

Berhampur Patta - Odisha

V1 — Authentic Style

Universal Hard Prompt

Create an image in the **pure authentic source-truth visual logic of Berhampur Patta from Odisha**, treating it as a **pure silk handloom saree-and-joda system** built through **Phoda Kumbha temple-pattern intelligence, long-pallu ceremonial structure, reversible woven clarity, dense silk finish, and Berhampur-born loom order**.

Build the image as if it genuinely belongs inside the native Berhampur Patta woven system itself. The image must be governed first by **pure silk handloom logic, Phoda Kumbha border law, body-border-pallu hierarchy, and ceremonial saree-and-joda architecture**, not by print logic, embroidery simulation, decorative luxury styling, or generic festive silk fashion. The cloth must feel loom-built, silk-dense, structurally woven, and ceremonially dignified. Design must feel inside the silk structure, not added onto it later.

The body field must remain readable as a woven silk zone with its own identity. The border must act as a structural carrier, not decorative trim only. The long pallu must feel like an integrated intensified ceremonial zone, not an unrelated ornate insert. Temple-pattern intelligence must feel woven and structural rather than graphic or printed. If fish, tortoise, or other supporting motifs appear, they must remain subordinate to the larger Phoda Kumbha silk architecture.

Color must behave as vibrant ceremonial silk richness, not cinematic grading, luxury-ad gloss, or fashion-editorial mood. The saree should preserve a sense of reversible woven integrity and deep silk finish. If the textile is shown draped, hanging, folded, worn, or paired as joda, the structural order must remain readable under movement. If figures or broader image-world forms appear, faces, bodies, objects, and environment must still be rebuilt through Berhampur Patta-born sectional silk order rather than generic realism.

Do not make this generic Odisha silk, printed temple-border saree, decorative luxury silk cloth, boutique festive saree mood, generic handloom richness without Berhampur specificity, or realism with Berhampur-style border added later. The final result must feel like **the real Berhampur Patta handloom system itself made the whole image**.

Reusable Variable Template

Create **[SUBJECT / TEXTILE IMAGE / FIGURAL TEXTILE IMAGE / CEREMONIAL SILK SYSTEM]** in the **pure authentic source-truth visual logic of Berhampur Patta from Odisha.**

Style system that must remain unchanged:

- pure silk handloom identity
- Phoda Kumbha temple-pattern logic
- saree-and-joda architecture
- body-border-pallu hierarchy
- long-pallu ceremonial emphasis
- reversible woven clarity
- dense silk finish
- whole-frame Berhampur Patta consistency

Translate the image like this:

- **[MAIN FIELD / MAIN FORM / MAIN FIGURE IF PRESENT]** becomes a Berhampur Patta-built presence governed by ceremonial silk sectional order
- **[BODY FIELD]** remains structurally woven and readable
- **[BORDER FIELD]** acts as an integrated Phoda Kumbha structural carrier, not trim
- **[PALLU / ANCHAL / EMPHASIS ZONE]** becomes a connected intensified silk zone
- **[MOTIFS / TEMPLE FORMS / SUPPORTING SYMBOLS]** remain woven and structural, not printed or illustrated
- **[DRAPE / HANG / BASE SILK BODY]** preserves silk movement without destroying hierarchy
- **[IF FIGURES OR OBJECTS APPEAR]** faces, bodies, posture, grouping, silhouette, object logic, and environment logic must all be reorganized through Berhampur Patta order, not realism

Keep:

- silk handloom identity
- Phoda Kumbha law
- body-border-pallu relation
- long-pallu hierarchy
- reversible woven feel
- ceremonial dignity
- whole-frame consistency

Avoid:

- generic Odisha silk mood
- printed temple-border logic
- decorative luxury silk styling
- embroidery-like surface effect
- pallu as unrelated panel
- border doing all the work while the body stays generic
- realism with Berhampur Patta accents added later

The final result must feel like a true Berhampur Patta ceremonial silk system, not a modern silk image wearing Berhampur cues.

Image-to-Image

Convert this source image into the **pure authentic source-truth visual logic of Berhampur Patta from Odisha**.

Preserve the source image's **subject count, core action, main relationships, and readability**, but rebuild the full image through Berhampur Patta grammar. Replace generic silk styling with pure silk handloom structure. Replace decorative surface treatment with body-border-pallu hierarchy. Replace generic temple ornament with Phoda Kumbha woven logic. Replace luxury gloss with dense ceremonial silk finish and reversible woven authority.

If the image includes drape or wearable cloth, keep the sectional order readable under movement. If figures or objects appear, they must also be reorganized through Berhampur Patta's internal silk architecture rather than remain generic under styled fabric.

Do not simply add temple-like borders or ornate silk richness to the source image. Do not keep realism underneath. Do not let the pallu behave like a separate decorative insert. The final result must feel as if the original image has been fully reauthored inside the true source-truth Berhampur Patta woven system.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in the **creative artisan translation of Berhampur Patta from Odisha**, preserving the same deep source grammar as the authentic source-truth version, but translating it into a **richer, more imaginative, more dimensional 2D + 3D hybrid visual system**.

