

Sanganer - Rajasthan

V1 — Authentic Style

Universal Hard Prompt

Attachments needed: none.

Create an image in pure authentic source-truth Bagru from Rajasthan.

Treat this as a true natural-dye hand block textile-printing system, not as floral painting, not as wallpaper, not as generic ethnic fabric, not as boutique fashion print, and not as decorative surface design without process memory.

Build the image from the true grammar of Bagru:
prepared cotton cloth identity,
cloth-field logic,
woodblock repeat construction,
natural-dye process memory,
direct-print and dabu-resist intelligence,
outline / fill / detail sequencing,
earthy Bagru palette,
floral / jaali textile rhythm,
and whole-field printed-cloth coherence.

The image must feel like it genuinely belongs inside the original Bagru textile tradition.

Keep the whole frame inside one cloth-authored visual language.

The surface itself must be source-born:
printed cloth, not painted cloth,
block-built motif edges, not freehand illustration,
naturally dyed absorption, not synthetic print coating,
repeat architecture, not picture composition,
wearable and spreadable textile logic, not framed image logic.

Motif logic must remain source-faithful:
repeatable floral and vegetal forms,
block-simplified butis and bells,
textile-usable jaali structures,
rhythmic spacing,
field continuity,
and print-sequence logic rather than painterly botanical realism.

Material memory must remain visible:
harda / saaj process memory,
natural black / red / brown / khaki / indigo depth,
slightly softened cloth-absorbed surface behavior,
print registration logic,
and repeated artisan intervention.

Use Bagru color logic:
earthy reds,
iron blacks,
browns,
khakis,
greys,
indigo where relevant,
grounded natural-dye depth,
never chemically loud color.

Do not add:
generic floral textile,
hand-painted fabric,
Sanganer-like delicate prettiness,
Ajrakh-like geometric dominance,
wallpaper panel logic,
digital repeat perfection,
synthetic fashion-print sharpness,
or any second textile language stronger than Bagru.

The final result must feel like true Bagru printed cloth from Rajasthan at source-truth level,
not a modern textile decorated in Bagru-like motifs.

Reusable Variable Template

Attachments needed: none.

Create [SUBJECT / OBJECT / TEXTILE FIELD / WORLD] using the authentic source-truth grammar of Bagru from Rajasthan.

Core style system to preserve:
prepared cotton cloth identity,
cloth-field logic,
hand block repeat construction,
natural-dye process memory,
direct-print and dabu-resist intelligence,
outline / fill / detail sequencing,
earthy Bagru palette,

floral / jaali textile rhythm,
whole-field printed-cloth coherence.

Translate the image like this:

[MAIN SURFACE / MAIN FIELD / MAIN SUBJECT] becomes a Bagru-born printed-cloth presence built through repeat, block sequencing, and natural-dye behavior.

[SECONDARY SURFACES / OBJECTS / SUPPORTING ELEMENTS] become supporting Bagru textile-world presences obeying the same cloth-field logic.

[BACKGROUND / WORLD / ENVIRONMENT / SURROUNDING AREAS] becomes a Bagru-authored textile field rather than neutral realism or wallpaper logic.

Keep:

cloth identity,
block-built motifs,
earthy natural-dye depth,
repeat rhythm,
print-sequence memory,
textile spacing intelligence,
Bagru field order.

Avoid:

generic floral fabric,
hand-painted textile look,
wallpaper logic,
fashion-print realism,
Sanganer drift,
Ajrakh drift,
digital sharpness,
or a realistic world with Bagru print pasted on top.

The final image must feel like the Bagru tradition itself authored the full textile field.

Image-to-Image

Attachments needed: none.

Convert this source image into an authentic source-truth Bagru world from Rajasthan.

Preserve the source image's core subject count, structural readability, and main visual organization, but rebuild the entire image through true Bagru grammar.

Replace ordinary image logic with:

prepared cotton cloth identity,
cloth-field organization,
hand block repeat construction,
natural-dye process memory,
direct-print and dabu-resist intelligence,

earthy Bagru palette,
and full printed-textile coherence.

Do not simply add floral motifs.
Do not merely recolor the surface into earthy tones.
Do not turn the source into generic block-print fabric.

If the source contains figures, objects, architecture, landscape, or background, rebuild them through Bagru textile logic:
block-simplified forms,
repeat-structured behavior,
cloth-surface continuity,
natural-dye absorption,
and field-based organization.

Do not leave the environment as scenic realism.
Do not make the result behave like wallpaper.
Do not make it digitally perfect.

