

Himalayan sacred-image, thangka-related logic -Sikkim

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of Himalayan sacred-image, thangka-related painting from Sikkim.

Treat this as a real sacred-image system, not as generic Buddhist décor, not as mystical fantasy art, not as poster-like deity illustration, and not as a realistic world with Buddhist motifs added later.

Build the entire image as if it comes from true Sikkim sacred-image intelligence:

iconographic proportion discipline,
deity-centered hierarchy,
symbolic placement,
sacred compositional order,
prepared cotton-or-silk scroll support,
mineral/vegetable/gold color logic,
brocade-scroll object completion,
devotional and meditative image status,
and same-language extension into shrine, mural, wood, and architecture.

The style must control the whole frame:

face logic,
body logic,
gesture logic,
posture logic,
halo logic,
throne and support logic,
ornament logic,
symbolic object logic,
ground logic,
architectural logic,
spatial layering,
negative space,
and sacred-image hierarchy.

If figures appear, do not build them as normal realistic people first.

Build them as source-born sacred presences:

iconographic,
hieratic,

non-photoreal in logic,
doctrinally ordered,
and shaped by sacred-image grammar rather than by realism-first anatomy.

Do not treat the branch like generic Tibetan art.
Do not reduce it to mandala décor.
Do not turn it into fantasy mysticism.
Do not make it a beautiful painting without sacred order.
Do not let generic realism sit underneath the style.

The image must still feel like a Sikkim sacred image:
reverential,
ordered,
devotional,
symbolically charged,
scroll-born,
and capable of shrine-world extension.

Preserve true branch identity:
sacred-image-first,
iconographic-grid-first,
deity-hierarchy-first,
symbolic-color-first,
consecrated-object-first,
same-language world logic.

Do not make it:
generic Buddhist art,
mandala wallpaper,
mystical mountain fantasy,
poster deity illustration,
realistic humans with sacred accessories,
or realism with Buddhist symbols added later.

The final image must feel like the original Sikkim sacred-image system itself made this image.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in the pure authentic source-truth visual logic of Himalayan sacred-image, thangka-related painting from Sikkim.

Treat the style as a sacred-image system built from:
iconographic proportion discipline,
deity-centered hierarchy,
symbolic placement,

sacred compositional order,
prepared scroll support,
mineral/vegetable/gold color logic,
brocade-object completion,
and devotional image status.

Core style system to preserve:
sacred-image identity,
iconographic face and body grammar,
symbolic hierarchy,
ritual object logic,
same-language shrine-world intelligence,
whole-frame consistency.

Translate the image like this:

[MAIN FIGURES] must become sacred-image-born presences, not normal people

[FACES] must become iconographic, hieratic, and non-photoreal in logic

[BODIES / GESTURE / POSTURE] must obey doctrinal order and sacred-image construction

[PROPS / OBJECTS] must become symbolic, ritual, and source-born rather than generic realism

[GROUND / SURFACES] must become sacred-image space, not generic environment fill

[ARCHITECTURE / STRUCTURES] must become shrine-world compatible, not normal realism

[ENVIRONMENT / BACKGROUND] must also inherit the same sacred-image language

Keep:

sacred hierarchy,
iconographic proportion,
symbolic color/material order,
consecrated scroll-object logic,
same-language shrine-world extension.

Avoid:

generic Buddhist décor,
mandala wallpaper,
fantasy mysticism,
poster illustration,
real humans with sacred motifs,
or one sacred icon inside an unstylized world.

The final result must feel like true Sikkim sacred-image logic itself generated the whole image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of Himalayan sacred-image, thangka-related painting from Sikkim.

Preserve the source image's subject count, main action, pose relationships, and basic readability,
but rebuild the entire image through real Sikkim sacred-image intelligence.

Replace normal realism with:
iconographic proportion discipline,
deity-centered hierarchy,
symbolic placement,
sacred compositional order,
prepared scroll-surface logic,
mineral/vegetable/gold image logic,
and devotional object-world presence.

Do not merely add halos, lotuses, or Buddhist motifs.
Do not merely turn the image into a decorative scroll.
Do not keep realistic environment logic while only the central figure changes.

Rebuild:
faces as sacred-image faces,
bodies as sacred-image bodies,
objects as symbolic sacred objects,
ground as sacred image-space,
architecture as shrine-world structure,
and the whole frame as one Sikkim sacred-image-authored visual language.

The final result must feel like the source image has been completely re-authored by authentic Sikkim sacred-image logic, not decorated with it.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Himalayan sacred-image, thangka-related painting from Sikkim.

Preserve the same deep source grammar of the style:
iconographic proportion discipline,
deity-centered hierarchy,
symbolic placement,

sacred compositional order,
prepared cotton-or-silk scroll support,
mineral/vegetable/gold color logic,
brocade-object completion,
and devotional sacred-image status.

