

Durrie - Punjab

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of Punjab Durrie flatweaving.

Treat this as a real flatwoven spread system, not as generic rug decor, not as luxury carpet styling, not as home-interior product design, not as soft coverlet cloth, and not as a realistic room scene with one local rug added later.

Build the entire image as if it comes from true Punjab Durrie intelligence:

flatwoven spread identity,
punja-beaten weft compression,
dense reversible woven body,
cotton and wool handloom structure,
strong stripe, band, geometric, or symbolic field order,
crisp field organization,
durable household and ritual use,
and spread-based textile presence.

The style must control the whole frame:

surface density,
field order,
spread logic,
edge behavior,
band and stripe rhythm,
material firmness,
object placement,
zone divisions,
household and ritual adjacency,
and same-language woven structure.

If figures appear, do not build them as normal realistic people first.

Build them as presences that belong to the same flatwoven world:

field-aware,
spread-aware,
compressed-surface-aware,
non-photoreal in logic,
and shaped by woven order rather than by realism-first anatomy.

Do not treat the surface like embroidery.

Do not make it plush like carpet pile.
Do not soften it into Khes-like coverlet behavior.
Do not reduce it to generic geometric rug styling.
Do not make it a décor-first object.

The spread must still feel like Durrie:
flat,
dense,
structurally held,
durable,
reversible in body logic,
meant for floor, bed, sitting, bridal, or ritual placement,
and rooted in Punjab weaving culture.

Preserve true Durrie identity:
flatwoven-first,
compression-first,
spread-first,
field-order-first,
durable textile body,
and Punjab-rooted domestic and ritual use.

Do not make it:
generic rug styling,
luxury carpet,
soft blanket behavior,
embroidered surface behavior,
base-cloth simplicity,
boutique interior decor,
or realism with one local woven spread used as decoration.

The final image must feel like the source Punjab Durrie tradition itself made this image.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in the pure authentic source-truth visual logic of Punjab Durrie flatweaving.

Treat the style as a flatwoven spread system built from:
punja-beaten weft compression,
dense reversible woven body,
cotton/wool handloom structure,
strong stripe, band, geometric, or symbolic field order,
durable household and ritual use,
and spread-based textile presence.

Core style system to preserve:
flatwoven spread identity,
compressed dense surface,
field-order-first logic,
durable woven body,
reversible spread mentality,
household and ritual placement memory,
Punjab-rooted same-language textile intelligence,
whole-frame consistency.

Translate the image like this:
[MAIN FORMS / FIGURES / OBJECTS] must become field-aware, spread-aware,
compressed-surface-driven rather than generic realism
[FACES if present] must become simplified, woven-compatible, non-photoreal, and
structurally clear
[BODIES / DRAPERY if present] must obey flatwoven spread logic, stripe/band/zone order,
and durable textile placement
[PROPS / OBJECTS] must feel structured, bounded, spread-adjacent, and
woven-order-driven
[ENVIRONMENT / BACKGROUND] must also inherit flat field divisions, compressed surface
logic, and spread-based placement order

Keep:
flatwoven identity,
punja-compressed density,
durable woven body,
field structure,
spread presence,
household and ritual dignity.

Avoid:
generic rug decor,
luxury carpet language,
Khes-like softness,
Khaddar-like plain cloth behavior,
Phulkari-like embroidery,
generic ethnic geometry,
or one local spread inside an unstylized world.

The final result must feel like true Punjab Durrie itself generated the whole image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of Punjab Durrie flatweaving.

Preserve the source image's subject count, main action, pose relationships, and basic readability,
but rebuild the entire image through real Durrie flatwoven spread intelligence.

Replace normal realism with:
flatwoven spread identity,
punja-beaten compression,
dense reversible woven surface,
cotton/wool handloom body,
strong field order through stripes, bands, geometry, or symbolic units,
and durable household/ritual textile presence.

Do not merely place a local rug into the image.
Do not merely add geometric pattern.
Do not turn the result into generic décor styling.
Do not keep realistic environment logic while only one spread changes.

Rebuild:
surface order through compressed flatweave logic,
forms through spread-body structure,
zones through woven field rhythm,
and the whole frame as one Durrie-authored visual language.

The final result must feel like the source image has been completely re-authored by authentic Punjab Durrie, not decorated with it.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Punjab Durrie flatweaving.

Preserve the same deep source grammar of the style:
flatwoven spread identity,
punja-beaten weft compression,
dense reversible woven body,
cotton/wool handloom structure,
strong stripe, band, geometric, or symbolic field order,
durable household and ritual use,
and spread-based textile presence.

Now translate that same grammar into believable handcrafted dimensional form.

