

Khaddar - Punjab

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of Khaddar cloth from Punjab.

Treat this as a real rural handloom cloth system, not as generic khadi symbolism, not as rustic textile mood, not as embroidery cloth, not as a patterned coverlet, and not as a realistic scene with one coarse fabric added later.

Build the entire image as if it comes from true Punjab Khaddar intelligence:
hand-spun and hand-woven cloth logic,
coarse practical fabric body,
visible woven grain,
material irregularity from hand process,
breathable but durable everyday cloth presence,
plain cloth honesty,
quiet domestic use-readiness,
and foundational rural textile truth.

The style must control the whole frame:
material body,
surface grain,
cloth weight,
woven irregularity,
tactile presence,
fold behavior,
drape behavior,
wearable and domestic placement,
and foundational textile identity.

If figures appear, do not build them as normal realistic people first.
Build them as presences that belong to the same Khaddar cloth world:
cloth-aware,
grain-aware,
material-first,
non-photoreal in logic,
and shaped by handloom fabric truth rather than by realism-first stylization.

Do not treat the surface like embroidered cloth.
Do not spread the design like Khes.

Do not compress it like Durrie.
Do not beautify it into generic rustic fabric styling.
Do not make it decorative before it becomes materially true.

The cloth must still feel like Khaddar:
foundational handloom fabric,
coarse and practical,
quietly dignified,
everyday-use-ready,
woven by hand,
and rooted in Punjab rural textile life.

Preserve true Khaddar identity:
cloth-first,
material-first,
handloom-first,
grain-first,
practical domestic fabric presence,
and rural weaving culture.

Do not make it:
generic khadi-national poster language,
vague rustic cotton mood,
embroidered surface behavior,
checked coverlet behavior,
flatwoven rug compression,
boutique slow-fashion fabric styling,
or realism with one rough cloth used as local decoration.

The final image must feel like the source Khaddar tradition itself made this image.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in the pure authentic source-truth visual logic of Khaddar cloth from Punjab.

Treat the style as a rural handloom cloth system built from:
hand-spun and hand-woven structure,
coarse practical fabric body,
visible woven grain,
material irregularity,
quiet domestic use-readiness,
and foundational cloth truth.

Core style system to preserve:
cloth-body identity,

material-first logic,
handloom grain,
coarse tactile presence,
practical everyday fabric behavior,
woven irregularity,
Punjab-rooted rural cloth intelligence,
whole-frame consistency.

Translate the image like this:

[MAIN FORMS / FIGURES / OBJECTS] must become material-aware, grain-aware, and cloth-body-driven rather than generic realism

[FACES if present] must become simplified, non-photoreal, structurally clear, and compatible with plain cloth truth

[BODIES / DRAPERY if present] must obey coarse fabric behavior, handloom tactility, and everyday cloth logic

[PROPS / OBJECTS] must feel grounded in woven material honesty and practical fabric adjacency

[ENVIRONMENT / BACKGROUND] must also inherit handloom grain logic, domestic textile presence, and cloth-first material truth

Keep:

cloth-body honesty,
handwoven grain,
coarse practical tactility,
quiet material dignity,
everyday domestic use logic,
foundational textile presence.

Avoid:

generic rustic fabric mood,
khadi-symbolic poster styling,
embroidered cloth behavior,
Khes-like broad patterned spread,
Durrie-like flatwoven compression,
boutique slow-fashion textile styling,
or one rough cloth inside an unstylized world.

The final result must feel like true Khaddar itself generated the whole image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of Khaddar cloth from Punjab.

Preserve the source image's subject count, main action, pose relationships, and basic readability,

but rebuild the entire image through real Khaddar handloom cloth intelligence.

Replace normal realism with:
hand-spun and hand-woven cloth logic,
coarse practical fabric body,
visible woven grain,
material irregularity,
quiet domestic fabric presence,
and rural cloth honesty.

Do not merely place rough cotton cloth into the image.
Do not merely add rustic handloom texture.
Do not turn the result into generic khadi mood.
Do not keep realistic environment logic while only one coarse textile changes.

