

Kathputli - Rajasthan

V1 — Authentic Style

Universal Hard Prompt

Attachments needed: none.

Create an image in pure authentic source-truth Kathputli from Rajasthan.

Treat this as a true Rajasthani string-puppet performance system, not as a doll, not as a figurine, not as a toy, not as decorative souvenir craft, and not as a realistic human character in folk costume.

Build the image from the true grammar of Kathputli:

puppet-head identity,
painted theatrical face coding,
suspended object-body logic,
costume-built silhouette,
stage-readable role clarity,
bold festive color,
string-governed performance memory,
and a fully unified puppet-world.

The figure must feel like it genuinely belongs inside the original Kathputli performance tradition.

Keep the whole frame inside one puppet-performance visual language.

The characters themselves must be source-born:

carved puppet-head presence,
painted eyes and facial coding for stage readability,
stylized puppet face rather than realistic human face,
hung or suspended body logic,
costume-led silhouette,
theatrical role-type clarity,
performable gesture,
lively puppet-stage energy.

Body logic must remain source-faithful:

do not build a realistic human body,
do not correct anatomy,
do not make the figure stand like a normal person,
do not treat costume as clothing on a natural body.

The body must feel puppet-built, string-governed, suspended, and stage-made.

Environment and supporting elements must also be source-born:

props, stage cues, related puppet presences, background framing, and surrounding objects must all feel like they belong to a puppet-performance world rather than neutral realism.

Use bold, festive, high-contrast color for distance readability and character recognition.

Use clear silhouette.

Use puppet-stage presence rather than psychological realism.

Do not add:

generic doll craft,

collectible figurine logic,

soft toy logic,

western marionette design,

realistic human anatomy,

fashion-costume realism,

decorative ethnic puppet styling without performance memory,

or cinematic theatrical realism.

The final image must feel like a true Kathputli performance-object world from Rajasthan at source-truth level, not a modern image wearing puppet decoration.

Reusable Variable Template

Attachments needed: none.

Create [SUBJECT / CHARACTER / PERFORMANCE IMAGE] using the authentic source-truth grammar of Kathputli from Rajasthan.

Core style system to preserve:

puppet-head identity,

painted theatrical face coding,

suspended object-body logic,

costume-built silhouette,

stage-readable role-type clarity,

bold festive color,

performable gesture,

whole-frame puppet-world consistency.

Translate the image like this:

[MAIN FIGURE / MAIN CHARACTER] becomes a true Kathputli puppet presence with a carved puppet-head identity, painted stage-readable face, suspended puppet-body logic, and costume-led silhouette.

[SECONDARY FIGURES / SUPPORTING CHARACTERS / OBJECTS] become supporting puppet-world presences obeying the same performance grammar.

[ENVIRONMENT / STAGE / BACKGROUND / PROPS] becomes a puppet-performance space rather than neutral realism.

Keep:

puppet-head first,
painted face as identity sign,
suspended object-body construction,
costume silhouette,
stage readability,
performable energy.

Avoid:

generic doll styling,
realistic human bodies,
figurine craft logic,
toy-like softness,
ethnic costume realism,
static decorative puppet display,
or a realistic world around one puppet-like figure.

The final image must feel like the Kathputli tradition itself authored the full puppet-performance world.

Image-to-Image

Attachments needed: none.

Convert this source image into an authentic source-truth Kathputli world from Rajasthan.

Preserve the source image's core subject count, main action or character relation, and overall readability, but rebuild the entire image through true Kathputli grammar.

Replace ordinary image logic with:

puppet-head identity,
painted theatrical facial coding,
suspended object-body logic,
costume-built silhouette,
stage-readable role clarity,
bold festive color,
and a fully unified puppet-performance world.

Do not simply add puppet costume styling.

Do not merely paint the face.

Do not turn the source into a decorative hanging doll.

If the source contains figures, rebuild them as Kathputli-born puppet presences:

carved puppet heads,
painted stage-readable faces,
hung or string-governed body logic,
costume-led silhouette,
performable gesture,
theatrical role identity.

If the source contains props, stage elements, background, or supporting forms, translate them into the same puppet-world logic.

Do not leave the environment as generic realism.

Do not make the result look like a souvenir object photo.

The final image must feel like a genuine Kathputli performance world from Rajasthan, not a modern image decorated in puppet style.

V2 — Artisan Translation

Universal Hard Prompt

Attachments needed: none.

Create an image in V2 = authentic handcrafted dimensional translation of Kathputli from Rajasthan.

