

Bandhej - Rajasthan

V1 — Authentic Style

Universal Hard Prompt

Create an image in pure authentic source-truth Bandhej from Rajasthan.

Treat this as a true Rajasthani resist tie-dye textile system, not as block print, not as painted cloth, not as embroidery, not as generic polka-dot fabric, and not as random fashion tie-dye.

Build the image from the true grammar of Bandhej:

fabric-first identity,
tied-resist process memory,
tiny tied-point structure,
dot-built pattern emergence,
dyed color-field behavior,
clustered point formations,
wearable cloth logic,
drape-aware pattern organization,
and whole-field Bandhej coherence.

The image must feel like it genuinely belongs inside the original Bandhej textile tradition.

Keep the whole frame inside one cloth-authored visual language.

The surface itself must be source-born:

dyed cloth, not painted cloth,
resisted tied points, not printed dots,
pattern revealed through binding and release,
field spread across wearable fabric,
not picture-panel composition,
not wallpaper logic,
not graphic design logic.

Pattern logic must remain source-faithful:

dots,
dot clusters,
geometric and floral-like formations built from tied points,
repeat discipline,
field rhythm,
cloth continuity,
all emerging from resist structure rather than drawn outlines.

Material memory must remain visible:
fabric that was tied before dyeing,
color entering cloth around resisted points,
released knot logic,
soft but clear dyed contrast,
living textile surface,
not synthetic print sharpness,
not digitally perfect circles.

Use Bandhej color logic:
bold dyed color,
clear contrast between dyed field and resisted points,
vibrant Rajasthan textile energy,
never muddy unless intentionally specified,
never generic psychedelic tie-dye randomness,
never printed-ink behavior.

Do not add:
block-print motifs,
painted dots,
embroidered knot logic,
generic fashion tie-dye,
Leheriya stripe-wave logic,
digitally tiled dotted patterns,
or any second textile language stronger than Bandhej.

The final result must feel like true Bandhej resist-dyed cloth from Rajasthan at source-truth level, not a modern textile decorated with dotted motifs.

Reusable Variable Template

Create [SUBJECT / OBJECT / TEXTILE FIELD / CLOTH WORLD] using the authentic source-truth grammar of Bandhej from Rajasthan.

Core style system to preserve:
fabric-first identity,
tied-resist structure,
dot-built pattern emergence,
dyed color-field behavior,
clustered point formations,
wearable and drape-aware cloth logic,
whole-field Bandhej coherence.

Translate the image like this:
[MAIN SURFACE / MAIN FIELD / MAIN SUBJECT] becomes a Bandhej-born resist-dyed cloth presence built through tied points, released dots, and dyed field contrast.

[SECONDARY SURFACES / SUPPORTING ELEMENTS] become supporting Bandhej textile presences obeying the same tied-resist logic.

[BACKGROUND / WORLD / ENVIRONMENT / SURROUNDING AREAS] becomes a Bandhej-authored cloth field rather than neutral realism or graphic pattern design.

Keep:

tied-point logic,
resist-born dots,
dyed cloth behavior,
clustered pattern rhythm,
drape-aware spread,
Rajasthan Bandhej identity.

Avoid:

printed dot fabric,
painted dotted cloth,
block-print logic,
embroidery-like surface,
generic tie-dye,
Leheriya drift,
digital perfection,
or a realistic world with Bandhej dots pasted on top.

The final image must feel like the Bandhej tradition itself authored the full textile field.

Image-to-Image

Create [SUBJECT / OBJECT / TEXTILE FIELD / CLOTH WORLD] using the authentic source-truth grammar of Bandhej from Rajasthan.

Core style system to preserve:

fabric-first identity,
tied-resist structure,
dot-built pattern emergence,
dyed color-field behavior,
clustered point formations,
wearable and drape-aware cloth logic,
whole-field Bandhej coherence.

Translate the image like this:

[MAIN SURFACE / MAIN FIELD / MAIN SUBJECT] becomes a Bandhej-born resist-dyed cloth presence built through tied points, released dots, and dyed field contrast.

[SECONDARY SURFACES / SUPPORTING ELEMENTS] become supporting Bandhej textile presences obeying the same tied-resist logic.

[BACKGROUND / WORLD / ENVIRONMENT / SURROUNDING AREAS] becomes a Bandhej-authored cloth field rather than neutral realism or graphic pattern design.

Keep:

tied-point logic,
resist-born dots,
dyed cloth behavior,
clustered pattern rhythm,
drape-aware spread,
Rajasthan Bandhej identity.

Avoid:

printed dot fabric,
painted dotted cloth,
block-print logic,
embroidery-like surface,
generic tie-dye,
Leheriya drift,
digital perfection,
or a realistic world with Bandhej dots pasted on top.

The final image must feel like the Bandhej tradition itself authored the full textile field.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Bandhej from Rajasthan.

This is not a literal cloth mockup.

This is not fabric-product photography.

This is not printed textile realism.

This is not surface texture added on top of a normal image.

This is not generic handmade styling.