This must not become generic rug realism.
This must not become luxury carpet styling.
This must not become a realistic room with a local woven spread added later.

Dimensionality must come from the style itself:
through compressed woven body,
surface density over form,
field order over mass,
spread thickness,
edge and zone articulation,
stripe and band structure,
durable textile pressure,
and flatwoven material firmness.

Allow:
moderate volume,
clearer spread objecthood,
tactile woven material presence,
stronger edge and border readability,
more believable compressed surface behavior,
handcrafted structural depth,
and stronger relation between spread and surrounding world.

Figures or wider image-world elements, if present, must remain style-born:
not realism-first,
not decor-first,
not generic humans standing near a local rug.
They must inherit flatwoven order, compressed surface logic, spread placement, and
same-language textile intelligence.

Do not turn the branch into plush carpet behavior.
Do not soften it into Khes-like cloth.
Do not let it drift into Khaddar plainness.
Do not let the environment stay generic while only one spread gains style.

The whole image must feel like Durrie has entered handcrafted dimensional space without
losing itself.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V2 = authentic handcrafted dimensional
translation of Punjab Durrie flatweaving.

Preserve the unchanged deep source core:
flatwoven spread identity,
punja-compressed dense surface,

reversible woven body,
cotton/wool handloom structure,
field-order-first logic,
durable household/ritual spread presence,
and same-language woven intelligence.

Translate the image into handcrafted dimensional form by increasing:
volume,
spread objecthood,
surface density clarity,
edge articulation,
zone separation,
material tactility,
spread placement presence,
and flatwoven spatial structure.

Build the image like this:

[MAIN FORMS / OBJECTS] become handcrafted dimensional presences still governed by flatwoven spread logic and compressed field order

[FACES if present] remain simplified, woven-compatible, and non-photoreal, never realism-first

[BODIES / DRAPERY if present] gain dimensional body but still read as style-born through Durrie spread logic and structured field order

[PROPS / SUPPORTING OBJECTS] gain structure and tactility through spread adjacency and woven boundary logic, not generic realism

[ENVIRONMENT / BACKGROUND] gains textile-authored spread structure, not generic interior or cinematic realism

Keep:

flatwoven identity,
punja-compressed density,
durable woven body,
field organization,
spread placement logic,
household and ritual dignity,
whole-frame consistency.

Avoid:

generic rug realism,
luxury carpet softness,
premium interior styling,
Khes-like coverlet softness,
Khaddar-like plain cloth drift,
Phulkari-like embroidery drift,
or one local spread inside an unstylized world.

The final image must feel like authentic Punjab Durrie translated into handcrafted dimensional presence.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of Punjab Durrie flatweaving.

Keep the source image's subject count, core action, and readability, but rebuild the entire image through Durrie flatwoven grammar translated into handcrafted dimensional form.

The image must no longer behave like generic rug realism.

Replace that with:

flatwoven spread identity,
punja-held compressed surface,
dense reversible woven body,
cotton/wool handloom memory,
field structure through stripes, bands, geometry, or symbolic units,
and durable household/ritual textile presence.

Add:

moderate dimensional presence,
tactile spread objecthood,
clear edge and zone readability,
strong surface density,
and handcrafted space logic.

But do not let dimensionality come from generic rug rendering.

Do not keep normal interiors or bodies while only one spread becomes local.

Do not build a normal room or ritual space and then add Durrie afterward.

Rebuild all visible elements so they feel born from Punjab Durrie flatwoven logic.

The result must feel like the source image has entered Durrie's handcrafted dimensional world, not that a local spread has been placed into an ordinary scene.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of the same source grammar of Punjab Durrie flatweaving.

Keep the authentic Durrie style system unchanged and push it into its most complete, most embodied, most scene-capable, most volumetric image-world.

This is maximum world-depth, not realism replacement.

Preserve the same unchanged deep Durrie core:
flatwoven spread identity,
punja-beaten weft compression,
dense reversible woven body,
cotton and wool handloom structure,
strong stripe, band, geometric, and symbolic field order,
durable household and ritual spread logic,
and same-language spread-world construction.

Important:
do not create normal humans,
do not create normal architecture,
do not create normal ground,
do not create normal interior realism,
do not create generic environment with Durrie texture or embossed motifs added later.

The entire world must be rebuilt through Durrie logic.

Every visible category must become Durrie-born:
faces,
bodies,
hands,
feet,
hair logic if present,
drapery,
props,
ground,
spread surfaces,
objects,
architecture,
background structures,
foreground, midground, and background space,
negative space,
and empty spatial rhythm.

Believable real-world 3D here means:
believable volume,
believable material behavior,
believable light on form,
believable spatial separation,
believable object presence,
believable scene-world logic.

