grammar fully embodied into believable reality.

## Image-to-Image

Convert this source image into **V3 fully resolved believable real-world Namda / Kashmir**.

Preserve the source image's main purpose, subject count, action logic, and readable composition,  
but rebuild every visible element through authentic Namda felt grammar fully embodied.

Replace ordinary realism with:  
felted wool sheet body,  
compressed soft mass,  
fused-fiber material reality,  
warm grounded domestic presence,  
floral / geometric / bel field order,  
and ornament integrated into a true felt surface.

Expand the image into:  
fully believable felt material presence,  
clear thickness and edge reality,  
strong ground contact,  
full object weight,  
clear relation between body and ornament,  
complete environmental coherence,  
strong spatial separation,  
and strong whole-frame unity.

Do not merely decorate the surface.  
Do not make a décor product image.  
Do not make it look woven, knotted, plush, printed, or luxurious in a showroom way.  
Do not keep generic realistic people, objects, or space.  
Do not let realism replace felt logic.  
Do not let V3 become a more glamorous cousin of V1.

Rebuild the whole image so it feels like authentic Namda itself has become a complete believable lived image-world.

**Hmaram**

**Puanlaisen stripe-ground**