The final image must feel like a genuine Bagru printed-cloth world from Rajasthan, not a modern image decorated in printed floral style.

V2 — Artisan Translation

Universal Hard Prompt

Attachments needed: none.

Create an image in V2 = authentic handcrafted dimensional translation of Bagru from Rajasthan.

Keep the same deep style-core unchanged:
prepared cotton cloth identity,
cloth-field logic,
hand block repeat construction,
natural-dye process memory,
direct-print and dabu-resist intelligence,
outline / fill / detail sequencing,
earthy Bagru palette,
floral / jaali textile rhythm,
and whole-field printed-cloth coherence.

Now translate that same source grammar into believable handcrafted dimensional form.

This is not generic 3D.

This is not boutique artisan fabric decor.

This is not embossed wallpaper.

This is not luxury home-textile styling.

This is not realistic cloth photography with Bagru motifs mapped onto it.

The image must still feel authored by Bagru cloth logic first.

Allow:

stronger cloth tactility,
moderate surface depth,
clearer relation between print layer and cloth body,
more legible outline / fill / detail sequencing,
shallow but believable textile layering,
stronger field separation,
more deployable dimensional readability,
but only within Bagru print logic.

Keep unchanged:

printed-cloth identity,
block-built motif behavior,
natural-dye absorption feel,
earthy Bagru palette,
repeat architecture,
textile-field organization,
process memory.

Important version rule:

V2 for Bagru must feel like true Bagru printed cloth entering handcrafted dimensional textile space,
not like fashion fabric becoming more realistic.

If figures, objects, or environments appear, they must remain Bagru-born:

cloth-authored surfaces,
print-structured forms,
repeat-based organization,
and textile logic stronger than realism.

Do not allow:

generic artisan textile 3D,
synthetic print sharpness,
luxury décor bias,
wallpaper embossing,
fashion-product realism,
hand-painted cloth look,
or any realism stronger than Bagru cloth and print intelligence.

The final result must feel like the same Bagru grammar has entered handcrafted dimensional textile-world space without losing its process identity.

Reusable Variable Template

Attachments needed: none.

Create [SUBJECT / OBJECT / TEXTILE FIELD / WORLD] in V2 = authentic handcrafted dimensional translation of Bagru from Rajasthan.

Preserve these unchanged style-core rules:

prepared cotton cloth identity,
cloth-field logic,
hand block repeat construction,
natural-dye process memory,
direct-print and dabu-resist intelligence,
outline / fill / detail sequencing,
earthy Bagru palette,
floral / jaali textile rhythm,
whole-field printed-cloth coherence.

Translate the image like this:

[MAIN SURFACE / MAIN FIELD / MAIN SUBJECT] becomes a dimensionally readable Bagru textile presence with stronger cloth tactility and clear print-layer structure.
[SECONDARY SURFACES / OBJECTS / SUPPORTING ELEMENTS] become supporting dimensional textile-world presences still arranged by Bagru logic.
[BACKGROUND / WORLD / ENVIRONMENT] becomes a handcrafted Bagru textile field with shallow layering and field separation, not neutral realism.

Increase:

moderate surface depth,
cloth tactility,
print-layer clarity,
field separation,
textile-body relation,
handcrafted dimensional readability.

Do not lose:

block-built motif logic,
natural-dye absorption,
earthy Bagru color behavior,
repeat architecture,
process memory,
cloth-field identity.

Avoid:

generic 3D textile art,
wallpaper embossing,
fashion-product realism,
luxury décor fabric,
synthetic print precision,
Sanganer prettiness,
Ajrakh geometry dominance,
or any realism stronger than Bagru grammar.

The final image must feel like the same Bagru source grammar has become a handcrafted dimensional textile-world.

Image-to-Image

Attachments needed: none.

Convert this source image into a V2 authentic handcrafted dimensional Bagru world from Rajasthan.

Preserve the source image's main visual arrangement and readable structure, but rebuild the entire image through Bagru grammar translated into handcrafted dimensional form.

Replace ordinary image logic with:
cloth-field organization,
hand block repeat construction,
natural-dye process memory,
direct-print and dabu-resist intelligence,
earthy Bagru palette,
and a dimensional but still style-born printed-textile world.

Allow moderate surface depth, cloth tactility, print-layer separation, and handcrafted textile dimensionality, but do not let the image become realistic fashion cloth, wallpaper, or luxury textile décor.

If the source contains figures, objects, architecture, or background, rebuild them through Bagru textile logic rather than neutral realism.

Do not leave the environment as scenic realism.

Do not make the result look like generic artisan fabric design.

