

Buddhist mask and wood object - Sikkim

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of Buddhist mask and wood object systems from Sikkim.

Treat this as a real Sikkim Buddhist carved-object and ritual-mask system, not as generic Himalayan wood décor, not as fantasy mask art, not as a decorative dragon-carving style, and not as a realistic world with a few local carved objects added later.

Build the entire image as if it comes from true Sikkim mask-and-wood-object intelligence:
carved timber body,
chisel-defined contour,
assembled object construction,
painted or polished finish over carved form,
ritual/persona face logic,
Chaam-related ceremonial force,
object families such as wooden masks, altars, lamp stands, carved tables, decorative screens, and lucky signs,
and symbolic forms such as dragons, birds, phoenix, guardian-like faces, and
Vajrayana-linked object motifs.

The style must control the whole frame:
face construction,
eye logic,
mouth logic,
carved planes,
edge behavior,
paint-over-form hierarchy,
object mass,
ritual posture,
shrine placement,
support structures,
background structure,
and same-language world control.

If figures appear, do not build them as normal realistic humans first.
Build them as carved-object-born or ritual-persona-born presences:
role-bearing,
object-aware,
non-photoreal in logic,
and shaped by Sikkim carved ritual-object grammar rather than by realism-first anatomy.

Do not treat the branch like generic Buddhist wood craft.
Do not turn it into fantasy creature design.
Do not reduce it to decorative carving.
Do not let paint override carved form.
Do not let generic realism sit underneath the style.

The world must still feel like Sikkim Buddhist mask and wood object systems:
carved object-body truth,
ritual/persona force,
symbol-bearing timber construction,
painted or polished over carved form,
and shrine/ceremonial object-world identity.

Preserve true branch identity:
object-first,
carving-first,
ritual-mask-first,
symbolic-object-world-first,
paint-over-form hierarchy,
and same-language world logic.

Do not make it:
generic Himalayan carving,
fantasy demon-mask art,
tourist souvenir woodcraft,
generic dragon décor,
painted face without carved-body logic,
or realism with one local carved object used as flavor.

The final image must feel like the original Sikkim Buddhist mask-and-wood-object system itself made this image.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in the pure authentic source-truth visual logic of Buddhist mask and wood object systems from Sikkim.

Treat the style as a carved ritual-object system built from:
timber object-body construction,
chisel-defined contour,
assembled carved form,
painted or polished finish over carved form,
ritual/persona face logic,
symbolic dragon/bird/phoenix/lucky-sign object language,

and shrine/ceremonial placement intelligence.

Core style system to preserve:

carved object-body identity,
ritual/persona face logic,
tool-made construction truth,
Vajrayana symbolic object-world,
paint-over-form hierarchy,
shrine/ceremonial placement logic,
Sikkim-rooted named-branch intelligence,
whole-frame consistency.

Translate the image like this:

[MAIN FORMS / FIGURES / OBJECTS] must become carved-object-born, ritual-role-aware, and symbolically structured rather than generic realism

[FACES if present] must become role-bearing, carved, non-photoreal, and structurally clear

[BODIES / GESTURE / POSTURE if present] must obey carved-object logic, ritual role clarity, and ceremonial presence

[PROPS / OBJECTS] must feel like altars, masks, carved stands, screens, tables, lucky signs, or related object-world forms built from the same grammar

[GROUND / SURFACES] must become shrine/object space, not generic room fill

[ENVIRONMENT / BACKGROUND] must also inherit the same carved ritual-object language

Keep:

carved object-body truth,
ritual/persona force,
symbolic object-world clarity,
tool-made structure,
paint-over-form hierarchy,
shrine/ceremonial placement,
same-language world control.

Avoid:

generic Buddhist wood décor,
fantasy mask art,
generic Himalayan carving,
realistic furniture with local motifs,
painted faces without carved structure,
or one carved object inside an unstylized world.

The final result must feel like true Sikkim Buddhist mask-and-wood-object logic itself generated the whole image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of Buddhist mask and wood object systems from Sikkim.

Preserve the source image's subject count, main action, pose relationships, and basic readability,
but rebuild the entire image through real Sikkim carved ritual-object intelligence.

Replace normal realism with:
carved timber object-body construction,
chisel-defined contour,
assembled object logic,
painted or polished finish over carved form,
ritual/persona face logic,
symbol-bearing dragon/bird/phoenix/lucky-sign object language,
and shrine/ceremonial placement truth.

Do not merely add a carved mask.
Do not merely add wood texture.
Do not merely paint a fierce face.
Do not keep realistic environment logic while only one prop changes.

Rebuild:
faces as carved ritual faces,
objects as carved ritual objects,
support structures as object-born structures,
space as shrine/object space,
and the whole frame as one Sikkim mask-and-wood-object-authored visual language.

The final result must feel like the source image has been completely re-authored by authentic Sikkim Buddhist carved-object logic, not decorated with it.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Buddhist mask and wood object systems from Sikkim.