Keep the core Berhampur Patta grammar fully unchanged: pure silk handloom identity, Phoda Kumbha temple-pattern intelligence, saree-and-joda architecture, long-pallu ceremonial emphasis, reversible woven clarity, dense silk finish, and Berhampur-born compositional DNA. Do not turn this into generic silk fashion render, textile sample mockup, surface texture exercise, embossing effect, luxury cloth realism, or realism with Berhampur Patta surface styling.

Translate that same grammar into a more alive and dimensional visual language. The image must no longer behave only as literal ceremonial silk description, but it must also not

become full realistic scene-world depth. It should become a **creative hybrid style-image** where Berhampur Patta's own internal sectional order generates richer form, stronger visual invention, and more dimensional presence.

The transformation must affect the whole frame. If figures appear, faces, bodies, silhouettes, posture, grouping, and figure relations must all be rebuilt through Berhampur Patta's silk-sectional intelligence. If objects appear, they must be shaped through Phoda Kumbha law, long-pallu hierarchy, and ceremonial silk architecture. If environment appears, it must grow from Berhampur Patta's internal structure rather than remain generic. The textile architecture must become a larger organizing intelligence, not just fabric decoration.

Dimensionality must come from Berhampur Patta itself: from temple-border law, body-border-pallu hierarchy, long-pallu order, reversible woven clarity, dense silk contrast, and ceremonial loom structure. Do not solve dimensionality through generic rendering habits, normal anatomy, realistic silk-world lighting, or a generic environment with Berhampur cloth added on top.

Do not create:

textile mockup, craft simulation, embossing, relief effect, luxury silk ad-image, generic dimensional cloth render, or a generic dimensional image decorated later by Berhampur Patta.

The final result must feel like **the same Berhampur Patta grammar has entered a richer, more imaginative, more dimensional artisan translation without losing itself.**

Reusable Variable Template

Create **[SUBJECT / IMAGE / FIGURAL SYSTEM / CEREMONIAL SILK WORLD]** in the **creative artisan translation of Berhampur Patta from Odisha.**

Keep unchanged:

- pure silk handloom identity
- Phoda Kumbha temple-pattern law
- saree-and-joda architecture
- body-border-pallu hierarchy
- long-pallu ceremonial emphasis
- reversible woven clarity
- dense silk finish
- Berhampur Patta compositional DNA
- whole-frame style consistency

Translate it into a richer dimensional hybrid visual system like this:

- **[MAIN FORM / MAIN FIGURE / MAIN GROUP / MAIN FIELD]** becomes a Berhampur Patta-built presence with more dimensional life, but still controlled by ceremonial silk sectional order
- **[SECONDARY FORMS / SUPPORT FIELDS]** also transform through the same Berhampur Patta grammar rather than generic styling
- **[BODY / BORDER / PALLU / EMPHASIS ZONES]** become more spatially alive and structurally expressive while remaining woven-order based
- **[TEMPLE FORMS / SUPPORTING MOTIFS]** become more visually alive but stay loom-built, not illustrated or printed
- **[IF FIGURES APPEAR]** faces, bodies, posture, grouping, silhouette, object logic, and environment logic must all be rebuilt through Berhampur Patta organization
- **[IF ENVIRONMENT APPEARS]** it must grow from Berhampur Patta field separation, ceremonial dignity, and sectional order rather than realism

Increase:

- dimensional presence
- visual richness
- artisan-like reinterpretation
- hybrid 2D + 3D form
- structural clarity
- whole-frame transformation
- imaginative spatial layering

Do not use:

- textile sample mockup logic
- surface-texture-only translation
- embossing or relief tricks
- generic silk rendering
- realistic anatomy with styled cloth
- generic environment with Berhampur overlay
- only clothing or border carrying the style

Success condition:

the result feels like the same Berhampur Patta style has been artistically translated into a richer dimensional hybrid system.

Failure condition:

the result feels like a generic dimensional image decorated later by Berhampur Patta.

Image-to-Image

Convert this source image into the **creative artisan translation of Berhampur Patta from Odisha**.

Preserve the source image's core subject logic, action logic, grouping logic, and readability, but rebuild the full image through Berhampur Patta's internal grammar translated into a richer, more dimensional 2D + 3D hybrid visual system.

Replace generic textile behavior with body-border-pallu intelligence. Replace ordinary organization with ceremonial field hierarchy. Replace decorative silk richness with woven structural brilliance. Replace generic temple-border styling with Phoda Kumbha woven law. If figures are present, transform faces, bodies, silhouettes, posture, grouping, object logic, and surrounding structure through Berhampur Patta silk architecture, not realism. If objects or environment are present, they must also be rebuilt through Berhampur Patta's internal order instead of remaining generic.

Let the image gain more dimensional life, richer structural form, more imaginative layering, and stronger whole-frame coherence. But do not turn it into a silk fashion render, embossed textile object, or realism with Berhampur border added afterward.