Keep the same deep style-core unchanged:

puppet-head identity,
painted theatrical face coding,
suspended object-body logic,
costume-built silhouette,
stage-readable role clarity,
bold festive color,
performable character energy,
and one unified puppet-performance world.

Now translate that same source grammar into believable handcrafted dimensional form.

This is not generic 3D.

This is not a decorative doll.

This is not a realistic figurine.

This is not a soft toy.

This is not a human actor stylized like a puppet.

The image must still feel authored by Kathputli logic first.

Allow:

stronger puppet-head object presence,
moderate body thickness where appropriate,
clearer separation between head, costume mass, and supporting elements,
tactile handcrafted material presence,
shallow but readable puppet-world spatial layering,
stronger stage-object readability,
more deployable dimensional clarity,
but only within the same puppet-performance grammar.

Keep unchanged:

puppet-head identity,
painted stage-readable face,
suspended object-body logic,
costume-built silhouette,
role-type clarity,
string-governed performance memory,
whole-frame puppet-world coherence.

Important version rule:

V2 for Kathputli must feel like a true performing puppet-object world entering handcrafted dimensional space,
not like a doll becoming more realistic.

If figures appear, they must remain Kathputli-born:

puppet heads,
painted theatrical faces,
hung or suspended body logic,
costume-driven silhouette,
performable gesture,
role-type clarity.

If props, stage elements, or environment appear, they must also remain style-born:
they must belong to one puppet-performance space rather than a realistic location.

Do not allow:

generic artisan doll-making,
figurine realism,
soft sculptural folk object logic,
realistic human anatomy,
luxury handcrafted décor bias,
western marionette drift,
or realism stronger than Kathputli puppet mechanics.

The final image must feel like the same Kathputli grammar has entered handcrafted dimensional puppet-world space without losing its performance identity.

Reusable Variable Template

Attachments needed: none.

Create [SUBJECT / CHARACTER / PERFORMANCE IMAGE] in V2 = authentic handcrafted dimensional translation of Kathputli from Rajasthan.

Preserve these unchanged style-core rules:

- puppet-head identity,
- painted theatrical face coding,
- suspended object-body logic,
- costume-built silhouette,
- stage-readable role clarity,
- bold festive color,
- performable character energy,
- whole-frame puppet-world consistency.

Translate the image like this:

[MAIN FIGURE / MAIN CHARACTER] becomes a dimensionally readable Kathputli puppet presence with stronger object presence and clear puppet-head authority.

[SECONDARY FIGURES / SUPPORTING CHARACTERS / OBJECTS] become supporting dimensional puppet-world presences still arranged by Kathputli logic.

[ENVIRONMENT / STAGE / BACKGROUND / PROPS] becomes a handcrafted puppet-performance space with shallow layering and clear stage-object relation, not neutral realism.

Increase:

- moderate thickness,
- head-object clarity,
- costume mass readability,
- puppet-world separation,
- handcrafted tactility,
- performable object presence.

Do not lose:

- painted puppet-face identity,
- suspended body logic,
- costume-led silhouette,
- stage readability,
- theatrical role-type clarity,
- full puppet-world coherence.

Avoid:

- generic 3D doll logic,
- figurine realism,
- toy softness,
- human anatomy correction,
- decorative ethnic puppet styling,

or a realistic world surrounding one puppet-like figure.

The final image must feel like the same Kathputli source grammar has become a handcrafted dimensional puppet-performance world.

Image-to-Image

Attachments needed: none.

Convert this source image into a V2 authentic handcrafted dimensional Kathputli world from Rajasthan.

Preserve the source image's main action, subject count, and readable arrangement, but rebuild the entire image through Kathputli grammar translated into handcrafted dimensional form.

Replace ordinary image logic with:
puppet-head identity,
painted theatrical face coding,
suspended object-body construction,
costume-built silhouette,
stage-readable role clarity,
and a dimensional but still style-born puppet-world.

Allow moderate thickness, shallow layering, and handcrafted puppet-object separation, but do not let the image become a realistic doll, figurine, or human character scene.

If the source contains figures, rebuild them as Kathputli-born puppet presences rather than realistic bodies.

If the source contains stage elements, props, background, or supporting forms, rebuild them inside the same puppet-performance logic.

Do not leave the environment as neutral realism.

Do not make the result look like a decorative handcrafted souvenir.

The final image must feel like a handcrafted dimensional translation of the same Kathputli grammar.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Attachments needed: none.

Create an image in V3 = fully resolved believable real-world 3D translation of Kathputli from Rajasthan while keeping the same source grammar unchanged.

