

Malerkotla Zari - Punjab

V1 — Authentic Style

Universal Hard Prompt

Create an image in the pure authentic source-truth visual logic of Malerkotla Zari Works from Punjab.

Treat this as a real metallic-thread embroidered surface system, not as generic Punjabi embroidery, not as generic zardozi luxury, not as bridal glamour, not as fashion-first decoration, and not as a realistic world with metallic trim added later.

Build the entire image as if it comes from true Malerkotla Zari intelligence:
frame-mounted fabric,
traced design transfer,
zari-thread embroidery,
satin-fill and outline emphasis,
formal emblematic construction,
badge, banner, insignia, epaulette, logo, crest, trophy, or ceremonial textile logic,
metallic embroidered authority,
and institutional / ceremonial symbolic clarity.

The style must control the whole frame:
symbol construction,
surface hierarchy,
outline behavior,
fill behavior,
metallic-thread authority,
ground-fabric relation,
formal placement,
edge control,
object identity,
and ceremonial surface logic.

If figures appear, do not build them as normal realistic humans first.
Build them as presences that belong to the same Malerkotla embroidery world:
emblem-aware,
surface-authority-aware,
symbolically structured,
non-photoreal in logic,
and shaped by traced metallic embroidery order rather than by realism-first anatomy.

Do not treat the branch like Phulkari field spread.
Do not treat it like generic floral embroidery.
Do not treat it like generic royal sparkle.
Do not reduce it to one embroidered badge on a normal object.
Do not let generic realism sit underneath the style.

The world must still feel like Malerkotla Zari:
metallic-thread embroidered authority,
formal insignia precision,
ceremonial object identity,
surface-built symbolic clarity,
and Punjab-rooted named craft logic.

Preserve true Malerkotla Zari identity:
metallic-thread-first,
frame-mounted precision,
traced design clarity,
fill-and-outline discipline,
formal symbol logic,
and ceremonial / institutional object-world authority.

Do not make it:
generic Punjabi embroidery,
generic zari luxury,
fashion-only embellishment,
Phulkari-like cloth field logic,
Bagh-like dense occupation,
realistic objects with metallic trim,
or generic realism with local embroidery flavor.

The final image must feel like the source Malerkotla Zari tradition itself made this image.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in the pure authentic source-truth visual logic of Malerkotla Zari Works from Punjab.

Treat the style as a metallic-thread embroidered surface system built from:
frame-mounted fabric,
traced design transfer,
zari-thread embroidery,
satin-fill and outline emphasis,
formal emblematic construction,
ceremonial object logic,
and symbolic embroidered authority.

Core style system to preserve:
metallic-thread surface authority,
frame-mounted precision,
traced emblematic design,
fill-and-outline discipline,
formal insignia logic,
ceremonial/institutional object-world identity,
Punjab-rooted named-branch intelligence,
whole-frame consistency.

Translate the image like this:

[MAIN FORMS / FIGURES / OBJECTS] must become emblem-aware,
metallic-thread-authored, and formally structured rather than generic realism
[FACES if present] must become simplified, symbol-compatible, non-photoreal, and
structurally clear
[BODIES / DRAPERY if present] must obey formal embroidered authority, traced-surface
order, and ceremonial symbolic logic
[PROPS / OBJECTS] must feel badge-like, banner-like, insignia-like, crest-like, or
ceremonially embroidered in their construction
[ENVIRONMENT / BACKGROUND] must also inherit same-language embroidered authority,
formal placement logic, and symbolic surface structure

Keep:

metallic-thread authority,
traced design precision,
formal symbol clarity,
fill-and-outline construction,
ground-fabric hierarchy,
ceremonial dignity.

Avoid:

generic Punjabi embroidery,
generic zari glamour,
fashion-editorial sparkle,
Phulkari-like field spread,
badge pasted onto realism,
military-logo graphic design without embroidery DNA,
or one embroidered object inside an unstylized world.

The final result must feel like true Malerkotla Zari itself generated the whole image.

Image-to-Image

Convert this source image into the pure authentic source-truth visual logic of Malerkotla Zari Works from Punjab.

Preserve the source image's subject count, main action, pose relationships, and basic readability,
but rebuild the entire image through real Malerkotla metallic-thread embroidery intelligence.

Replace normal realism with:
frame-mounted fabric logic,
traced emblematic design,
zari-thread embroidered construction,
satin-fill and outline emphasis,
formal insignia precision,
ceremonial symbolic authority,
and embroidered object-world clarity.

Do not merely place a crest on a realistic surface.
Do not merely add metallic trim.
Do not turn the result into generic zari glamour.
Do not keep realistic environment logic while only one emblem area changes.

Rebuild:
symbols through embroidered authority,
forms through traced and filled surface logic,
objects through ceremonial insignia construction,
and the whole frame as one Malerkotla-authored visual language.

The final result must feel like the source image has been completely re-authored by authentic Malerkotla Zari, not decorated with it.

V2 — Artisan Translation

Universal Hard Prompt

Create an image in V2 = authentic handcrafted dimensional translation of Malerkotla Zari Works from Punjab.