Preserve the same deep source grammar of the style:
carved timber body,
chisel-defined contour,
assembled object construction,
painted or polished finish over carved form,
ritual/persona face logic,
Chaam-related ceremonial force,
object families such as masks, altars, lamp stands, screens, carved tables, and lucky signs,

and symbolic dragon/bird/phoenix/Vajrayana object language.

Now translate that same grammar into believable handcrafted dimensional presence.

This must not become generic realism.

This must not become premium Himalayan carved décor.

This must not become a realistic room with a few local carved props added later.

Dimensionality must come from the style itself:

through carved planes,

object thickness,

relief depth,

cut edge hierarchy,

paint-over-form structure,

role-bearing facial construction,

timber mass,

and shrine/ceremonial object presence.

Allow:

moderate volume,

clearer carved objecthood,

tactile timber presence,

stronger carved relief,

more believable ritual-mask structure,

handcrafted structural thickness,

and stronger relation between carved-object world and surrounding space.

Figures or wider image-world elements, if present, must remain style-born:

not realism-first,

not fantasy-first,

not normal people near ritual props.

They must inherit carved-object logic, role-face logic, and same-language ceremonial world construction.

Do not let color fake the translation.

Do not let the environment stay generic while only one object gains style.

Do not let fantasy creature design replace ritual object truth.

Do not let realism replace carving DNA.

The whole image must feel like Sikkim Buddhist mask and wood object systems have entered handcrafted dimensional space without losing themselves.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V2 = authentic handcrafted dimensional translation of Buddhist mask and wood object systems from Sikkim.

Preserve the unchanged deep source core:

carved object-body identity,
ritual/persona face logic,
tool-made construction truth,
assembled timber structure,
paint-over-form hierarchy,
symbolic dragon/bird/phoenix/lucky-sign object language,
and shrine/ceremonial placement logic.

Translate the image into handcrafted dimensional form by increasing:

volume,
object mass,
relief depth,
timber tactility,
cut-edge clarity,
painted-over-carved readability,
figure-ground separation,
and same-language spatial structure.

Build the image like this:

[MAIN FORMS / OBJECTS] become handcrafted dimensional presences still governed by carved-object logic and ritual role clarity
[FACES if present] remain role-bearing, carved, and non-photoreal, never realism-first
[BODIES / GESTURE / POSTURE if present] gain dimensional body but still read as style-born through ritual-object logic
[PROPS / SUPPORTING OBJECTS] gain structure and tactility through carved shrine/object-world construction, not generic realism
[GROUND / SURFACES] become object-space or shrine-space, not generic room fill
[ENVIRONMENT / BACKGROUND] gains same-language carved ceremonial structure, not generic cinematic or décor realism

Keep:

carved object-body truth,
ritual/persona force,
tool-made structure,
paint-over-form hierarchy,
symbolic object-world clarity,
shrine/ceremonial placement,
same-language world control.

Avoid:

generic realism,
premium décor styling,
fantasy mask art,
generic Himalayan carving,
painted face without carved form,
or one carved object inside an unstylized world.

The final image must feel like authentic Sikkim Buddhist mask-and-wood-object grammar translated into handcrafted dimensional presence.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of Buddhist mask and wood object systems from Sikkim.

Keep the source image's subject count, core action, and readability, but rebuild the entire image through Sikkim carved ritual-object grammar translated into handcrafted dimensional form.

The image must no longer behave like generic realism.

Replace that with:

carved timber object-body construction,
chisel-defined contour,
assembled ritual-object logic,
painted or polished finish over carved form,
role-bearing face structure,
symbolic object-world language,
and shrine/ceremonial placement truth.

Add:

moderate dimensional presence,
tactile carved objecthood,
clear relief and cut-edge readability,
strong timber mass,
and handcrafted spatial logic.

But do not let dimensionality come from generic realistic room rendering or premium carved décor polish.

Do not keep normal environment or people while only one carved object becomes local.

Rebuild all visible elements so they feel born from Sikkim mask-and-wood-object logic.

The result must feel like the source image has entered the branch's handcrafted dimensional world, not that a local carved prop has been placed into an ordinary scene.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of the same source grammar of Buddhist mask and wood object systems from Sikkim.

Keep the authentic Sikkim carved ritual-object style system unchanged and push it into its most complete, most embodied, most scene-capable, most volumetric image-world.

This is maximum world-depth, not realism replacement.

Preserve the same unchanged deep Sikkim core:

carved timber body,
chisel-defined contour,
assembled object construction,
painted or polished finish over carved form,
ritual/persona face logic,
Chaam-related ceremonial force,
symbolic dragon/bird/phoenix/lucky-sign object language,
shrine/ceremonial placement logic,
and same-language carved-object world construction.

Important:

do not create generic room realism,
do not create normal furniture with a few local carvings,
do not create generic humans,
do not create generic ceremonial scenery,
do not create a normal world with ritual masks or carved props added later.

The entire world must be rebuilt through Sikkim carved ritual-object logic.