This must become a fully embodied dimensional world, but it must still be ruled by Kathputli logic, not by figurine realism, not by theatrical fantasy realism, and not by realistic human-character design.

Preserve the same unchanged deep style-core:

- puppet-head identity,
- painted theatrical face coding,
- suspended object-body logic,
- costume-built silhouette,
- stage-readable role clarity,
- bold festive color,
- performable movement memory,
- and a fully unified puppet-performance world.

Now push that same grammar into its most complete dimensional embodiment.

Increase:

- full puppet-object presence,
- material clarity,
- stronger figure-ground separation,
- clearer stage/world relation,
- full puppet-world coherence,
- stronger spatial staging,
- stronger costume mass readability,
- stronger head-object authority,
- stronger full-frame orchestration,
- but without replacing Kathputli with realism logic.

Critical rule:

V3 must still feel like the same Kathputli DNA fully embodied.

It must not become a realistic human folk performer.

It must not become a cinematic puppet fantasy.

It must not become a premium collectible figurine.

It must not become a Western marionette realism style.

If figures appear, they must still remain Kathputli-born:

- puppet heads,
- painted theatrical faces,
- suspended object-body logic,
- costume-driven silhouette,
- performable gesture,
- role-type clarity.

If props, stage elements, supporting forms, or background appear, they must also remain style-born:

they must still belong to a unified puppet-performance world rather than a neutral realistic setting.

Puppet-world logic must remain stronger than realism.

Suspended object-body behavior must remain stronger than anatomy.

Costume silhouette must remain stronger than natural body modeling.

The image must not collapse into one realistic folk-theatre moment.

Supporting elements must still reinforce a performable puppet world across the whole frame.

Do not allow:

generic theatrical realism,

realistic human anatomy under puppet styling,

figurine realism,

luxury handcrafted decor-object bias,

soft doll logic,

cinematic fantasy puppet style,

or any second visual language overpowering Kathputli grammar.

The final image must feel like the same Kathputli grammar has become a fully inhabitable real-world puppet-performance reality.

Reusable Variable Template

Attachments needed: none.

Create [SUBJECT / CHARACTER / PERFORMANCE IMAGE] in V3 = fully resolved believable real-world 3D translation of Kathputli from Rajasthan.

Keep these unchanged style-core rules:

puppet-head identity,

painted theatrical face coding,

suspended object-body logic,

costume-built silhouette,

stage-readable role clarity,

bold festive color,

performable movement memory,

whole-frame puppet-world consistency.

Translate the image like this:

[MAIN FIGURE / MAIN CHARACTER] becomes a fully embodied dimensional Kathputli puppet presence with strong puppet-head authority and performable object-body logic.

[SECONDARY FIGURES / SUPPORTING CHARACTERS / OBJECTS] become equally style-born dimensional puppet presences.

[ENVIRONMENT / STAGE / BACKGROUND / PROPS] becomes a complete inhabitable Kathputli puppet-performance world, not neutral realism.

Increase:

full puppet-object embodiment,
material clarity,
figure-ground separation,
stage/world relation,
costume mass readability,
spatial staging,
full puppet-world completion,
stronger full-frame coherence.

Do not lose:

painted puppet-face identity,
suspended body logic,
costume-led silhouette,
stage readability,
role-type clarity,
performance memory,
Kathputli-world coherence.

Avoid:

realistic human design,
figurine realism,
decorative doll logic,
cinematic theatrical fantasy,
luxury handcrafted puppet decor,
neutral realistic environment,
or any realism stronger than Kathputli grammar.

The final image must feel like the same Kathputli source system has become fully embodied real-world puppet-performance reality.

Image-to-Image

Attachments needed: none.

Convert this source image into a V3 fully resolved believable real-world Kathputli world from Rajasthan.

Preserve the source image's main action, subject count, core pose logic, and readable arrangement, but rebuild all visible forms through fully embodied Kathputli grammar.

Replace ordinary realism with:

puppet-head identity,
painted theatrical face coding,
suspended object-body logic,
costume-built silhouette,

stage-readable role clarity,
performable character energy,
and full-world Kathputli coherence.

Expand the image into a complete dimensional puppet-performance world:
full puppet-object presence,
clear figure-ground separation,
material clarity,
stage/world coherence,
costume silhouette authority,
and full-frame readability.

Do not turn the image into realistic folk theatre.
Do not let it become a realistic human character in puppet costume.
Do not let the background become neutral realism.
Do not let only the face or costume carry the style.

The final image must feel like Kathputli itself has become fully embodied real-world puppet-performance reality.