Rebuild:
surface truth through woven grain,
forms through cloth-body logic,
folds and adjacency through practical domestic fabric behavior,
and the whole frame as one Khaddar-authored visual language.

The final result must feel like the source image has been completely re-authored by authentic Khaddar, not decorated with it.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Khaddar cloth from Punjab.

Preserve the same deep source grammar of the style:
hand-spun and hand-woven cloth logic,
coarse practical fabric body,
visible woven grain,
material irregularity from hand process,
quiet domestic use-readiness,
and foundational rural textile truth.

Now translate that same grammar into believable handcrafted dimensional form.

This must not become generic cloth realism.
This must not become boutique handloom fashion.
This must not become a realistic cotton fabric with local rustic character added later.

Dimensionality must come from the style itself:
through cloth body,
woven grain over form,
coarse tactile thickness,
fold logic,
drape logic,
hand process irregularity,
material weight,
and quiet everyday domestic fabric presence.

Allow:
moderate volume,
clearer cloth objecthood,
tactile material presence,
stronger fold and drape readability,
more believable handloom surface behavior,
handcrafted structural depth,
and stronger relation between cloth and domestic world.

Figures or wider image-world elements, if present, must remain style-born:
not realism-first,
not fashion-editorial,
not generic humans with rough local fabric.
They must inherit cloth-body logic, woven grain intelligence, plain material truth, and domestic fabric adjacency.

Do not turn the branch into embroidery behavior.
Do not let it behave like Khes patterned spread logic.
Do not let it become Durrie-like compressed flatweave.
Do not let the environment stay generic while only one cloth gains style.

The whole image must feel like Khaddar has entered handcrafted dimensional space without losing itself.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V2 = authentic handcrafted dimensional translation of Khaddar cloth from Punjab.

Preserve the unchanged deep source core:
hand-spun and hand-woven structure,
coarse practical fabric body,
visible woven grain,
material irregularity,
quiet domestic use-readiness,

and foundational rural cloth presence.

Translate the image into handcrafted dimensional form by increasing:

volume,
cloth objecthood,
fold and drape readability,
material tactility,
surface grain clarity,
fabric weight,
and cloth-body spatial presence.

Build the image like this:

[MAIN FORMS / OBJECTS] become handcrafted dimensional presences still governed by cloth-body logic and handloom grain

[FACES if present] remain simplified, material-compatible, and non-photoreal, never realism-first

[BODIES / DRAPERY if present] gain dimensional body but still read as style-born through Khaddar cloth behavior and plain fabric truth

[PROPS / SUPPORTING OBJECTS] gain structure and tactility through domestic textile relation, not generic realism

[ENVIRONMENT / BACKGROUND] gains textile-authored material structure, not generic cinematic or rustic-lifestyle realism

Keep:

cloth-body identity,
handloom grain,
coarse practical tactility,
plain material honesty,
domestic fabric dignity,
whole-frame consistency.

Avoid:

generic cloth realism,
slow-fashion styling,
premium artisanal fabric photography,
embroidered textile drift,
Khes-like patterned spread drift,
Durrie-like compression drift,
or one coarse fabric inside an unstylized world.

The final image must feel like authentic Khaddar translated into handcrafted dimensional presence.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of Khaddar cloth from Punjab.

Keep the source image's subject count, core action, and readability, but rebuild the entire image through Khaddar handloom cloth grammar translated into handcrafted dimensional form.

The image must no longer behave like generic cloth realism.

Replace that with:

hand-spun and hand-woven memory,
coarse practical fabric body,
visible woven grain,
material irregularity,
quiet domestic use presence,
and foundational rural cloth truth.

Add:

moderate dimensional presence,
tactile cloth objecthood,
clear fold and drape readability,
strong material grain,
and handcrafted space logic.

But do not let dimensionality come from generic realistic cotton rendering.
Do not keep normal interiors or bodies while only one cloth becomes local.
Do not build a normal rustic scene and then add Khaddar afterward.

