

needle-work - Lakshadweep

V1 — Authentic Style

Universal Hard Prompt

For the style **Needle-work / Lakshadweep**, create an image in **V1 = pure authentic source-truth**.

Treat this branch as a **modest domestic stitched-textile system**, not as luxury embroidery, not as boutique needlework, not as fashion embellishment, and not as decorative island textile fantasy.

First preserve the true native image-making logic of this branch:

- needle-built cloth order,
- seam intelligence,
- join logic,
- hem and edge control,
- restrained stitched reinforcement or embellishment,
- hand-finished textile presence,
- and practical household utility.

Keep the whole frame inside one visual language.

If figures appear, they must not remain generic realistic humans with stitched cloth added later. Rebuild them through the source branch itself:

- source-born stitched-cloth face logic,
- source-born body logic,
- source-born silhouette logic,
- source-born posture,
- source-born grouping,
- source-born object logic,
- source-born environment logic.

The image must feel made through:

- needle action on cloth,
- hand-guided seam paths,
- joined panels,
- finished borders,
- edge reinforcement,
- restrained stitched accents,
- practical textile handling,
- and domestic use-value.

Keep the style modest and source-cautious.
Do not invent a dense ornamental motif system.
Do not borrow a better-known mainland embroidery language.
Do not turn this into decorative prettiness.
Do not let island atmosphere do the work of the stitching.

Do not add:
generic realism,
generic boutique embroidery,
luxury cloth styling,
fashion-photo elegance,
random decorative motifs,
or a second visual language on top of the source branch.

The final image must feel like:
the source domestic stitched-textile tradition itself made this image.

Reusable Variable Template

For the style **Needle-work / Lakshadweep**, create **[SCENE / SUBJECT / OBJECT WORLD]** in **V1 = pure authentic source-truth**.

Preserve the true source system:
needle-built cloth logic,
seam / join / hem / edge intelligence,
restrained stitched finishing,
domestic utility,
and modest hand-finished textile order.

Keep these scene invariants fixed unless explicitly changed:

[SUBJECT COUNT]
[CHARACTER ROLES]
[RELATIONSHIPS]
[KEY PROPS]
[ENVIRONMENT FUNCTION]
[ACTION / POSE PURPOSE]
[EMOTIONAL BEAT]
[VIEWER-READ]
[BASIC STAGING LOGIC]

Translate the image like this:

[MAIN SUBJECT / MAIN OBJECT] becomes a source-faithful stitched-textile presence built through seam, hem, join, edge, and restrained thread logic.

[SECONDARY FIGURES / OBJECTS] become supporting stitched-cloth forms obeying the same modest textile grammar.

[ENVIRONMENT / BACKGROUND] becomes a hand-finished domestic use-space rather than generic island realism.

Keep:

needle-built cloth order,
seam and border clarity,
restrained stitch rhythm,
practical textile logic,
and source-cautious modesty.

Avoid:

pretty-embroidery drift,
mainland decorative borrowing,
fashion-textile styling,
random stitched motifs,
generic realism with one stitched object,
or environment carrying the style more than the textile behavior.

The final image must feel like:

the source branch itself authored the full frame.

Image-to-Image

Convert this source image into **V1 pure authentic source-truth Needle-work / Lakshadweep**.

Preserve the source image's:

[SUBJECT COUNT]
[CORE ACTION]
[MAIN RELATIONSHIPS]
[KEY OBJECTS]
[VIEWER-READ]
[BASIC STAGING]

Replace ordinary image logic with:

needle-built cloth order,
seam and hem intelligence,
joined and reinforced textile logic,
restrained stitched finishing,
modest domestic use-value,
and hand-finished textile presence.

Do not simply add decorative embroidery.

Do not keep generic realism underneath.

Do not make the image fashionable, luxurious, or over-ornamental.

Do not use island context as a shortcut for weak stitching logic.

Rebuild every visible element so it feels born from this stitched-textile system itself.

The final result must feel like:

the source image has been fully rebuilt inside the original modest Needle-work / Lakshadweep grammar.