Do not style only the textile surface. Do not leave the rest of the frame generic. The final result must feel like **the source image has been fully reauthored through a creative artisan translation of Berhampur Patta.**

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in the **fully resolved believable real-world 3D translation of Berhampur Patta from Odisha**, preserving the same authentic source grammar but pushing it into its **most complete, most embodied, most scene-capable volumetric world.**

Keep the same deep Berhampur Patta visual intelligence fully unchanged: pure silk handloom identity, Phoda Kumbha temple-pattern logic, saree-and-joda architecture, long-pallu ceremonial emphasis, reversible woven clarity, dense silk finish, and Berhampur-born compositional logic. Do not turn this into generic ethnic fashion realism, printed silk styling, decorative luxury mood, or cinematic scene illustration with Berhampur cloth added on top.

Now convert that same grammar into a believable volumetric world. The result must have believable volume, believable woven silk material behavior, believable light on cloth and structure, believable spatial separation, believable object presence, and believable three-dimensional world logic. But every visible part of the image must still be generated by Berhampur Patta grammar.

If figures are present, they must be rebuilt through Berhampur Patta-born structure, not normal anatomy wearing Berhampur cloth. If objects appear, they must be shaped through Phoda Kumbha law and ceremonial silk order. If environment appears, it must be generated by saree-and-joda architecture, long-pallu hierarchy, reversible woven intelligence, and

handloom-born organization. The world must not become ordinary reality with a Berhampur Patta saree inserted into it.

Depth must now become full scene-world depth, but it must remain style-controlled. The source grammar must still govern figure design, shape logic, composition logic, material identity, environment logic, and total scene organization.

Do not let realism replace the style. Do not let the style survive only in border, pallu, costume, or props. Do not create a premium cinematic makeover stronger than the source grammar. The final image must feel like **Berhampur Patta itself has become a believable full world.**

Reusable Variable Template

Create **[SUBJECT / SCENE / FIGURAL WORLD / EXPANDED BERHAMPUR PATT A WORLD]** in the **fully resolved believable real-world 3D translation of Berhampur Patta from Odisha.**

Keep unchanged:

- pure silk handloom identity
- Phoda Kumbha temple-pattern logic
- saree-and-joda architecture
- body-border-pallu hierarchy
- long-pallu ceremonial emphasis
- reversible woven clarity
- dense silk finish
- Berhampur Patta compositional DNA
- whole-frame style consistency

Translate it into full world-depth like this:

- **[MAIN FORM / MAIN FIGURE / MAIN GROUP / MAIN FIELD]** becomes a fully embodied Berhampur Patta-built presence with believable woven silk material behavior and ceremonial sectional order
- **[SECONDARY FORMS / SUPPORT FIELDS]** also remain under the same Berhampur Patta-born logic
- **[BODY / BORDER / PALLU / EMPHASIS ZONES / TEMPLE FORMS]** become volumetric world-organizing elements still governed by loom-born structure
- **[SURROUNDING WORLD / ENVIRONMENT / SPATIAL FIELD]** becomes a believable scene-world generated by Berhampur Patta sectional intelligence rather than generic realism
- **[IF FIGURES ARE PRESENT]** faces, bodies, posture, grouping, silhouette, object logic, and environment logic must all remain Berhampur Patta-born, not realism-first

Increase:

- volumetric world-building
- woven silk material-light interaction
- spatial separation
- scene completeness
- object presence
- environmental orchestration
- full-frame readability

Do not lose:

- Phoda Kumbha law
- body-border-pallu structure
- long-pallu hierarchy
- reversible woven integrity
- ceremonial silk order
- Berhampur world organization
- whole-frame Berhampur Patta identity

Do not use:

- realistic ethnic fashion scene
- generic cinematic illustration
- style-as-border only
- style-as-pallu only
- style-as-textile only
- premium finish overpowering source grammar
- reality with Berhampur Patta flavor added later

Success condition:

the result feels like Berhampur Patta itself has become a believable full world.

Failure condition:

the result feels like reality has been coated with Berhampur Patta.

Image-to-Image

Convert this source image into the **fully resolved believable real-world 3D translation of Berhampur Patta from Odisha**.

Preserve the source image's main subject logic, action logic, relationship logic, and readability, but rebuild the entire image through Berhampur Patta's source grammar translated into **full world-depth**.

Replace generic forms with Berhampur Patta-built volumetric presences. Replace ordinary surfaces with ceremonial woven silk construction. Replace generic decorative order with Phoda Kumbha law and body-border-pallu intelligence. Replace fashion-driven silk richness

with structural ceremonial brilliance. Replace generic environment space with a believable scene-world shaped by Berhampur Patta field intelligence. If figures are present, transform faces, bodies, posture, grouping, silhouette, object logic, and environment logic through Berhampur Patta grammar, not realism.

Allow the result to gain complete volumetric embodiment, stronger woven silk material-light interaction, spatial separation, object presence, scene completion, and environmental orchestration. But do not let the image become generic reality with Berhampur Patta added later. The whole world must remain Berhampur Patta-born.

Do not stylize only the fabric, border, or pallu while leaving the rest of the world generic. Do not make it an ethnic fashion scene. Do not let the source grammar weaken as depth increases. The final result must feel like **the source image has been fully reauthored as a believable volumetric world generated by Berhampur Patta itself.**