Preserve the same deep Bandhej grammar unchanged:

fabric-first identity,
tied-resist process memory,
tiny tied-point structure,
dot-built pattern emergence,
clustered point formations,
dyed color-field behavior,
Rajasthani Bandhej color energy,
drape-aware cloth intelligence,
and whole-field Bandhej coherence.

Now re-author that same grammar into a richer, more inventive, more dimensional 2D + 3D hybrid image-form.

The added dimensionality must come from Bandhej's own logic:

gathered tied points,
resist-tension zones,
clusters of released dots,
dye spreading around bound centers,
fold-driven pattern deformation,
cloth-body relation,
layered drape structures,
surface rhythm built from resist clusters,
and full-frame textile intelligence.

Do not only change texture.

Transform the full image logic:

form,
construction,
grouping,
silhouette,
objects,
environment,
spatial organization,
and full-frame visual language.

If figures appear, they must not be generic humans wearing Bandhej fabric.

They must be Bandhej-born presences:

face logic influenced by tied-point clustering,
body construction shaped through cloth tension and resist-field organization,
silhouettes built through drape, gathered knot-fields, and dot-cluster structure,
objects and props translated into the same resist-born visual logic.

If environment appears, it must not remain generic realism.

It must already begin to feel re-authored by Bandhej:

surfaces shaped by dyed-field organization,
spatial rhythm built from clustered resist zones,
environmental grouping controlled by Bandhej pattern intelligence,
not just normal scenery with Bandhej cloth somewhere inside it.

Believable depth must come from Bandhej itself,

not from default realism,

not from generic cinematic shading,

not from ordinary 3D rendering habits.

Keep:

source-rooted Bandhej identity,

resist-born dot logic,

cloth-authored dimensionality,
creative artisan translation,
strong drape intelligence,
process-born pattern emergence,
full-frame style control.

Do not allow:
block-print logic,
painted-dot logic,
embroidered-dot logic,
generic tie-dye randomness,
fashion-styling realism,
textile mockup behavior,
surface-only styling,
or a normal image underneath with Bandhej added later.

The final result must feel like Bandhej itself has creatively re-authored the image into a richer, more dimensional, more inventive visual world while still remaining fully Bandhej-born.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / IMAGE FIELD] in V2 = authentic handcrafted dimensional translation of Bandhej from Rajasthan.

Preserve these unchanged deep style-core rules:

fabric-first identity,
tied-resist process memory,
tiny tied-point structure,
dot-built pattern emergence,
clustered point formations,
dyed color-field behavior,
Bandhej color energy,
drape-aware cloth intelligence,
whole-field Bandhej coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a Bandhej-born dimensional presence built through resist-cluster logic, dyed-field contrast, and cloth-structured form.
[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become supporting Bandhej presences governed by the same tied-point visual system.
[ENVIRONMENT / BACKGROUND / WORLD] becomes a creatively re-authored Bandhej space where grouping, depth, and spatial rhythm come from resist-born textile intelligence rather than neutral realism.

Increase:
dimensional presence,
cloth-structured form,

cluster hierarchy,
drape depth,
resist-field richness,
spatial layering,
inventive Bandhej world-building.

Do not lose:
tied-resist identity,
dot-built emergence,
dyed cloth behavior,
process memory,
Bandhej discipline,
full-frame style control.

Avoid:
textile mockup logic,
fashion realism,
block print,
painted dots,
embroidered dots,
generic tie-dye,
or a normal world with Bandhej applied afterward.

The final image must feel like the same Bandhej grammar has been creatively translated into a richer, more dimensional, more scene-capable visual form.

Image-to-Image

Convert this source image into a V2 authentic handcrafted dimensional Bandhej world from Rajasthan.

Preserve the source image's main action, subject count, pose relations, and overall readability, but rebuild the entire image through Bandhej grammar translated into a richer, more dimensional, more inventive hybrid image-form.

Replace ordinary image logic with:
fabric-first identity,
tied-resist structure,
dot-built pattern emergence,
dyed color-field behavior,
clustered point rhythm,
drape-aware spatial intelligence,
and full-frame Bandhej coherence.

Do not simply overlay Bandhej dots.
Do not just add tie-dye texture.
Do not make it a cloth mockup.

Rebuild the image so that:

forms are organized through resist-cluster logic,
surfaces feel dyed and tied rather than painted or printed,
depth comes from cloth tension, fold structure, and clustered point fields,
objects and environment begin to behave like a Bandhej-authored world,
not a normal realistic world with Bandhej decoration.

If figures appear, rebuild them as Bandhej-born presences rather than generic bodies in styled fabric.

If objects or environments appear, rebuild them through Bandhej visual ontology rather than neutral realism.

The final image must feel like a true creative artisan translation of Bandhej into a richer dimensional image-world, not a normal image with Bandhej surface styling.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of Bandhej from Rajasthan while keeping the same source grammar unchanged.

This is not realism replacing style.

This is not fashion realism with Bandhej patterns.

This is not generic cinematic illustration coated with Bandhej motifs.

This is not a normal world with Bandhej decoration added afterward.