Preserve the same deep source grammar of the style:
frame-mounted fabric,
traced design transfer,
zari-thread embroidery,
satin-fill and outline emphasis,
formal emblematic construction,
badge/banner/insignia/ceremonial object logic,
metallic embroidered authority,
and symbolic ceremonial clarity.

Now translate that same grammar into believable handcrafted dimensional form.

This must not become generic realism.

This must not become premium military pageantry.

This must not become realistic objects with local metallic embroidery added later.

Dimensionality must come from the style itself:

through embroidered relief,

metallic-thread hierarchy,

fill-versus-outline structure,

symbolic massing,

surface depth,

object authority,

formal edge articulation,

and embroidered material-body presence.

Allow:

moderate volume,

clearer objecthood,

tactile metallic surface presence,

stronger fill and outline readability,

more believable emblematic depth,

handcrafted structural thickness,

and stronger relation between embroidered authority and surrounding world.

Figures or wider image-world elements, if present, must remain style-born:

not realism-first,

not generic ceremonial realism,

not normal humans standing near embroidered objects.

They must inherit emblematic construction, surface authority, and same-language symbolic order.

Do not let metallic shine fake the translation.

Do not let the environment stay generic while only one insignia area gains style.

Do not let the branch become generic zardozi richness.

Do not let realism replace embroidery DNA.

The whole image must feel like Malerkotla Zari has entered handcrafted dimensional space without losing itself.

Reusable Variable Template

Create [SUBJECT / SCENE / OBJECT / WORLD] in V2 = authentic handcrafted dimensional translation of Malerkotla Zari Works from Punjab.

Preserve the unchanged deep source core:

frame-mounted fabric logic,
traced emblematic design,
zari-thread surface construction,
satin-fill and outline emphasis,
formal insignia logic,
ceremonial object-world identity,
and metallic embroidered authority.

Translate the image into handcrafted dimensional form by increasing:
volume,
symbolic mass,
surface relief,
material tactility,
outline clarity,
fill depth,
object presence,
and emblematic spatial structure.

Build the image like this:

[MAIN FORMS / OBJECTS] become handcrafted dimensional presences still governed by metallic-thread authority and formal symbol logic

[FACES if present] remain simplified, emblem-compatible, and non-photoreal, never realism-first

[BODIES / DRAPERY if present] gain dimensional body but still read as style-born through traced embroidery order and ceremonial symbolic discipline

[PROPS / SUPPORTING OBJECTS] gain structure and tactility through badge/banner/insignia logic, not generic realism

[ENVIRONMENT / BACKGROUND] gains same-language embroidered authority, not generic cinematic or ceremonial realism

Keep:

metallic-thread authority,
traced design precision,
fill-and-outline discipline,
formal symbolic clarity,
ceremonial object-world identity,
whole-frame same-language control.

Avoid:

generic realism,
generic zari glamour,
premium ceremonial polish,
Phulkari field spread,
normal objects with metallic trim,
badge graphics without embroidery DNA,
or one embroidered area inside an unstylized world.

The final image must feel like authentic Malerkotla Zari translated into handcrafted dimensional presence.

Image-to-Image

Convert this source image into V2 = authentic handcrafted dimensional translation of Malerkotla Zari Works from Punjab.

Keep the source image's subject count, core action, and readability, but rebuild the entire image through Malerkotla metallic-thread embroidery grammar translated into handcrafted dimensional form.

The image must no longer behave like generic realism.

Replace that with:

frame-mounted surface logic,
traced emblematic construction,
zari-thread fill and outline structure,
metallic embroidered authority,
formal symbolic clarity,
and ceremonial object-world precision.

Add:

moderate dimensional presence,
tactile embroidered objecthood,
clear relief and outline readability,
strong symbolic mass,
and handcrafted space logic.

But do not let dimensionality come from generic realistic rendering.

Do not keep normal environments or bodies while only one emblem becomes local.

Do not build a normal ceremonial scene and then add Malerkotla Zari afterward.

Rebuild all visible elements so they feel born from Malerkotla embroidery logic.

The result must feel like the source image has entered Malerkotla Zari's handcrafted dimensional world, not that metallic embroidery has been placed into an ordinary scene.

V3 — 3D / Realistic / Cinematic Translation

Universal Hard Prompt

Create an image in V3 = fully resolved believable real-world 3D translation of the same source grammar of Malerkotla Zari Works from Punjab.

Keep the authentic Malerkotla Zari style system unchanged and push it into its most complete, most embodied, most scene-capable, most volumetric image-world.

This is maximum world-depth, not realism replacement.

Preserve the same unchanged deep Malerkotla core:

frame-mounted fabric logic,
traced emblematic design,
zari-thread embroidery,
satin-fill and outline emphasis,
formal insignia construction,
badge, banner, epaulette, logo, crest, trophy, or ceremonial object logic,
metallic embroidered authority,
and same-language symbolic world control.

Important:

do not create normal humans,
do not create normal ceremonial space,
do not create normal architecture,
do not create normal objects with metallic trim,
do not create generic environment with zari motifs added later.

The entire world must be rebuilt through Malerkotla Zari logic.