But the style must still control:
figure design,
shape logic,

field order,
ornament logic,
composition logic,
symbolic logic,
material identity,
environment logic,
and scene organization.

Increase:
full same-style world embodiment,
full spatial completion,
full object presence,
full environmental completion,
strong figure-ground separation through Durrie logic,
strong readability through Durrie logic,
strong whole-frame coherence through Durrie logic.

Absolute rule:
Durrie must not decorate the world.
Durrie must generate the world.

The figures must not be real humans with Durrie styling.
The environment must not be normal realism with woven textures.
The ground must not be generic floor realism.
The architecture must not be generic scenic realism.
Everything must feel reconstructed by the flatwoven Durrie system itself.

Do not introduce:
generic realism,
generic cinematic illustration,
luxury interior styling,
premium décor polish,
normal anatomy under local motifs,
realistic room logic with local rug flavor,
or a second visual language stronger than the source grammar.

The final image must feel like:
the same Punjab Durrie style itself has become a fully embodied complete volumetric scene-world.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] in V3 = fully resolved believable real-world 3D translation of the same source grammar of Punjab Durrie flatweaving.

Keep the authentic Durrie style system unchanged and push it into maximum world-depth.

Preserve the same unchanged deep Durrie core:

flatwoven spread identity,
punja-beaten weft compression,
dense reversible woven body,
cotton and wool handloom structure,
strong stripe, band, geometric, and symbolic field order,
durable household and ritual spread logic,
and same-language spread-world construction.

Important:

the whole world must be rebuilt through Durrie logic.

Do not keep normal realism and then add style flavor later.

Build the image like this:

[MAIN FIGURES] must become Durrie-born figures, not normal humans

[FACES] must become source-born, woven-compatible, non-photoreal in logic

[BODIES / DRAPERY] must become flatwoven-spread-aware, field-ordered, and style-born

[PROPS / OBJECTS] must become Durrie-constructed, not normal objects with local pattern

[GROUND / FLOOR / SURFACES] must become Durrie-born spread logic, not generic flooring

[ARCHITECTURE / STRUCTURES] must become source-born, not realistic walls with embossed motifs

[ENVIRONMENT / BACKGROUND] must become same-language Durrie world-space, not generic realism

Believable real-world 3D here means:

believable volume,
believable material behavior,
believable light on form,
believable spatial separation,
believable object presence,
believable scene-world coherence.

Increase:

full world embodiment,
full spatial completion,
full object presence,
full environmental completion,
strong figure-ground separation,
strong scene readability,
strong whole-frame orchestration.

Keep unchanged:

flatwoven spread identity,
punja-compressed density,
reversible woven body logic,

field-order-first organization,
durable household and ritual presence,
same-language world control.

Avoid:

generic realism,
generic cinematic illustration,
luxury décor styling,
interior-design polish,
real humans with Durrie accents,
normal environment with Durrie textures,
style only in stripes or motifs,
or any second visual language overpowering the source grammar.

The final image must feel like:

the same Durrie grammar itself has become a believable volumetric scene-world.

Image-to-Image

Convert this source image into V3 = fully resolved believable real-world 3D translation of the same source grammar of Punjab Durrie flatweaving.

Preserve the source image's subject count, core action, scene purpose, and main relationships,
but rebuild every visible element through Durrie flatwoven spread intelligence fully embodied as reality.

Keep the authentic Durrie system unchanged and push it into maximum world-depth.

Replace ordinary realism with:

flatwoven spread identity,
punja-beaten compressed surface logic,
dense reversible woven body,
cotton and wool handloom structure,
strong stripe, band, geometric, and symbolic field organization,
durable household and ritual spread presence,
and same-language woven world construction.

Do not keep normal humans and add Durrie styling later.

Do not keep normal room or landscape logic and add local woven textures later.

Do not emboss Durrie motifs onto generic walls.

Do not use generic flooring with local rug flavor.

Do not let the style survive only as surface pattern.

Rebuild:

faces as Durrie-born,

bodies as Durrie-born,
objects as Durrie-born,
ground as Durrie-born,
architecture as Durrie-born,
environment as Durrie-born,
and the whole frame as one uninterrupted same-language flatwoven scene-world.

Expand the source into:
full volumetric embodiment,
full object presence,
full environmental completion,
coherent material-light behavior,
clear spatial separation,
and complete scene readability,
but only through Durrie grammar.

Absolute rule:
Durrie must generate the world, not decorate the world.

The final result must feel like:
the same Punjab Durrie style itself has become a believable fully embodied volumetric scene-world.
If it feels like reality coated with Durrie flavor, it has failed.