The final image must feel like a handcrafted dimensional translation of the same Bagru grammar.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Attachments needed: none.

Create an image in V3 = fully resolved believable real-world 3D translation of Bagru from Rajasthan while keeping the same source grammar unchanged.

This must become a fully embodied dimensional world, but it must still be ruled by Bagru logic, not by generic textile realism, not by luxury ethnic decor, and not by boutique fashion styling.

Preserve the same unchanged deep style-core:

prepared cotton cloth identity,
cloth-field logic,
hand block repeat construction,
natural-dye process memory,
direct-print and dabu-resist intelligence,
outline / fill / detail sequencing,
earthy Bagru palette,
floral / jaali textile rhythm,
and full printed-cloth coherence.

Now push that same grammar into its most complete dimensional embodiment.

Increase:

full cloth-material presence,
stronger relation between print and textile body,
stronger material clarity,
stronger field separation,
full textile-world completion,
clearer surface-to-space organization,
stronger full-frame coherence,
but without replacing Bagru with realism logic.

Critical rule:

V3 must still feel like the same Bagru DNA fully embodied.
It must not become realistic fashion cloth.
It must not become luxury home-textile styling.
It must not become wallpaper realism.
It must not become hyper-real premium ethnic fabric.
It must not become a realistic world with Bagru pattern applied afterward.

If figures, objects, or environments appear, they must still remain Bagru-born:

cloth-field logic,
block-built motif behavior,
natural-dye depth,

repeat architecture,
and textile-authored organization must remain stronger than realism.

Cloth logic must remain stronger than scenic realism.
Print sequence memory must remain stronger than decorative polish.
Bagru earthiness must remain stronger than premium beautification.
The image must not collapse into product photography or décor display.

Do not allow:
generic textile realism,
luxury décor bias,
fashion editorial styling,
synthetic surface perfection,
wallpaper logic,
digital repeat sharpness,
or any second textile language overpowering Bagru grammar.

The final result must feel like the same Bagru grammar has become a fully inhabitable
real-world textile-print reality.

Reusable Variable Template

Attachments needed: none.

Create [SUBJECT / OBJECT / TEXTILE FIELD / WORLD] in V3 = fully resolved believable
real-world 3D translation of Bagru from Rajasthan.

Keep these unchanged style-core rules:
prepared cotton cloth identity,
cloth-field logic,
hand block repeat construction,
natural-dye process memory,
direct-print and dabu-resist intelligence,
outline / fill / detail sequencing,
earthy Bagru palette,
floral / jaali textile rhythm,
whole-field printed-cloth coherence.

Translate the image like this:
[MAIN SURFACE / MAIN FIELD / MAIN SUBJECT] becomes a fully embodied Bagru textile
presence with strong cloth-material authority and visible print-process intelligence.
[SECONDARY SURFACES / OBJECTS / SUPPORTING ELEMENTS] become equally
style-born dimensional textile presences.
[BACKGROUND / WORLD / ENVIRONMENT] becomes a complete Bagru textile-world, not
neutral realism.

Increase:
full cloth embodiment,
material clarity,
print-layer presence,
field separation,
textile-world completion,
surface-to-space coherence,
full-frame readability,
stronger Bagru-world orchestration.

Do not lose:
cloth-field identity,
block-built motif logic,
natural-dye depth,
direct-print / dabu intelligence,
earthy Bagru palette,
repeat architecture,
process memory.

Avoid:
generic textile realism,
fashion cloth styling,
luxury décor finish,
wallpaper realism,
synthetic precision,
or any realism stronger than Bagru grammar.

The final image must feel like the same Bagru source system has become fully embodied real-world textile-print reality.

Image-to-Image

Attachments needed: none.

Convert this source image into a V3 fully resolved believable real-world Bagru world from Rajasthan.

Preserve the source image's main visual arrangement and readable structure, but rebuild all visible forms through fully embodied Bagru grammar.

Replace ordinary realism with:
cloth-field logic,
hand block repeat construction,
natural-dye process memory,
direct-print and dabu-resist intelligence,
earthy Bagru palette,

and full-world Bagru textile coherence.

Expand the image into a complete dimensional Bagru textile-world:

full cloth-material presence,
clear relation between print and surface,
material clarity,
field separation,
textile-world completion,
and full-frame readability.

Do not turn the image into realistic fashion fabric.

Do not let it become luxury ethnic décor.

Do not let the background become neutral realism.

Do not let only the motifs carry the style.

The final image must feel like Bagru itself has become fully embodied real-world textile-print reality.