Rebuild all visible elements so they feel born from Khaddar cloth logic.
The result must feel like the source image has entered Khaddar's handcrafted dimensional world, not that coarse fabric has been placed into an ordinary scene.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of the same source grammar of Khaddar cloth from Punjab.

Preserve the same unchanged deep style-core:

hand-spun and hand-woven cloth logic,
coarse practical fabric body,
visible woven grain,
material irregularity from hand process,
quiet domestic use-readiness,
and foundational rural textile truth.

Now push that same grammar into its most believable, fully embodied real-world 3D scene.

Real-world here means:

- believable volume,
- believable material behavior,
- believable cloth presence,
- believable spatial separation,
- believable scene completion,
- and believable full-frame readability.

It does NOT mean:

- generic cloth realism,
- slow-fashion styling,
- cinematic heritage makeover,
- or realism with one coarse local fabric added later.

The same style must still govern:

- material body,
- woven grain,
- surface behavior,
- fold logic,
- drape behavior,
- cloth adjacency,
- domestic placement,
- and any wider environment ordering.

Increase:

- full volumetric embodiment,
- material clarity,
- cloth presence,
- environmental completion,
- attention control,
- scene coherence,
- and whole-frame readability.

But do not introduce a second visual language.

Do not let the world become generic realism while only one cloth remains local.

Do not let the style survive only in rough texture.

Do not make V3 a prettier heritage or artisanal version.

It must remain the same Khaddar grammar, fully embodied.

The final image must feel like Khaddar itself has become a believable real-world 3D cloth-world.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V3 = fully resolved believable real-world 3D translation of the same source grammar of Khaddar cloth from Punjab.

Keep the same unchanged deep style-core:
hand-spun and hand-woven cloth logic,
coarse practical fabric body,
visible woven grain,
material irregularity,
quiet domestic use-readiness,
and foundational rural cloth dignity.

Now fully embody that style into a believable 3D world.

Increase:
full volumetric depth,
material-light interaction,
cloth presence,
environment completion,
figure-ground separation,
focal clarity,
and whole-scene coherence.

Build the image like this:

[MAIN FORMS / OBJECTS] must be fully style-born and fully embodied, never generic realism with local coarse cloth added

[FACES if present] must remain simplified, material-compatible, and non-photoreal in their logic

[BODIES / DRAPERY if present] must feel fully real in space, but still governed by Khaddar cloth-body logic and woven grain truth

[PROPS / SUPPORTING OBJECTS] must become fully present through domestic textile adjacency and material logic, not realism-first modeling

[ENVIRONMENT / BACKGROUND] must become a complete world that still behaves like Khaddar authored it

Keep unchanged:
cloth-body ontology,
handloom grain,
coarse practical tactility,
material honesty,
domestic fabric presence,
single visual language across the frame.

Avoid:
generic cinematic illustration,
premium rural textile styling,
luxury artisanal fabric realism,

embroidered textile drift,
Khes spread drift,
Durrie compression drift,
style only in roughness,
or any second visual language overpowering the source grammar.

The final image must feel like the same Khaddar system has become fully embodied reality.

Image-to-Image

Convert this source image into V3 = fully resolved believable real-world 3D translation of the same source grammar of Khaddar cloth from Punjab.

Preserve the source image's subject count, core action, scene purpose, and main relationships,
but rebuild every visible element through Khaddar handloom cloth intelligence fully embodied as reality.

Replace ordinary realism with:
hand-spun and hand-woven memory,
coarse practical fabric body,
visible woven grain,
material irregularity,
quiet domestic cloth presence,
and foundational rural textile truth.

Expand the source into:
fully embodied cloth presence,
believable material behavior,
clear spatial separation,
full environmental completion,
strong object adjacency,
and coherent real-world scene depth.

But keep the same source grammar intact.
Do not let realism replace the style.
Do not add Khaddar only as one local coarse fabric.
Do not let the background become generic realism.
Do not let V3 turn into premium artisanal or cinematic heritage cloth styling.

Rebuild the entire frame so it feels like authentic Khaddar itself has become reality.
If the result feels like reality coated with rough local cloth, it has failed.
If it feels like Khaddar embodied as a whole cloth-world, it is correct.