Now translate that same grammar into believable handcrafted dimensional presence.

This must not become generic realism.

This must not become cinematic fantasy spirituality.

This must not become realistic humans or architecture with thangka motifs added later.

Dimensionality must come from the style itself:

through source-born body construction,
source-born halo and aureole structure,
source-born throne/support structure,
source-born layered sacred space,
source-born material-light behavior,
source-born symbolic object presence,
and source-born shrine-world logic.

Allow:

moderate volume,
clearer sacred objecthood,
tactile material presence,
stronger spatial layering,
more believable figure-ground separation,
handcrafted structural depth,
and stronger shrine-world embodiment.

Figures or wider image-world elements, if present, must remain style-born:

not realism-first,

not fantasy-first,

not normal humans inside a sacred setting.

They must inherit sacred-image form logic, symbolic order, and same-language world construction.

Do not let shading replace sacred form-language.

Do not let architecture become normal realism.

Do not let environment remain generic while only the central icon gains style.

The whole image must feel like the Sikkim sacred-image system has entered handcrafted dimensional space without losing itself.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V2 = authentic handcrafted dimensional translation of Himalayan sacred-image, thangka-related painting from Sikkim.

Preserve the unchanged deep source core:

iconographic proportion discipline,
deity hierarchy,
symbolic placement,
sacred compositional order,
scroll-object logic,
mineral/vegetable/gold color intelligence,
and same-language shrine-world construction.

Translate the image into handcrafted dimensional form by increasing:

volume,
sacred objecthood,
material tactility,
spatial layering,
figure-ground separation,
symbolic object presence,
and shrine-world embodiment.

Build the image like this:

[MAIN FIGURES] become handcrafted dimensional presences still governed by sacred-image grammar

[FACES] remain iconographic, hieratic, and non-photoreal, never realism-first

[BODIES / GESTURE / POSTURE] gain dimensional body but still read as source-born through sacred proportion logic

[PROPS / SUPPORTING OBJECTS] gain structure and tactility through ritual/symbolic logic, not generic realism

[GROUND / SURFACES] gain sacred-image spatial structure, not generic environment fill

[ARCHITECTURE / BACKGROUND] gains shrine-world depth, not cinematic realism

Keep:

sacred-image identity,
iconographic order,
symbolic color/material logic,
consecrated-object feeling,
same-language shrine-world intelligence,
whole-frame consistency.

Avoid:

generic realism,
mystical fantasy art,
poster deity illustration,
real humans with Buddhist motifs,
generic temple environment,
or one sacred icon inside an unstylized world.

The final image must feel like authentic Sikkim sacred-image grammar translated into handcrafted dimensional presence.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of Himalayan sacred-image, thangka-related painting from Sikkim.

Keep the source image's subject count, core action, and readability, but rebuild the entire image through Sikkim sacred-image grammar translated into handcrafted dimensional form.

The image must no longer behave like generic realism.

Replace that with:

iconographic proportion discipline,
deity-centered hierarchy,
symbolic placement,
sacred compositional order,
source-born figure logic,
source-born object logic,
source-born shrine-world space,
and devotional image-object presence.

Add:

moderate dimensional presence,
tactile sacred objecthood,
clear layered sacred space,
stronger figure-ground separation,
and handcrafted spatial logic.

But do not let dimensionality come from generic shading habits or realism.

Do not keep normal people, normal architecture, or normal landscape while only the sacred motifs become local.

Rebuild all visible elements so they feel born from Sikkim sacred-image logic.

The result must feel like the source image has entered the sacred-image system's handcrafted dimensional world, not that sacred motifs have been placed into an ordinary scene.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of the same source grammar of Himalayan sacred-image, thangka-related painting from Sikkim.

Keep the authentic Sikkim sacred-image style system unchanged and push it into its most complete, most embodied, most scene-capable, most volumetric image-world.

This is maximum world-depth, not realism replacement.

Preserve the same unchanged deep sacred-image core:

iconographic proportion discipline,
deity-centered hierarchy,
symbolic placement,
sacred compositional order,
prepared cotton-or-silk scroll/surface logic,
mineral/vegetable/gold color intelligence,
brocade-object memory,
devotional and meditative image status,
and same-language extension into shrine, mural, wood, and architecture.

Important:

do not create normal humans,
do not create normal landscape realism,
do not create normal architecture,
do not create generic mystical atmosphere,
do not create generic environment with Buddhist motifs added later.

The entire world must be rebuilt through Sikkim sacred-image logic.

Every visible category must become source-born:

faces,
bodies,
hands,
feet,
hair logic if present,
gesture,
posture,
drapery,
ritual objects,
ground,
architecture,
shrine elements,
foreground, midground, background,
negative space,
and spatial rhythm.