V2 — Artisan Translation

Universal Hard Prompt

For the style **Needle-work / Lakshadweep**, create an image in **V2 = authentic handcrafted dimensional translation**.

First preserve the same unchanged deep style-core:

needle-built cloth logic,
seam / join / hem / edge intelligence,
restrained stitched finishing or reinforcement,
domestic utility,
and modest hand-finished textile order.

Now translate that same source grammar into believable handcrafted dimensional presence.

This must still feel fully style-born.

Faces must remain source-born.

Bodies must remain source-born.

Silhouettes must remain source-born.

Objects and environment must remain source-born.

Allow:

moderate cloth-body volume,
seam overlap,
hem thickness,
patch layering,
slight raised thread presence,
handmade tactile presence,
clearer cloth construction depth,
better front / middle / back readability,
and stronger relation between figures, objects, and environment.

But all depth must come from the branch's own logic:

stitch buildup,
seam paths,
joined textile panels,
edge finishing,

reinforcement structure,
cloth-body handling,
and restrained domestic handwork.

Do not allow:

generic realism,
generic 3D,
same thing with more shadows,
normal realistic humans with decorative stitching,
environment realism stronger than textile grammar,
clothes carrying the style while anatomy stays generic,
or a richer invented embroidery language replacing the modest source branch.

The final image must feel like:

the same source stitched-textile branch has entered handcrafted dimensional space without losing its identity.

Reusable Variable Template

For the style **Needle-work / Lakshadweep**, create **[SCENE / SUBJECT / OBJECT WORLD]** in **V2 = authentic handcrafted dimensional translation**.

Preserve the same unchanged source core:

needle-built cloth order,
seam / join / hem / edge intelligence,
restrained stitched finishing,
domestic utility,
and modest hand-finished textile logic.

Keep these scene invariants fixed unless explicitly changed:

[SUBJECT COUNT]
[CHARACTER ROLES]
[RELATIONSHIPS]
[KEY PROPS]
[ENVIRONMENT FUNCTION]
[ACTION / POSE PURPOSE]
[EMOTIONAL BEAT]
[VIEWER-READ]
[BASIC STAGING LOGIC]

Translate the image like this:

[MAIN SUBJECT / MAIN OBJECT] becomes a dimensional stitched-textile presence with clearer seam depth, edge structure, patch logic, and cloth-body readability.

[SECONDARY FIGURES / OBJECTS] become supporting forms obeying the same stitched-cloth grammar.

[ENVIRONMENT / BACKGROUND] becomes a believable handcrafted domestic use-space built from the same textile intelligence rather than neutral realism.

Increase:

seam depth,
hem clarity,
patch layering,
thread buildup,
cloth-body construction,
material tactility,
and spatial readability.

Do not lose:

modesty,
utility-rooted logic,
needle-built order,
source-cautious restraint,
and whole-frame same-language control.

Avoid:

generic handcrafted embroidery realism,
boutique textile polish,
fashion embellishment,
decorative over-invention,
or realism-first scene-building with stitching added later.

The final image must feel like:

the same branch has become handcrafted and dimensional without becoming a different style.

Image-to-Image

Convert this source image into **V2 authentic handcrafted dimensional Needle-work / Lakshadweep**.

Preserve the source image's:

[SUBJECT COUNT]
[CORE ACTION]
[MAIN RELATIONSHIPS]
[KEY OBJECTS]
[VIEWER-READ]
[BASIC STAGING]

Replace ordinary image logic with:

needle-built seam structure,

cloth join logic,
hem and edge thickness,
patch layering,
restrained stitched reinforcement,
and hand-finished textile-body presence.

Allow:

more visible seam buildup,
clearer edge and fold behavior,
slightly stronger thread relief,
better cloth construction depth,
and stronger relation between stitched surface and textile body.

Do not:

turn it into decorative embroidery realism,
make it fashionable,
make it luxurious,
invent a new motif language,
keep figures generic and only style the cloth,
or let the environment remain neutral while only textile accents change.