Every visible category must become source-born:

faces if present,
bodies if present,
hands if present,
objects,
altars,
supports,
screens,
tables,
lamp stands,
ground,
walls,
architectural structures,
foreground, midground, background,
negative space,
and spatial rhythm.

Believable real-world 3D here means:

believable volume,
believable material behavior,
believable light on carved form,
believable spatial separation,

believable object presence,
believable scene-world logic.

But the style must still control:
face design,
shape logic,
object logic,
composition logic,
symbolic logic,
material identity,
environment logic,
and scene organization.

Increase:
full same-style world embodiment,
full spatial completion,
full object presence,
full environmental completion,
strong figure-ground separation through carved-object logic,
strong readability through carved-object logic,
strong whole-frame coherence through carved-object logic.

Absolute rule:
the Sikkim carved ritual-object system must not decorate the world.
the Sikkim carved ritual-object system must generate the world.

The environment must not be generic realism with local carved props later.
The objects must not be normal furniture with a few motifs.
The faces must not be normal humans with mask accents.
Everything must feel reconstructed by the Sikkim carved ritual-object system itself.

Do not introduce:
generic realism,
generic interior styling,
premium décor polish,
fantasy mask spectacle,
paint-only identity without carved form,
or a second visual language stronger than the source grammar.

The final image must feel like:
the same Sikkim mask-and-wood-object style itself has become a fully embodied complete
volumetric scene-world.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] in V3 = fully resolved believable real-world 3D translation of the same source grammar of Buddhist mask and wood object systems from Sikkim.

Keep the authentic Sikkim carved ritual-object style system unchanged and push it into maximum world-depth.

Preserve the same unchanged deep core:

carved object-body identity,
ritual/persona face logic,
tool-made construction truth,
assembled timber structure,
paint-over-form hierarchy,
symbolic dragon/bird/phoenix/lucky-sign object language,
and shrine/ceremonial placement logic.

Important:

the whole world must be rebuilt through Sikkim carved ritual-object logic.

Do not keep normal realism and then add branch flavor later.

Build the image like this:

[MAIN FORMS / OBJECTS] must become source-born carved ritual objects, not normal objects with local motifs

[FACES if present] must become role-bearing carved faces, not default human realism

[BODIES if present] must become ritual-object-born presences, not generic people

[FURNITURE / SUPPORT OBJECTS] must become Sikkim-carved-object constructions, not generic décor

[GROUND / SURFACES] must become shrine/object space, not generic room fill

[ENVIRONMENT / BACKGROUND] must become same-language carved ceremonial world-space, not generic realism

Believable real-world 3D here means:

believable volume,
believable material behavior,
believable light on carved form,
believable spatial separation,
believable object presence,
believable scene-world coherence.

Increase:

full world embodiment,
full spatial completion,
full object presence,
full environmental completion,
strong figure-ground separation,
strong scene readability,
strong whole-frame orchestration.

Keep unchanged:
carved object-body truth,
ritual/persona force,
tool-made structure,
paint-over-form hierarchy,
symbolic object-world clarity,
shrine/ceremonial placement,
same-language world control.

Avoid:
generic realism,
generic Himalayan décor,
premium carved styling,
fantasy mask art,
normal people with local props,
style only in dragons or paint,
or any second visual language overpowering the source grammar.

The final image must feel like:
the same Sikkim carved ritual-object grammar itself has become a believable volumetric scene-world.

Image-to-Image

Convert this source image into V3 = fully resolved believable real-world 3D translation of the same source grammar of Buddhist mask and wood object systems from Sikkim.

Preserve the source image's subject count, core action, scene purpose, and main relationships,
but rebuild every visible element through Sikkim carved ritual-object intelligence fully embodied as reality.

Keep the authentic branch unchanged and push it into maximum world-depth.

Replace ordinary realism with:
carved timber object-body construction,
chisel-defined contour,
assembled shrine/ceremonial object logic,
painted or polished finish over carved form,
ritual/persona face structure,
symbolic object-world language,
and same-language carved ceremonial world construction.

Do not keep a normal room and add a local mask later.
Do not keep normal furniture and add carved motifs later.
Do not keep generic people and add ritual props later.

Do not let the style survive only in one carved object.

Rebuild:

faces as carved ritual faces,
objects as carved ritual objects,
surfaces as object-born surfaces,
space as shrine/ceremonial object-space,
environment as same-language carved world-space,
and the whole frame as one uninterrupted Sikkim mask-and-wood-object scene-world.

Expand the source into:

full volumetric embodiment,
full object presence,
full environmental completion,
coherent material-light behavior,
clear spatial separation,
and complete scene readability,
but only through Sikkim carved ritual-object grammar.

Absolute rule:

the Sikkim carved ritual-object system must generate the world, not decorate the world.

The final result must feel like:

the same Sikkim mask-and-wood-object style itself has become a believable fully embodied volumetric scene-world.

If it feels like reality coated with local carved ritual flavor, it has failed.