Believable real-world 3D here means:

believable volume,
believable material behavior,

believable light on form,
believable spatial separation,
believable object presence,
believable scene-world logic.

But the style must still control:
figure design,
shape logic,
composition logic,
symbolic logic,
material identity,
environment logic,
and scene organization.

Increase:
full same-style world embodiment,
full spatial completion,
full object presence,
full environmental completion,
strong figure-ground separation through sacred-image logic,
strong readability through sacred-image logic,
strong whole-frame coherence through sacred-image logic.

Absolute rule:
the sacred-image system must not decorate the world.
the sacred-image system must generate the world.

The figures must not be real humans with sacred accessories.
The environment must not be generic realism with thangka motifs later.
The architecture must not be normal realism with Buddhist ornament panels.
Everything must feel reconstructed by the Sikkim sacred-image system itself.

Do not introduce:
generic realism,
generic cinematic illustration,
fantasy mysticism,
premium spiritual polish,
normal anatomy under sacred costume,
realistic environment with symbolic overlays,
or a second visual language stronger than the source grammar.

The final image must feel like:
the same Sikkim sacred-image style itself has become a fully embodied complete volumetric scene-world.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] in V3 = fully resolved believable real-world 3D translation of the same source grammar of Himalayan sacred-image, thangka-related painting from Sikkim.

Keep the authentic Sikkim sacred-image style system unchanged and push it into maximum world-depth.

Preserve the same unchanged deep sacred-image core:

iconographic proportion discipline,
deity hierarchy,
symbolic placement,
sacred compositional order,
scroll-object logic,
mineral/vegetable/gold color intelligence,
consecrated image status,
and same-language shrine-world construction.

Important:

the whole world must be rebuilt through Sikkim sacred-image logic.

Do not keep normal realism and then add sacred flavor later.

Build the image like this:

[MAIN FIGURES] must become source-born sacred-image figures, not normal humans

[FACES] must become iconographic, hieratic, and non-photoreal in logic

[BODIES / GESTURE / POSTURE] must become sacred-image-born and doctrinally structured

[PROPS / OBJECTS] must become source-born ritual/symbolic objects, not normal objects with sacred motifs

[GROUND / SURFACES] must become sacred-image space, not generic environment fill

[ARCHITECTURE / STRUCTURES] must become source-born shrine-world construction, not normal realism

[ENVIRONMENT / BACKGROUND] must become same-language sacred world-space, not generic cinematic or fantasy space

Believable real-world 3D here means:

believable volume,
believable material behavior,
believable light on form,
believable spatial separation,
believable object presence,
believable scene-world coherence.

Increase:

full world embodiment,
full spatial completion,

full object presence,
full environmental completion,
strong figure-ground separation,
strong scene readability,
strong whole-frame orchestration.

Keep unchanged:
sacred-image identity,
iconographic order,
symbolic color/material logic,
consecrated-object logic,
same-language shrine-world control.

Avoid:
generic realism,
fantasy mysticism,
poster deity art,
real humans with sacred motifs,
normal temple environment with thangka panels,
style only in halos or gold,
or any second visual language overpowering the source grammar.

The final image must feel like:
the same Sikkim sacred-image grammar itself has become a believable volumetric scene-world.

Image-to-Image

Convert this source image into V3 = fully resolved believable real-world 3D translation of the same source grammar of Himalayan sacred-image, thangka-related painting from Sikkim.

Preserve the source image's subject count, core action, scene purpose, and main relationships,
but rebuild every visible element through Sikkim sacred-image intelligence fully embodied as reality.

Keep the authentic sacred-image system unchanged and push it into maximum world-depth.

Replace ordinary realism with:
iconographic proportion discipline,
deity-centered hierarchy,
symbolic placement,
sacred compositional order,
source-born figure logic,
source-born object logic,
source-born shrine-world environment logic,
mineral/vegetable/gold image intelligence,

and consecrated image-object presence.

Do not keep normal humans and add sacred styling later.

Do not keep normal architecture and add thangka ornament later.

Do not keep generic landscapes and add Buddhist symbols later.

Do not let the style survive only as halos, lotuses, or gold accents.

Rebuild:

faces as sacred-image-born,

bodies as sacred-image-born,

objects as sacred-image-born,

ground as sacred-image-born,

architecture as sacred-image-born,

environment as sacred-image-born,

and the whole frame as one uninterrupted same-language sacred scene-world.

Expand the source into:

full volumetric embodiment,

full object presence,

full environmental completion,

coherent material-light behavior,

clear spatial separation,

and complete scene readability,

but only through Sikkim sacred-image grammar.

Absolute rule:

the sacred-image system must generate the world, not decorate the world.

The final result must feel like:

the same Sikkim sacred-image style itself has become a believable fully embodied volumetric scene-world.

If it feels like reality coated with Buddhist sacred flavor, it has failed.