The final result must feel like:

a handcrafted dimensional expansion of the same modest domestic stitched-textile grammar.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

For the style **Needle-work / Lakshadweep**, create an image in **V3 = fully resolved believable real-world 3D translation of the same source grammar**.

Preserve the same unchanged deep style-core:

needle-built cloth logic,
seam / join / hem / edge intelligence,
restrained stitched finishing or reinforcement,
domestic utility,
and modest hand-finished textile order.

Now push the same source style into its most complete and believable dimensional world.

Increase:

full cloth material clarity,
stitch and seam believability,
edge and fold realism,
figure-ground separation,

environmental completion,
object presence,
scene readability,
focal hierarchy,
attention control,
and full-frame coherence.

But do not introduce:

generic realism underneath the style,
generic cinematic illustration,
luxury textile styling,
boutique embroidery polish,
a second visual language,
premium finish stronger than source grammar,
or a richer invented embroidery identity.

The characters must still be made from the style itself.

The environment must still be made from the style itself.

Every visible element must still belong to the same visual language.

Critical V3 rule for this branch:

the branch must remain modest, domestic, and source-cautious even at full embodiment.

Do not use V3 as permission to “upgrade” it into a bigger style than the evidence supports.

The final image must feel like:

the same source stitched-textile branch has become fully embodied reality without becoming a different ornamental style.

Reusable Variable Template

For the style **Needle-work / Lakshadweep**, create **[SCENE / SUBJECT / OBJECT WORLD]** in **V3 = fully resolved believable real-world 3D translation of the same source grammar.**

Keep the same unchanged core:

needle-built cloth order,
seam / join / hem / edge intelligence,
restrained stitched finishing,
domestic utility,
and modest hand-finished textile logic.

Keep these invariants fixed unless explicitly changed:

[SUBJECT COUNT]

[CHARACTER ROLES]

[RELATIONSHIPS]

[KEY PROPS]
[ENVIRONMENT FUNCTION]
[ACTION / POSE PURPOSE]
[EMOTIONAL BEAT]
[VIEWER-READ]
[BASIC STAGING LOGIC]

Translate the image like this:

[MAIN SUBJECT / MAIN OBJECT] becomes a fully embodied stitched-textile presence with believable cloth material, seam structure, edge control, and lived use-value.

[SECONDARY FIGURES / OBJECTS] become equally style-born presences obeying the same stitched-cloth grammar.

[ENVIRONMENT / BACKGROUND / SPACE] becomes a complete believable world still governed by domestic stitched-textile logic, not generic island realism or decorative textile glamour.

Increase:

material believability,
stitch resolution,
cloth-body realism,
edge and fold clarity,
space coherence,
environmental completion,
and whole-frame unity.

Do not lose:

modesty,
utility-rooted truth,
source-cautious restraint,
needle-built cloth logic,
and whole-frame same-language control.

Avoid:

luxury coastal textile styling,
generic embroidery richness,
fashion-photo mood,
mainland decorative borrowing,
or any realism stronger than the source branch.

The final image must feel like:

the same modest stitched-textile grammar fully embodied into believable reality.

Image-to-Image

Convert this source image into **V3 fully resolved believable Needle-work / Lakshadweep.**

Preserve the source image's:

[SUBJECT COUNT]

[CORE ACTION]

[MAIN RELATIONSHIPS]

[KEY OBJECTS]

[VIEWER-READ]

[BASIC STAGING]

Replace ordinary realism with:

needle-built cloth order,
real seam and join structure,
real hem and edge finishing,
real patch and reinforcement logic,
restrained stitched presence,
and believable domestic textile use-world.

Expand the image into:

full cloth material clarity,
full seam and stitch believability,
stronger edge and fold realism,
clear figure-ground separation,
clearer environmental completion,
and complete whole-frame coherence.

Do not merely add decorative stitching.

Do not make a premium textile image.

Do not keep generic realistic people, props, or island mood.

Do not let realism replace stitch grammar.

Do not let V3 become a more glamorous cousin of V1.

The final result must feel like:

the source image has been fully rebuilt as a complete believable world of the same modest domestic stitched-textile logic.