Every visible category must become Malerkotla-born:

faces,
bodies,
hands,
feet,
hair logic if present,
drapery,
props,
ground,
objects,
architecture,
background structures,
foreground, midground, and background space,
negative space,
and empty spatial rhythm.

Believable real-world 3D here means:

believable volume,
believable material behavior,
believable light on form,
believable spatial separation,
believable object presence,
believable scene-world logic.

But the style must still control:
figure design,
shape logic,
ornament logic,
composition logic,
symbolic logic,
material identity,
environment logic,
and scene organization.

Increase:
full same-style world embodiment,
full spatial completion,
full object presence,
full environmental completion,
strong figure-ground separation through Malerkotla logic,
strong readability through Malerkotla logic,
strong whole-frame coherence through Malerkotla logic.

Absolute rule:
Malerkotla Zari must not decorate the world.
Malerkotla Zari must generate the world.

The figures must not be real humans with metallic embroidery flavor.
The environment must not be generic realism with emblematic zari added later.
The architecture must not be normal realism with embroidered panels.
Everything must feel reconstructed by the Malerkotla embroidery system itself.

Do not introduce:
generic realism,
generic cinematic illustration,
premium ceremonial pageantry,
luxury heraldic polish,
normal anatomy under local motifs,
realistic objects with metallic trim,
or a second visual language stronger than the source grammar.

The final image must feel like:
the same Malerkotla Zari style itself has become a fully embodied complete volumetric scene-world.

Reusable Variable Template

Create [SUBJECT / SCENE / WORLD] in V3 = fully resolved believable real-world 3D translation of the same source grammar of Malerkotla Zari Works from Punjab.

Keep the authentic Malerkotla Zari style system unchanged and push it into maximum world-depth.

Preserve the same unchanged deep Malerkotla core:

frame-mounted fabric logic,
traced emblematic design,
zari-thread surface construction,
satin-fill and outline emphasis,
formal insignia and ceremonial object logic,
metallic embroidered authority,
and same-language symbolic world control.

Important:

the whole world must be rebuilt through Malerkotla Zari logic.

Do not keep normal realism and then add style flavor later.

Build the image like this:

[MAIN FIGURES] must become Malerkotla-born figures, not normal humans

[FACES] must become source-born, symbol-compatible, and non-photoreal in logic

[BODIES / DRAPERY] must become formally structured, emblem-aware, and style-born

[PROPS / OBJECTS] must become Malerkotla-constructed, not normal objects with metallic decoration

[GROUND / SURFACES] must become same-language embroidered authority, not generic realism

[ARCHITECTURE / STRUCTURES] must become source-born, not normal walls with zari motifs

[ENVIRONMENT / BACKGROUND] must become same-language Malerkotla world-space, not generic cinematic space

Believable real-world 3D here means:

believable volume,
believable material behavior,
believable light on form,
believable spatial separation,
believable object presence,
believable scene-world coherence.

Increase:

full world embodiment,
full spatial completion,
full object presence,
full environmental completion,
strong figure-ground separation,
strong scene readability,
strong whole-frame orchestration.

Keep unchanged:

metallic-thread authority,

traced precision,
fill-and-outline discipline,
formal symbol clarity,
ceremonial/institutional object-world identity,
same-language world control.

Avoid:

generic realism,
generic zari glamour,
premium ceremonial polish,
real humans with metallic accents,
normal environment with embroidered symbols,
style only in shine or crests,
or any second visual language overpowering the source grammar.

The final image must feel like:

the same Malerkotla Zari grammar itself has become a believable volumetric scene-world.

Image-to-Image

Convert this source image into V3 = fully resolved believable real-world 3D translation of the same source grammar of Malerkotla Zari Works from Punjab.

Preserve the source image's subject count, core action, scene purpose, and main relationships,
but rebuild every visible element through Malerkotla metallic-thread embroidery intelligence fully embodied as reality.

Keep the authentic Malerkotla system unchanged and push it into maximum world-depth.

Replace ordinary realism with:

frame-mounted surface logic,
traced emblematic construction,
zari-thread fill and outline hierarchy,
metallic embroidered authority,
formal symbolic clarity,
ceremonial and institutional object-world precision,
and same-language embroidered world control.

Do not keep normal humans and add Malerkotla styling later.

Do not keep normal ceremonial space and add metallic emblems later.

Do not emboss zari motifs onto generic walls.

Do not use realistic objects with local embroidered trim.

Do not let the style survive only as shine or insignia.

Rebuild:

faces as Malerkotla-born,
bodies as Malerkotla-born,
objects as Malerkotla-born,
ground as Malerkotla-born,
architecture as Malerkotla-born,
environment as Malerkotla-born,
and the whole frame as one uninterrupted same-language embroidered scene-world.

Expand the source into:
full volumetric embodiment,
full object presence,
full environmental completion,
coherent material-light behavior,
clear spatial separation,
and complete scene readability,
but only through Malerkotla Zari grammar.

Absolute rule:
Malerkotla Zari must generate the world, not decorate the world.

The final result must feel like:
the same Malerkotla Zari style itself has become a believable fully embodied volumetric scene-world.
If it feels like reality coated with metallic embroidery flavor, it has failed.