Preserve the same deep Bandhej grammar unchanged:

fabric-first identity,
tied-resist process memory,
tiny tied-point structure,
dot-built pattern emergence,
clustered point formations,
dyed color-field behavior,
Bandhej color energy,
drape-aware cloth intelligence,
process-authored pattern emergence,
and full-frame Bandhej coherence.

Now push that same grammar into its most complete, most fully embodied, most fully resolved, most fully inhabitable dimensional world state.

The entire visible world must be generated by Bandhej logic.

That means the transformation must affect everything:

faces,
bodies,
hands,
feet,
hair,
posture,
gesture,
props,
objects,
ground,
architecture,
plants,
trees,
sky treatment,
empty space,
environment rhythm,
foreground,
midground,
background,
and the full-frame visual language.

Nothing important may remain generic realism.

Bandhej must control reality through its own logic:
tied-point clustering,
resist-built surface emergence,
cloth-tension behavior,
gathered knot-fields,
dyed-field layering,
drape-structured form,
cluster-based spatial rhythm,
dot-born construction,
and cloth-authored world organization.

Believable here must mean:
believable volume,
believable spatial relation,
believable material embodiment,
believable environment completion,
believable inhabitable world logic.

It must not mean:
printed fabric realism,
fashion editorial styling,
normal anatomy with Bandhej cloth added,
generic landscapes with Bandhej motifs,
normal architecture with Bandhej decoration,
or realism-first image making.

If figures appear, they must be fully Bandhej-born:
face construction shaped by point-cluster logic,
body logic shaped by cloth-field organization,
silhouette logic shaped by drape and tied-resist structure,
gesture and posture integrated into the same Bandhej visual system.

If environment appears, it must also be fully Bandhej-born:
ground, plants, structures, objects, and space must all belong to one uninterrupted Bandhej world,
not a normal realistic environment underneath.

If you remove decorative cues, the image should still feel Bandhej through:
form construction,
body logic,
surface logic,
object logic,
environment logic,
spatial organization,
and full-world visual ontology.

Keep:
same deep Bandhej grammar,
full world embodiment,
full environmental completion,
stronger figure-ground hierarchy,
stronger spatial separation,
stronger object presence,
stronger total-frame style control.

Do not allow:
block-print behavior,
painted-dot behavior,
embroidered-dot behavior,
generic tie-dye,
fashion realism,
printed textile realism,
cinematic takeover,
or any second textile or realism language stronger than Bandhej.

The final result must feel like Bandhej itself has taken over the whole visible world and fully generated reality through resist-dyed cloth logic, not like realism with Bandhej decoration.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable real-world 3D translation of Bandhej from Rajasthan.

Keep these unchanged deep style-core rules:

fabric-first identity,
tied-resist process memory,
tiny tied-point structure,
dot-built pattern emergence,
clustered point formations,
dyed color-field behavior,
Bandhej color energy,
drape-aware cloth intelligence,
process-authored pattern emergence,
whole-frame Bandhej coherence.

Translate the image like this:

[MAIN FIGURE / MAIN OBJECT / MAIN FIELD] becomes a fully embodied Bandhej-born presence generated through resist-cluster logic, cloth-tension form, dyed-field layering, and dot-born world construction.

[SECONDARY FIGURES / OBJECTS / SUPPORTING ELEMENTS] become equally style-born Bandhej presences.

[ENVIRONMENT / BACKGROUND / WORLD] becomes a complete inhabitable Bandhej world where spatial structure, environmental rhythm, and full-scene organization are all controlled by the same Bandhej grammar.

Increase:

full world embodiment,
full environmental translation,
stronger spatial relation,
stronger figure-ground separation,
stronger material presence,
stronger world coherence,
stronger full-frame Bandhej control.

Do not lose:

tied-resist identity,
dot-built emergence,
dyed-cloth behavior,
drape intelligence,
process memory,
Bandhej visual ontology.

Avoid:

fashion realism,
printed fabric realism,
block-print logic,
painted dots,
generic tie-dye,

cinematic environment takeover,
or a normal world with Bandhej decoration.

The final image must feel like the same deep Bandhej grammar has fully generated an entire believable world.

Image-to-Image

Convert this source image into a V3 fully resolved believable real-world Bandhej world from Rajasthan.

Preserve the source image's main action, subject count, pose relations, and readable structure, but rebuild all visible forms through fully embodied Bandhej grammar.

Replace ordinary realism with:
fabric-first identity,
tied-resist structure,
dot-built pattern emergence,
dyed color-field behavior,
drape-aware cloth intelligence,
cluster-based spatial logic,
and full-world Bandhej coherence.

Do not simply paste Bandhej dots onto the image.
Do not just convert surfaces into patterned cloth.
Do not leave the environment generic.

Rebuild the full image so that:
faces, bodies, objects, props, and environment all belong to the same Bandhej visual ontology,
depth comes from Bandhej's own cloth-resist logic,
space is organized through tied-point clustering and dyed-field structure,
the world becomes fully inhabitable but remains completely Bandhej-born,
not realism-first.

If any part of the frame remains normal realism underneath, the conversion has failed.

The final image must feel like Bandhej itself has fully generated the entire visible world, not like a normal image decorated with resist-dyed motifs.
